

Erik's Covid-19 Chart Pack

Data updated 2020-08-06 18:38:34. World data are from Worldometers. National and state-level mortality, case, and testing data are from Johns-Hopkins University. County and city-level mortality and case data are from the New York Times. Most data presented in this report were accessed through APIs provided by The COVID Tracking Project and NovelCOVID API.

World Data

There have been 18,965,762 confirmed Covid-19 cases and 710,287 deaths worldwide.

Deaths

Cases

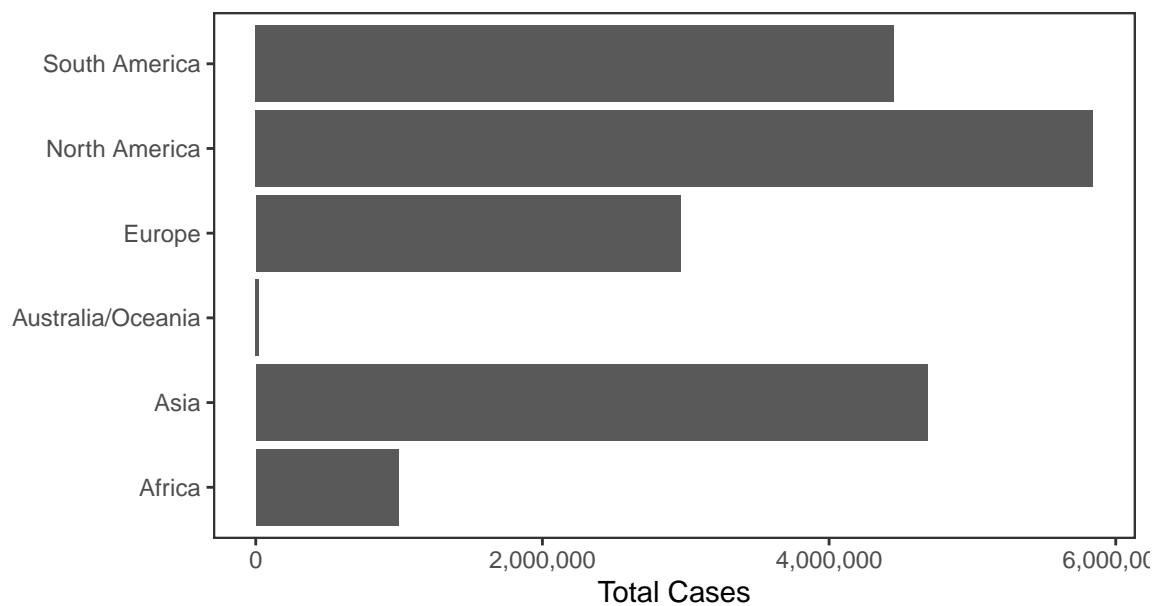

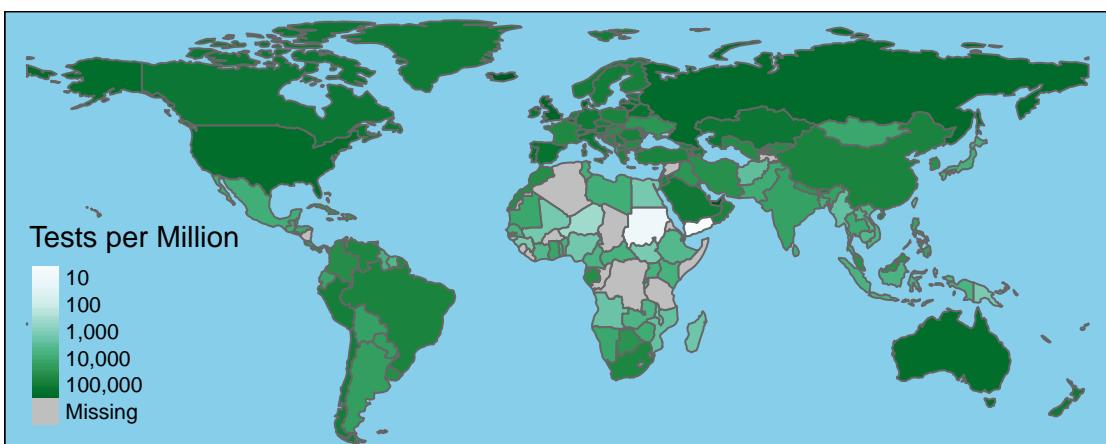

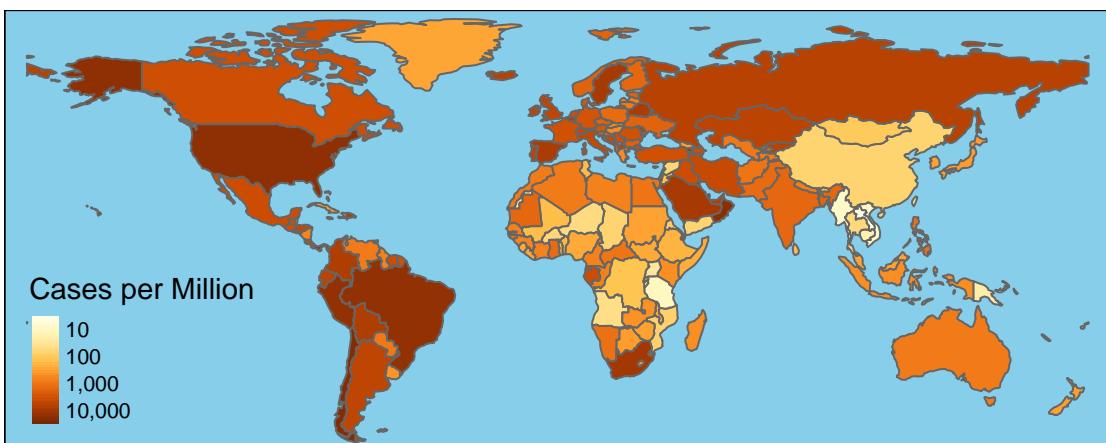

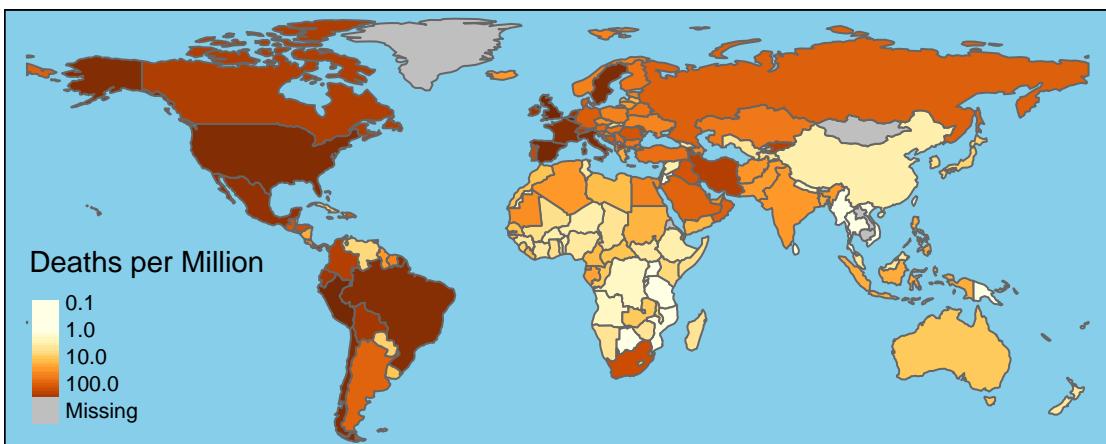

Table 1: Top Countries by Total Cases

Country	Cases	Deaths	New Cases	New Deaths
USA	4,973,568	161,601	55,148	1,311
Brazil	2,862,761	97,418	54,685	1,322
India	1,963,239	40,739	56,626	919
Russia	866,627	14,490	5,204	139
South Africa	529,877	9,298	8,559	414
Mexico	449,961	48,869	6,148	857
Peru	447,624	20,228	7,734	221
Chile	364,723	9,792	1,761	47
Spain	352,847	28,499	2,953	1
Colombia	345,714	11,624	10,735	309
Iran	317,483	17,802	2,697	185
UK	307,184	46,364	891	65
Saudi Arabia	282,824	3,020	1,389	36
Pakistan	281,136	6,014	675	15
Italy	248,803	35,181	384	10
Bangladesh	246,674	3,267	2,654	33
Turkey	236,112	5,784	1,178	19
Argentina	220,682	4,106	7,147	127
Germany	214,104	9,245	1,024	13
France	194,029	30,305	1,695	9

National Data

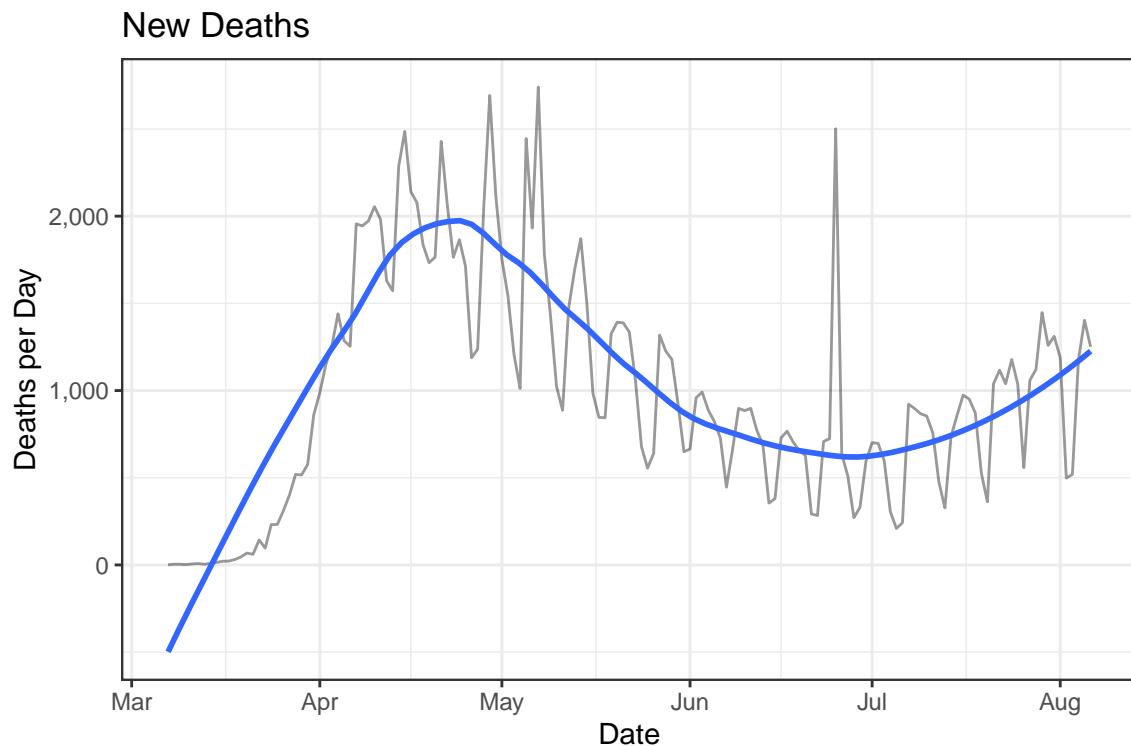

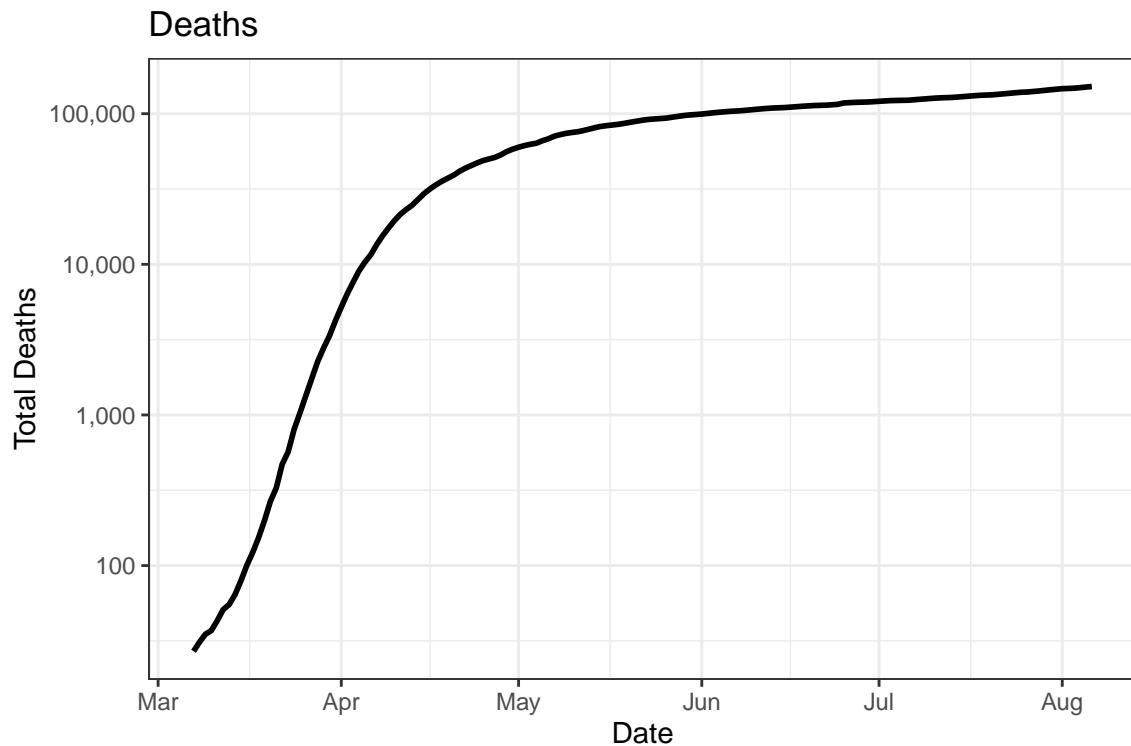

There have been 4,852,143 confirmed Covid-19 cases and 151,483 deaths in the United States.

