

Erik's Covid-19 Chart Pack

Data updated 2020-09-18 18:52:54. World data are from Worldometers. National and state-level mortality, case, and testing data are from Johns-Hopkins University. County and city-level mortality and case data are from the New York Times. Most data presented in this report were accessed through APIs provided by The COVID Tracking Project and NovelCOVID API.

World Data

There have been 30,371,357 confirmed Covid-19 cases and 950,270 deaths worldwide.

Deaths

Cases

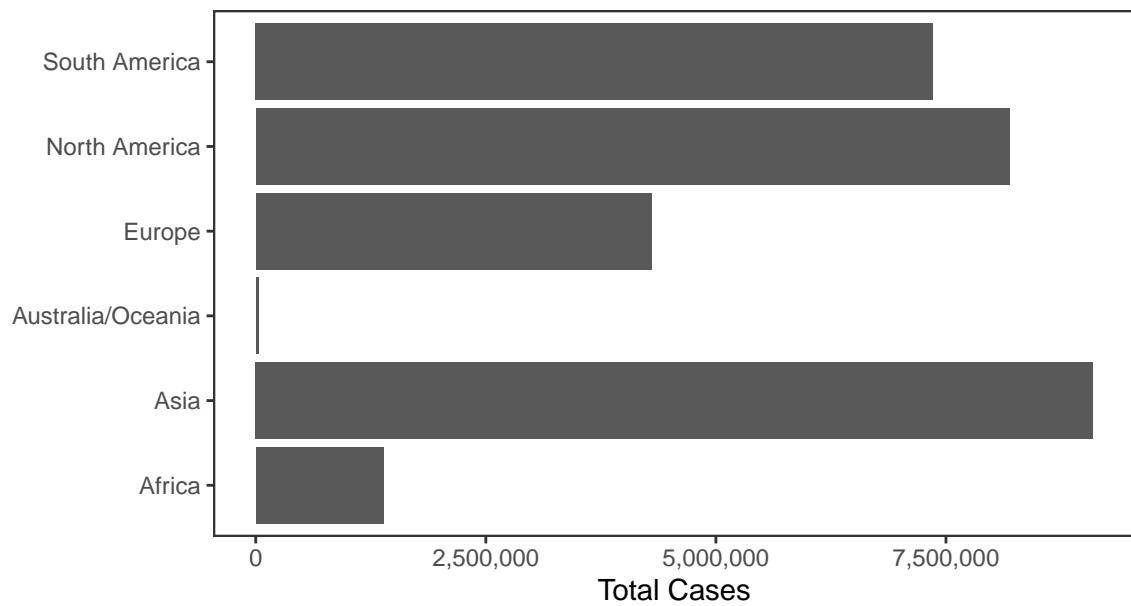

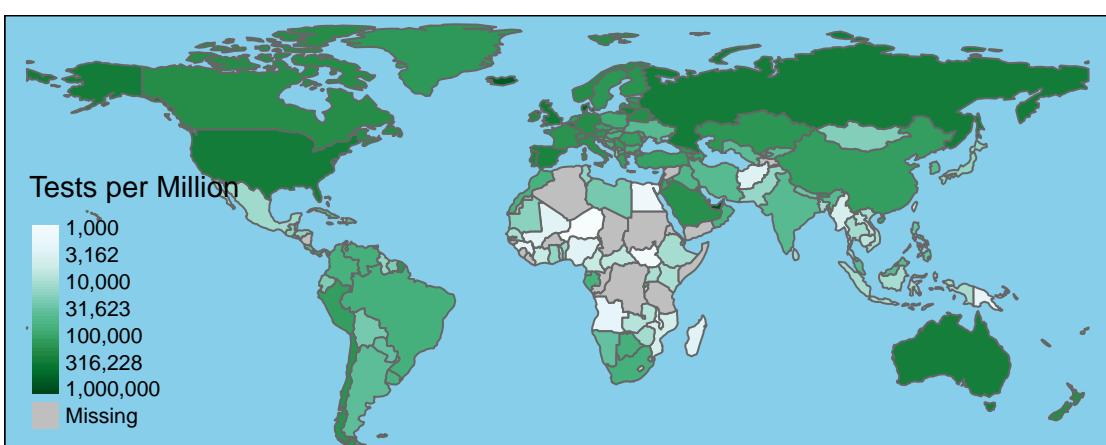

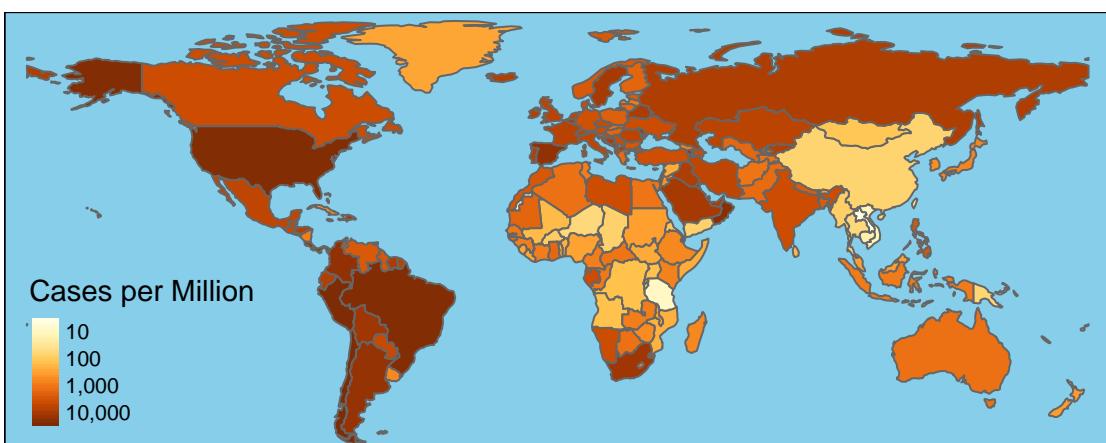

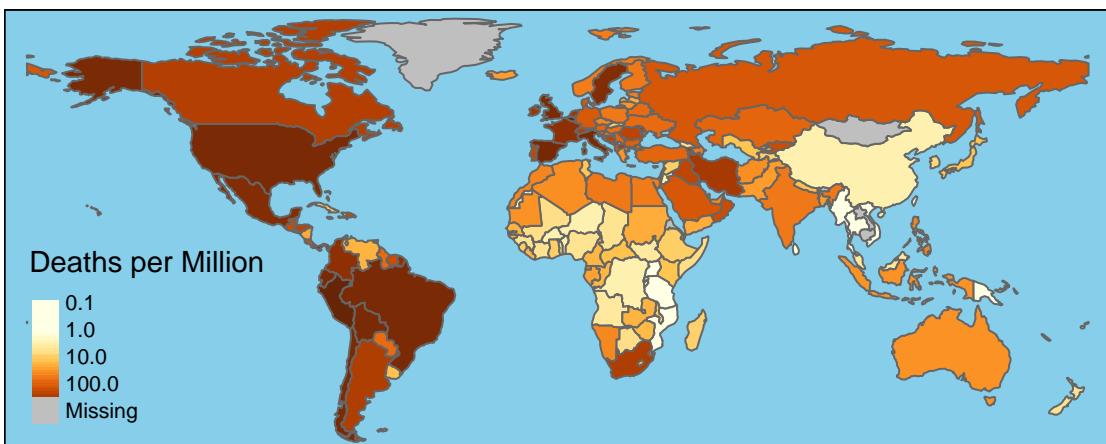

Table 1: Top Countries by Total Cases

Country	Cases	Deaths	New Cases	New Deaths
USA	6,874,596	202,213	46,295	879
India	5,212,686	84,404	96,793	1,174
Brazil	4,457,443	135,031	35,757	857
Russia	1,085,281	19,061	5,762	144
Peru	750,098	31,146	5,698	95
Colombia	743,945	23,665	7,568	187
Mexico	680,931	71,978	4,444	300
South Africa	655,572	15,772	2,128	67
Spain	654,637	30,405	4,541	162
Argentina	601,713	12,460	12,701	344
Chile	441,150	12,142	1,863	84
France	415,481	31,095	10,593	50
Iran	413,149	23,808	2,815	176
UK	381,614	41,705	3,395	21
Bangladesh	344,264	4,859	1,593	36
Saudi Arabia	328,144	4,399	593	30
Iraq	307,385	8,332	4,326	84
Pakistan	303,634	6,399	545	6
Turkey	298,039	7,315	1,648	66
Italy	293,025	35,658	1,585	13

