

Erik's Covid-19 Chart Pack

Data updated 2020-07-23 19:23:41. World data are from Worldometers. National and state-level mortality, case, and testing data are from Johns-Hopkins University. County and city-level mortality and case data are from the New York Times. Most data presented in this report were accessed through APIs provided by The COVID Tracking Project and NovelCOVID API.

World Data

There have been 15,365,917 confirmed Covid-19 cases and 629,357 deaths worldwide.

Deaths

Cases

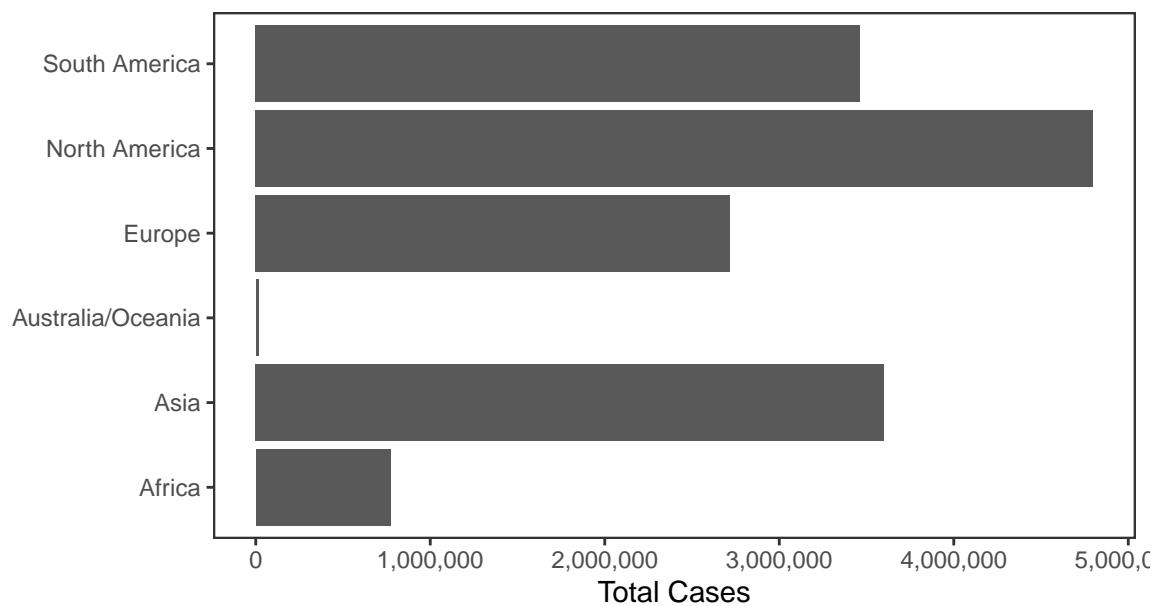

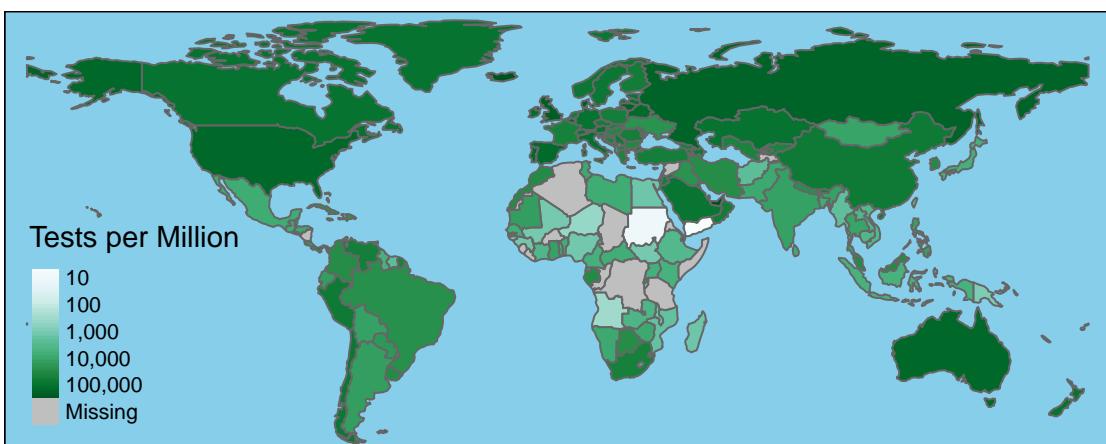

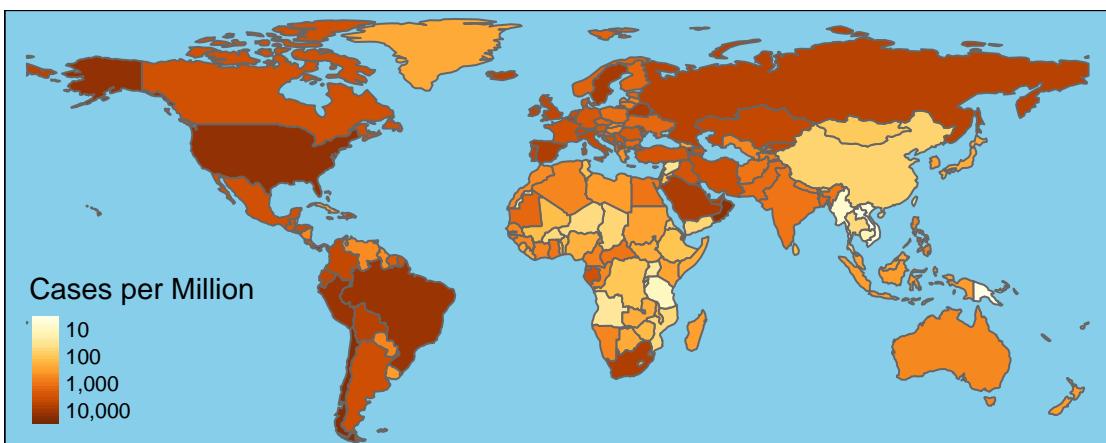

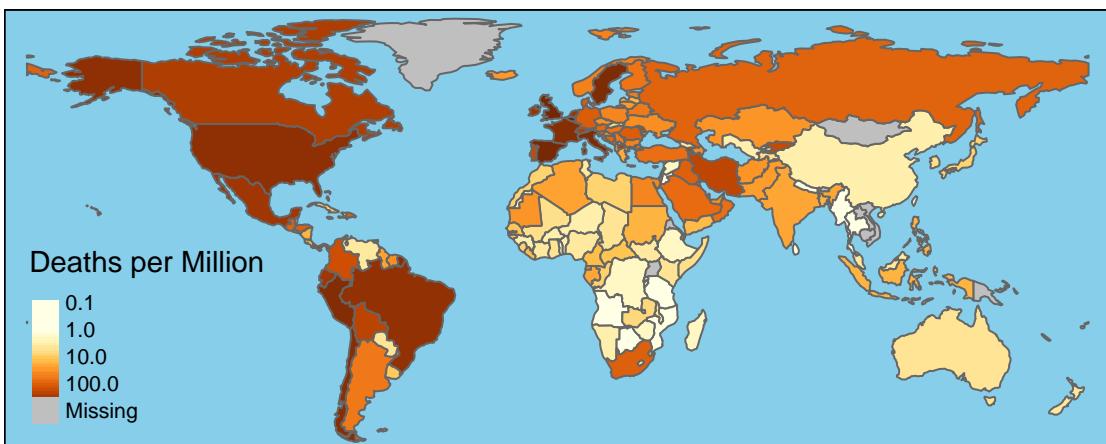

Table 1: Top Countries by Total Cases

Country	Cases	Deaths	New Cases	New Deaths
USA	4,100,875	146,183	71,967	1,205
Brazil	2,231,871	82,890	65,339	1,293
India	1,239,684	29,890	45,599	1,120
Russia	789,190	12,745	5,862	165
South Africa	394,948	5,940	13,150	572
Peru	366,550	17,455	4,463	188
Mexico	356,255	40,400	6,859	915
Chile	336,402	8,722	1,719	45
Spain	314,631	28,426	1,357	2
UK	296,377	45,501	560	79
Iran	281,413	14,853	2,586	219
Pakistan	267,428	5,677	1,332	38
Saudi Arabia	258,156	2,601	2,331	44
Italy	245,032	35,082	280	9
Turkey	222,402	5,545	902	19
Colombia	218,428	7,373	7,390	207
Bangladesh	213,254	2,751	2,744	42
Germany	204,470	9,182	580	2
France	178,336	30,172	998	7
Argentina	141,900	2,588	5,782	98

