

Erik's Covid-19 Chart Pack

Data updated 2020-07-21 18:52:08. World data are from Worldometers. National and state-level mortality, case, and testing data are from Johns-Hopkins University. County and city-level mortality and case data are from the New York Times. Most data presented in this report were accessed through APIs provided by The COVID Tracking Project and NovelCOVID API.

World Data

There have been 14,845,960 confirmed Covid-19 cases and 612,816 deaths worldwide.

Deaths

Cases

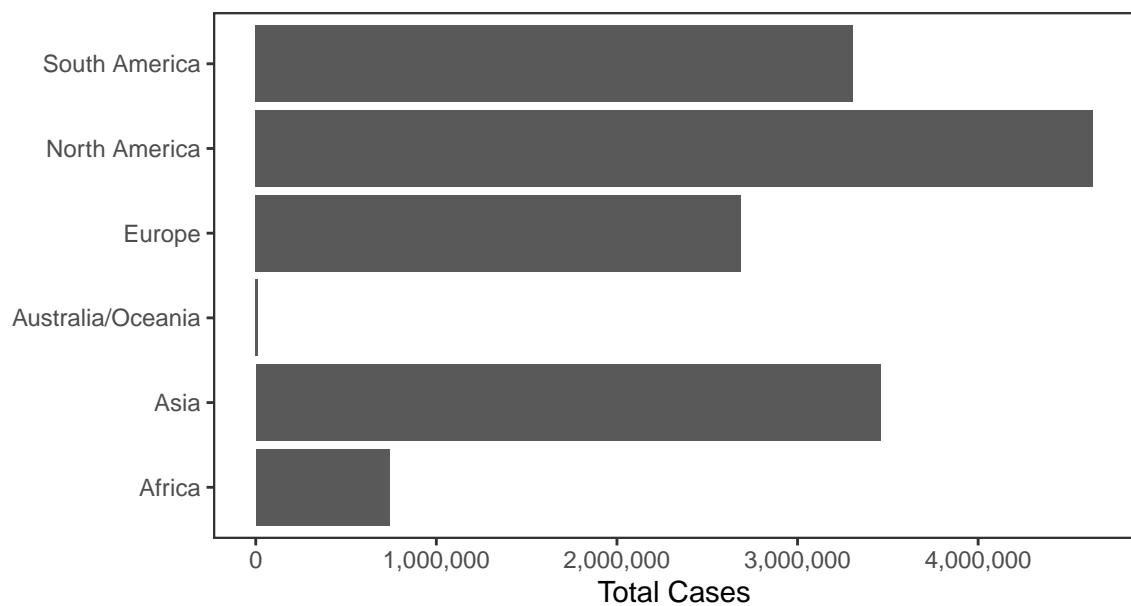

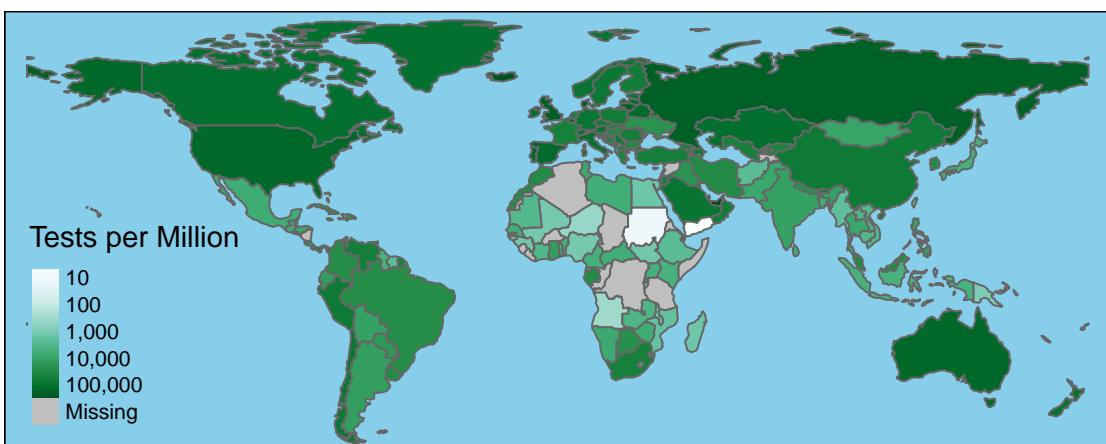

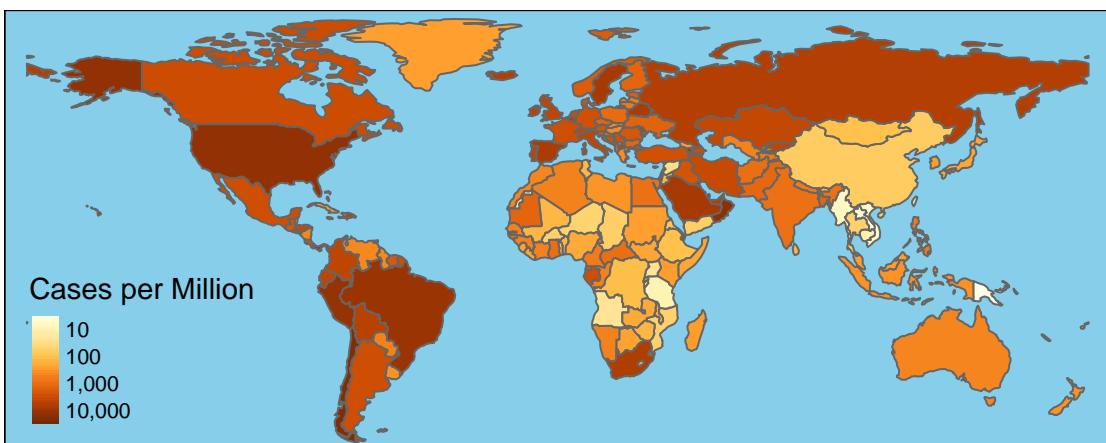

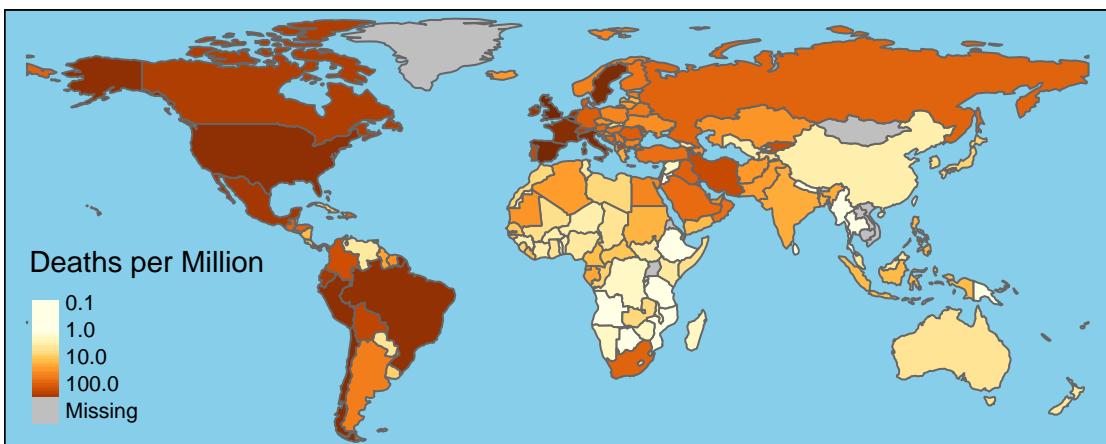

Table 1: Top Countries by Total Cases

Country	Cases	Deaths	New Cases	New Deaths
USA	3,961,429	143,834	62,879	545
Brazil	2,121,645	80,251	21,749	718
India	1,154,917	28,099	36,810	596
Russia	777,486	12,427	5,940	85
South Africa	373,628	5,173	9,300	140
Peru	357,681	13,384	4,091	197
Mexico	344,224	39,184	5,311	296
Chile	333,029	8,633	2,099	130
Spain	311,916	28,422	1,527	2
UK	295,372	45,312	580	12
Iran	276,202	14,405	2,414	217
Pakistan	265,083	5,599	1,587	31
Saudi Arabia	253,349	2,523	2,429	37
Italy	244,624	35,058	190	13
Turkey	220,572	5,508	931	17
Bangladesh	207,453	2,668	2,928	50
Colombia	204,005	6,929	6,727	193
Germany	203,487	9,173	642	10
France	176,754	30,152	350	8
Argentina	130,774	2,373	4,019	113

