

Erik's Covid-19 Chart Pack

Data updated 2020-07-07 19:05:42. World data are from Worldometers. National and state-level mortality, case, and testing data are from Johns-Hopkins University. County and city-level mortality and case data are from the New York Times. Most data presented in this report were accessed through APIs provided by The COVID Tracking Project and NovelCOVID API.

World Data

There have been 11,732,581 confirmed Covid-19 cases and 540,140 deaths worldwide.

Deaths

Cases

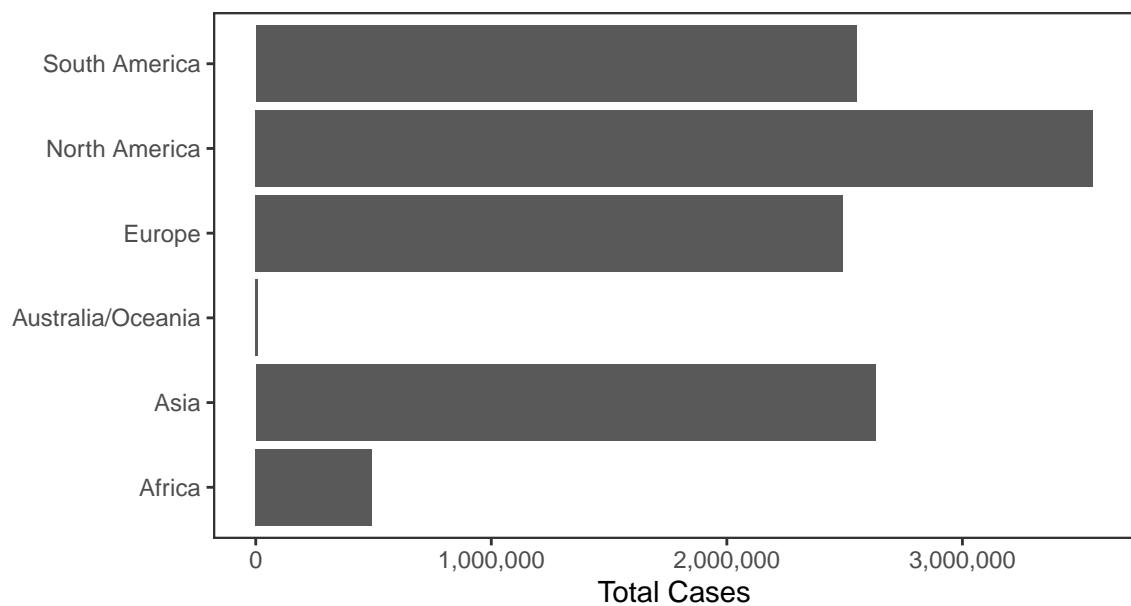

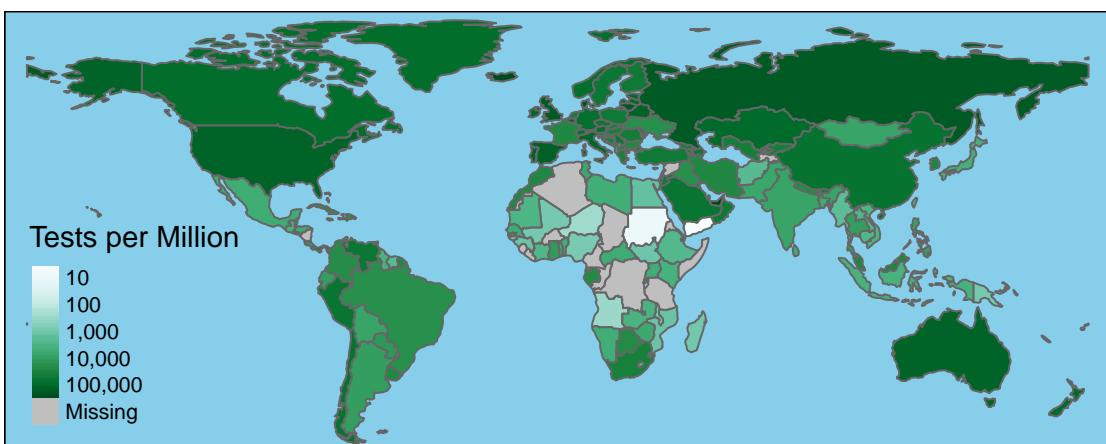

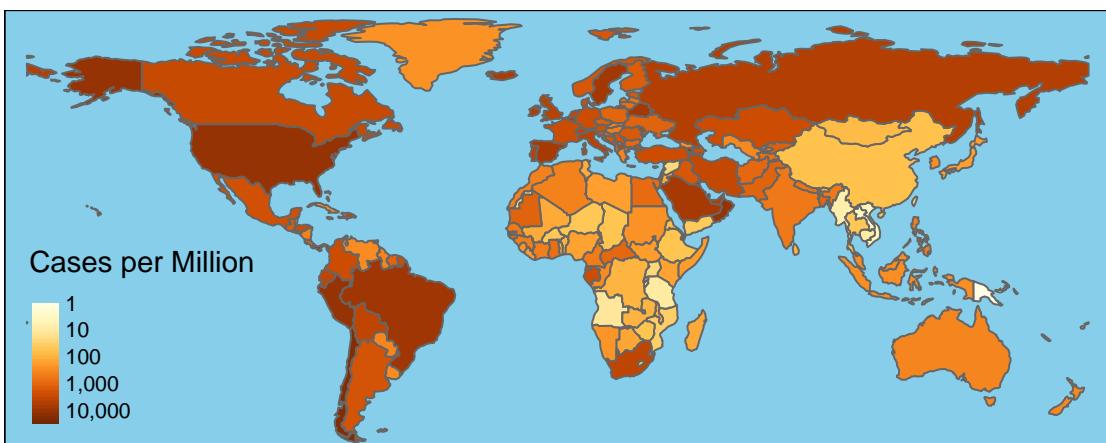

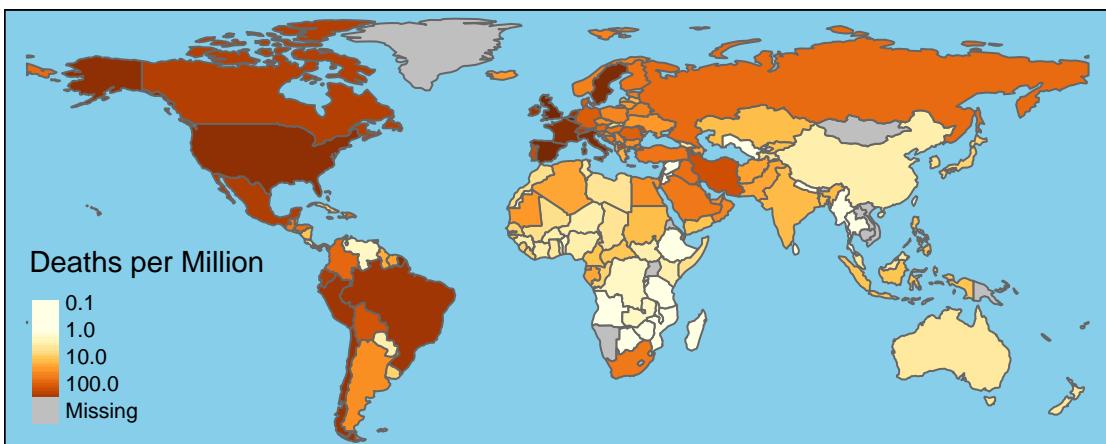

Table 1: Top Countries by Total Cases

Country	Cases	Deaths	New Cases	New Deaths
USA	3,040,192	132,979	50,584	378