National Data

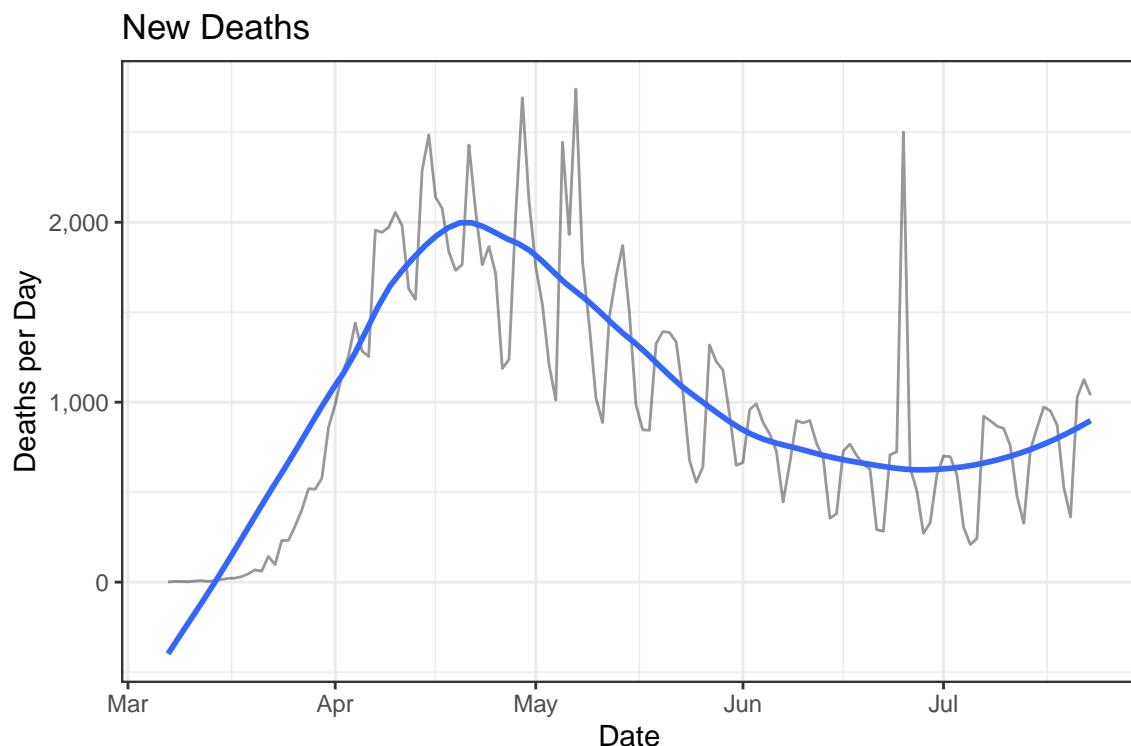

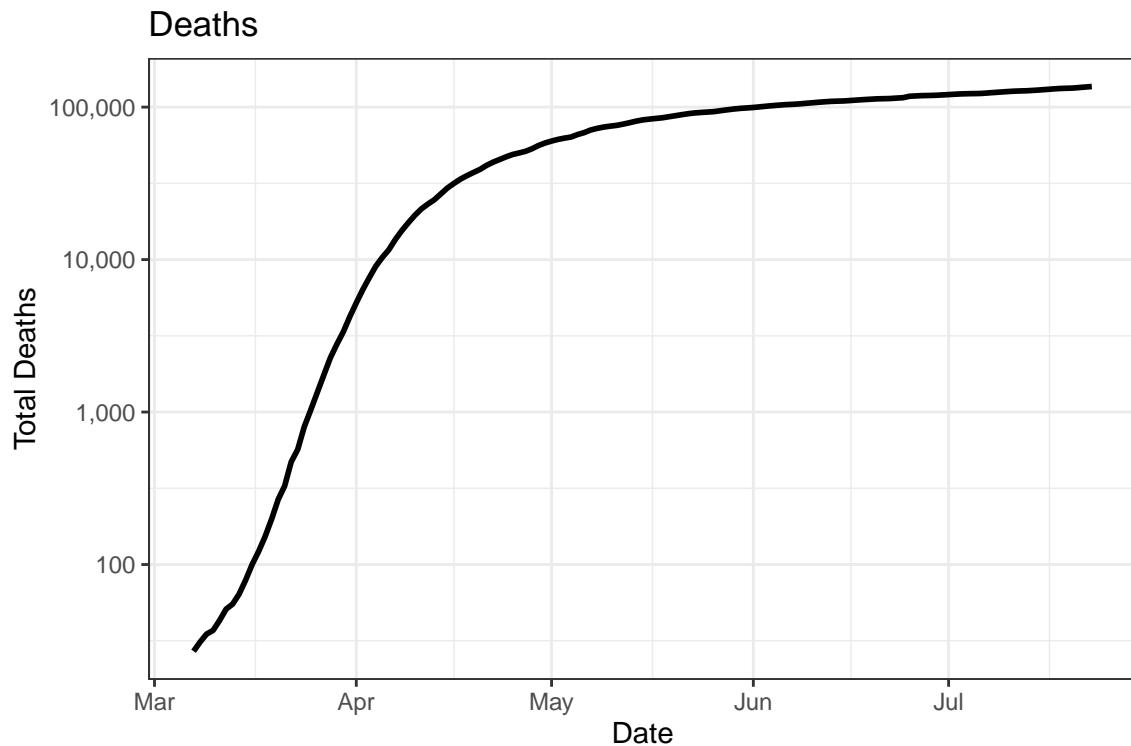

There have been 4,017,735 confirmed Covid-19 cases and 136,477 deaths in the United States.

Table 2: U.S. Deaths and Cases over the Last Two Weeks

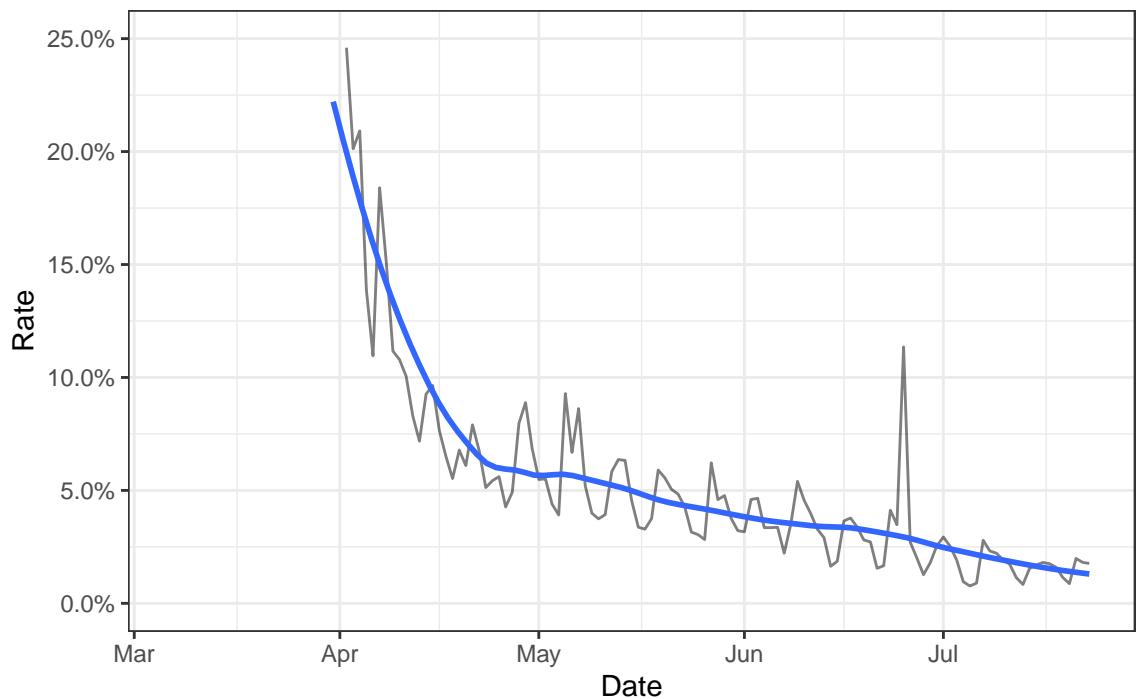

Date	Cases	Deaths	New Cases	New Deaths
2020-07-23	4,017,735	136,477	71,027	1,039
2020-07-22	3,946,708	135,438	70,043	1,126
2020-07-21	3,876,665	134,312	62,749	1,029
2020-07-20	3,813,916	133,283	56,971	362
2020-07-19	3,756,945	132,921	64,884	526
2020-07-18	3,692,061	132,395	65,180	872
2020-07-17	3,626,881	131,523	77,233	951
2020-07-16	3,549,648	130,572	70,953	974
2020-07-15	3,478,695	129,598	65,382	858
2020-07-14	3,413,313	128,740	62,879	736
2020-07-13	3,350,434	128,004	58,465	327
2020-07-12	3,291,969	127,677	60,978	476
2020-07-11	3,230,991	127,201	63,007	757
2020-07-10	3,167,984	126,444	66,645	854