Table 2: U.S. Deaths and Cases over the Last Two Weeks

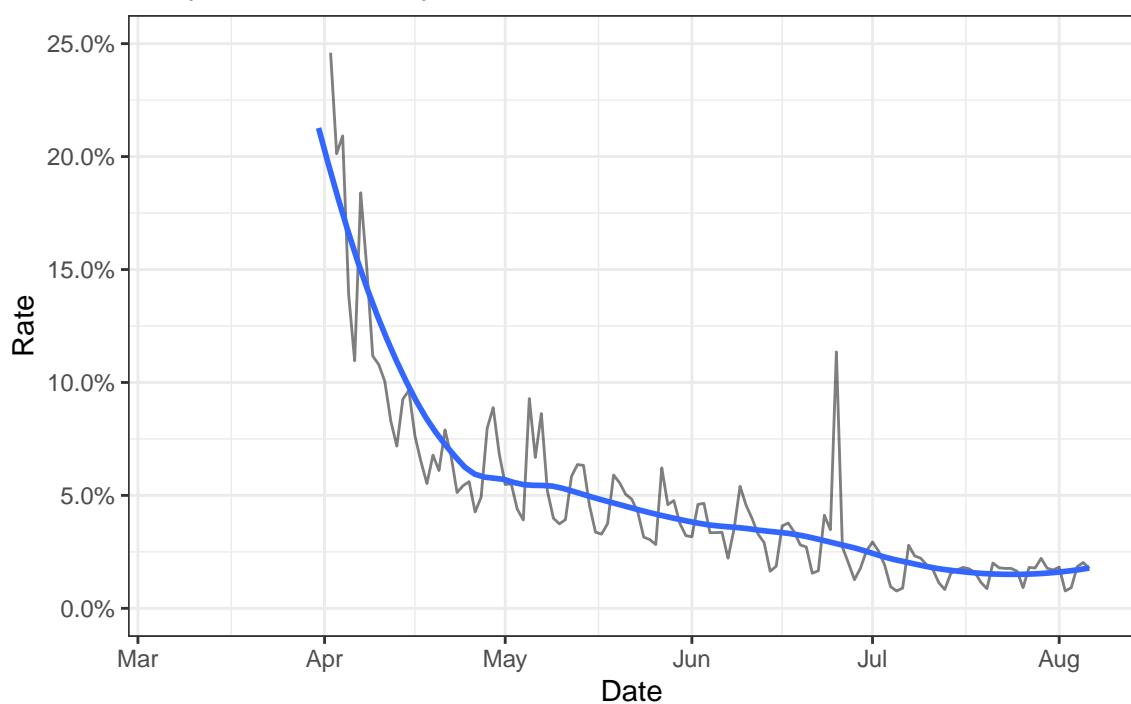

Date	Cases	Deaths	New Cases	New Deaths
2020-08-06	4,852,143	151,483	54,184	1,251
2020-08-05	4,797,959	150,232	52,265	1,403
2020-08-04	4,745,694	148,829	51,568	1,176
2020-08-03	4,694,126	147,653	49,561	519
2020-08-02	4,644,565	147,134	48,266	498
2020-08-01	4,596,299	146,636	60,692	1,189
2020-07-31	4,535,607	145,447	67,755	1,311
2020-07-30	4,467,852	144,136	69,466	1,259
2020-07-29	4,398,386	142,877	66,969	1,447
2020-07-28	4,331,417	141,430	56,229	1,121
2020-07-27	4,275,188	140,309	55,134	1,059
2020-07-26	4,220,054	139,250	61,713	558
2020-07-25	4,158,341	138,692	65,413	1,037
2020-07-24	4,092,928	137,655	75,193	1,178

Deaths

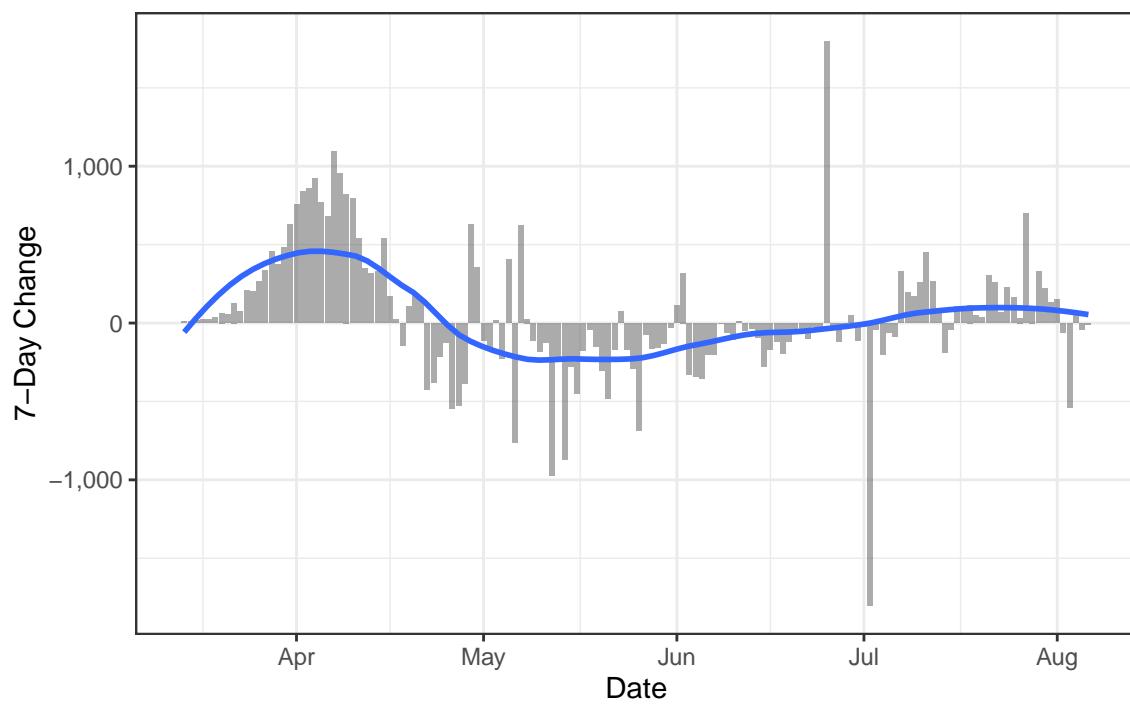

Because the effects of the virus can take several weeks to manifest in patients, deaths are a lagging indicator of contagion, but they may be a more reliable than case counts, which are a function of both the prevalence of the disease and the rate of testing. The case mortality rate is a very crude indicator of lethality because a large numbers of non-lethal cases are likely never detected. A declining case mortality rate is indicative of more widespread testing.