National Data

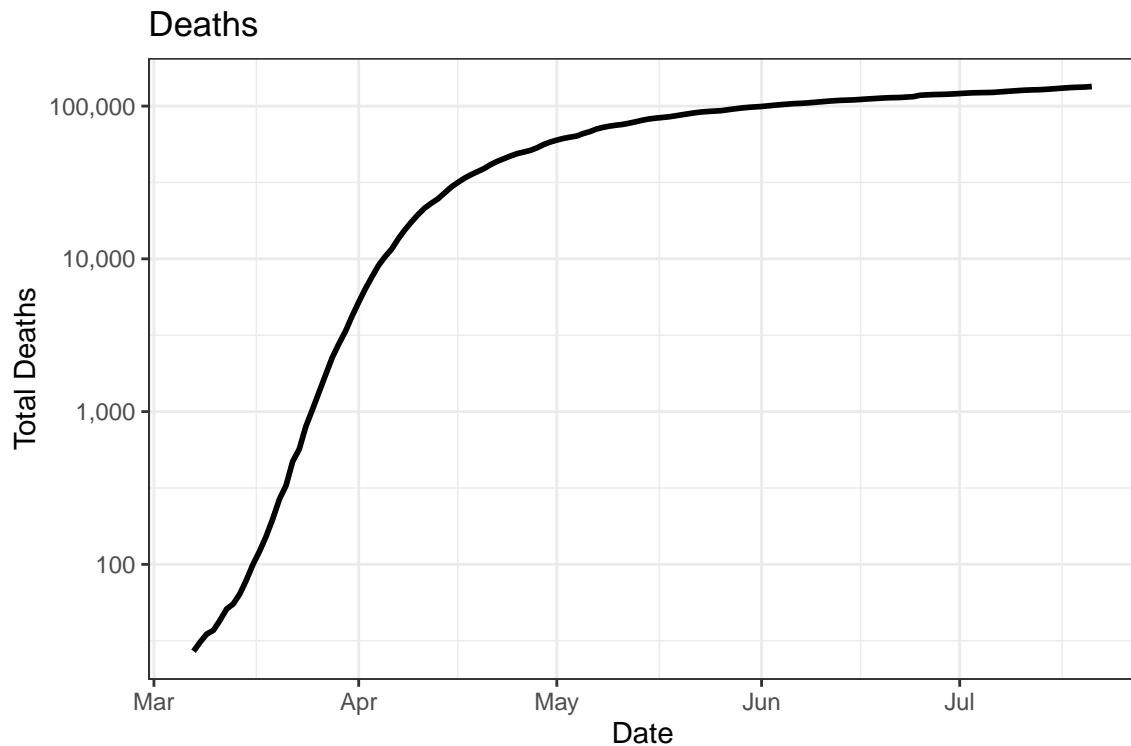

There have been 3,876,665 confirmed Covid-19 cases and 134,312 deaths in the United States.

Table 2: U.S. Deaths and Cases over the Last Two Weeks

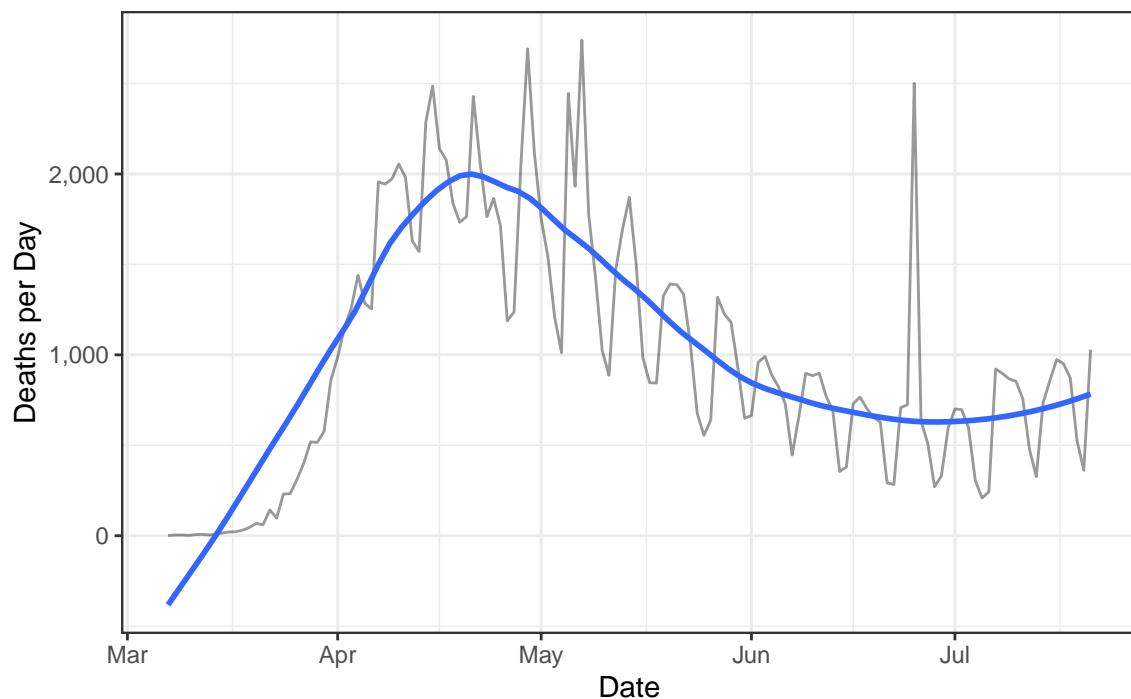

Date	Cases	Deaths	New Cases	New Deaths
2020-07-21	3,876,665	134,312	62,749	1,029
2020-07-20	3,813,916	133,283	56,971	362
2020-07-19	3,756,945	132,921	64,884	526
2020-07-18	3,692,061	132,395	65,180	872
2020-07-17	3,626,881	131,523	77,233	951
2020-07-16	3,549,648	130,572	70,953	974
2020-07-15	3,478,695	129,598	65,382	858
2020-07-14	3,413,313	128,740	62,879	736
2020-07-13	3,350,434	128,004	58,465	327
2020-07-12	3,291,969	127,677	60,978	476
2020-07-11	3,230,991	127,201	63,007	757
2020-07-10	3,167,984	126,444	66,645	854
2020-07-09	3,101,339	125,590	58,836	867
2020-07-08	3,042,503	124,723	62,147	897

Deaths

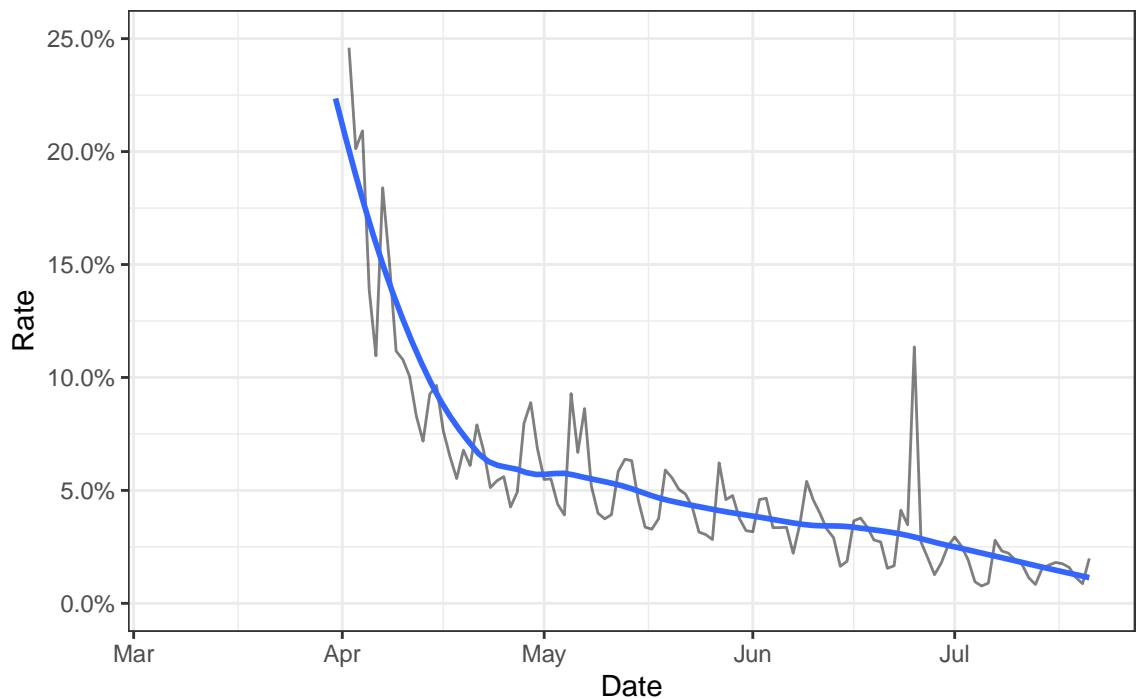

Because the effects of the virus can take several weeks to manifest in patients, deaths are a lagging indicator of contagion, but they may be a more reliable than case counts, which are a function of both the prevalence of the disease and the rate of testing. The case mortality rate is a very crude indicator of lethality because a large numbers of non-lethal cases are likely never detected. A declining case mortality rate is indicative of more widespread testing.