Brazil	1,626,071	65,556	21,486	656
India	720,346	20,174	22,510	474
Russia	687,862	10,296	6,611	135
Peru	305,703	10,772	2,985	183
Spain	298,869	28,388	414	3
Chile	298,557	6,384	3,025	76
UK	285,768	44,236	352	16
Mexico	256,848	30,639	4,683	273
Iran	243,051	11,731	2,613	160
Italy	241,819	34,869	208	8
Pakistan	231,818	4,762	3,344	50
Saudi Arabia	213,716	1,968	4,207	52
Turkey	206,844	5,241	1,086	16
South Africa	205,721	3,310	8,971	111
Germany	198,057	9,092	499	6
France	168,335	29,920	176	13
Bangladesh	165,618	2,096	3,201	44
Colombia	120,281	4,210	3,171	146
Canada	105,935	8,693	399	9

National Data

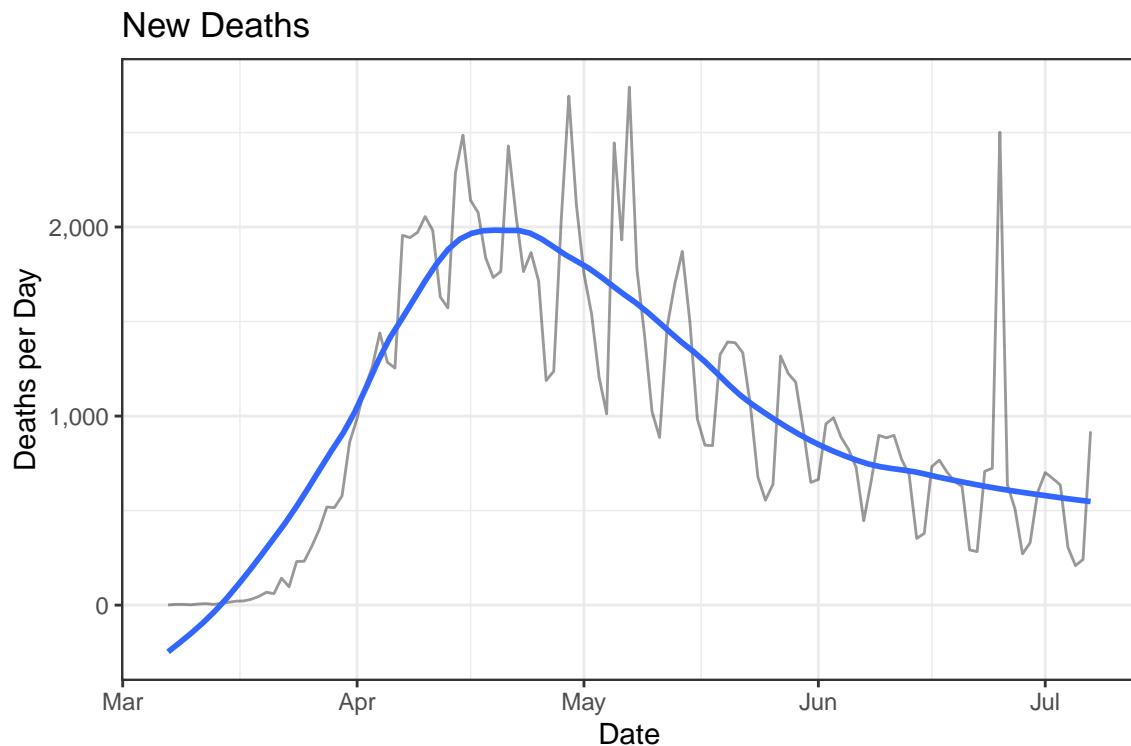

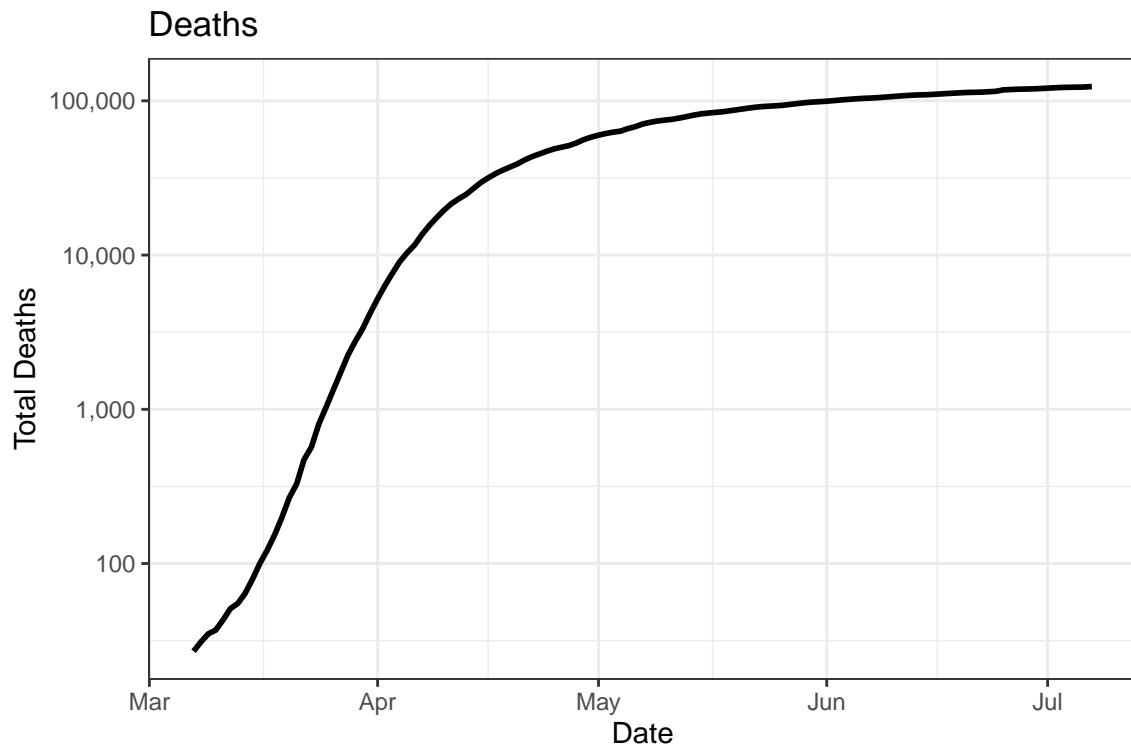

There have been 2,980,306 confirmed Covid-19 cases and 123,834 deaths in the United States.