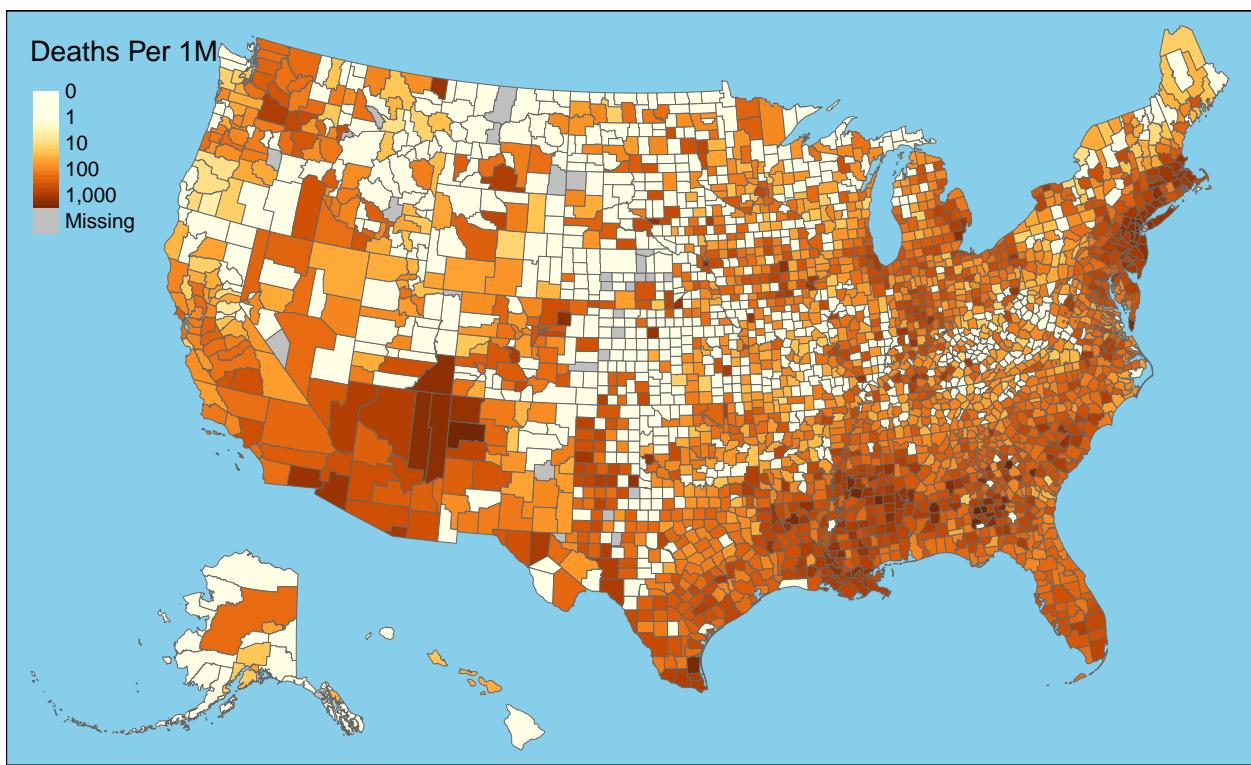

Daily Case Mortality Rate

One-Week Change in Daily Deaths

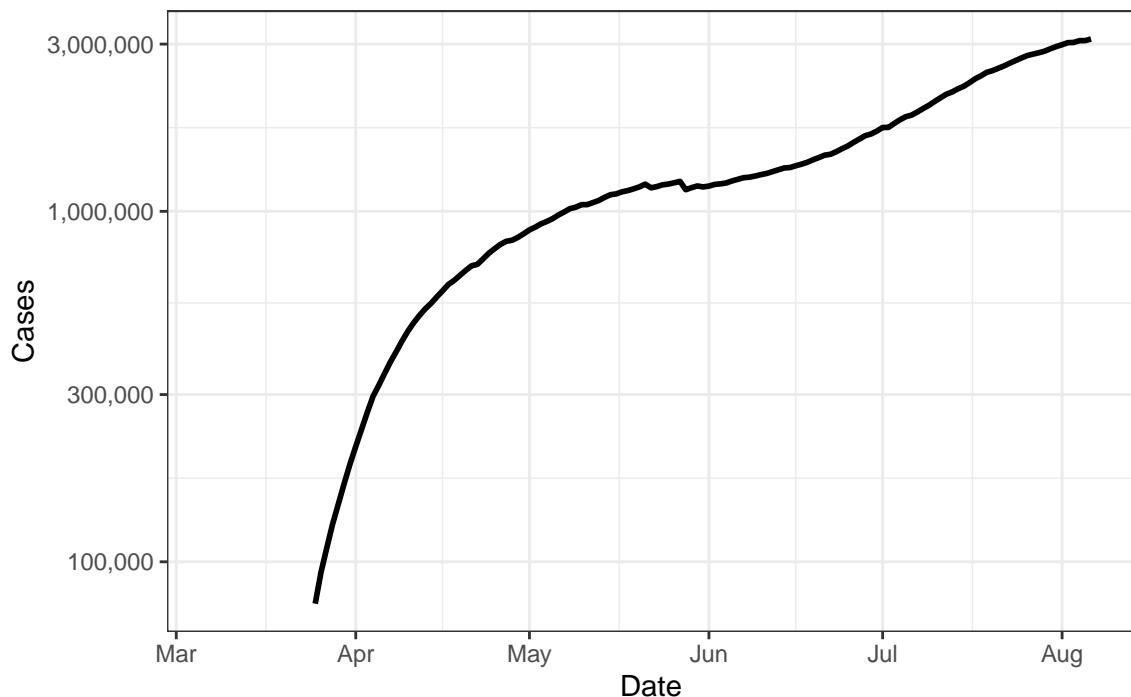

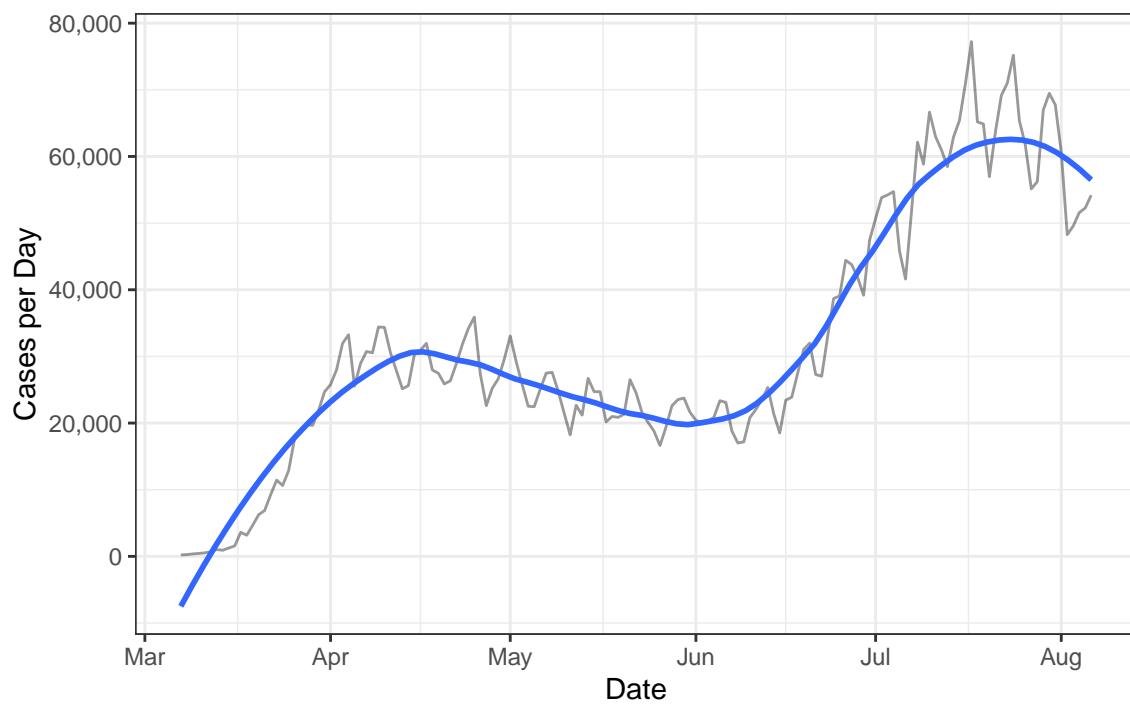

Cases

Reported cases are a function of both the spread of the disease and the prevalence of testing.