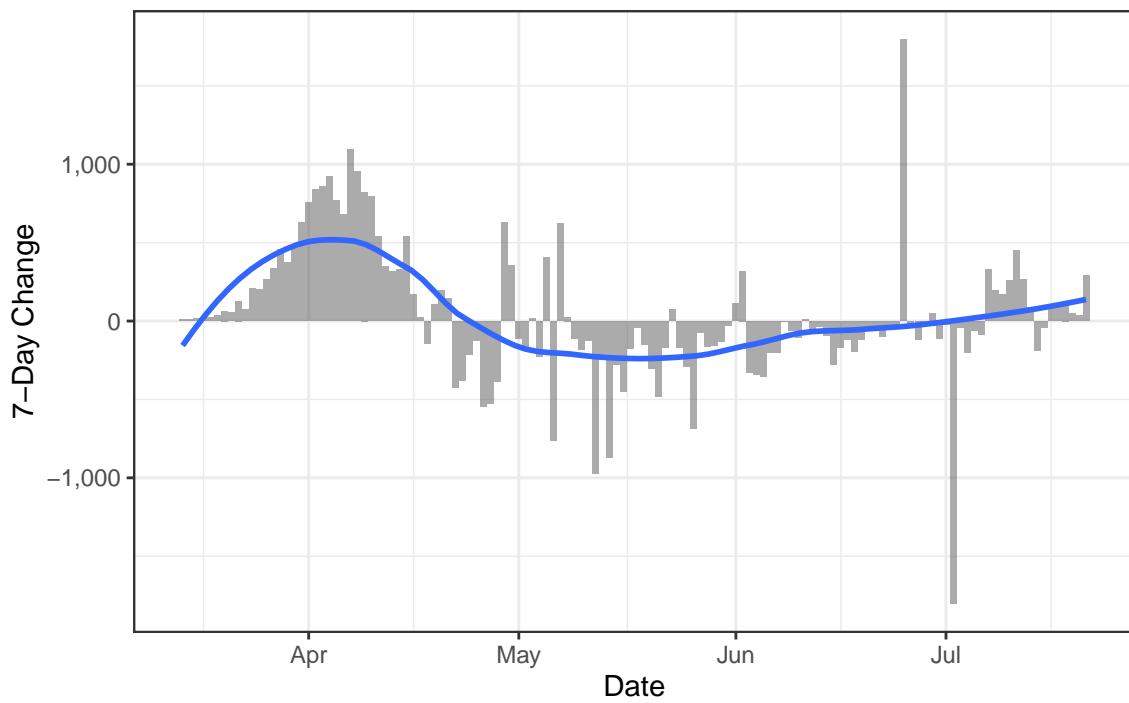

New Deaths

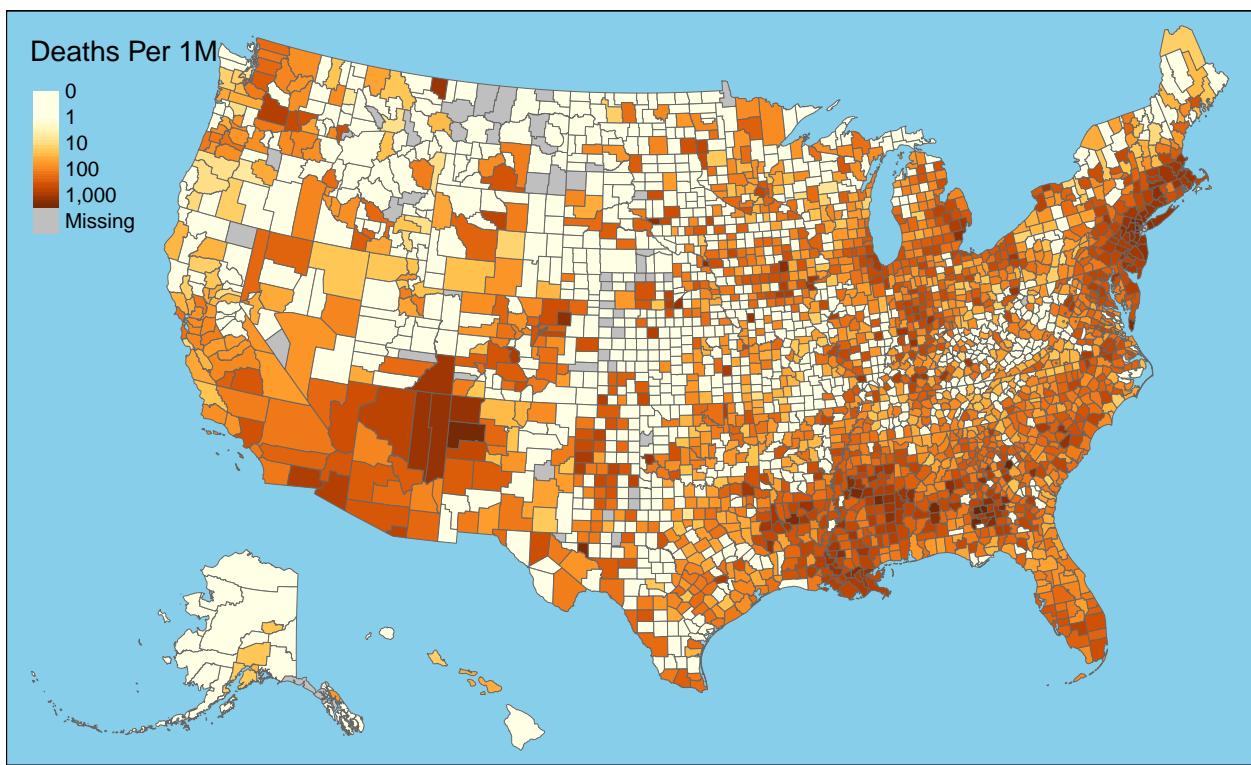

Daily Case Mortality Rate

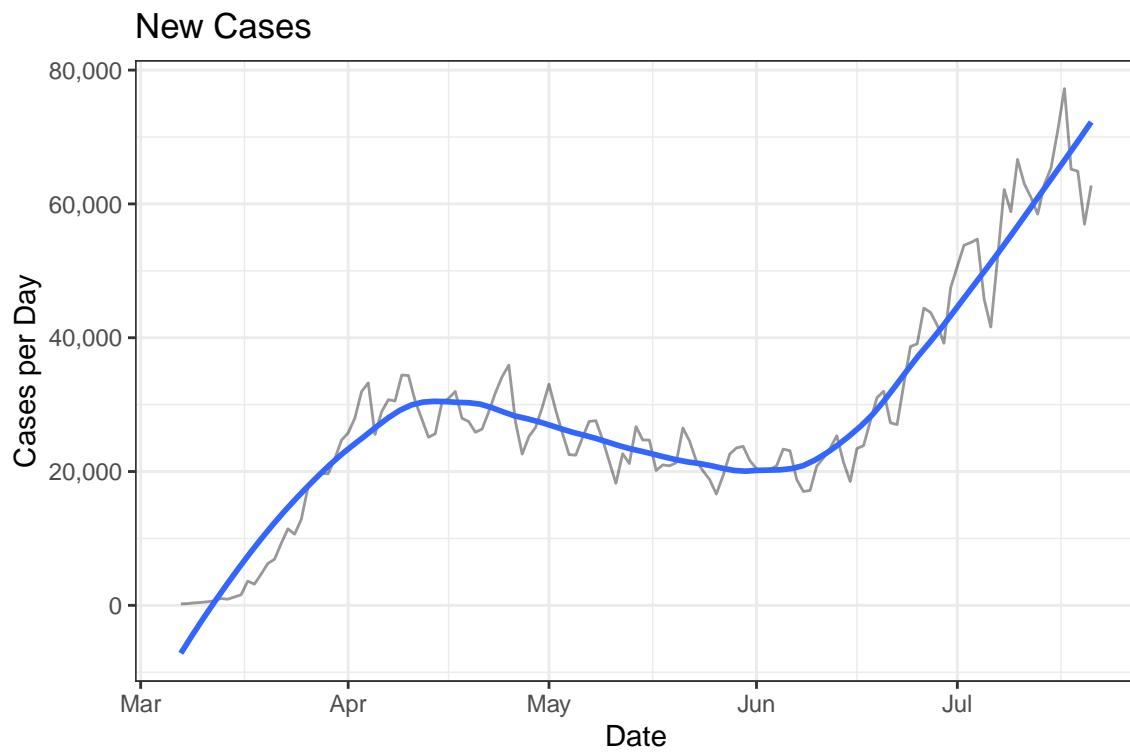

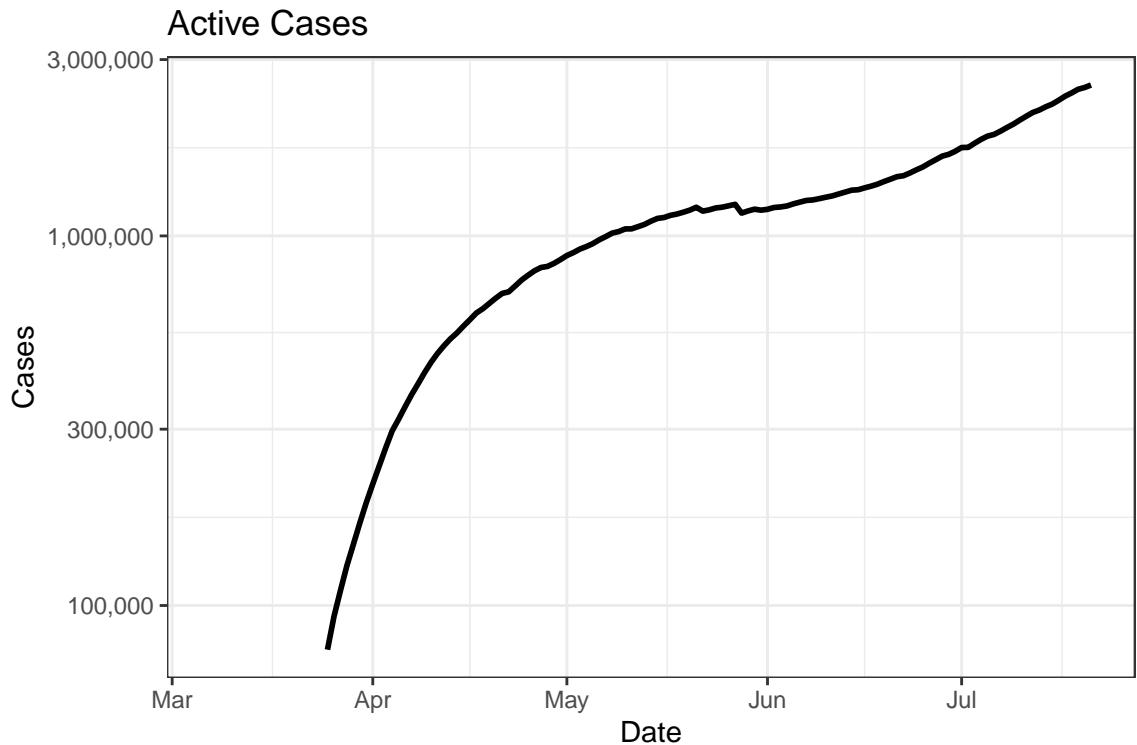