Deaths

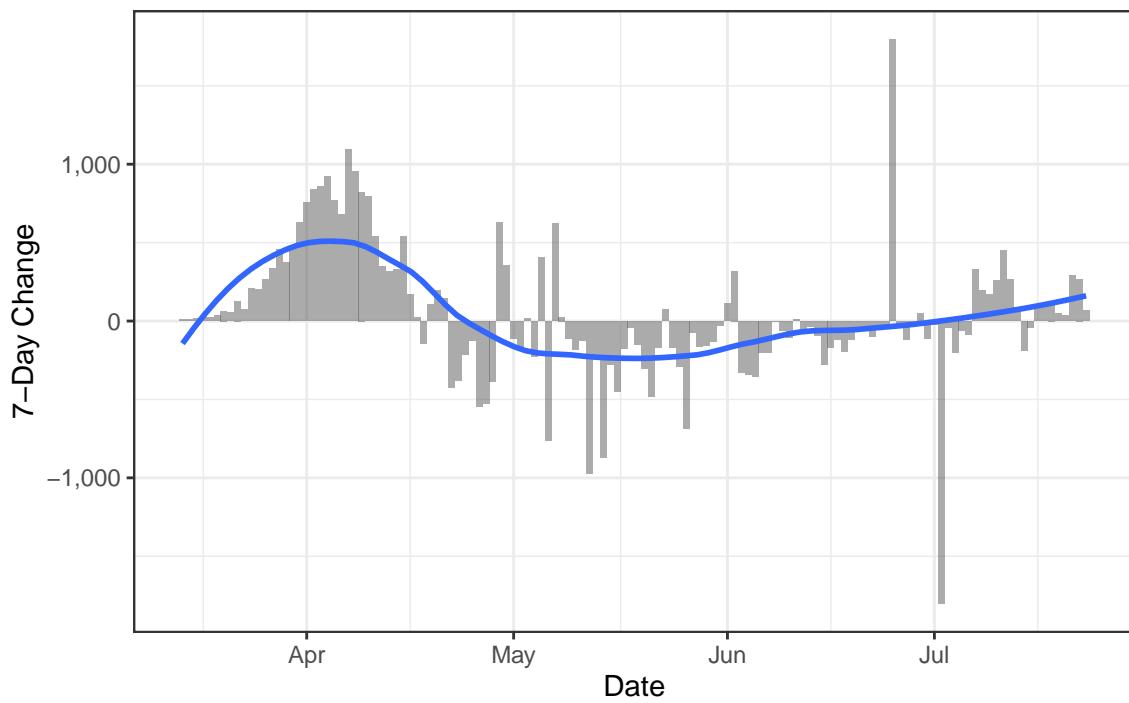

Because the effects of the virus can take several weeks to manifest in patients, deaths are a lagging indicator of contagion, but they may be a more reliable than case counts, which are a function of both the prevalence of the disease and the rate of testing. The case mortality rate is a very crude indicator of lethality because a large numbers of non-lethal cases are likely never detected. A declining case mortality rate is indicative of more widespread testing.