Table 2: U.S. Deaths and Cases over the Last Two Weeks

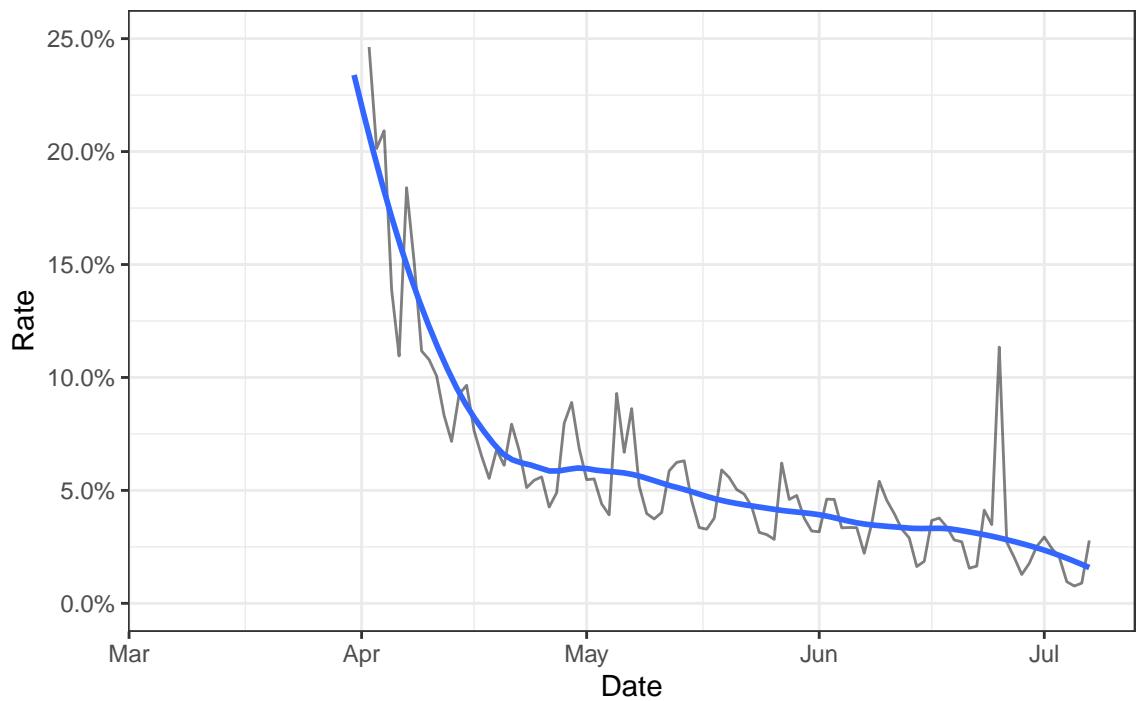

Date	Cases	Deaths	New Cases	New Deaths
2020-07-07	2,980,306	123,834	51,888	919
2020-07-06	2,928,418	122,915	47,375	242
2020-07-05	2,881,043	122,673	42,578	209
2020-07-04	2,838,465	122,464	52,406	306
2020-07-03	2,786,059	122,158	57,562	635
2020-07-02	2,728,497	121,523	53,684	670
2020-07-01	2,674,813	120,853	52,982	701
2020-06-30	2,621,831	120,152	44,358	596
2020-06-29	2,577,473	119,556	36,490	330
2020-06-28	2,540,983	119,226	42,161	271
2020-06-27	2,498,822	118,955	43,471	509
2020-06-26	2,455,351	118,446	44,373	636
2020-06-25	2,410,978	117,810	39,061	2,501
2020-06-24	2,371,917	115,309	38,706	724

Deaths

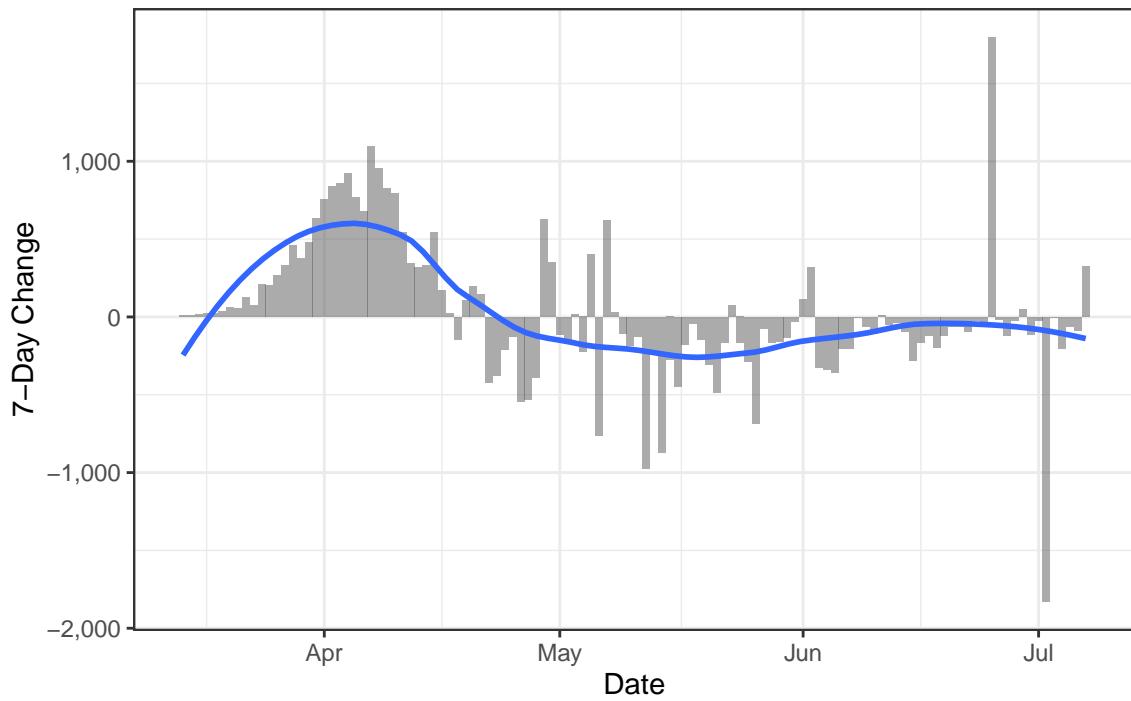

Because the effects of the virus can take several weeks to manifest in patients, deaths are a lagging indicator of contagion, but they may be a more reliable than case counts, which are a function of both the prevalence of the disease and the rate of testing. The case mortality rate is a very crude indicator of lethality because a large numbers of non-lethal cases are likely never detected. A declining case mortality rate is indicative of more widespread testing.