One-Week Change in Daily Deaths

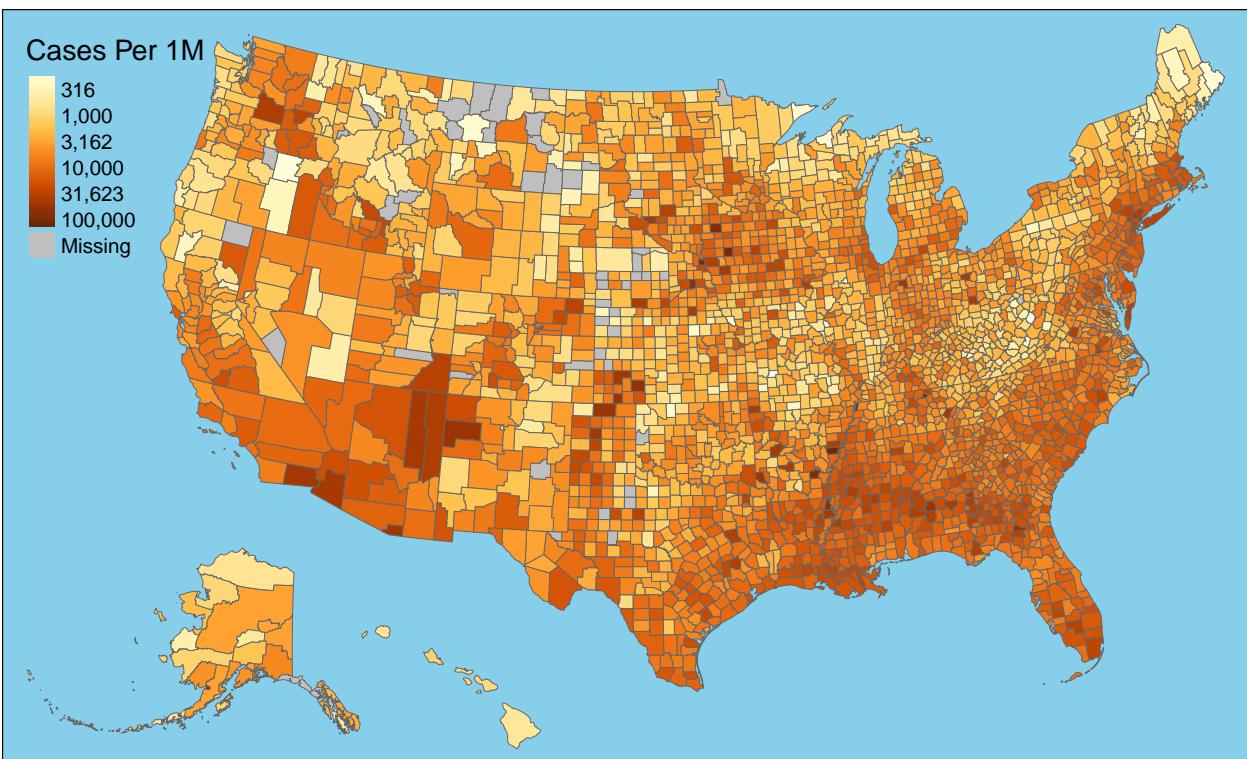

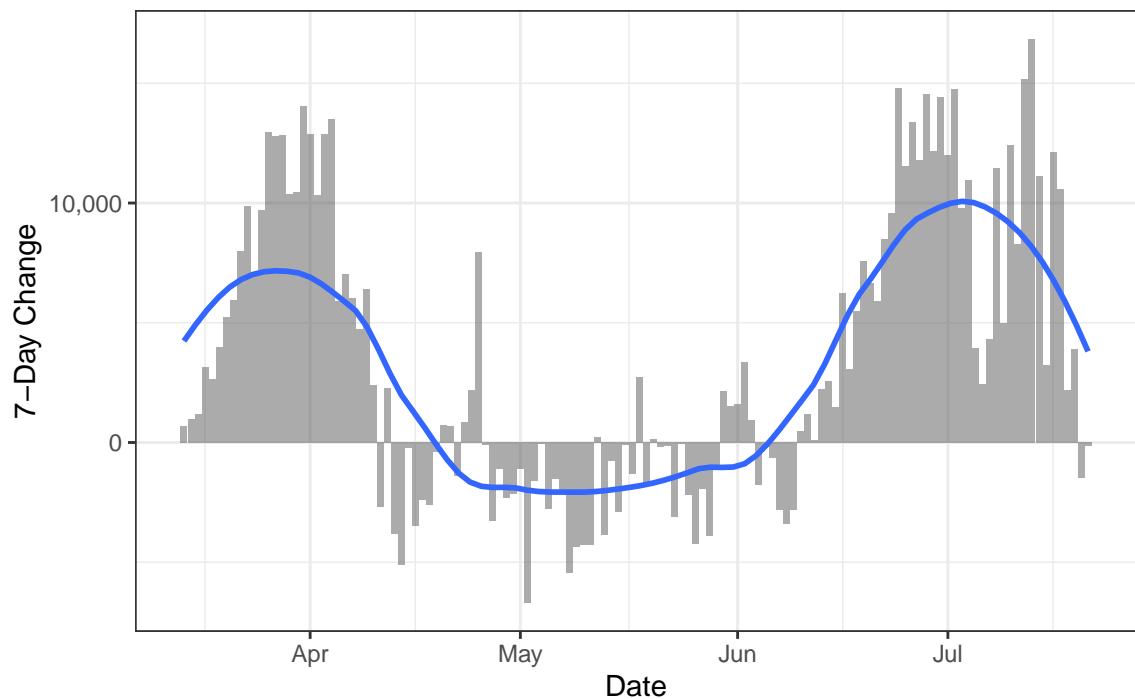

Cases

Reported cases are a function of both the spread of the disease and the prevalence of testing.