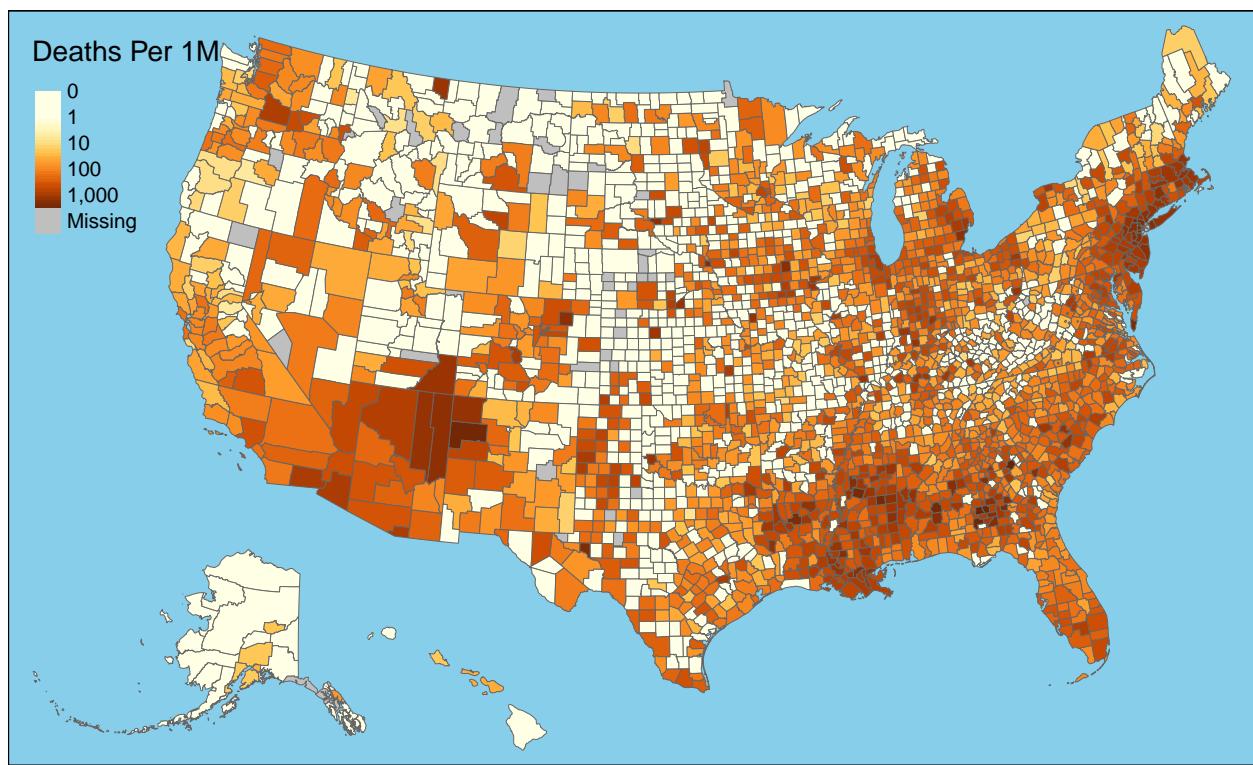

Daily Case Mortality Rate

One-Week Change in Daily Deaths

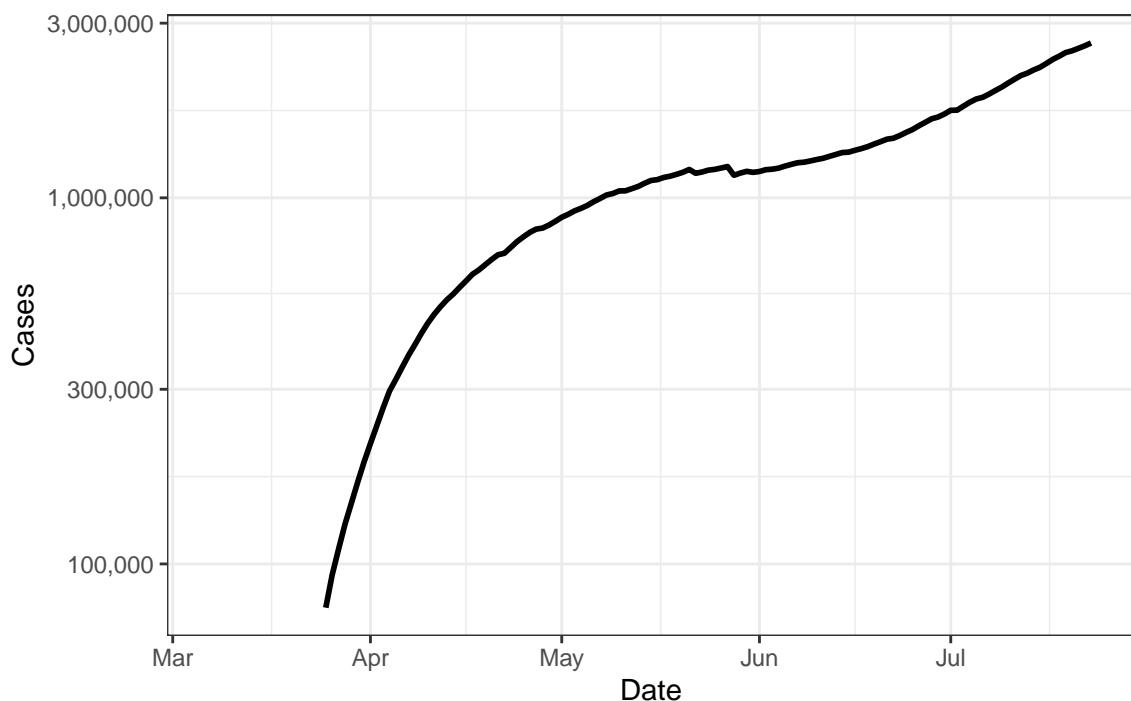

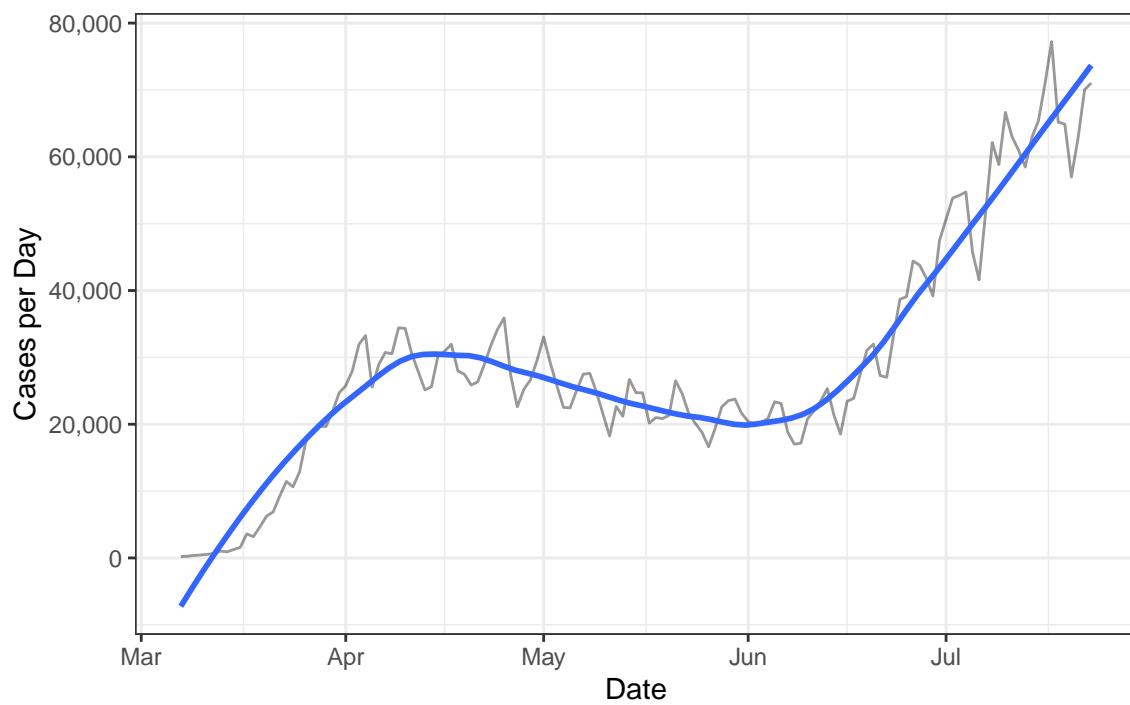

Cases

Reported cases are a function of both the spread of the disease and the prevalence of testing.