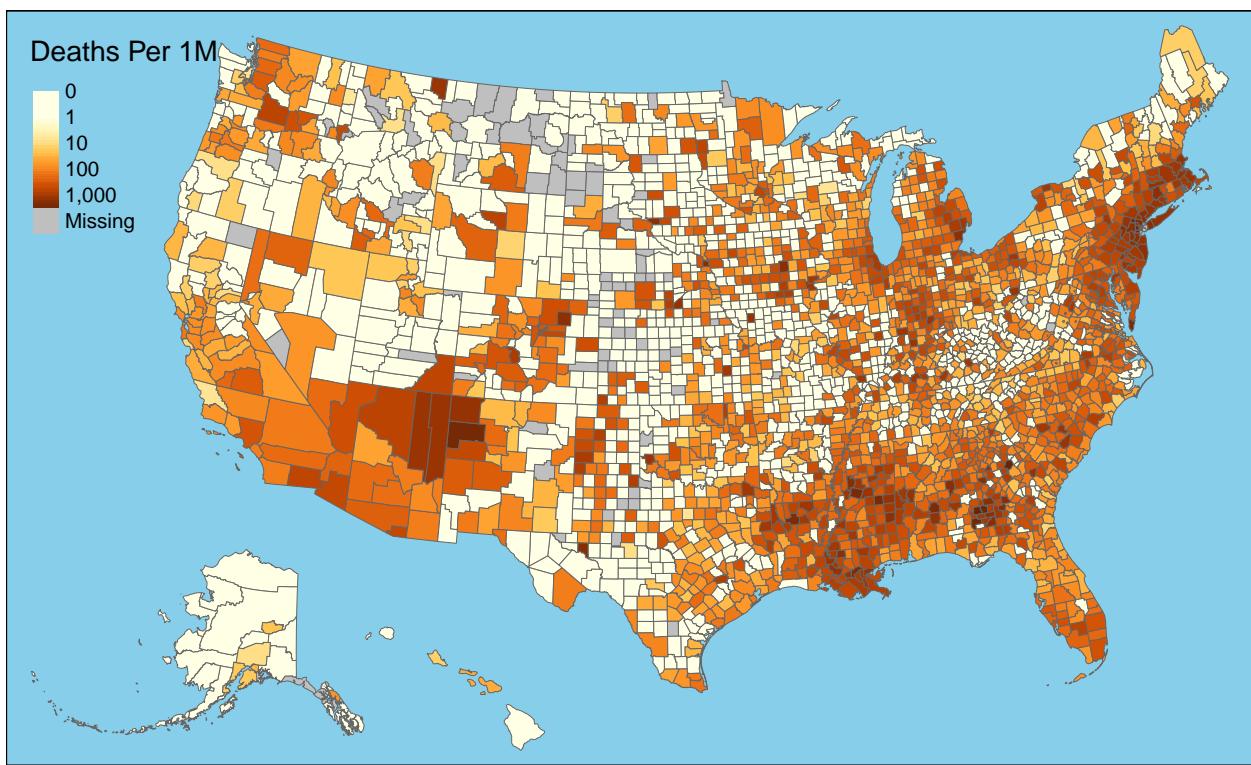

Daily Case Mortality Rate

One-Week Change in Daily Deaths

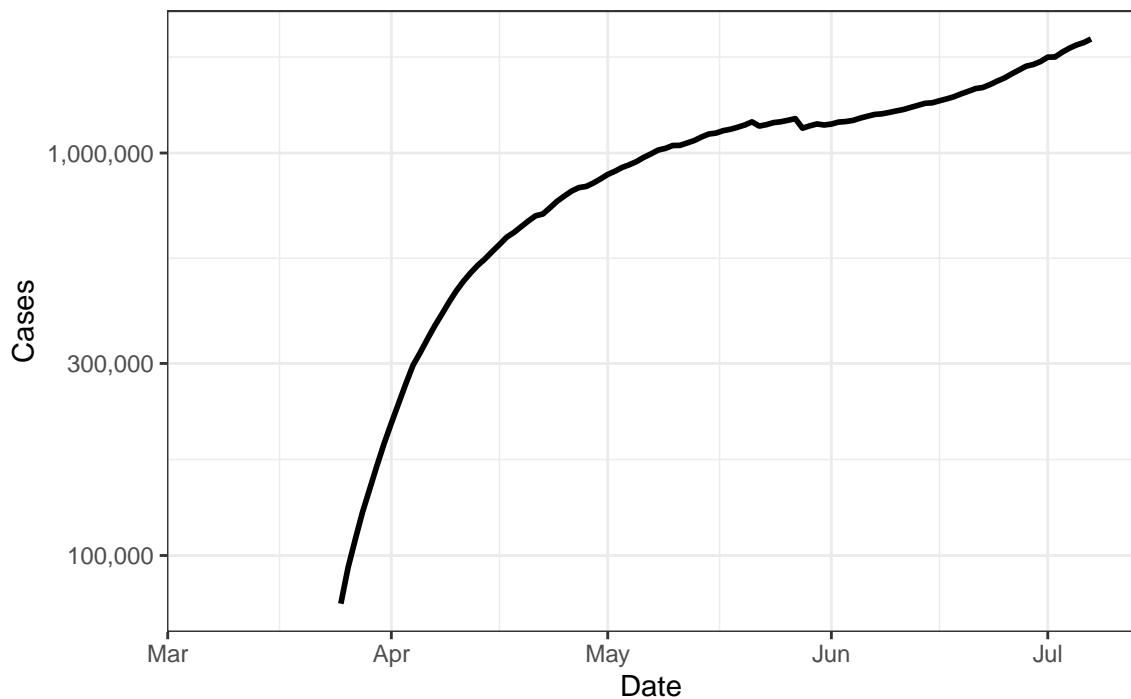

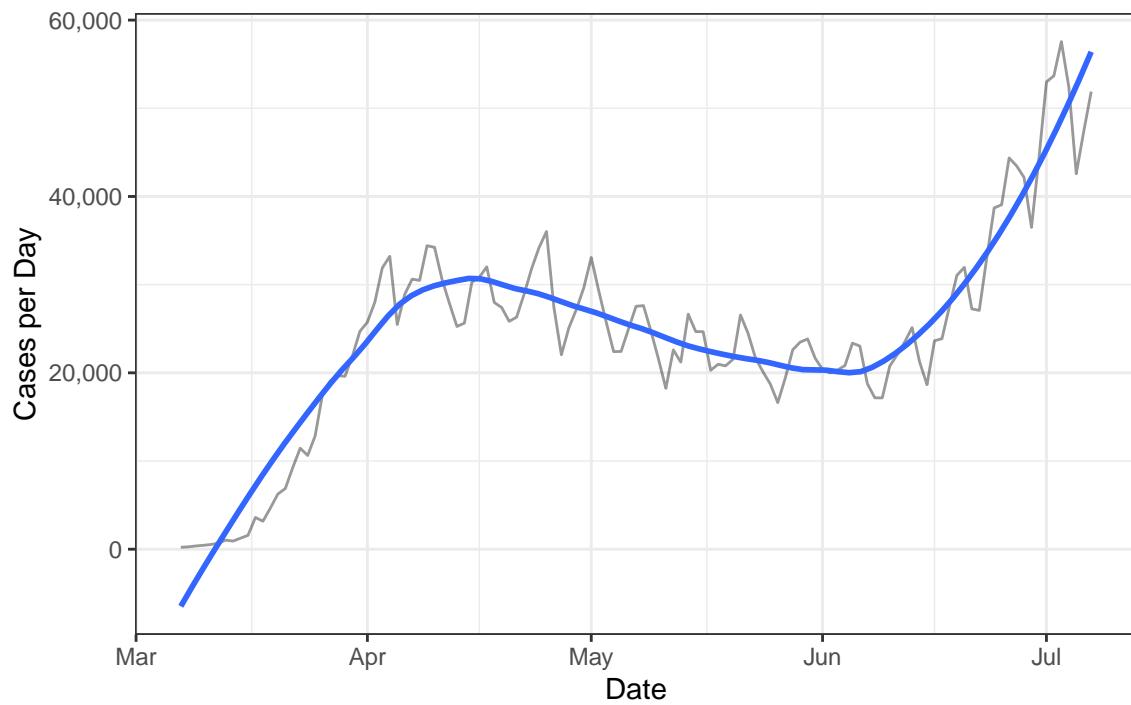

Cases

Reported cases are a function of both the spread of the disease and the prevalence of testing.