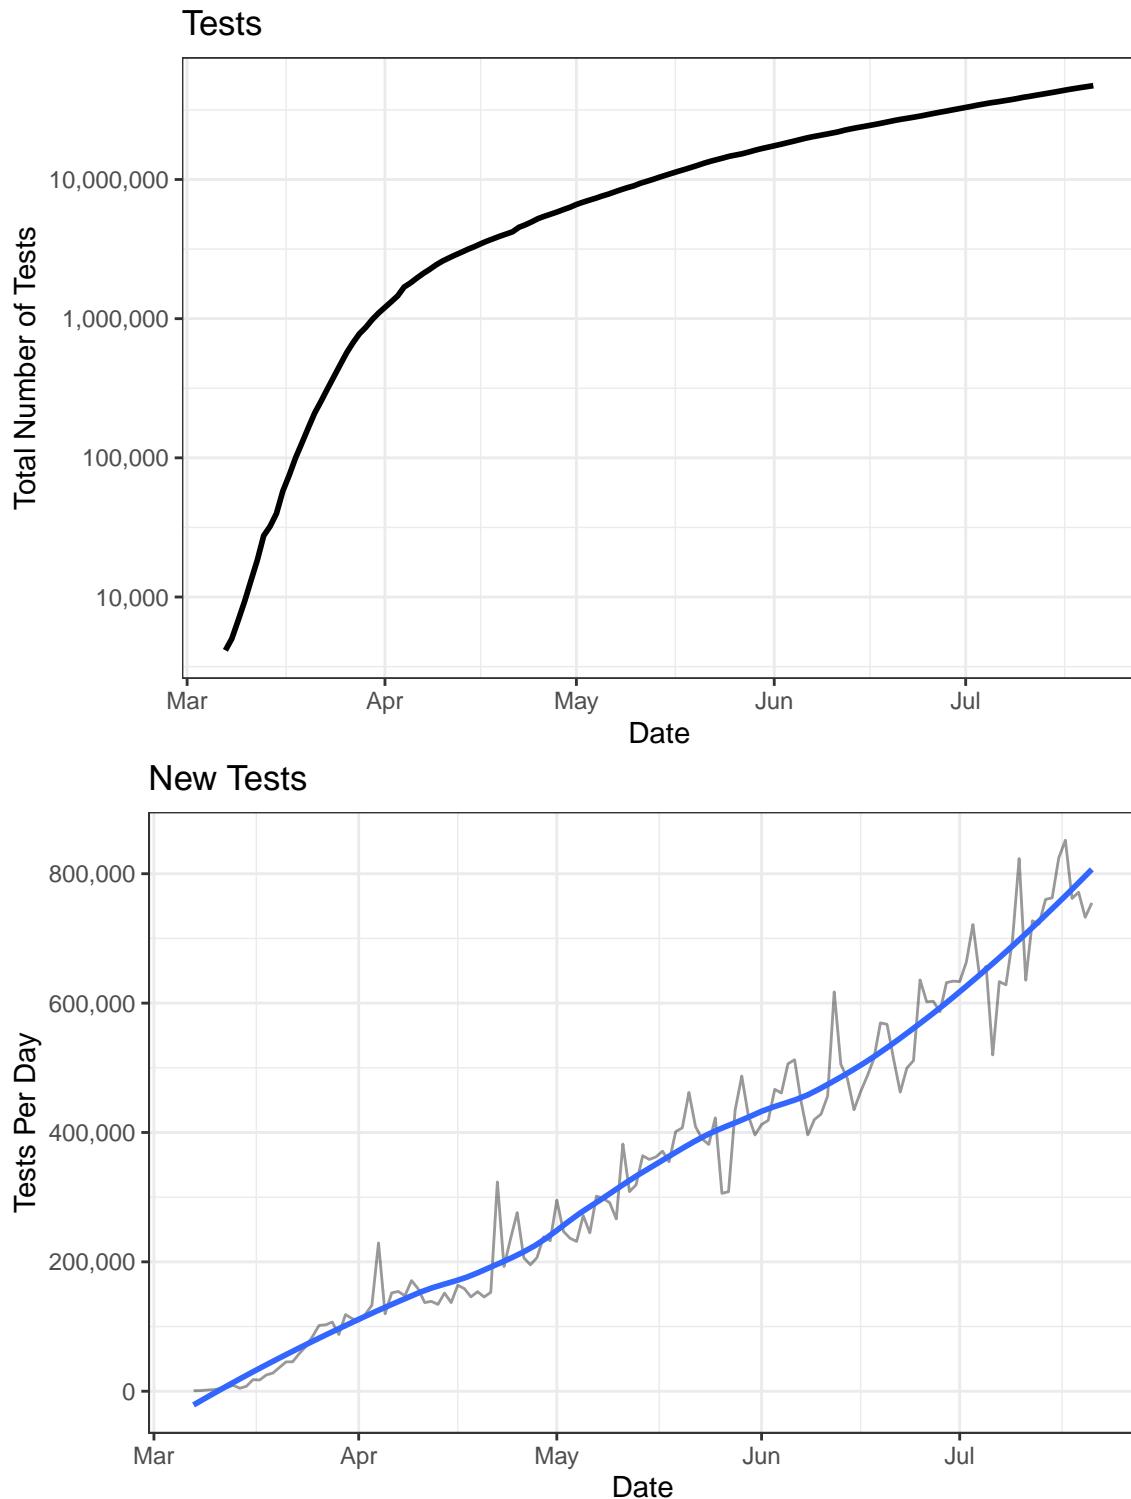

One-Week Change in Daily Cases

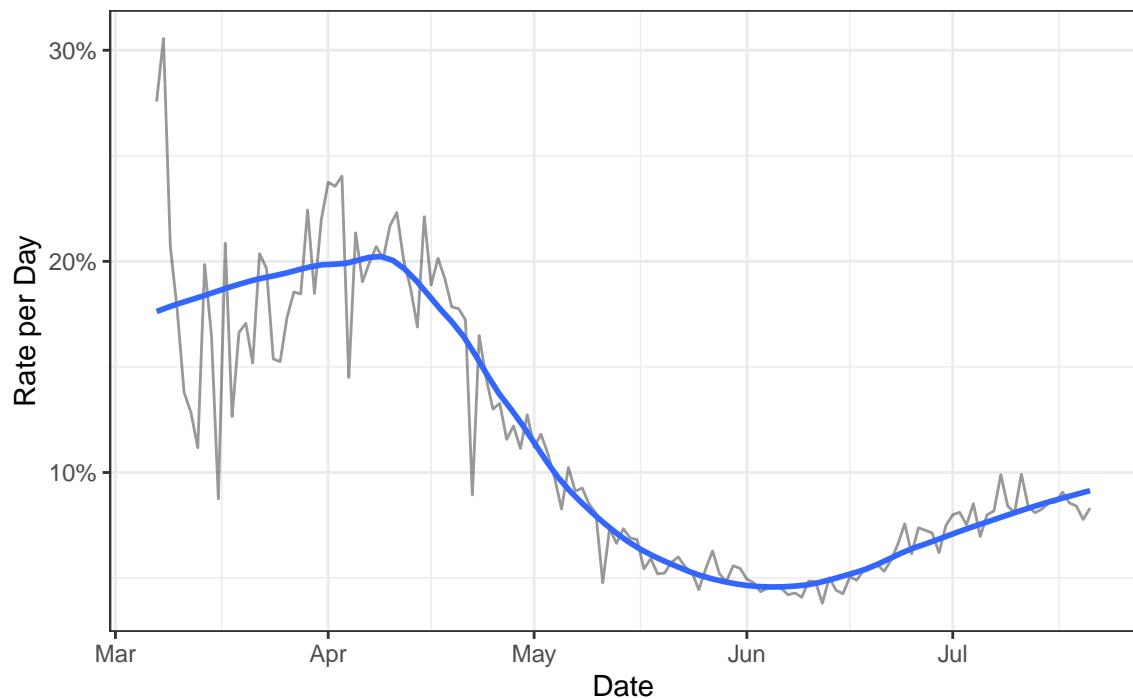

Testing

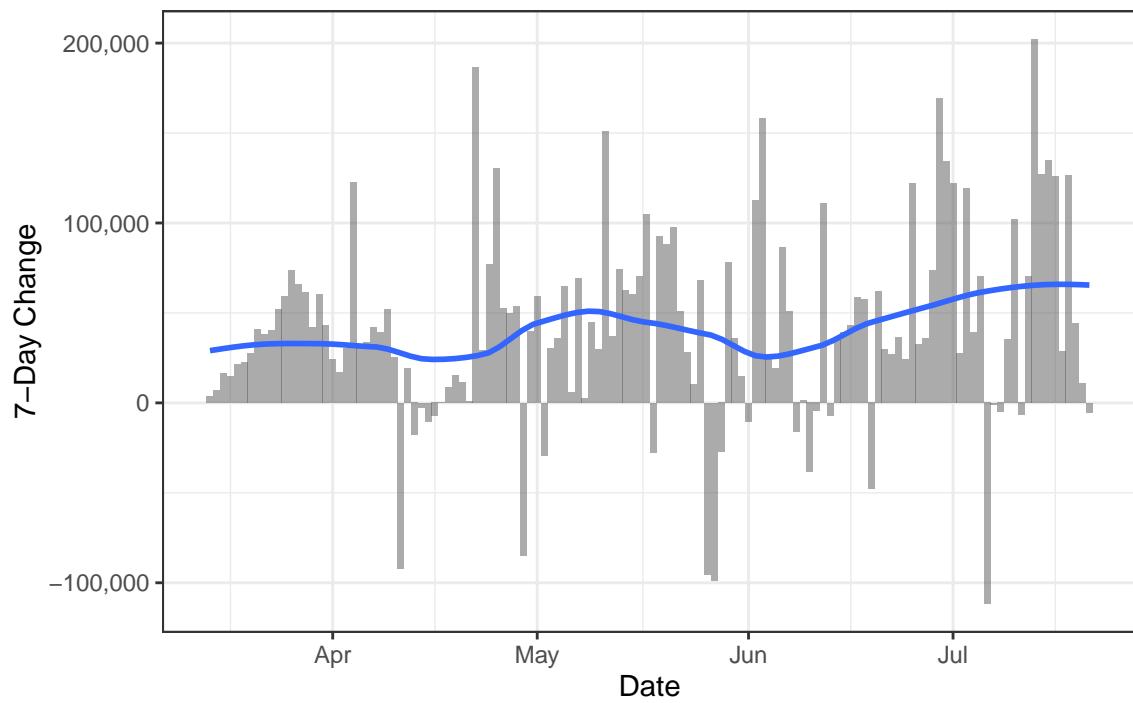

Widespread testing is necessary for managing the spread of the disease. The following charts show how testing in the United States has changed over time. When the supply of available tests is limited, they are typically only used for patients whose symptoms suggest they are likely to have contracted the virus. A high positive test rate indicates that testing capacity is constrained.