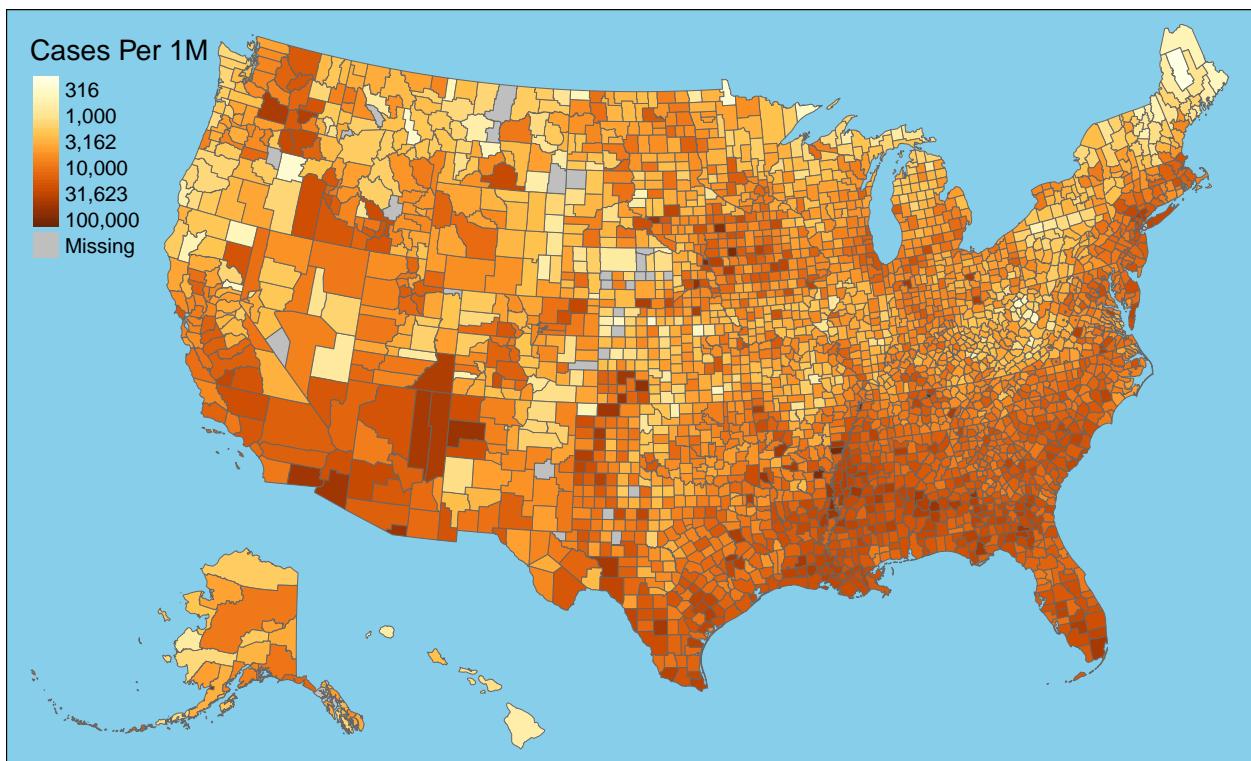

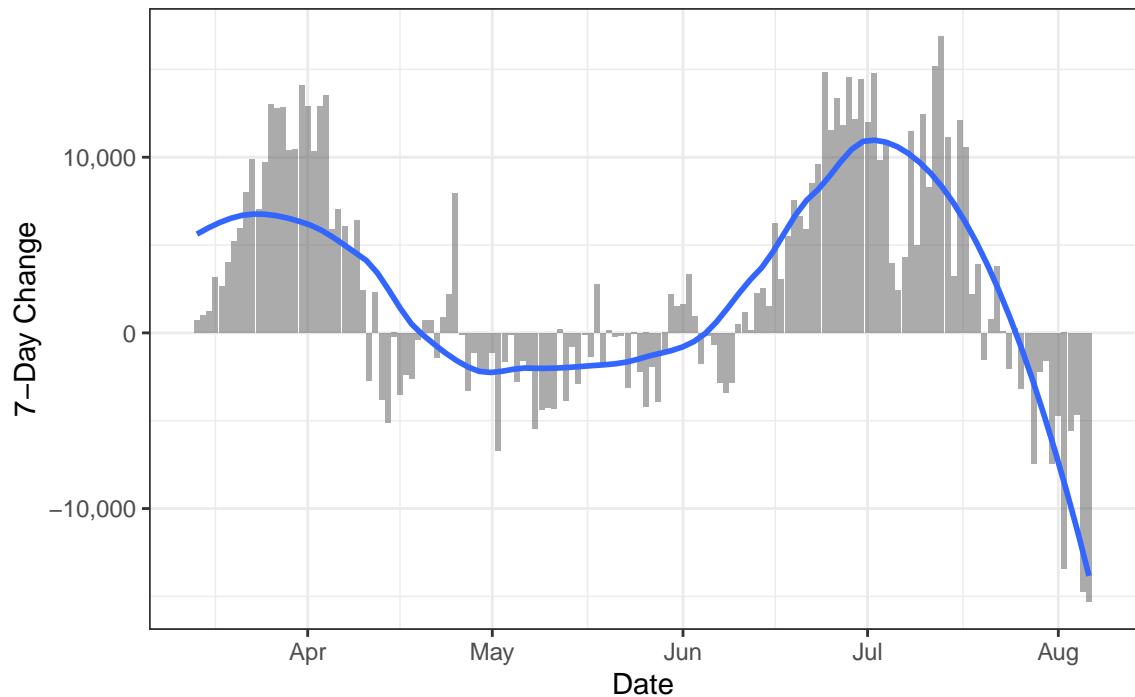

Active Cases

New Cases

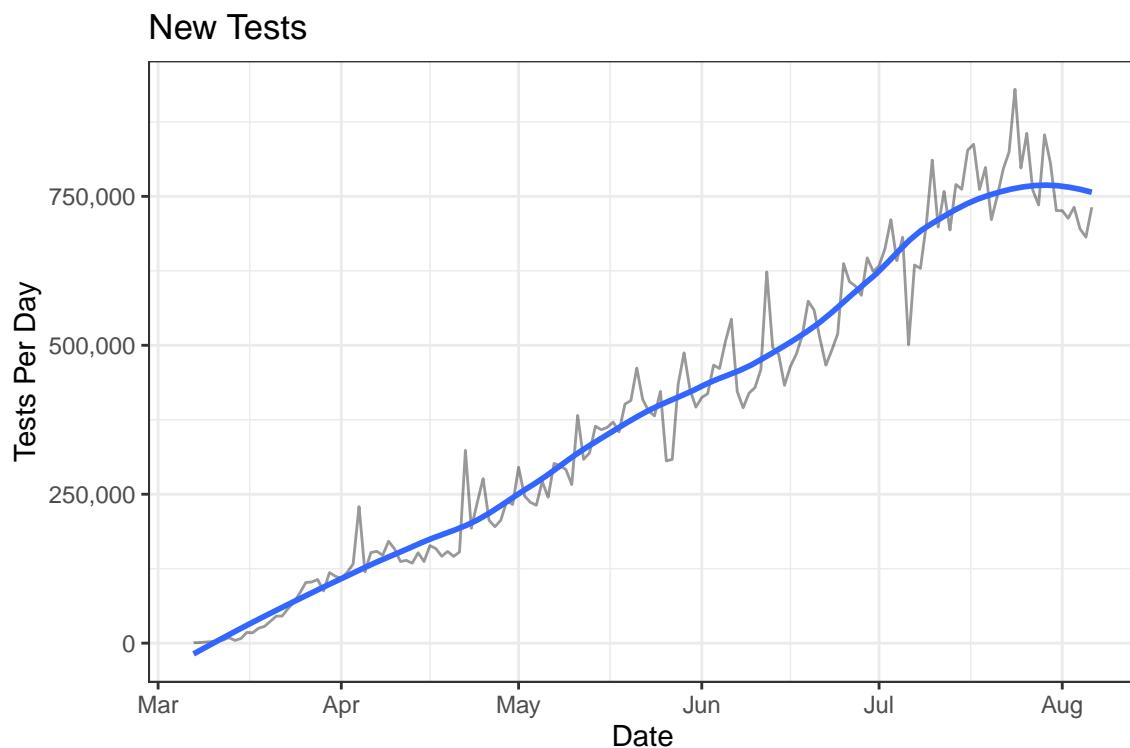

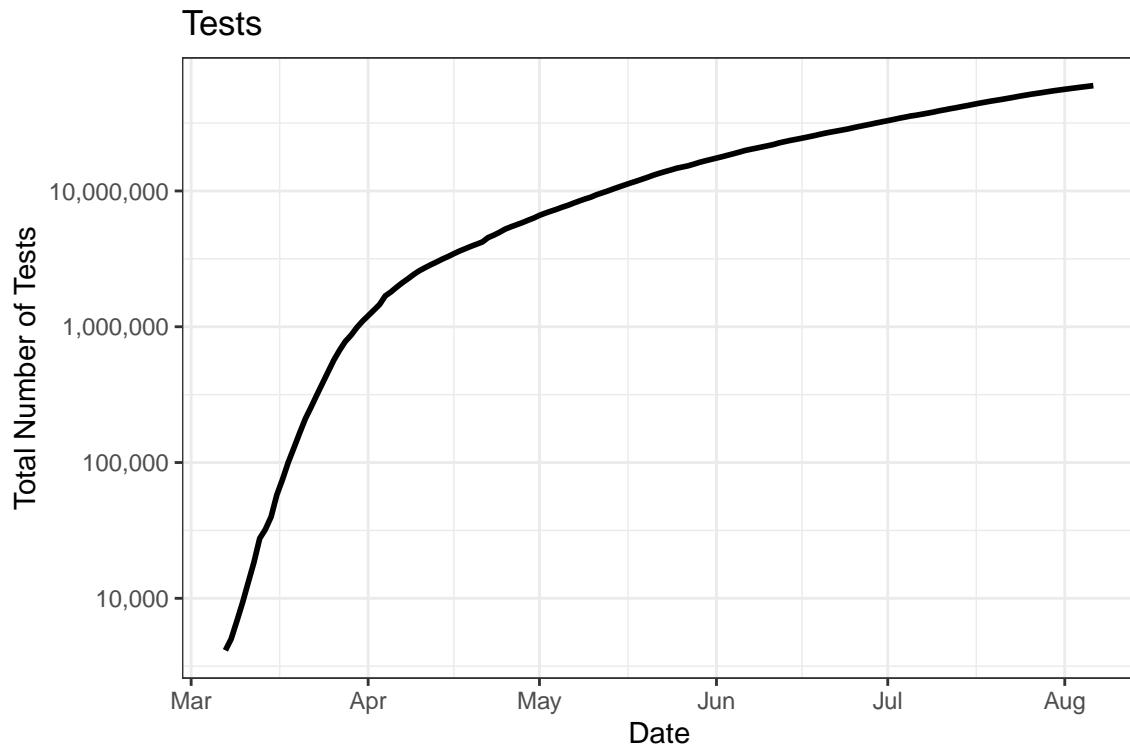

One-Week Change in Daily Cases

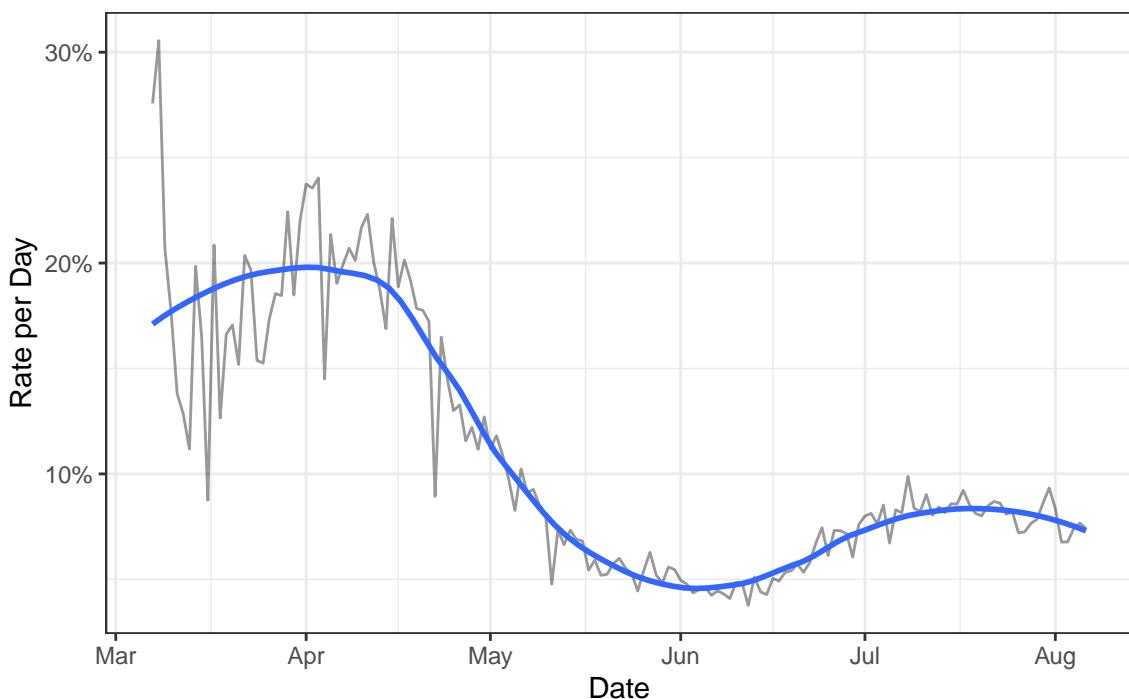

Testing

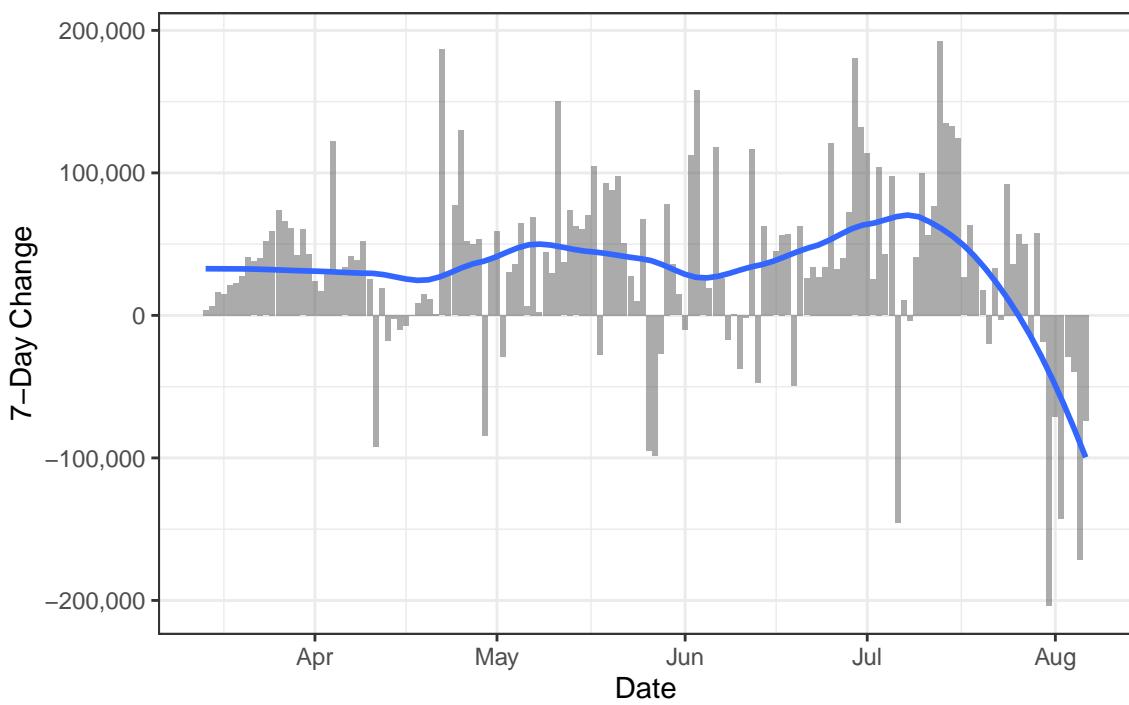

Widespread testing is necessary for managing the spread of the disease. The following charts show how testing in the United States has changed over time. When the supply of available tests is limited, they are typically only used for patients whose symptoms suggest they are likely to have contracted the virus. A high positive test rate indicates that testing capacity is constrained.