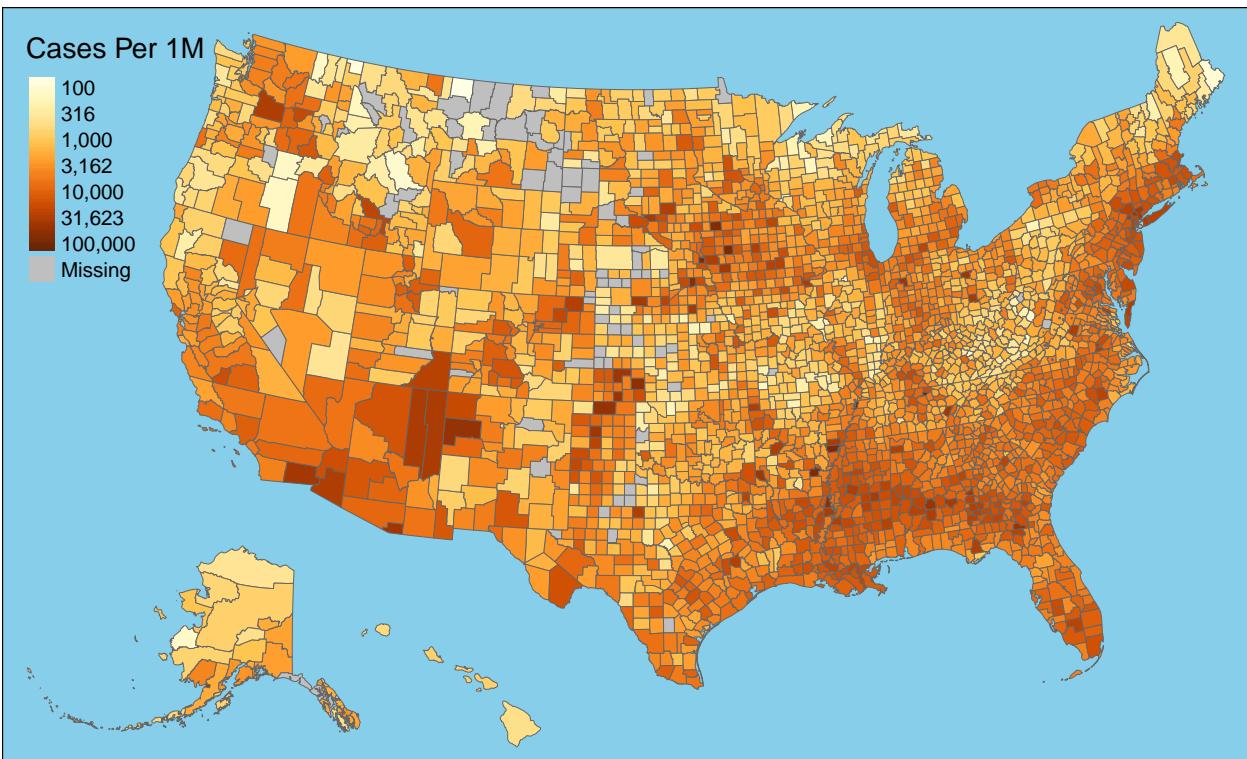

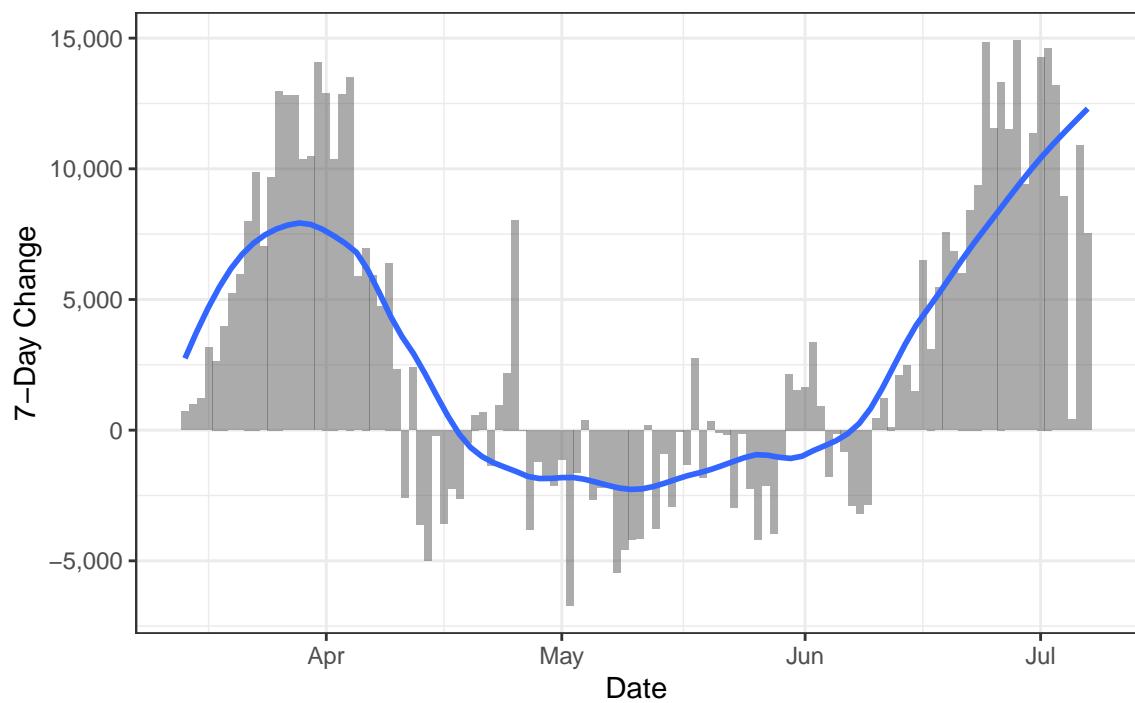

Active Cases

New Cases

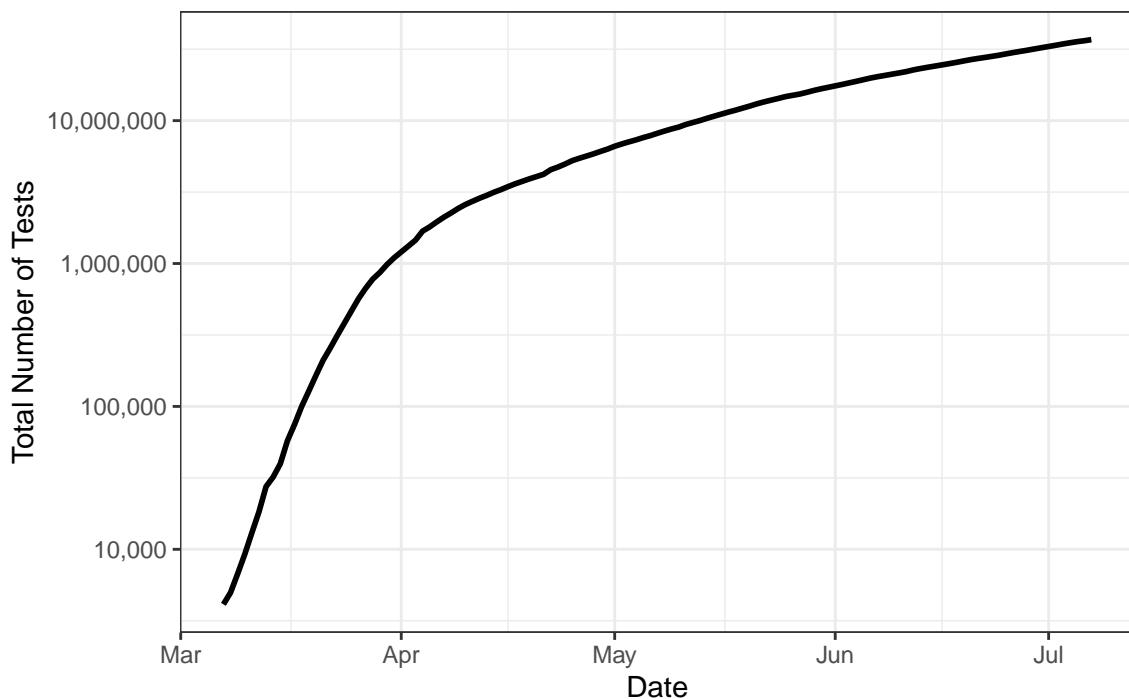

One-Week Change in Daily Cases

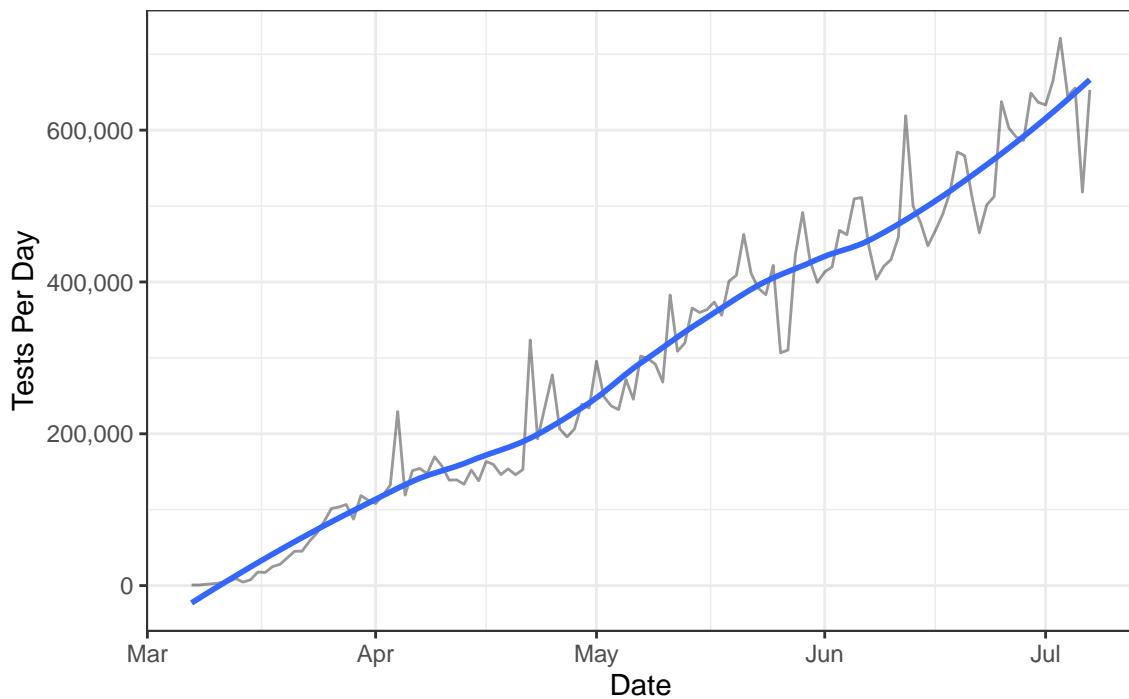

Testing

Widespread testing is necessary for managing the spread of the disease. The following charts show how testing in the United States has changed over time. When the supply of available tests is limited, they are typically only used for patients whose symptoms suggest they are likely to have contracted the virus. A high positive test rate indicates that testing capacity is constrained.