Positive Test Rate

One-Week Change in Daily Tests

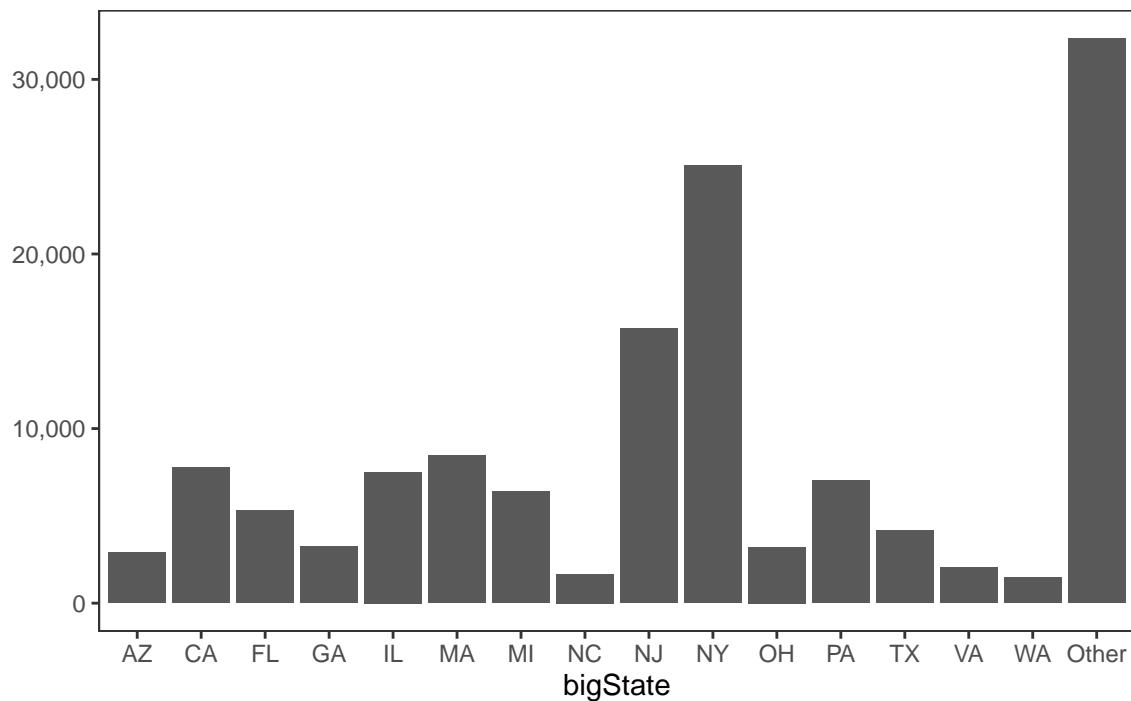

State Data

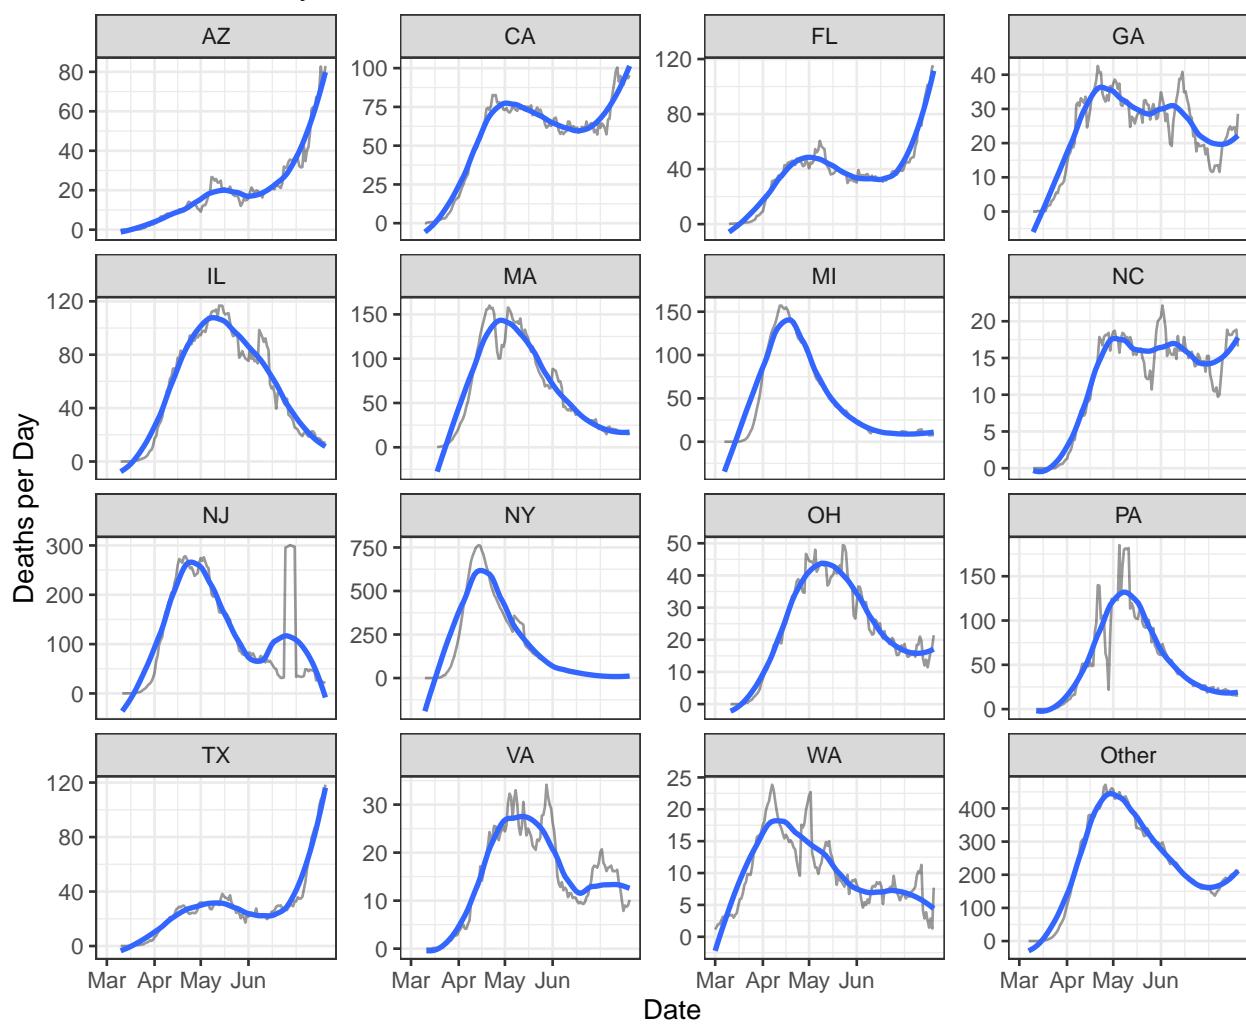

This section summarizes state-level data. Most data are reported for the largest 15 states by population, which account for NaN percent of the total U.S. population.