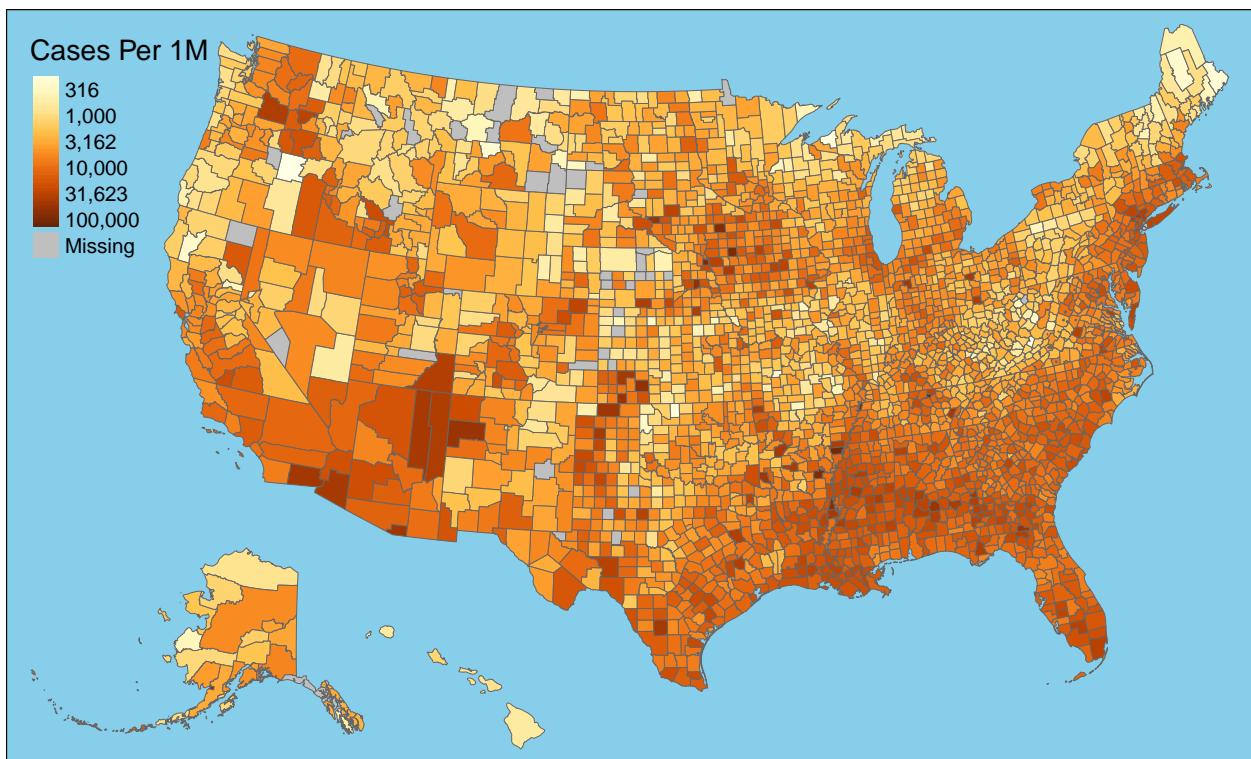

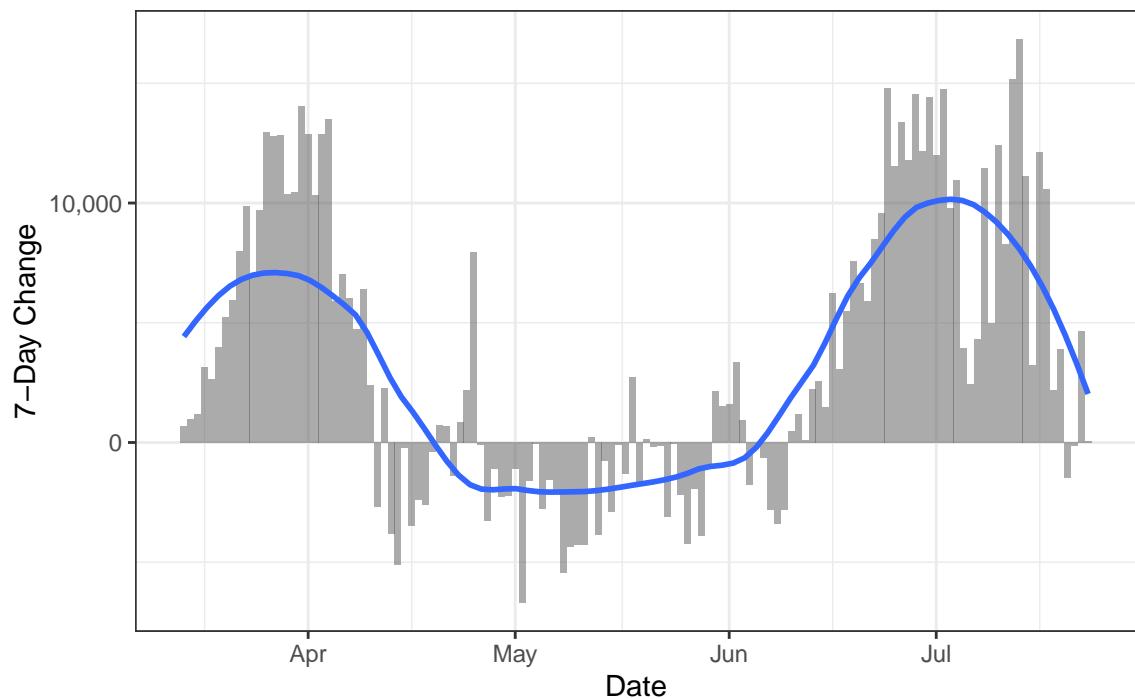

Active Cases

New Cases

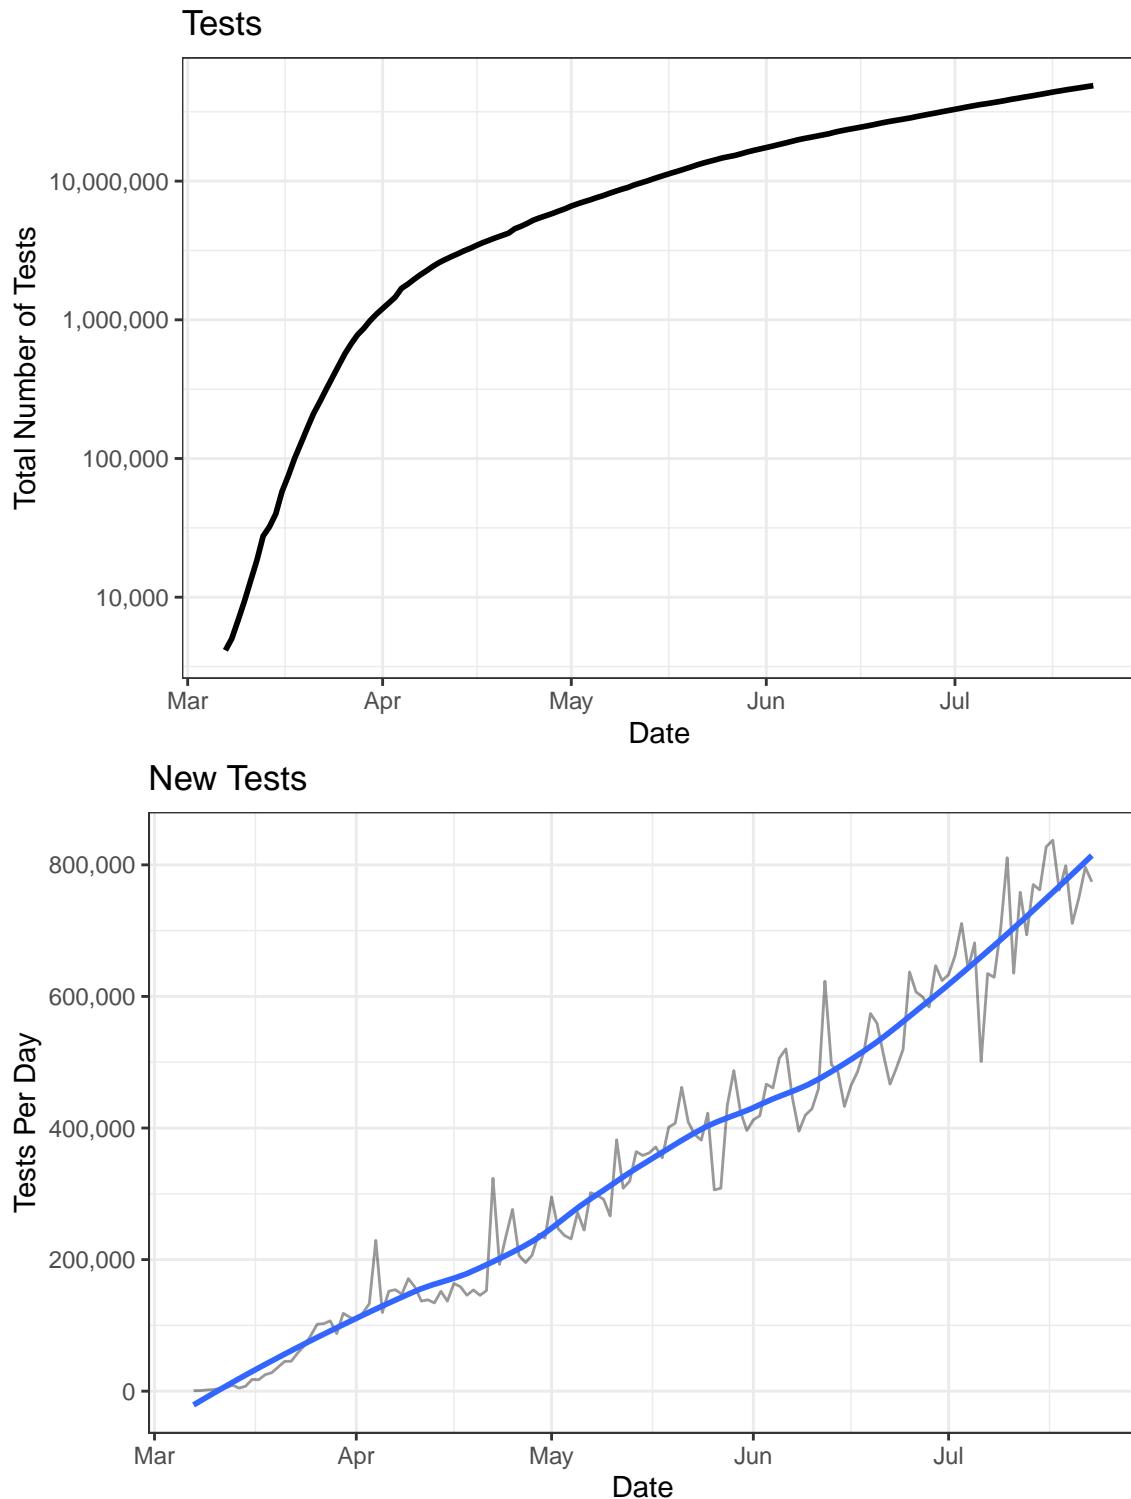

One-Week Change in Daily Cases

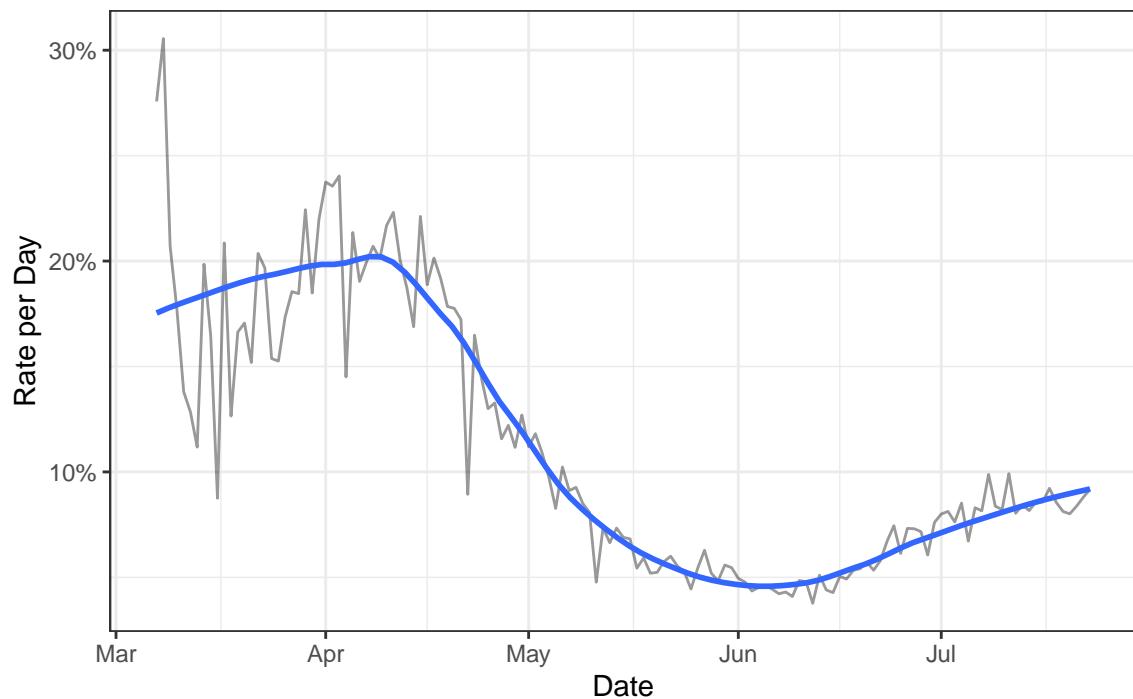

Testing

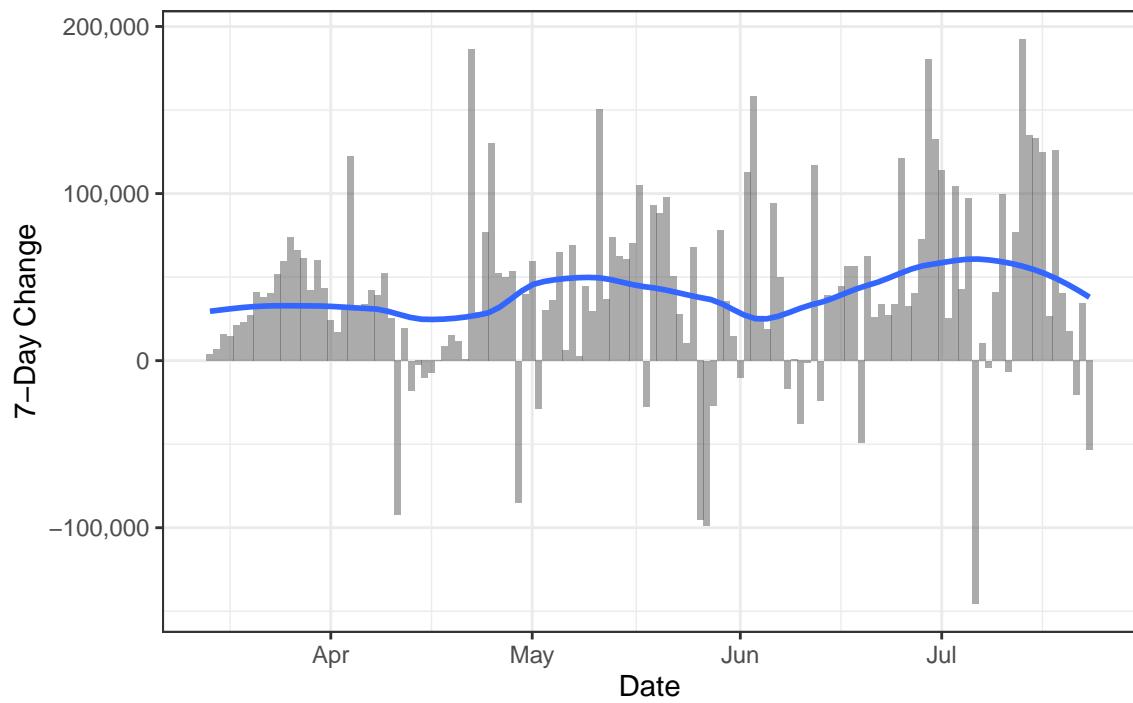

Widespread testing is necessary for managing the spread of the disease. The following charts show how testing in the United States has changed over time. When the supply of available tests is limited, they are typically only used for patients whose symptoms suggest they are likely to have contracted the virus. A high positive test rate indicates that testing capacity is constrained.