State Data

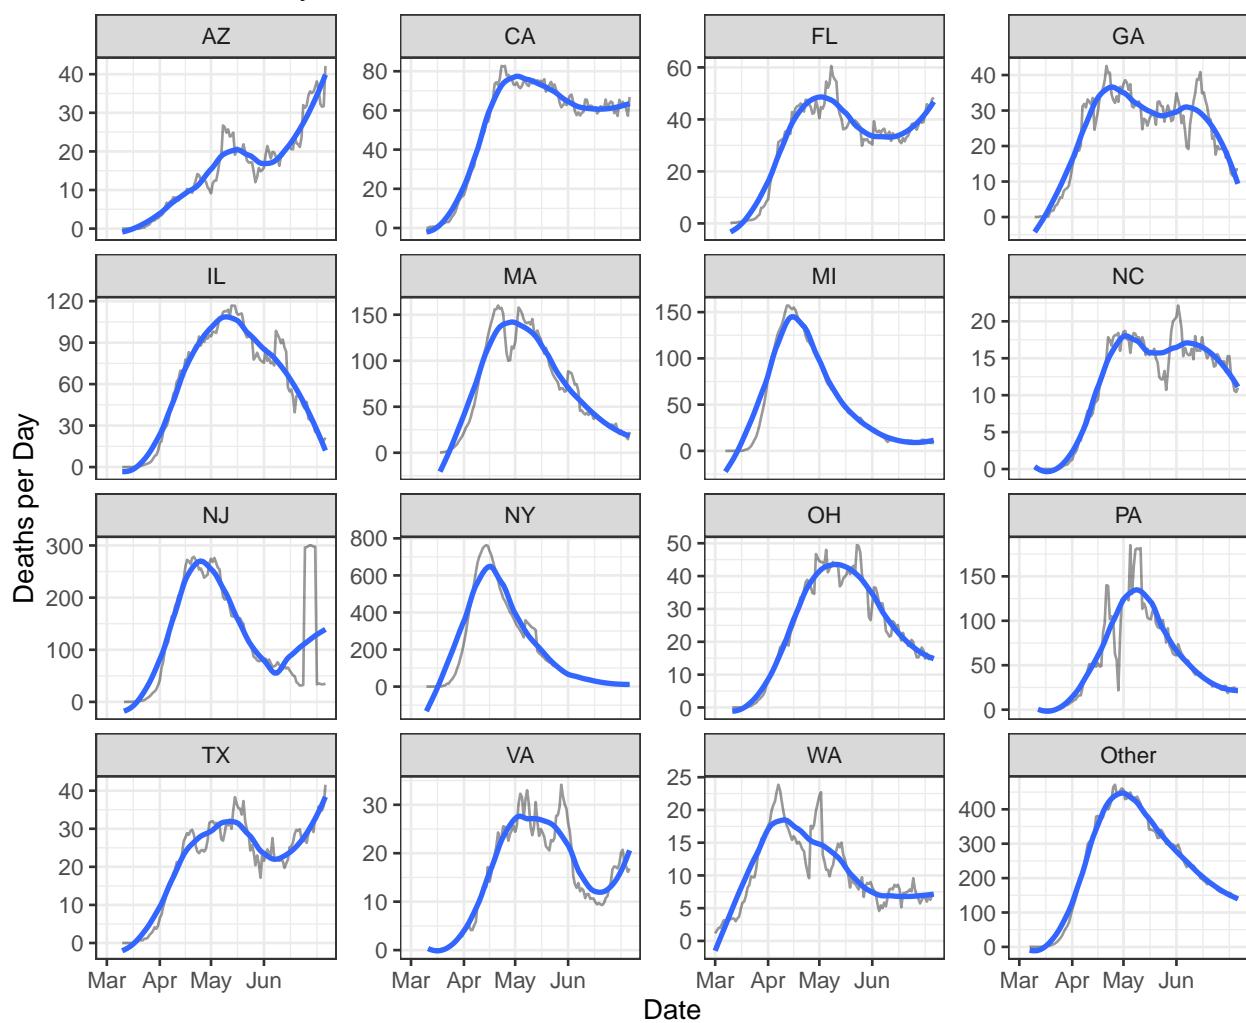

This section summarizes state-level data. Most data are reported for the largest 15 states by population, which account for NaN percent of the total U.S. population.

Testing

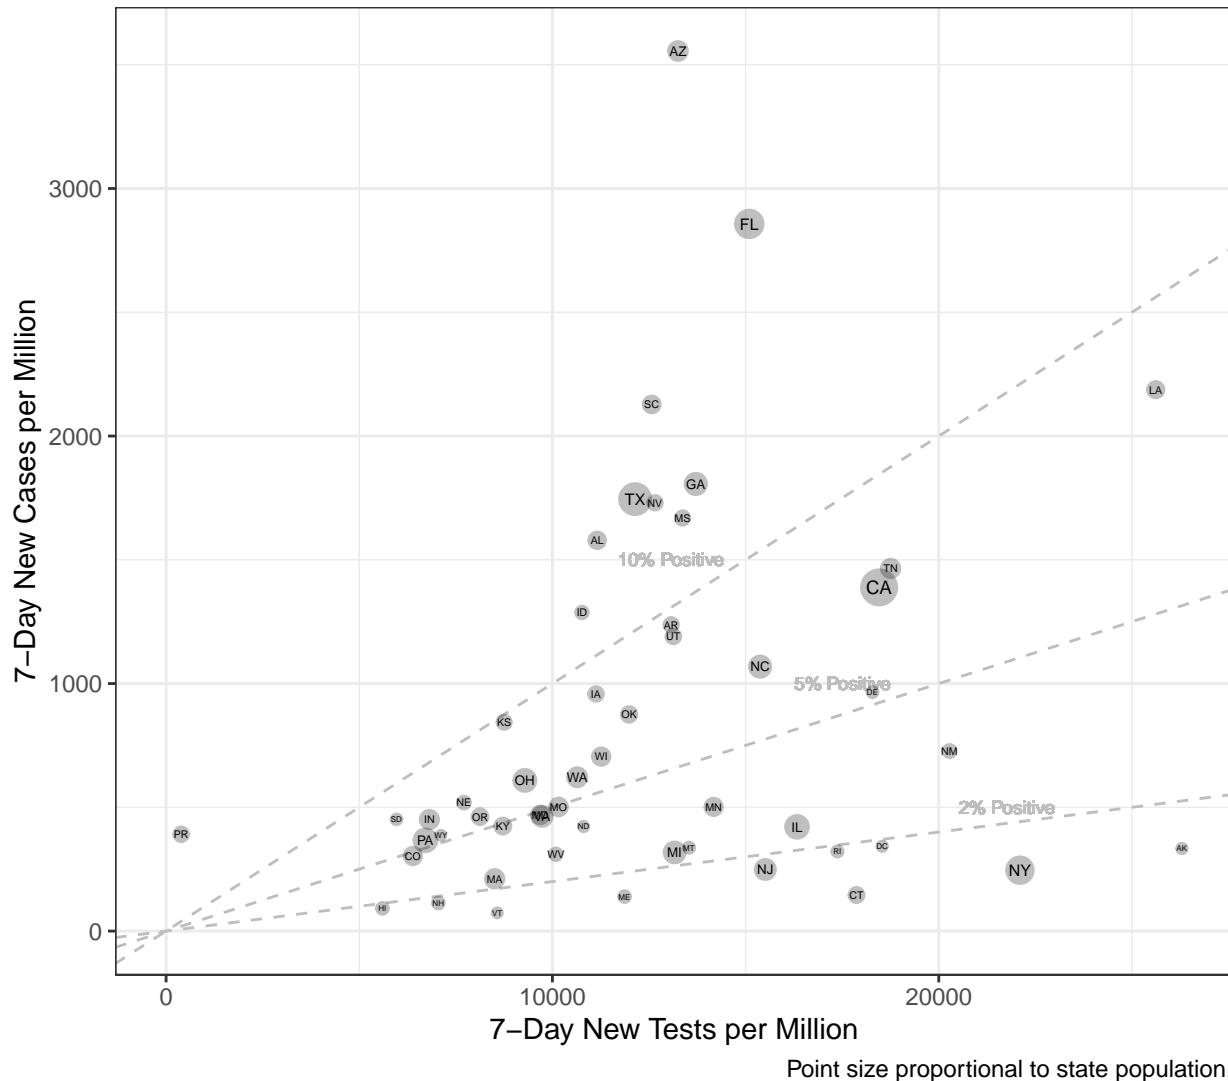

New Tests by State

Interpretation of differences in case rates across states is complicated by the fact that those states that do more thorough testing will invariably uncover more cases. A lower positive test rate is an indication that a state is doing more comprehensive testing since, when testing is rationed, only those individuals who are more likely to test positive are typically tested. The following chart compares the one-week increase in detected cases to the number of tests administered by each state relative to population. The states of greatest current concern are those with both a large increase in detected cases and a relatively small increase in tests. These states lie in the upper-left of the chart.