7-Day Change in Daily Cases

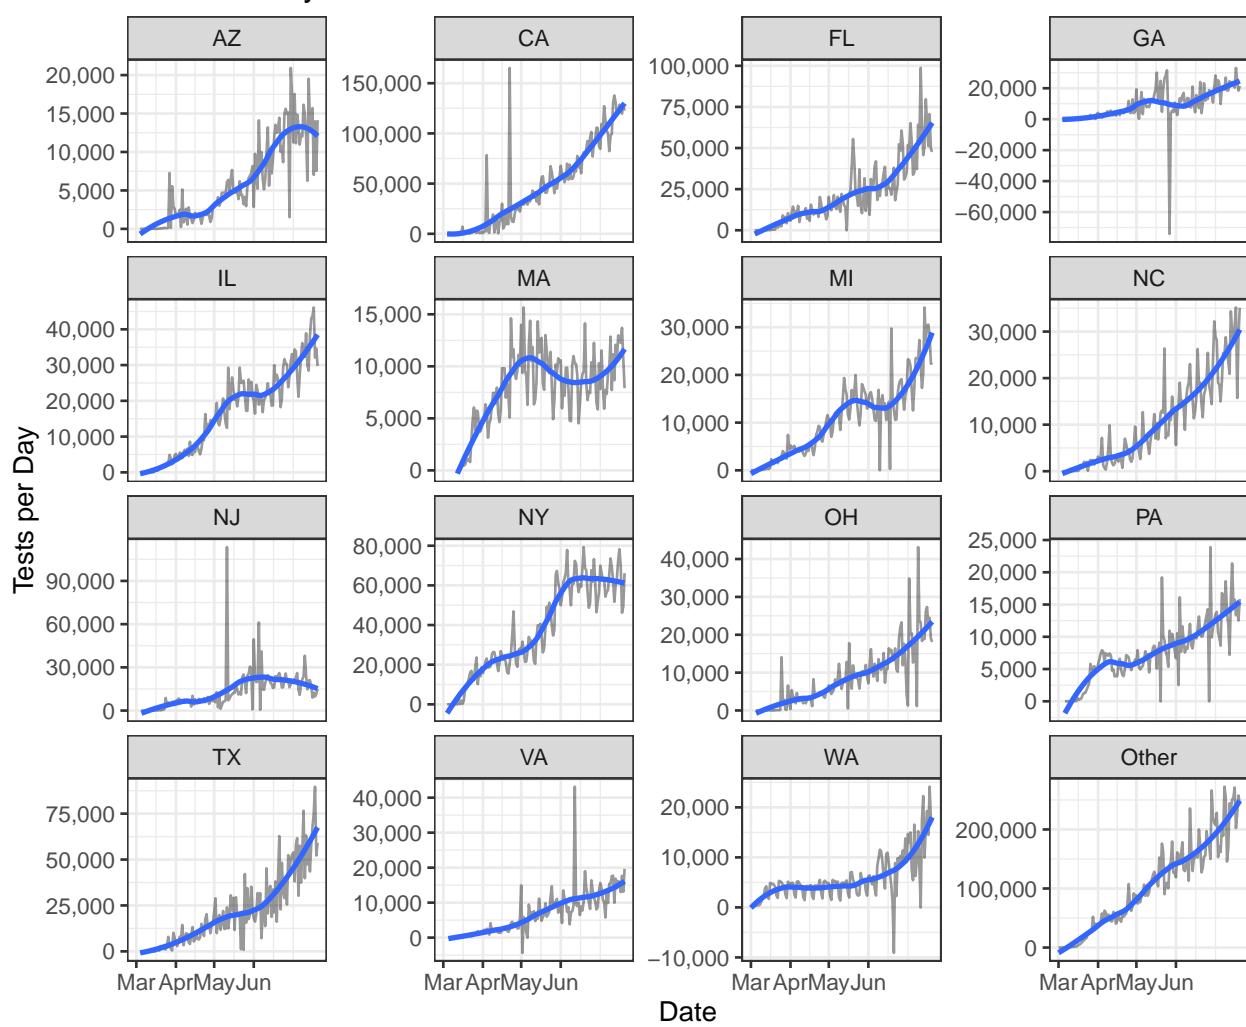

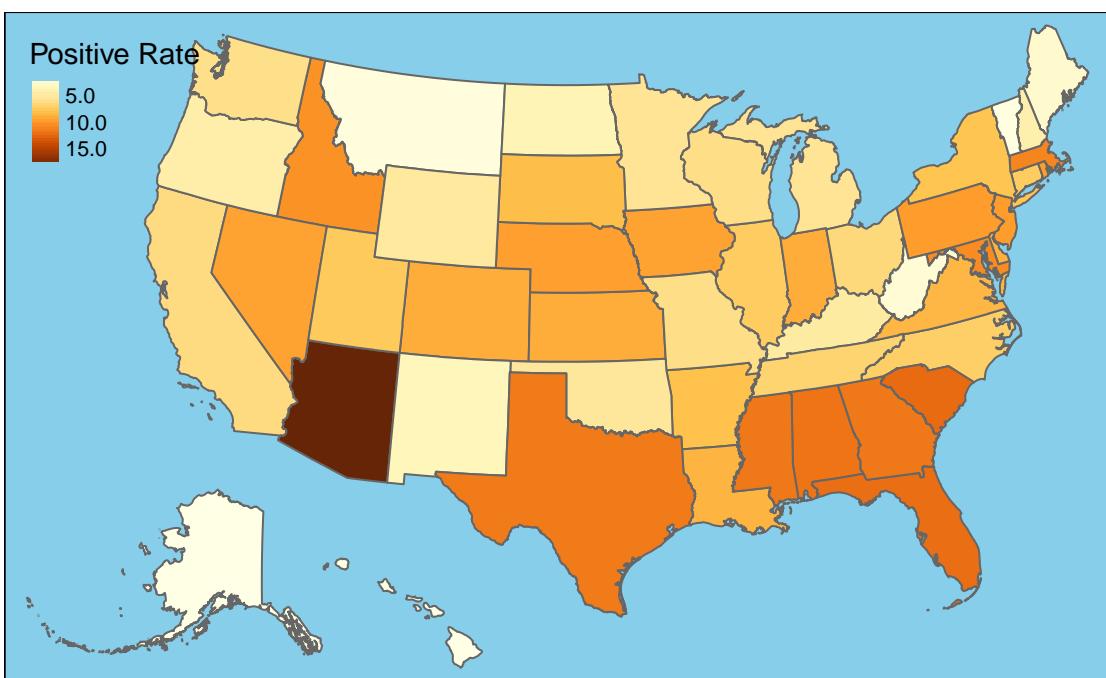

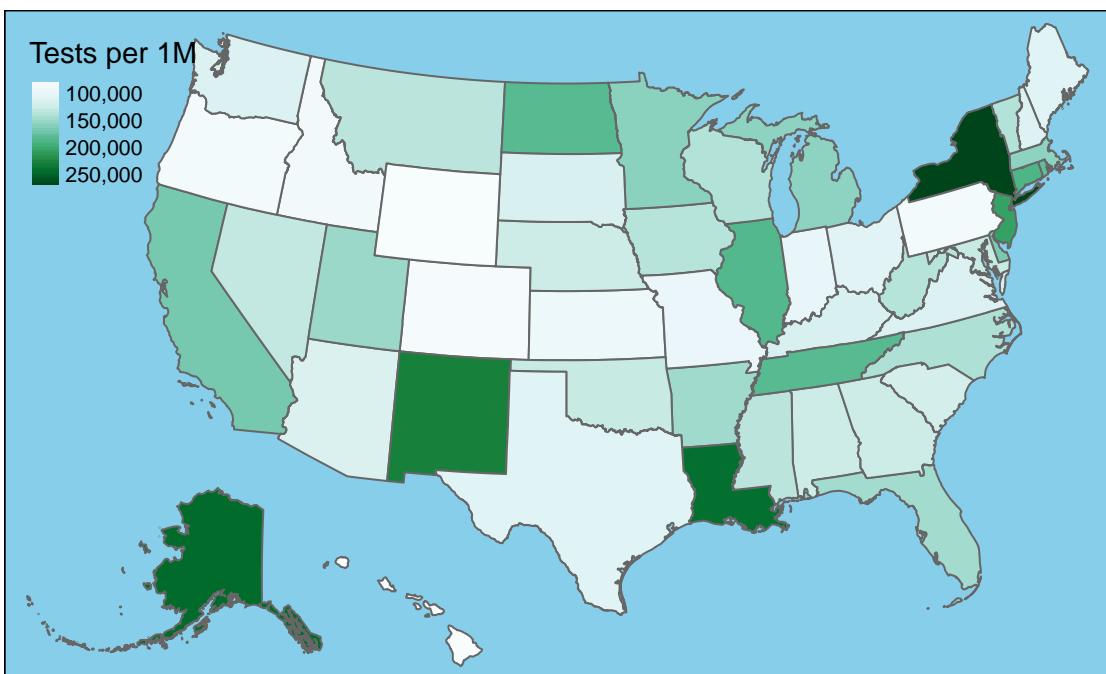

Testing

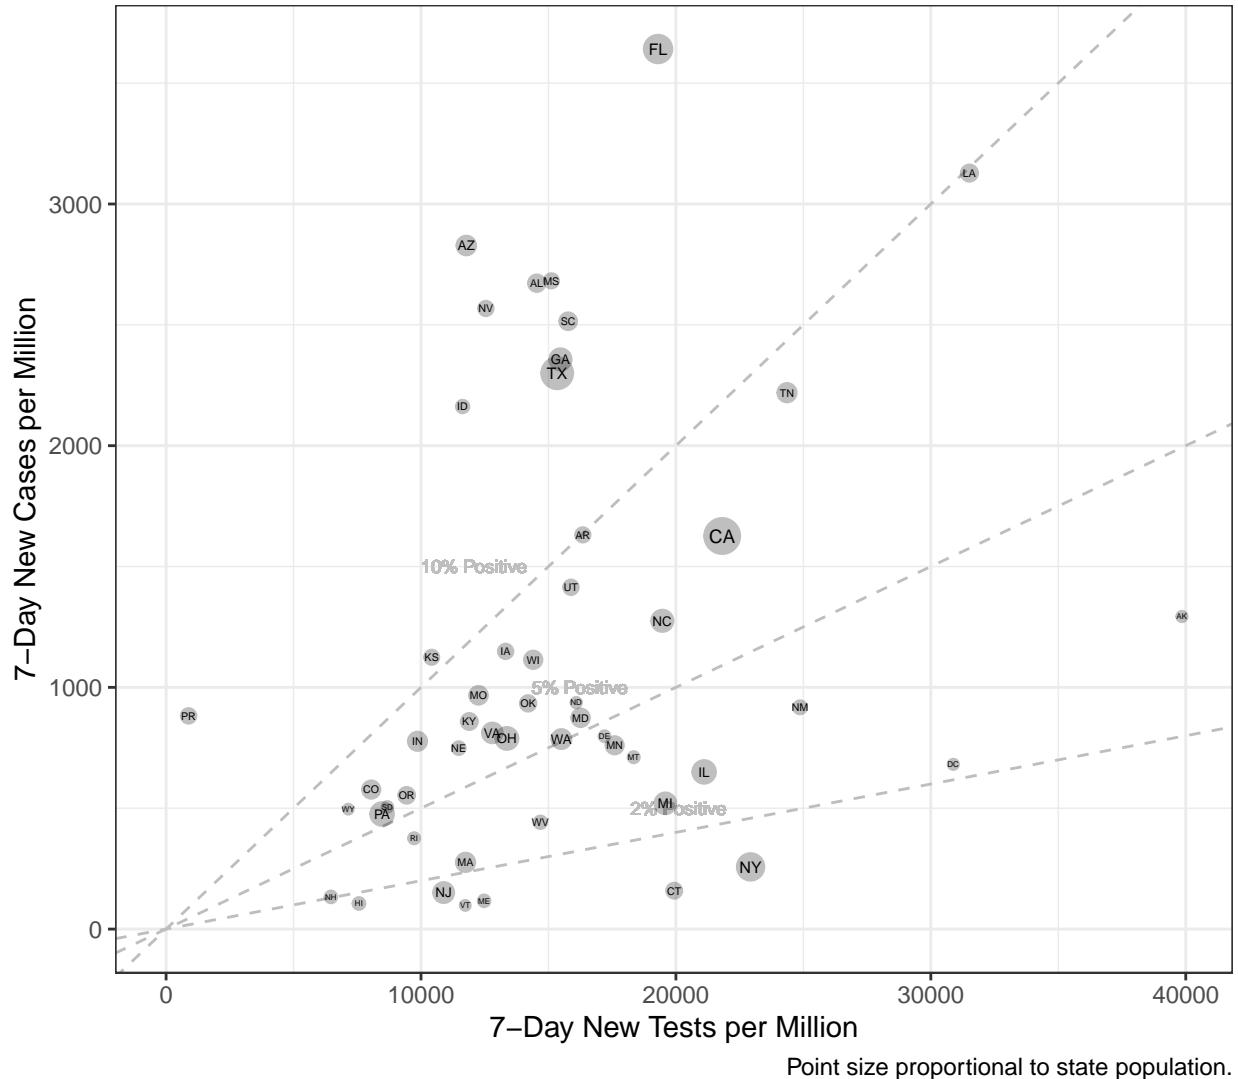

New Tests by State

Interpretation of differences in case rates across states is complicated by the fact that those states that do more thorough testing will invariably uncover more cases. A lower positive test rate is an indication that a state is doing more comprehensive testing since, when testing is rationed, only those individuals who are more likely to test positive are typically tested. The following chart compares the one-week increase in detected cases to the number