Positive Test Rate

One-Week Change in Daily Tests

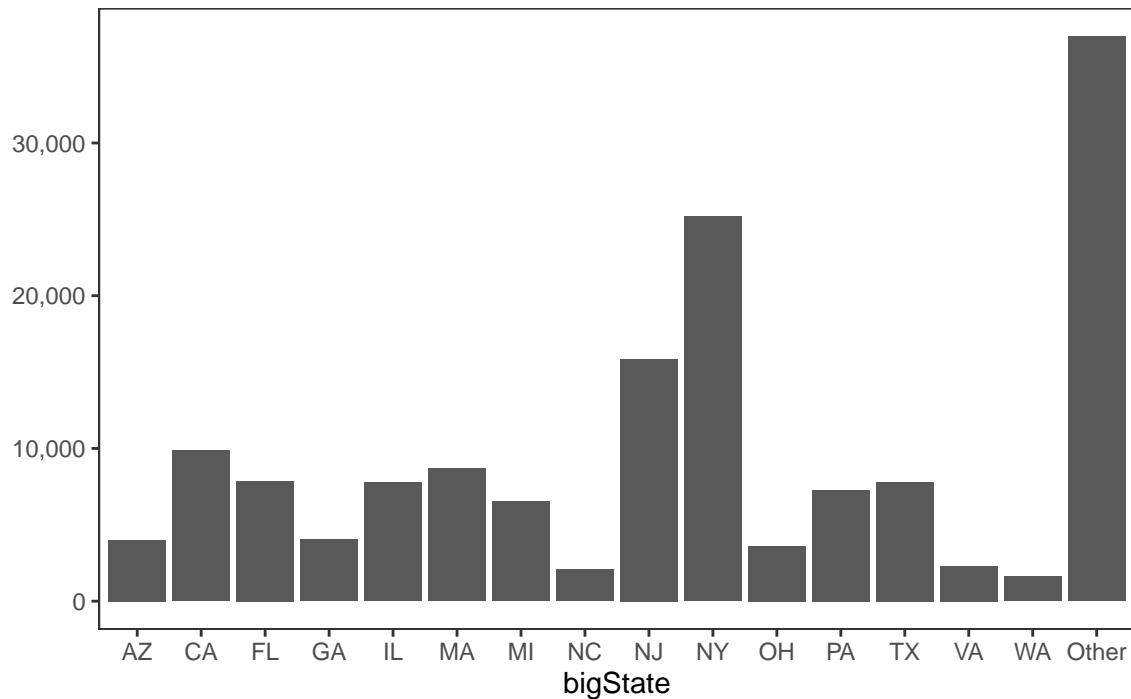

State Data

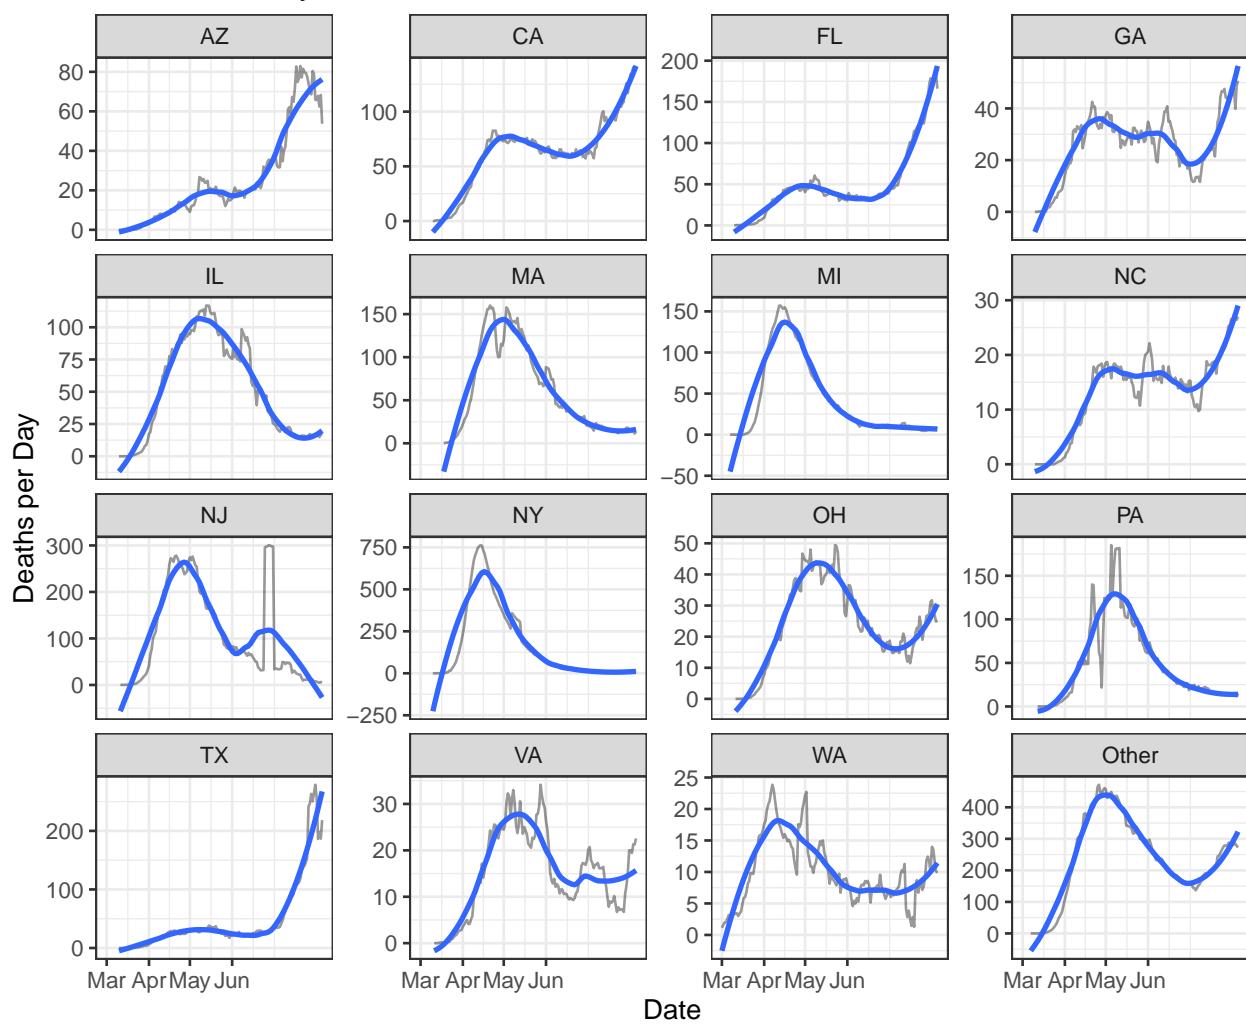

This section summarizes state-level data. Most data are reported for the largest 15 states by population, which account for NaN percent of the total U.S. population.