Positive Test Rate

One-Week Change in Daily Tests

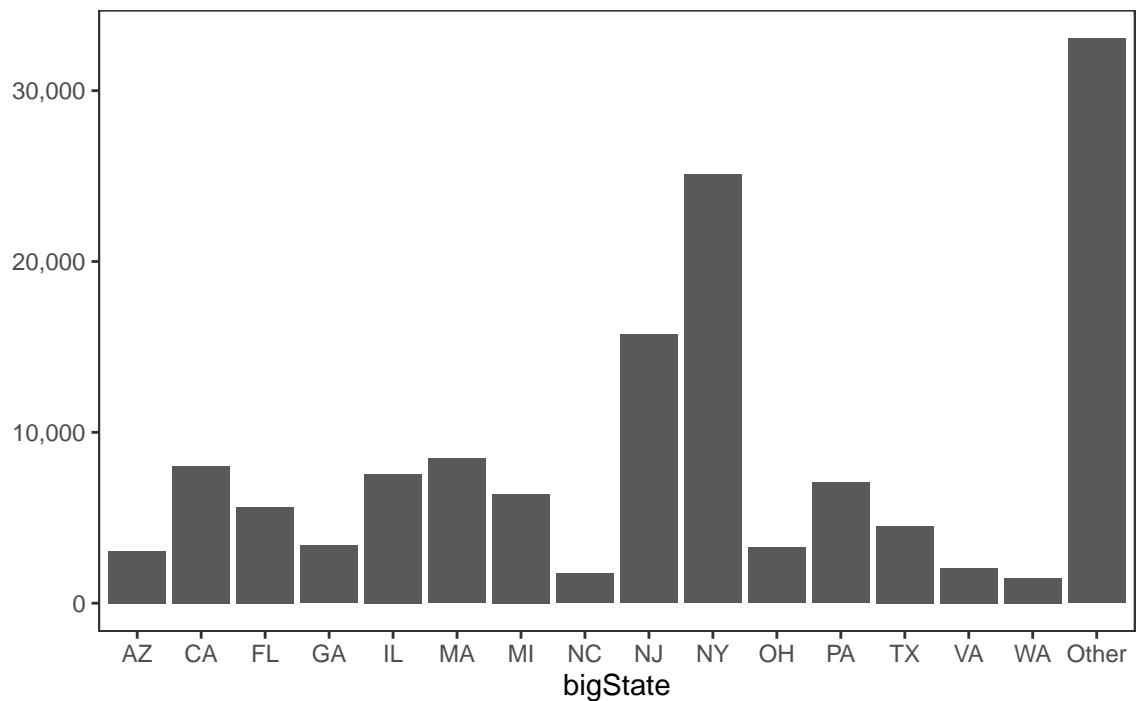

State Data

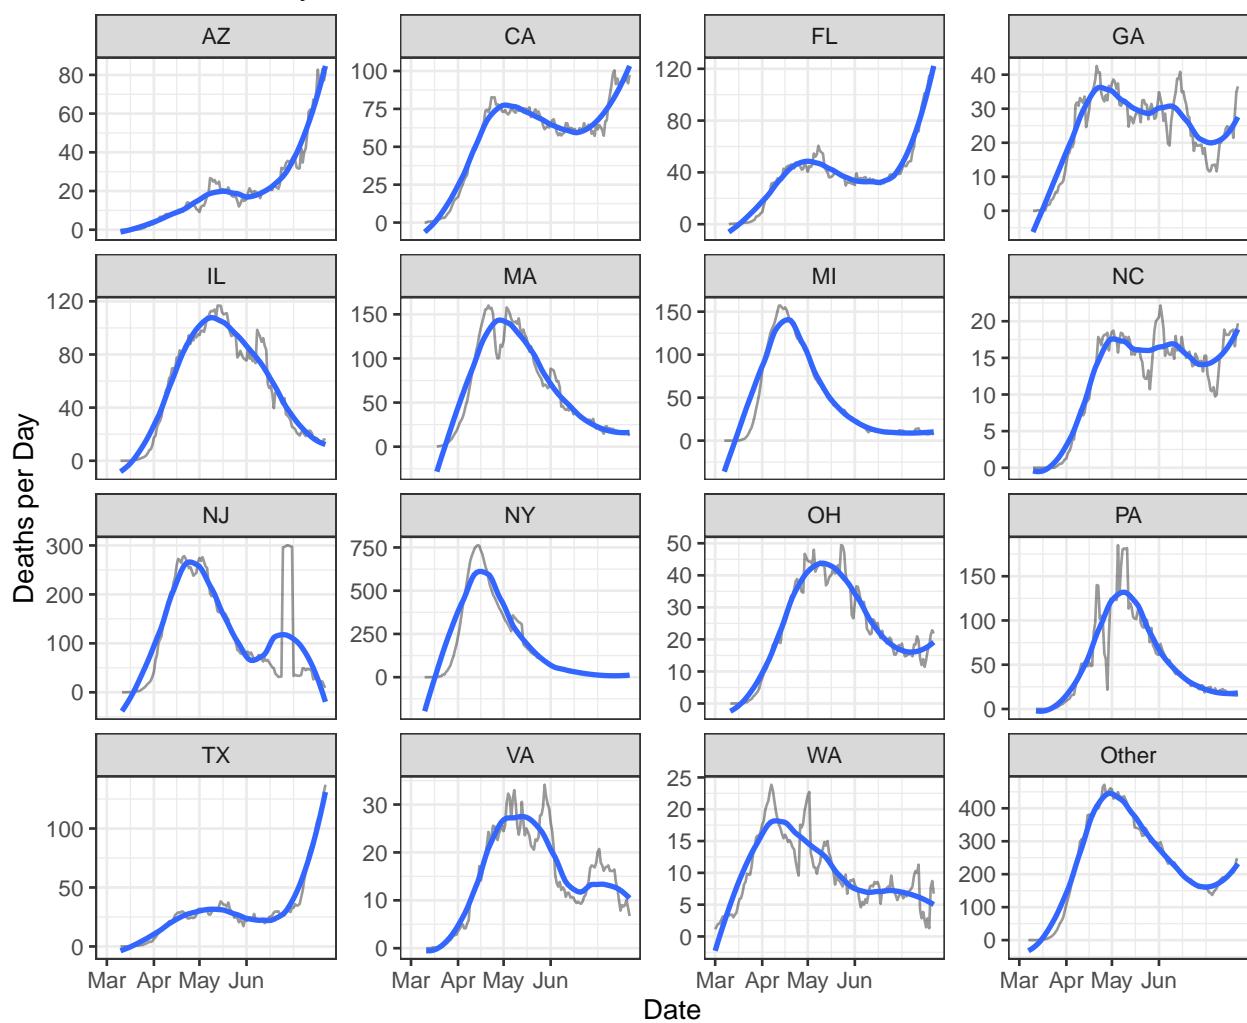

This section summarizes state-level data. Most data are reported for the largest 15 states by population, which account for NaN percent of the total U.S. population.