of tests administered by each state relative to population. The states of greatest current concern are those with both a large increase in detected cases and a relatively small increase in tests. These states lie in the upper-left of the chart.

Tests vs. Cases by State

Point size proportional to state population.

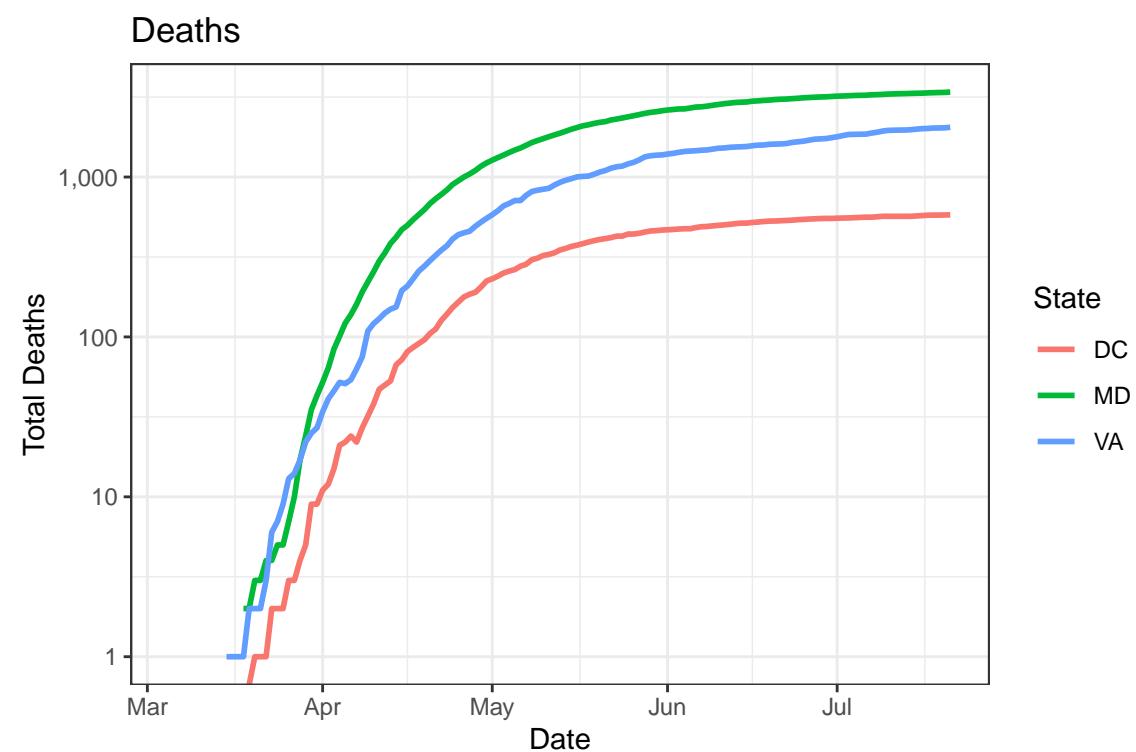

Local Data

The following charts and tables present mortality, case, and testing data for the Washington DC metropolitan area and adjacent states.

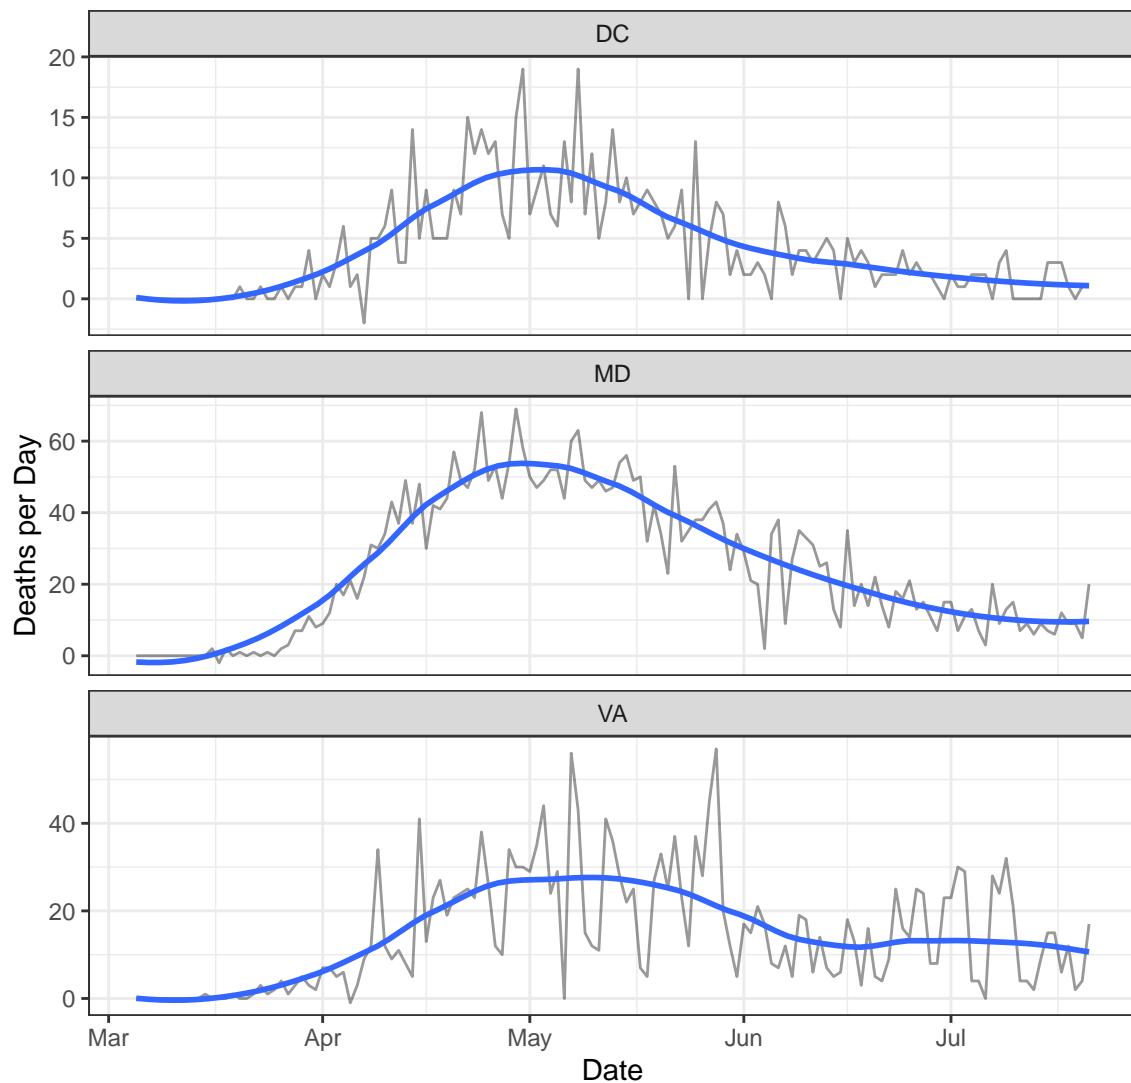

Table 3: Latest Local Data

State	Cases	Deaths	New Cases	New Deaths
DC	11,427	580	88	1
MD	79,545	3,402	860	20
VA	79,371	2,048	996	17