Deaths

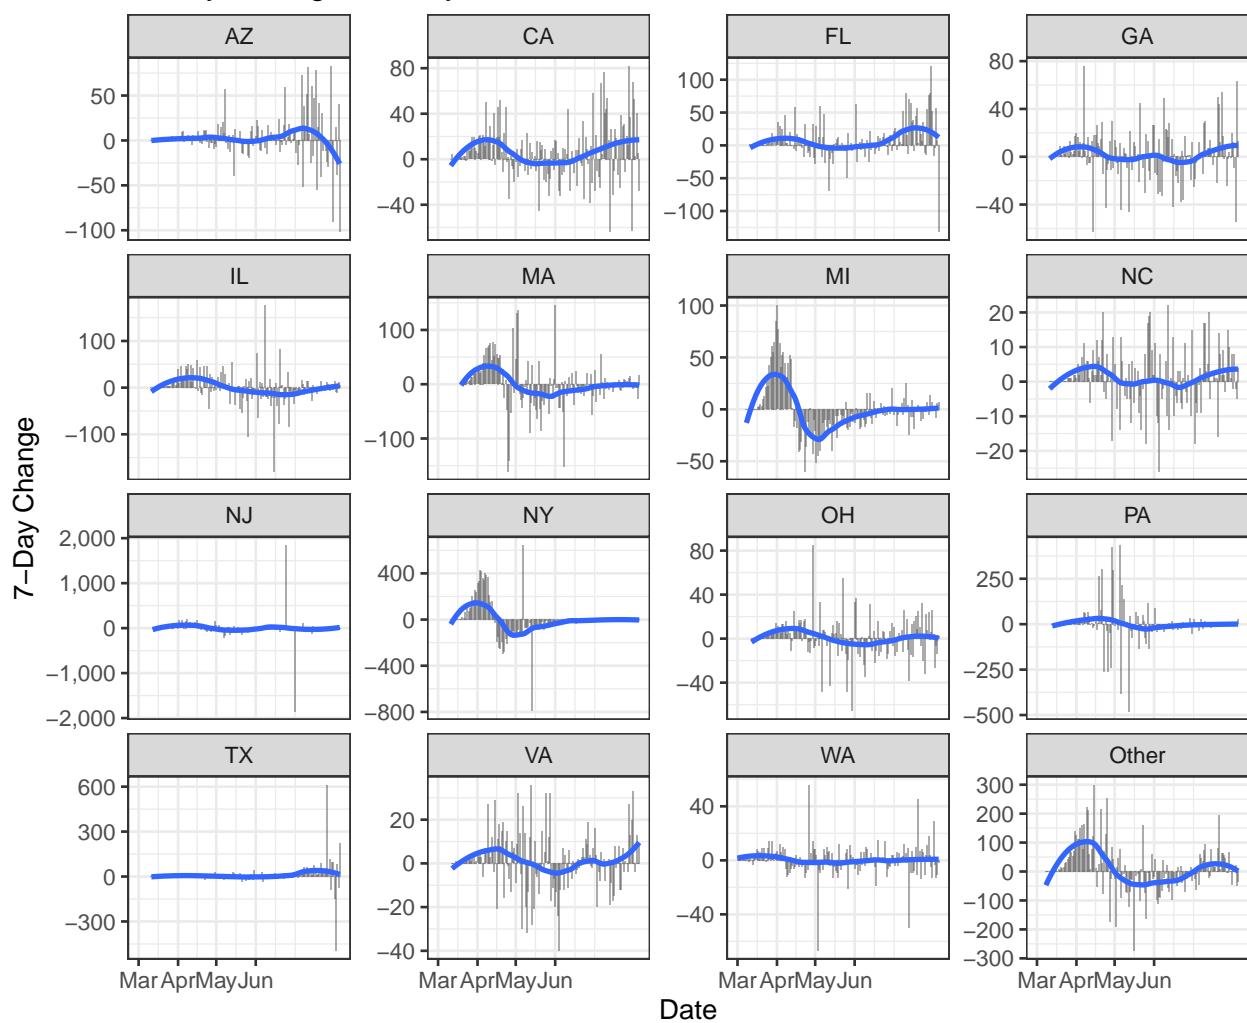

Deaths by State

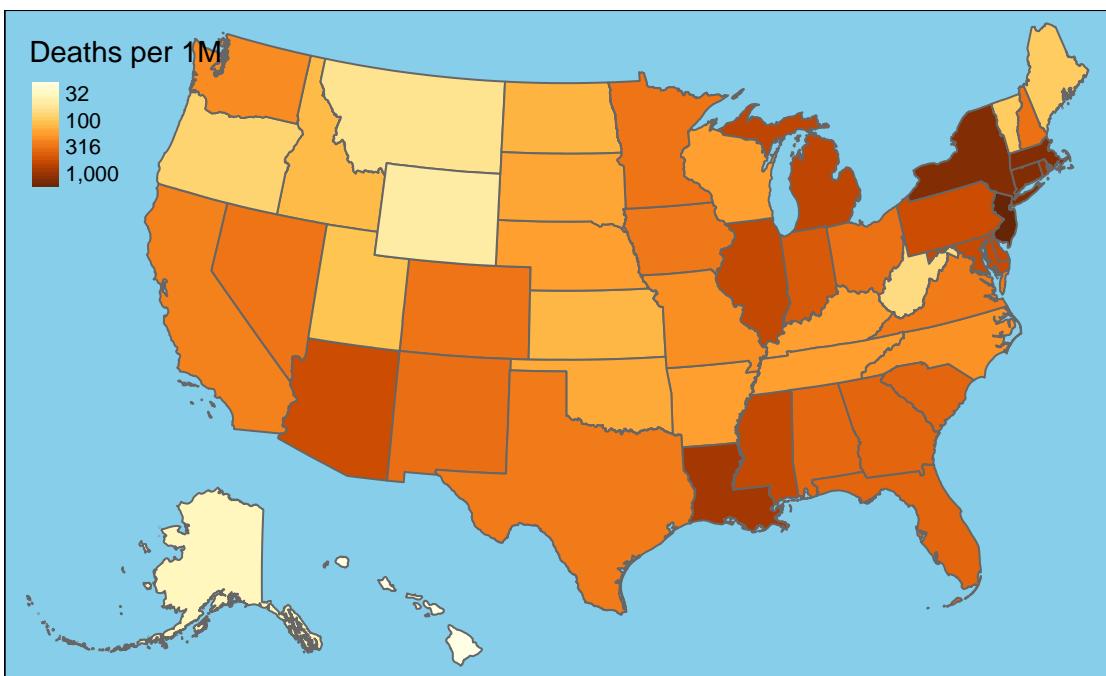

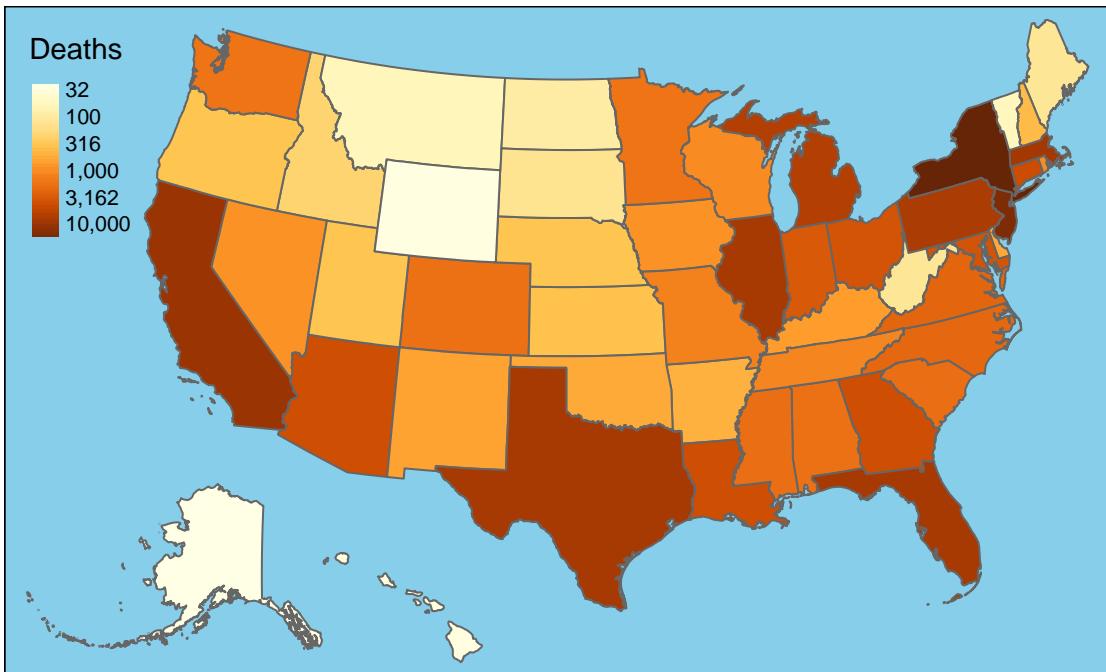

New Deaths by State

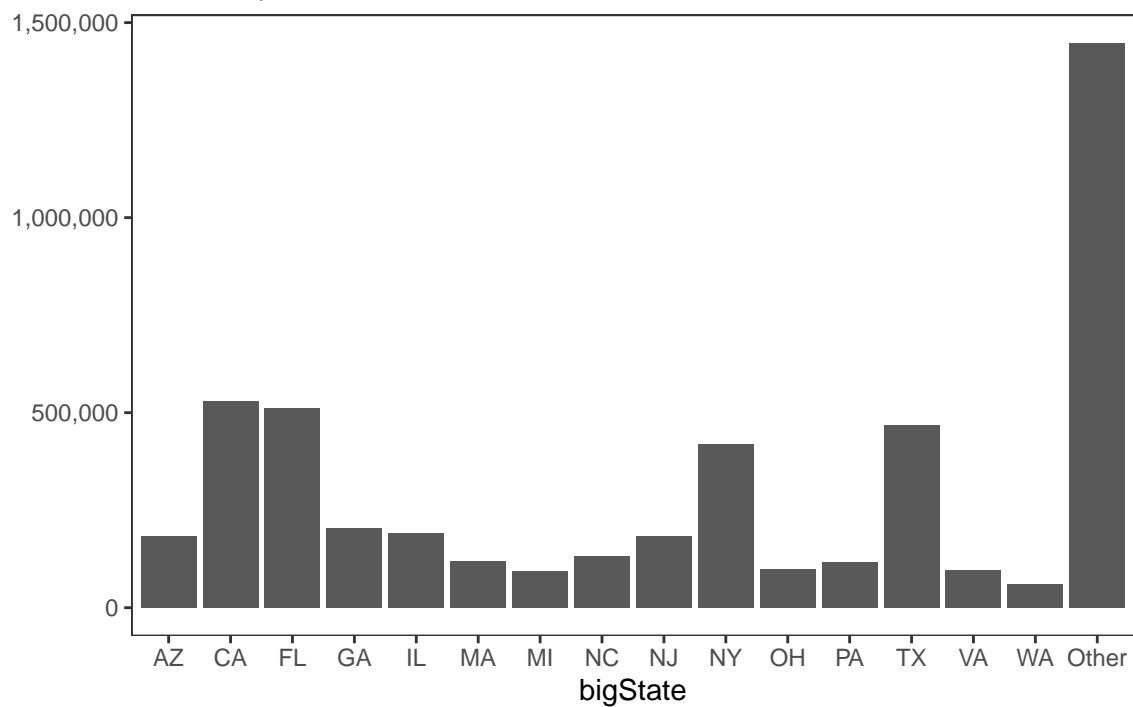

7-Day Change in Daily Deaths

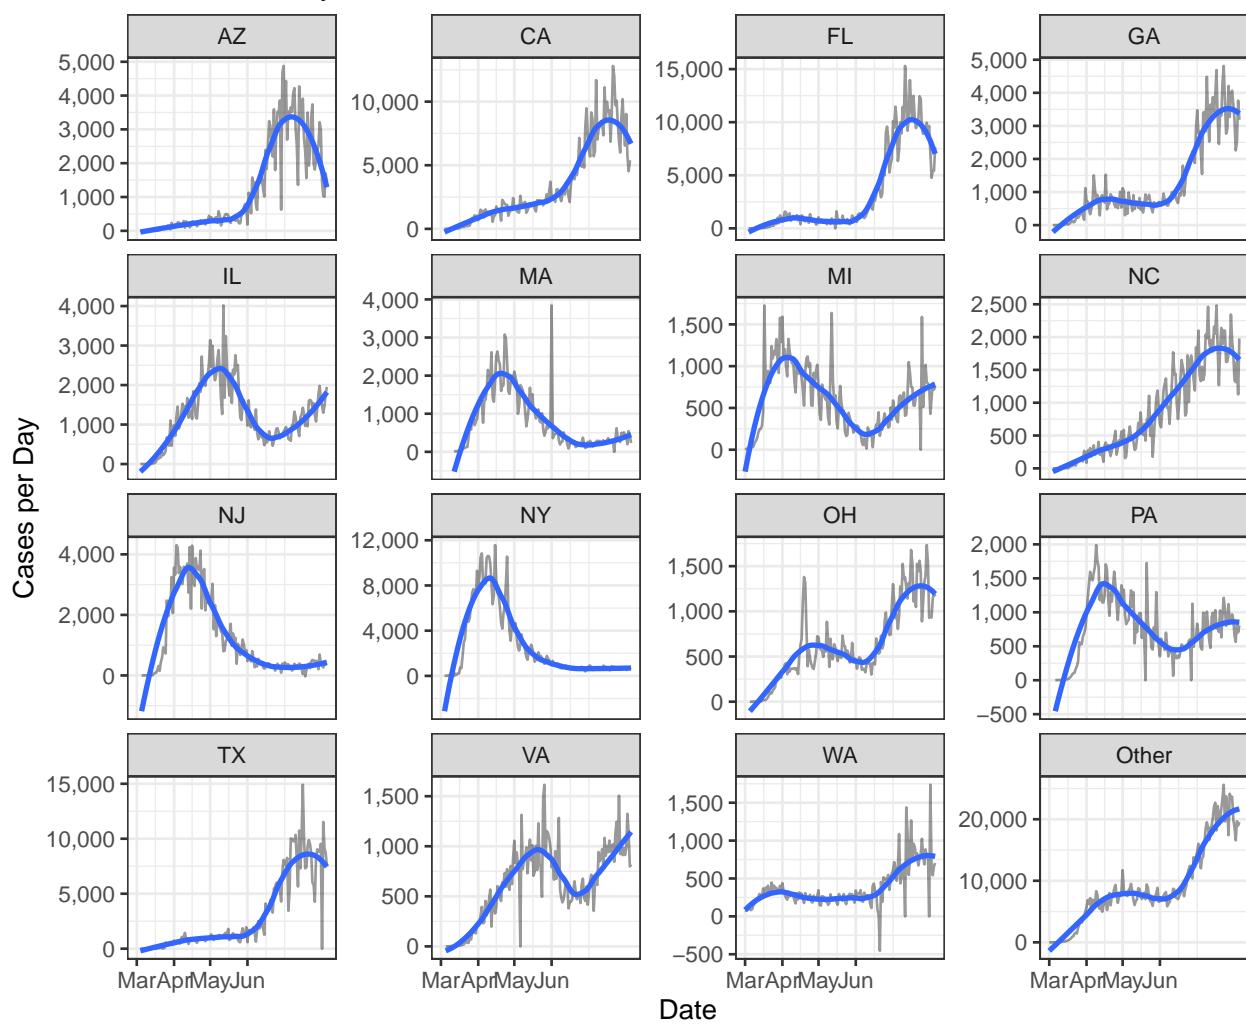

Cases

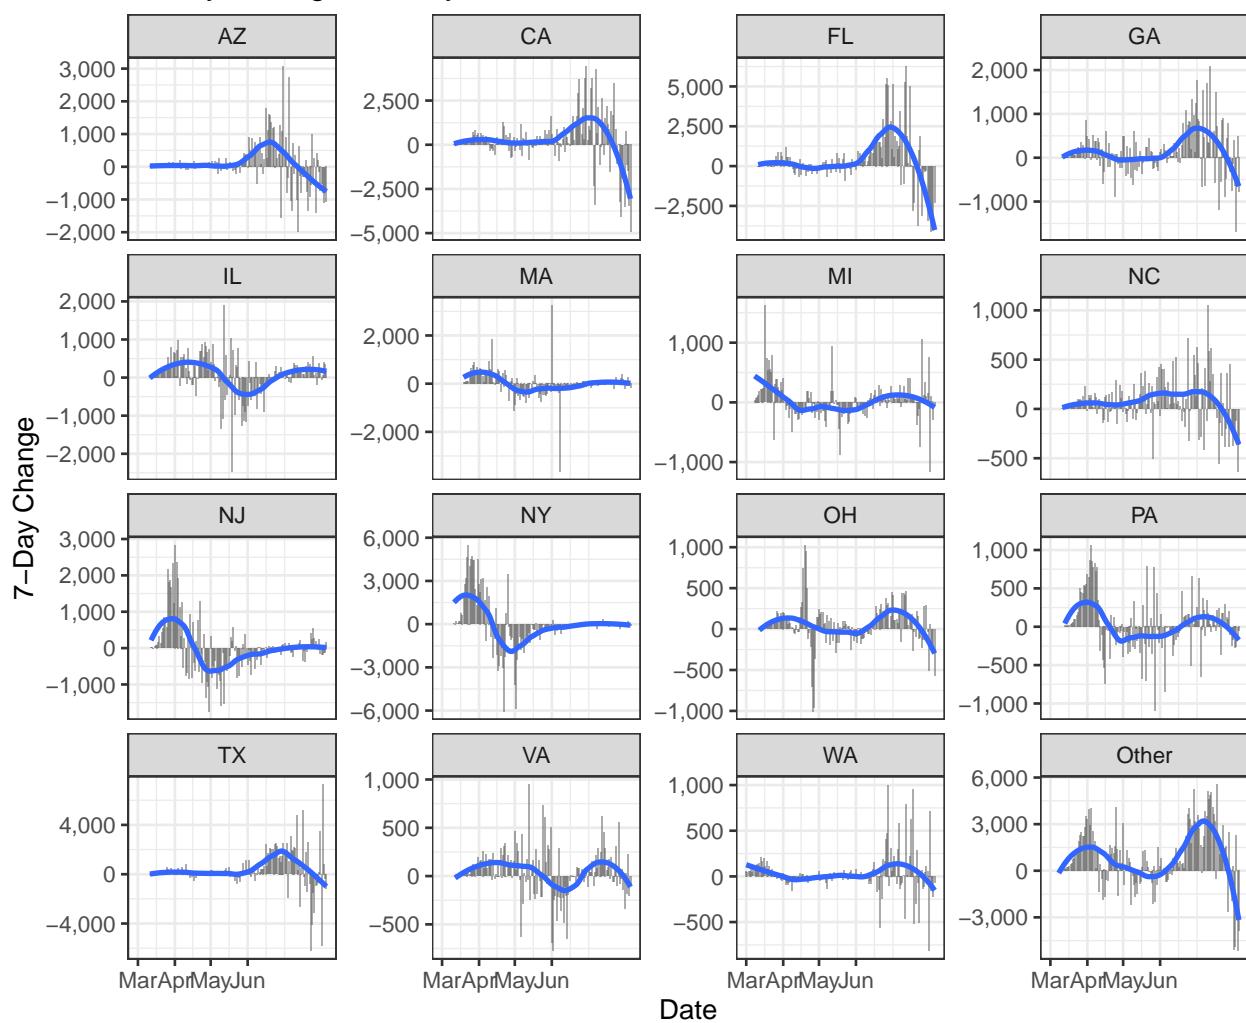

Cases by State

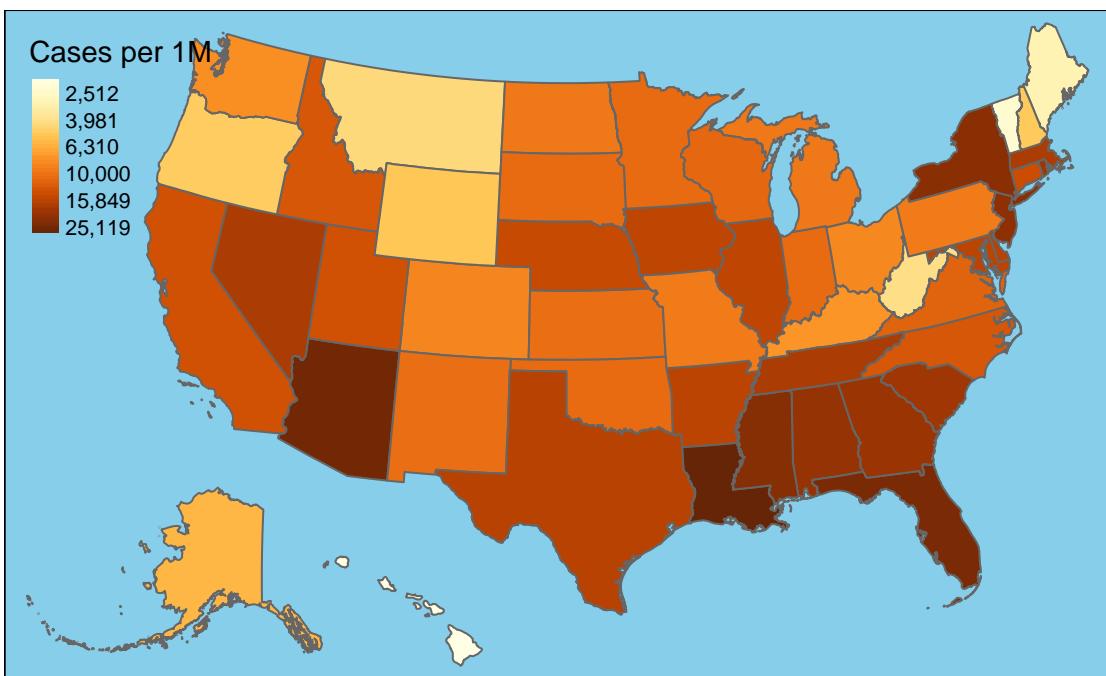

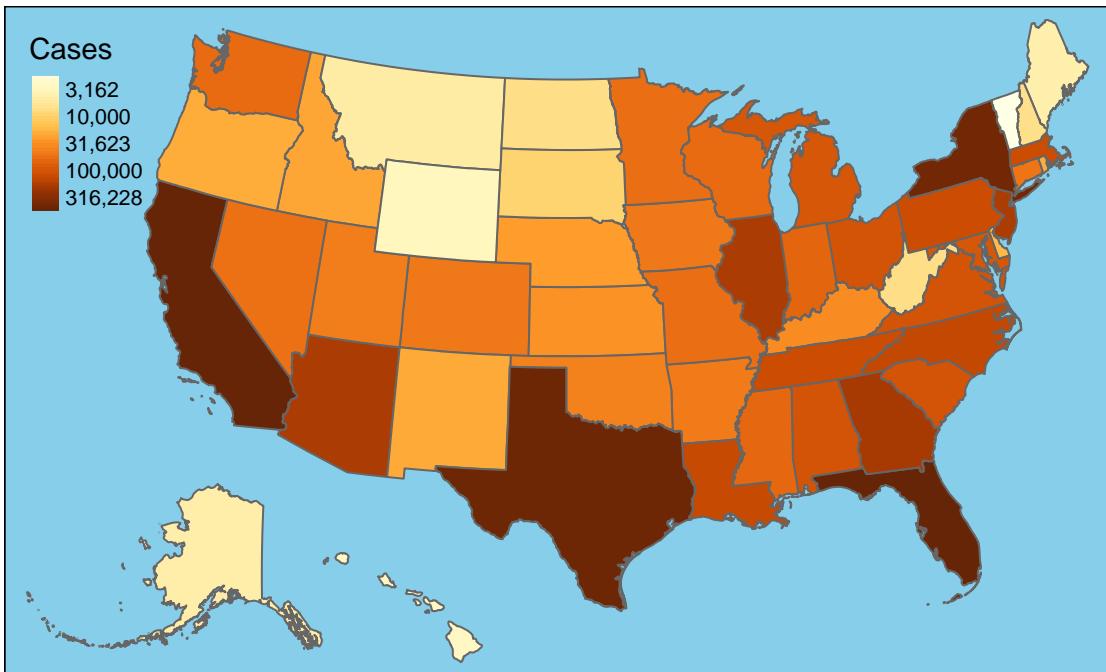

New Cases by State

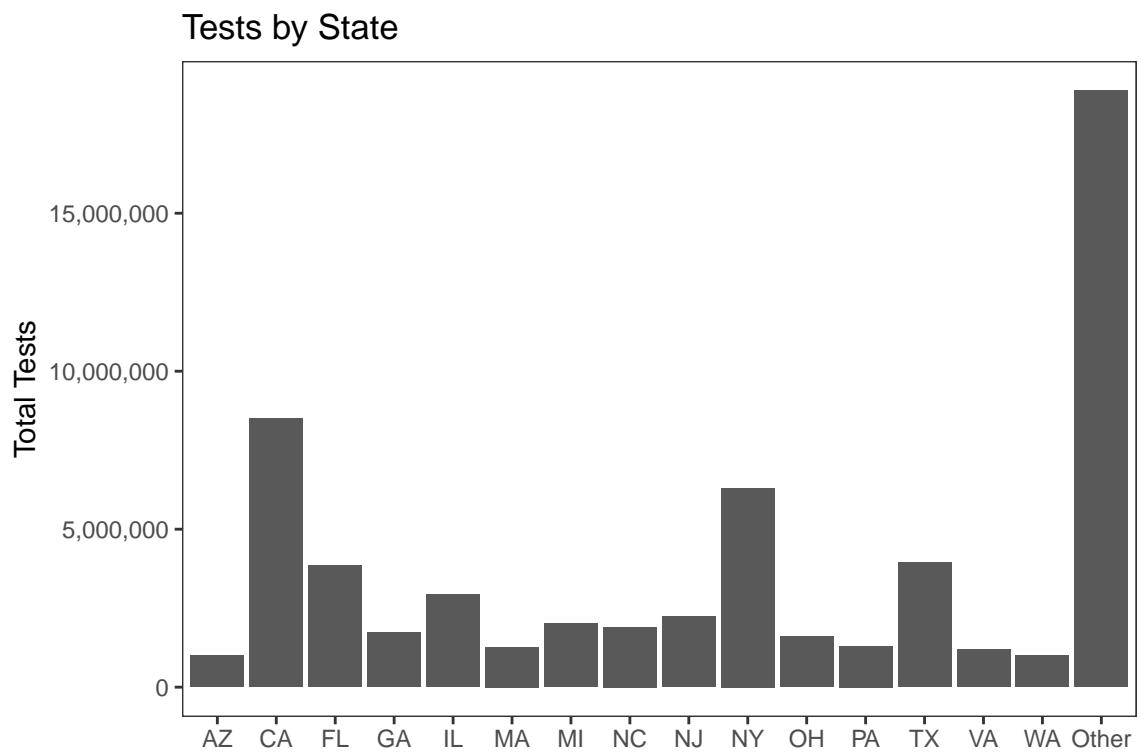

7-Day Change in Daily Cases

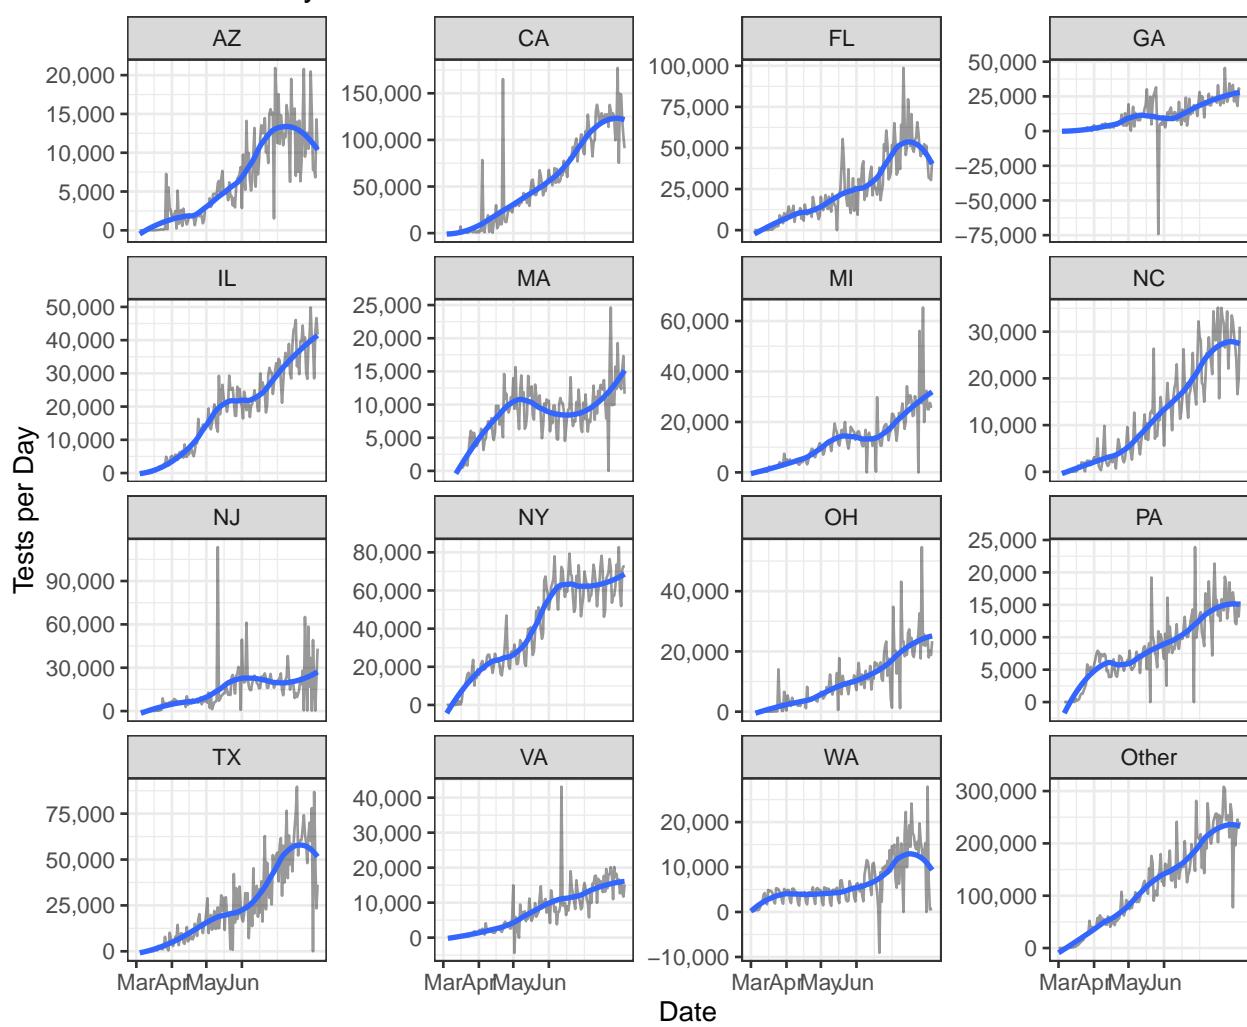

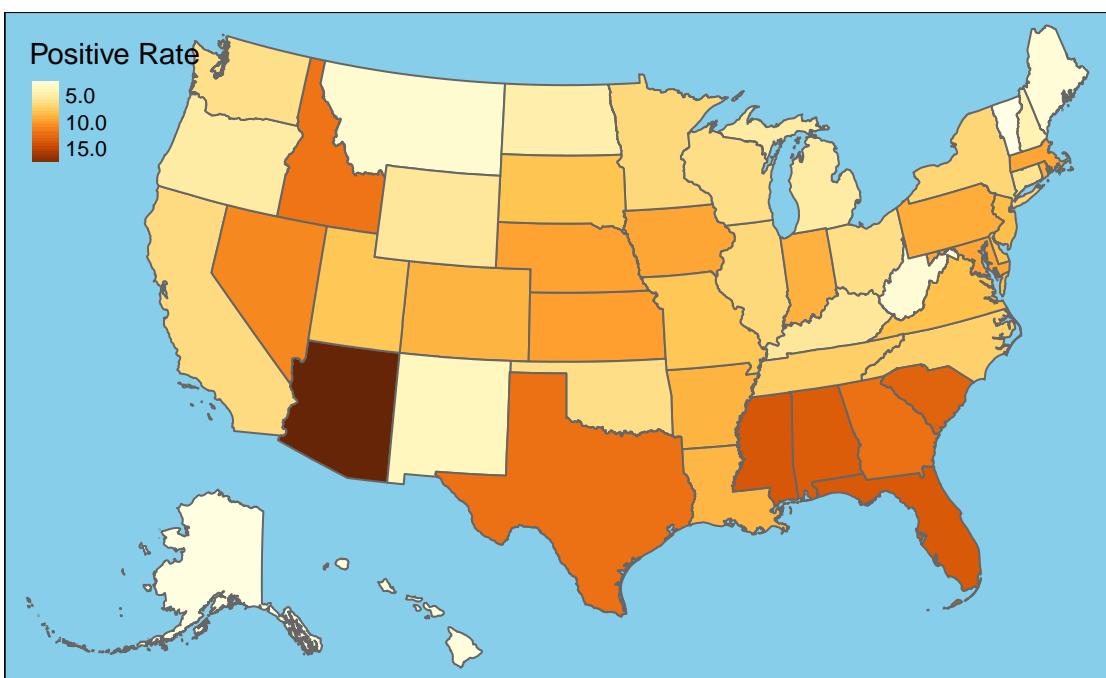