Deaths

7-Day Change in Daily Cases

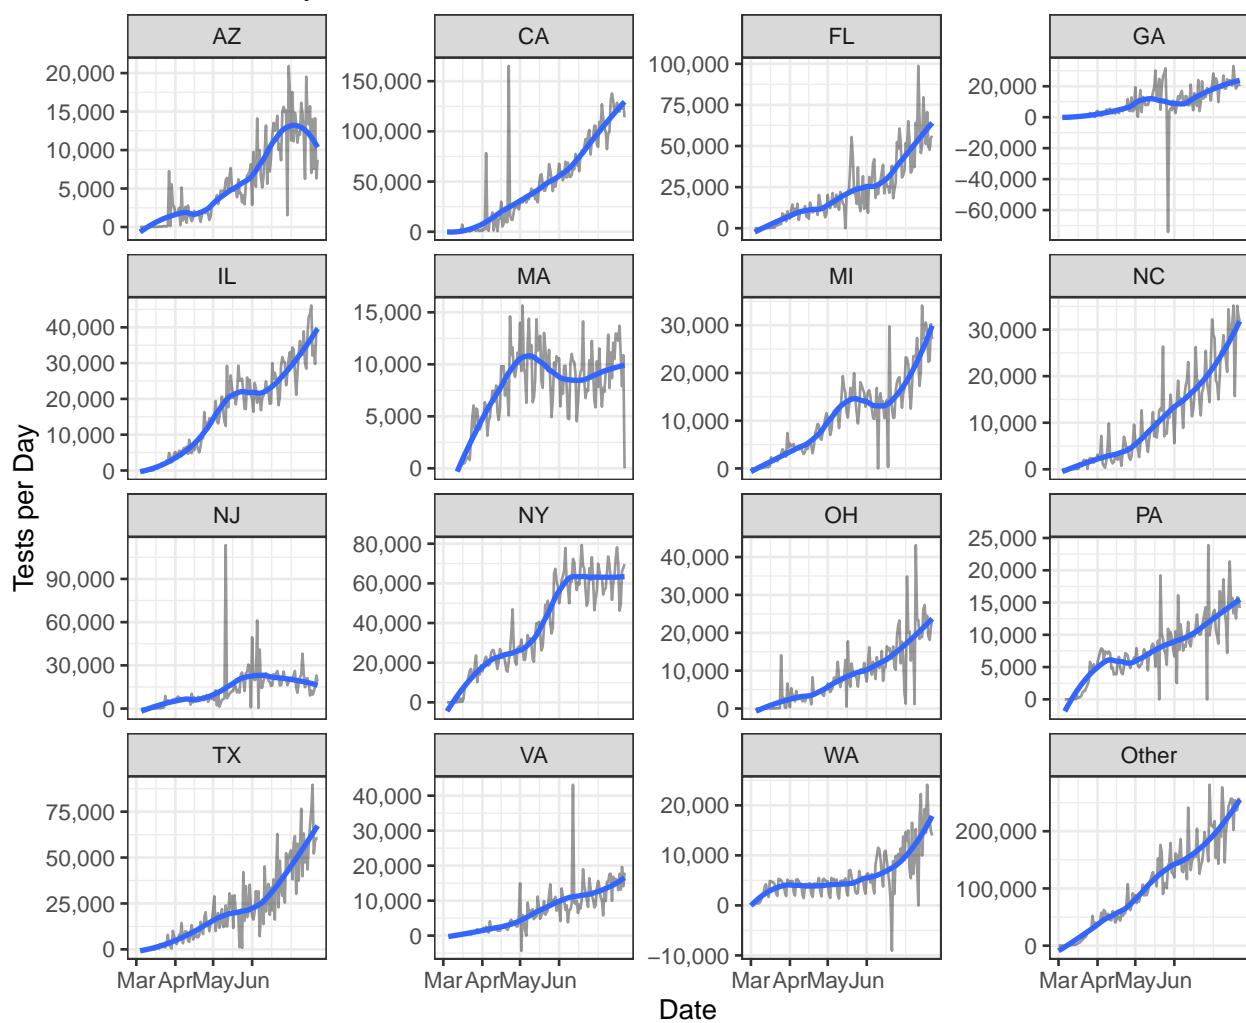

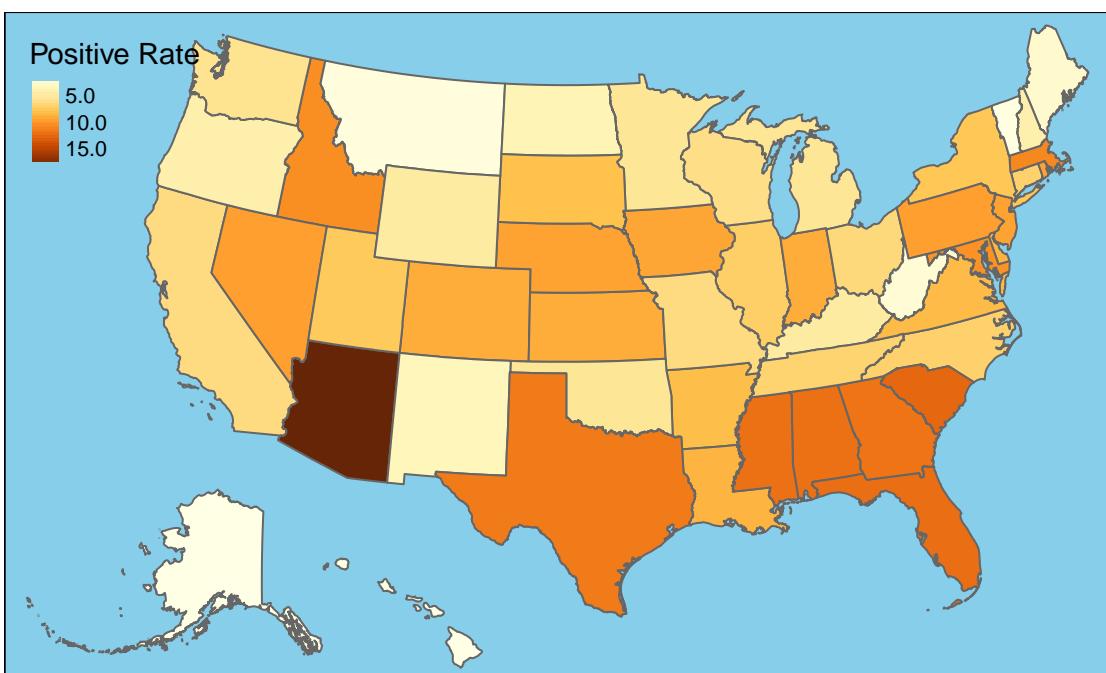

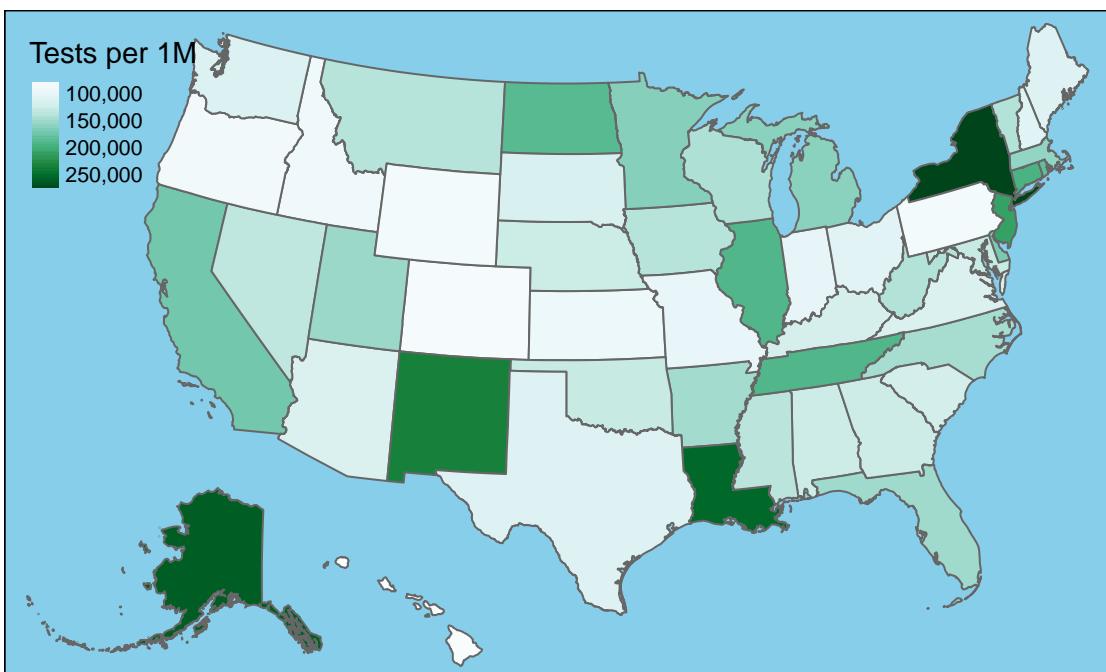

Testing

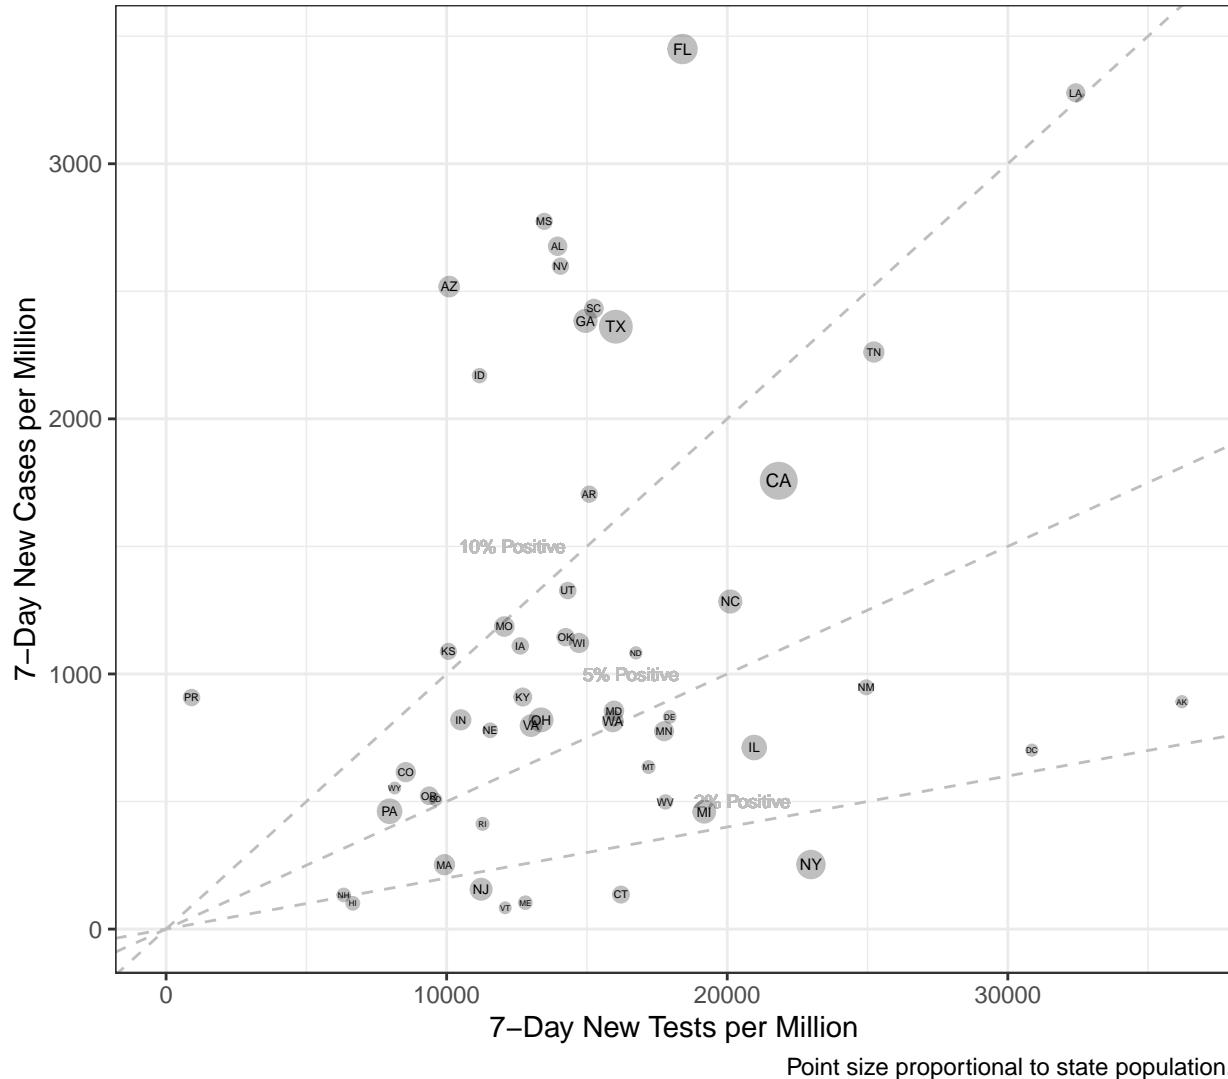

New Tests by State

Interpretation of differences in case rates across states is complicated by the fact that those states that do more thorough testing will invariably uncover more cases. A lower positive test rate is an indication that a state is doing more comprehensive testing since, when testing is rationed, only those individuals who are more likely to test positive are typically tested. The following chart compares the one-week increase in