Tests vs. Cases by State

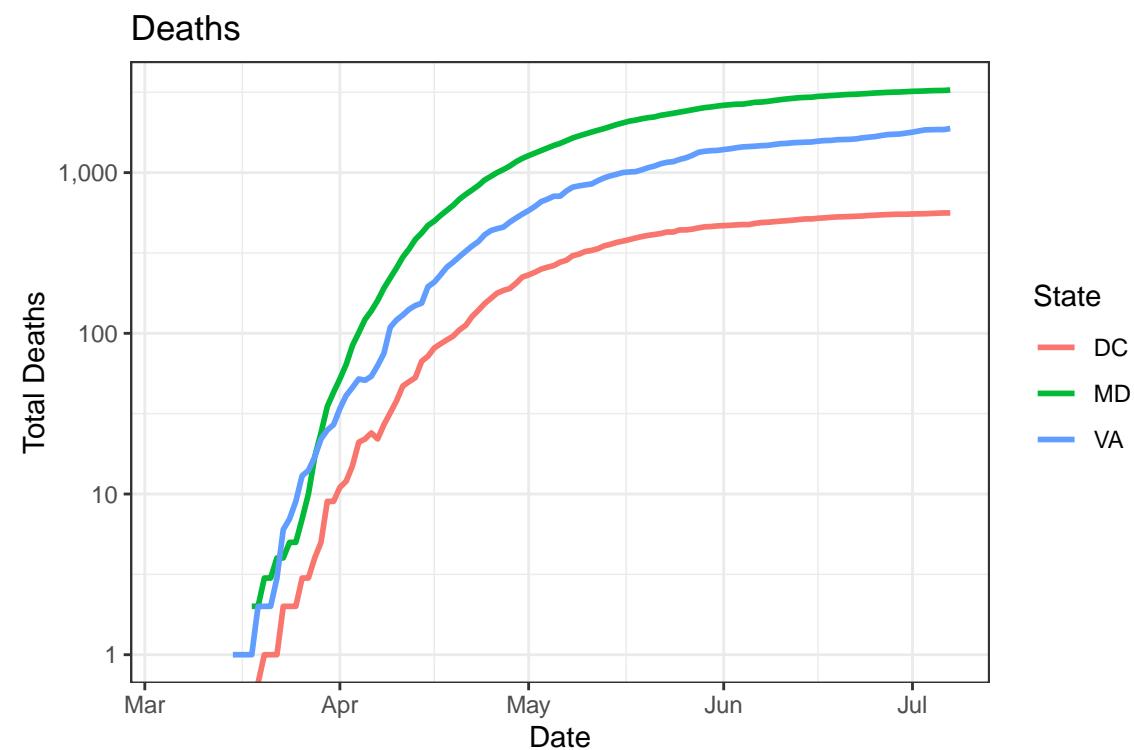

Local Data

The following charts and tables present mortality, case, and testing data for the Washington DC metropolitan area and adjacent states.

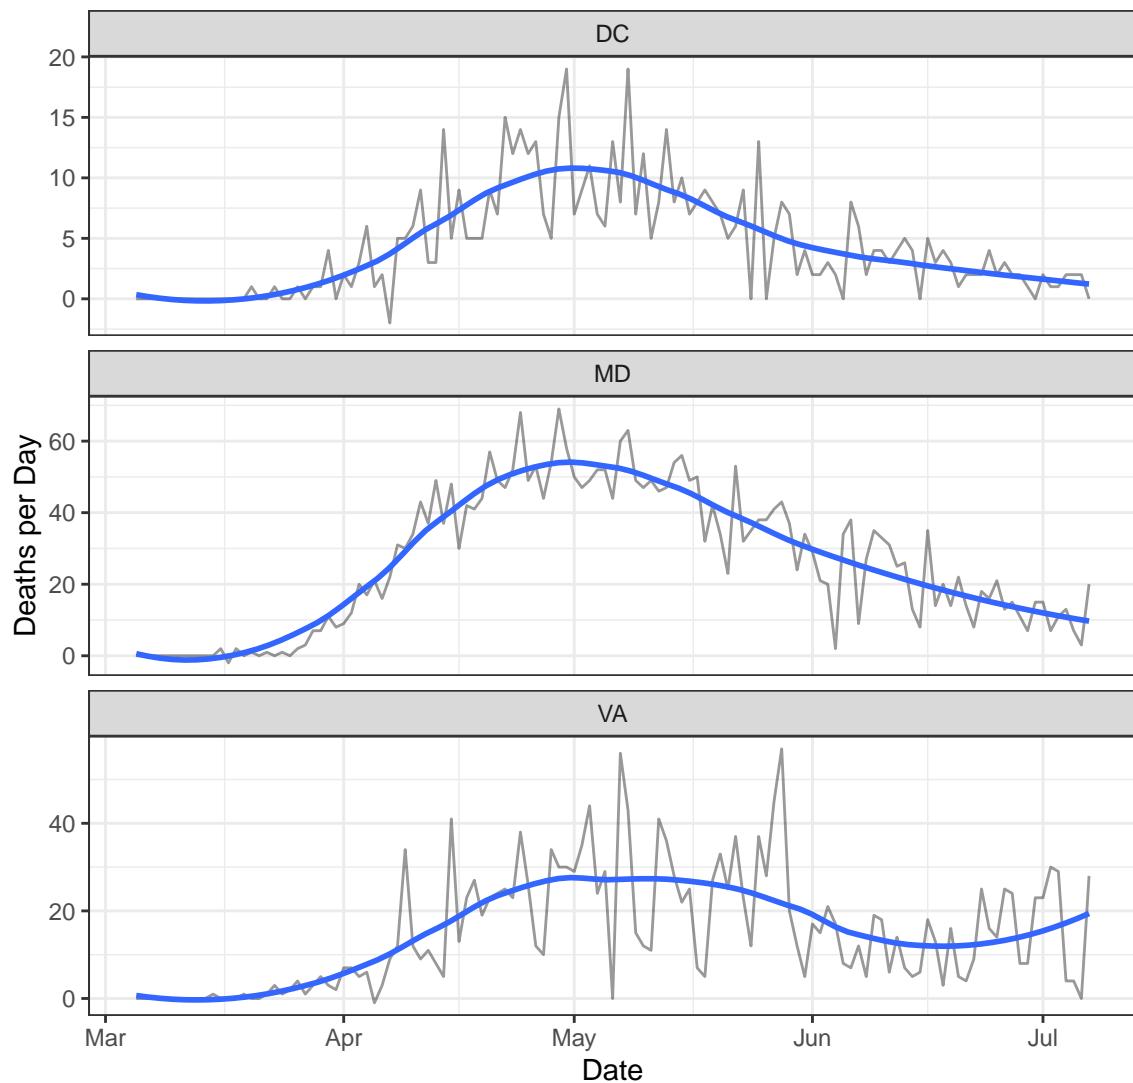

Table 3: Latest Local Data

State	Cases	Deaths	New Cases	New Deaths
DC	10,569	561	54	0
MD	70,396	3,266	492	20
VA	66,740	1,881	638	28