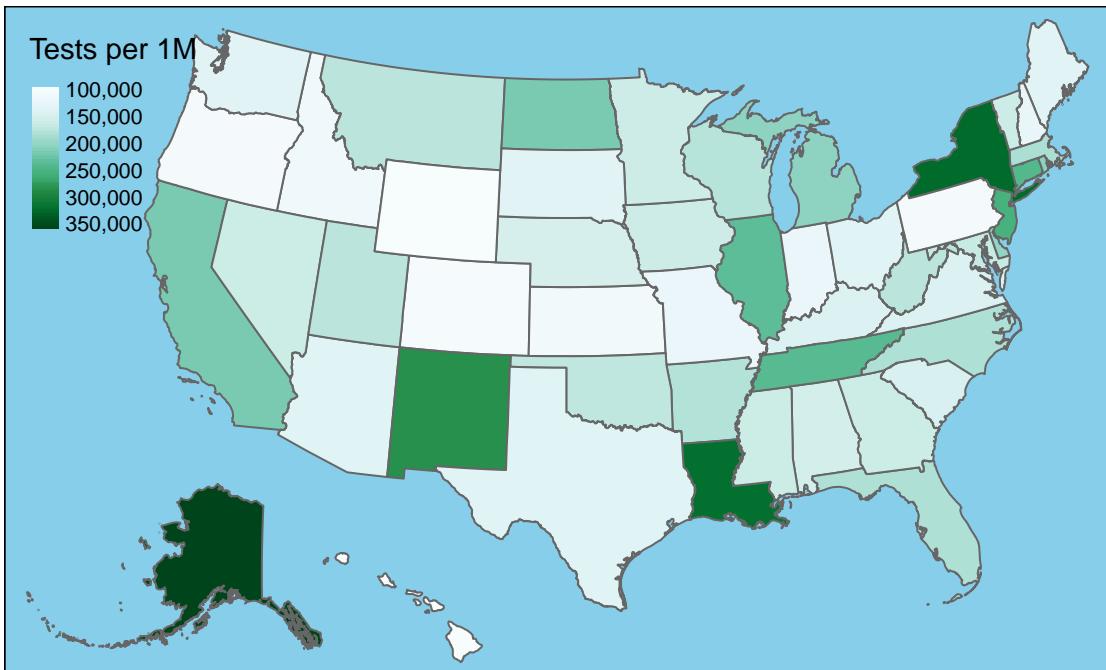

Testing

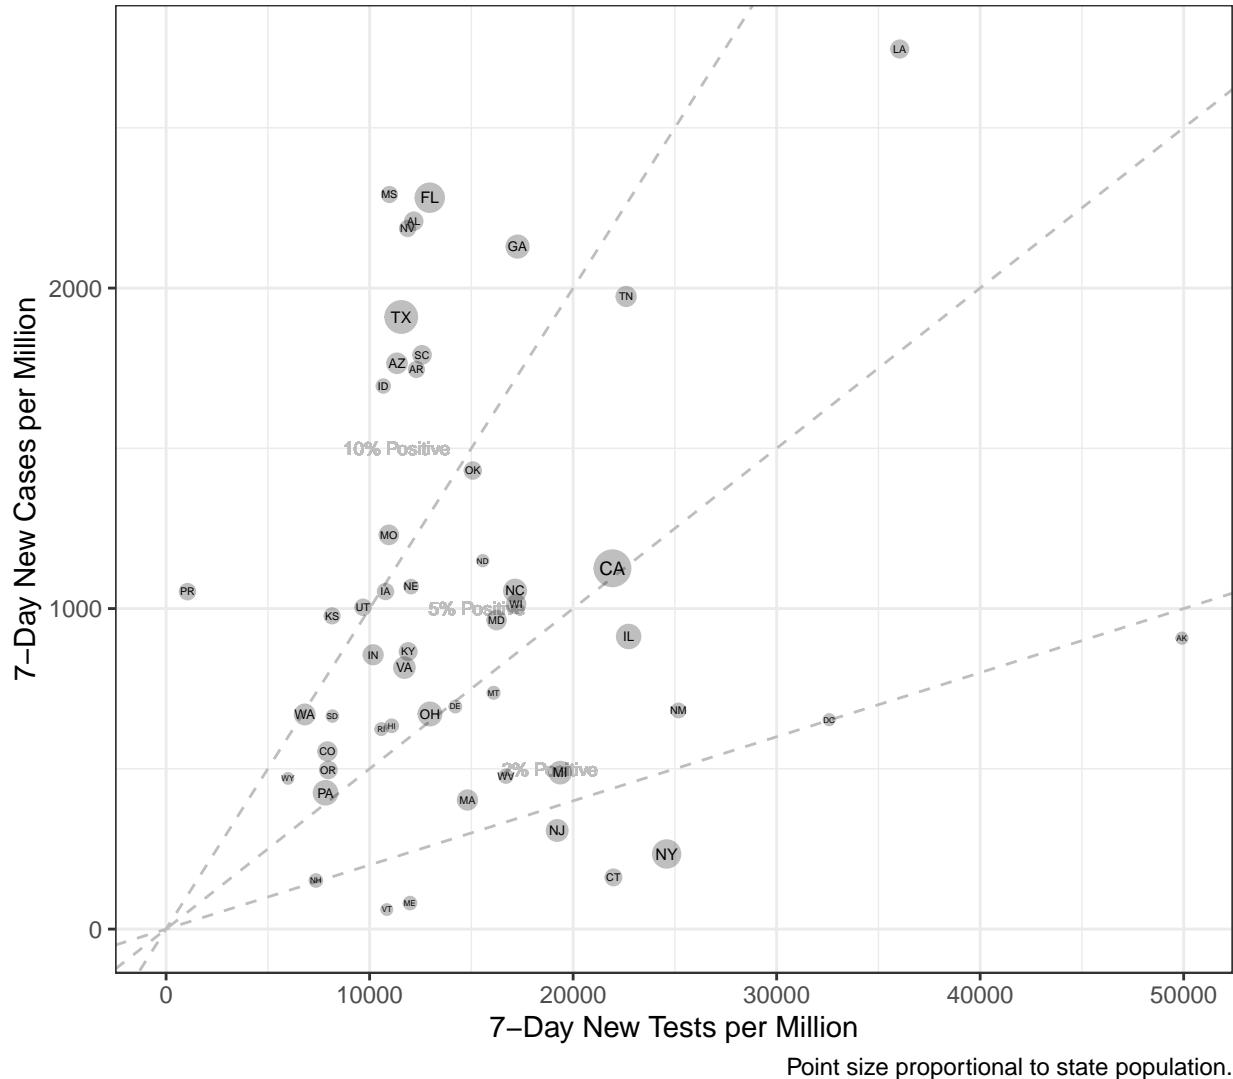

New Tests by State

Interpretation of differences in case rates across states is complicated by the fact that those states that do more thorough testing will invariably uncover more cases. A lower positive test rate is an indication that a state is doing more comprehensive testing since, when testing is rationed, only those individuals who are more likely to test positive are typically tested. The following chart compares the one-week increase in detected cases to the number of tests administered by each