detected cases to the number of tests administered by each state relative to population. The states of greatest current concern are those with both a large increase in detected cases and a relatively small increase in tests. These states lie in the upper-left of the chart.

Tests vs. Cases by State

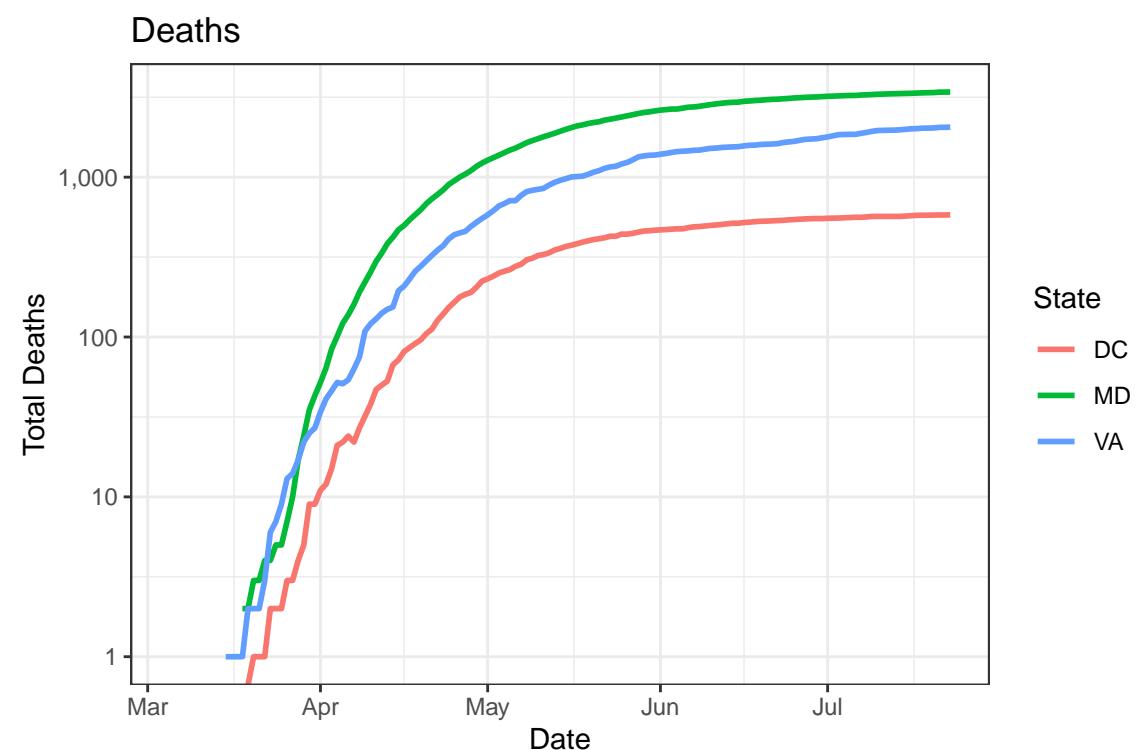

Local Data

The following charts and tables present mortality, case, and testing data for the Washington DC metropolitan area and adjacent states.

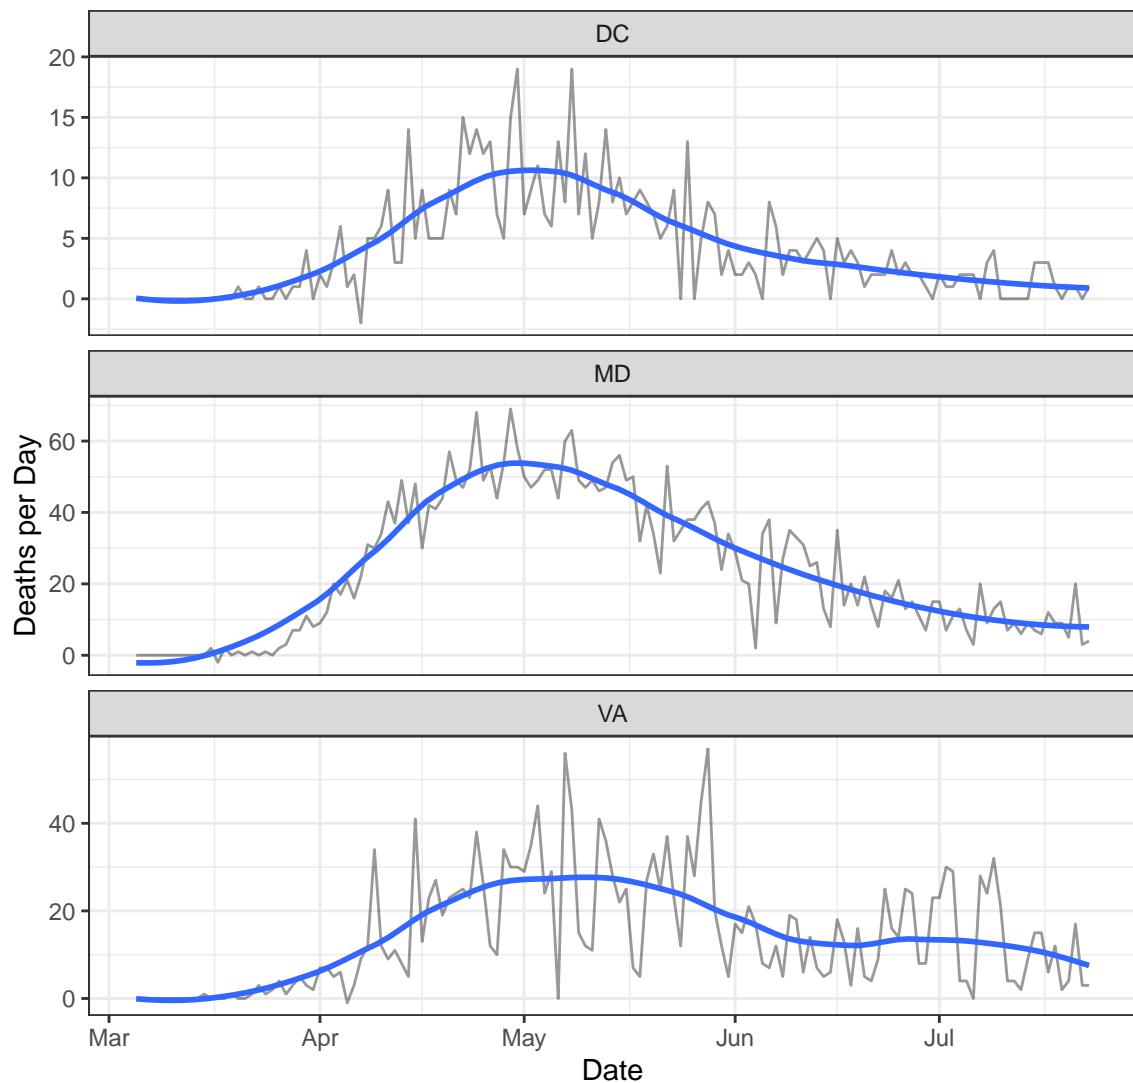

Table 3: Latest Local Data

State	Cases	Deaths	New Cases	New Deaths
DC	11,571	581	42	1
MD	80,836	3,409	664	4
VA	81,237	2,054	844	3