state relative to population. The states of greatest current concern are those with both a large increase in detected cases and a relatively small increase in tests. These states lie in the upper-left of the chart.

Tests vs. Cases by State

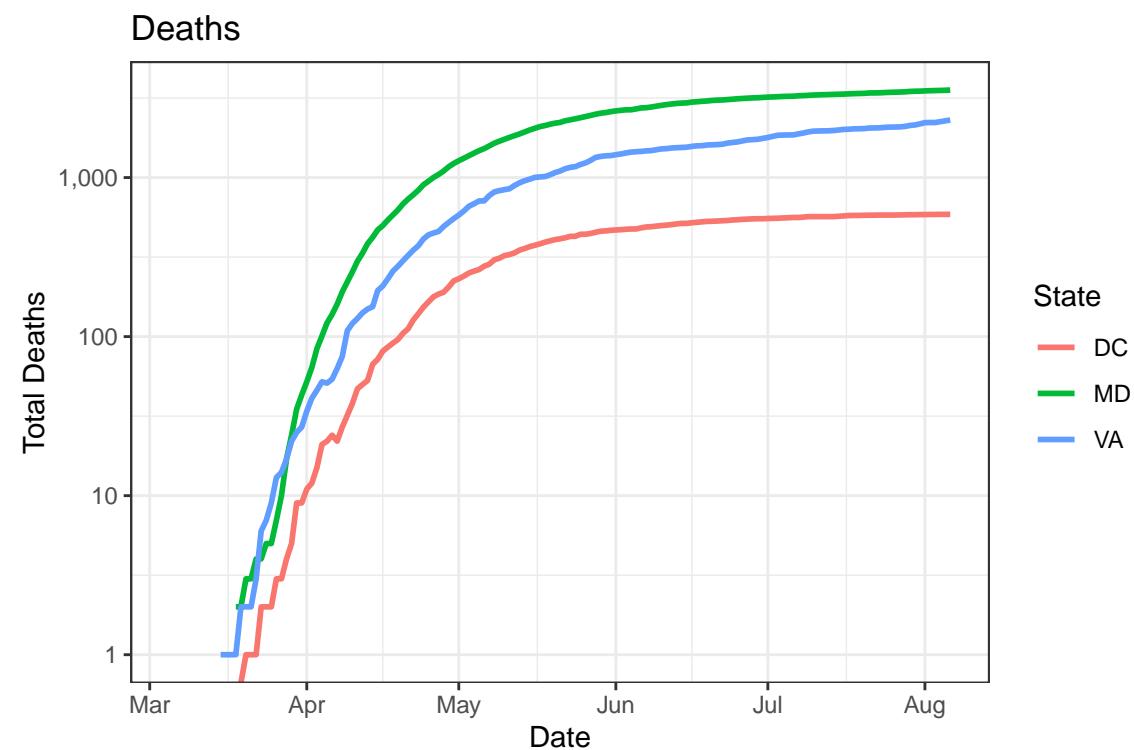

Local Data

The following charts and tables present mortality, case, and testing data for the Washington DC metropolitan area and adjacent states.

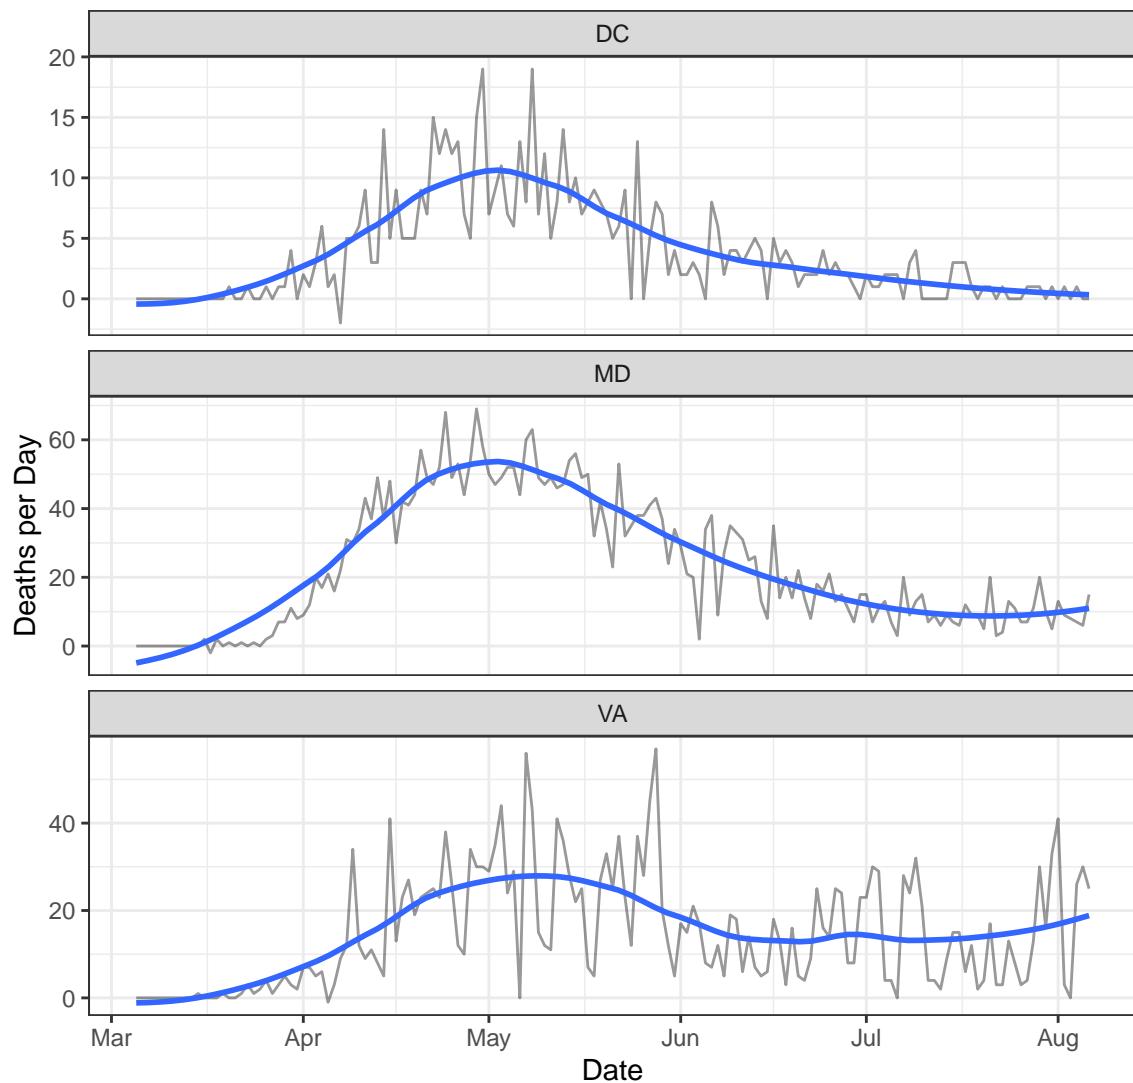

Table 3: Latest Local Data

State	Cases	Deaths	New Cases	New Deaths
DC	12,518	587	75	0
MD	93,005	3,551	579	15
VA	95,867	2,299	818	25