National Data

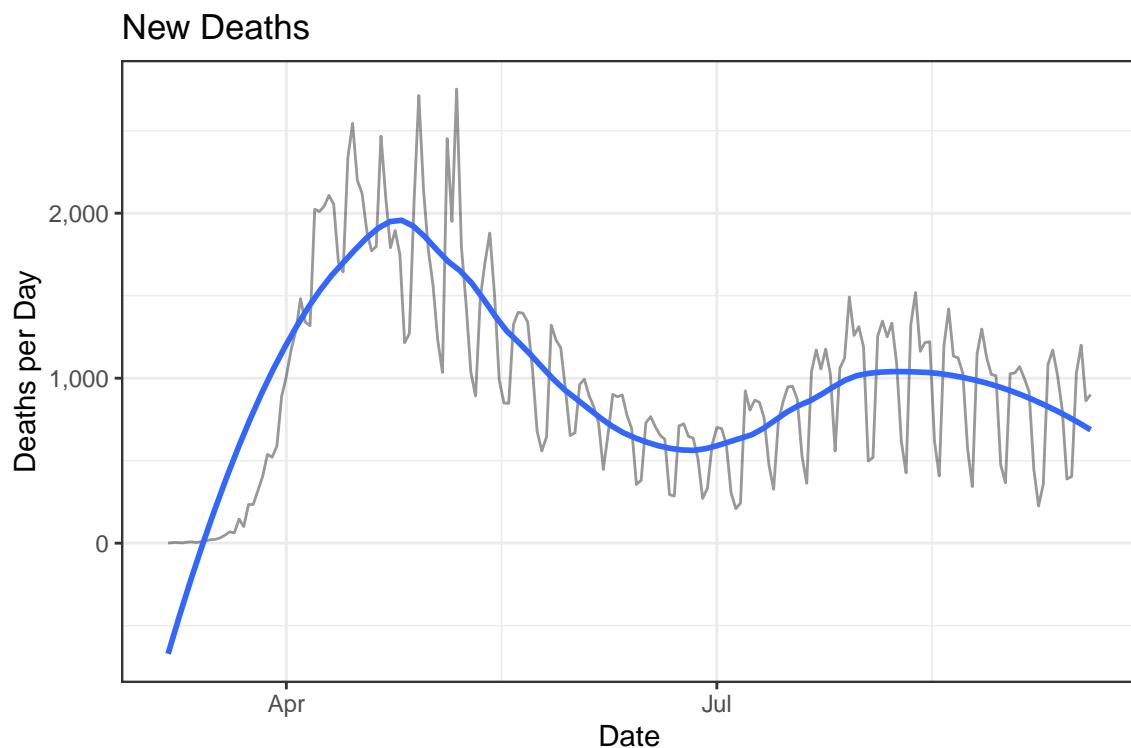

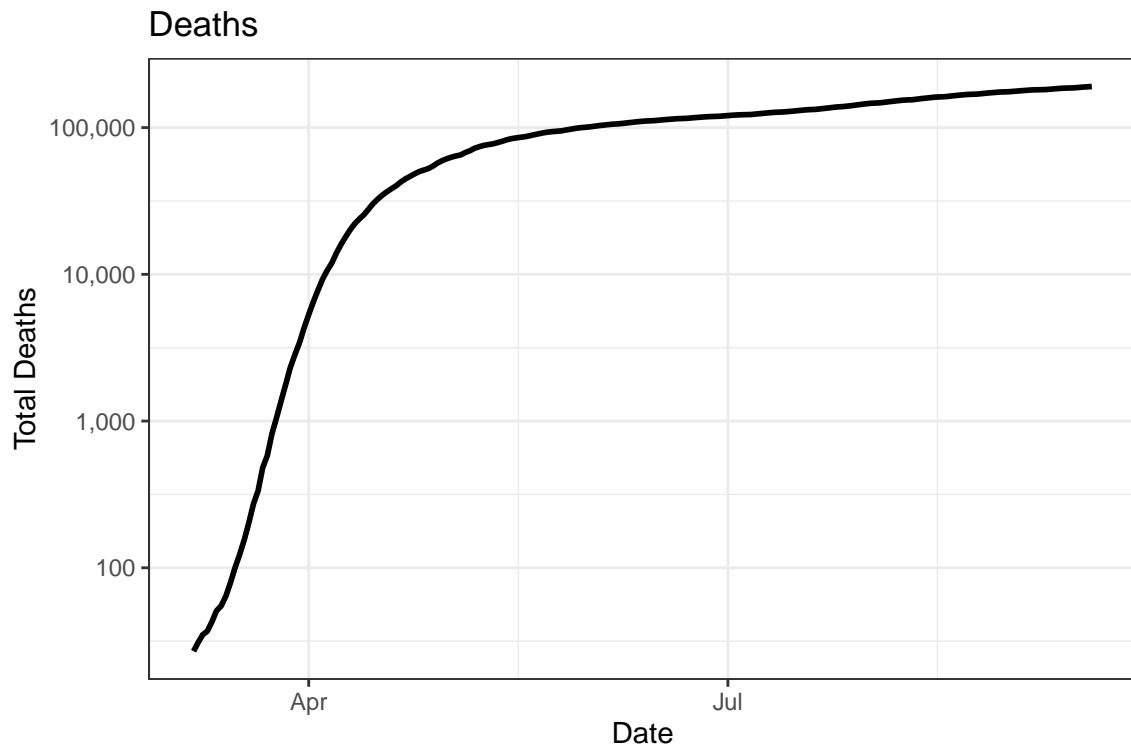

There have been 6,688,827 confirmed Covid-19 cases and 190,566 deaths in the United States.

Table 2: U.S. Deaths and Cases over the Last Two Weeks

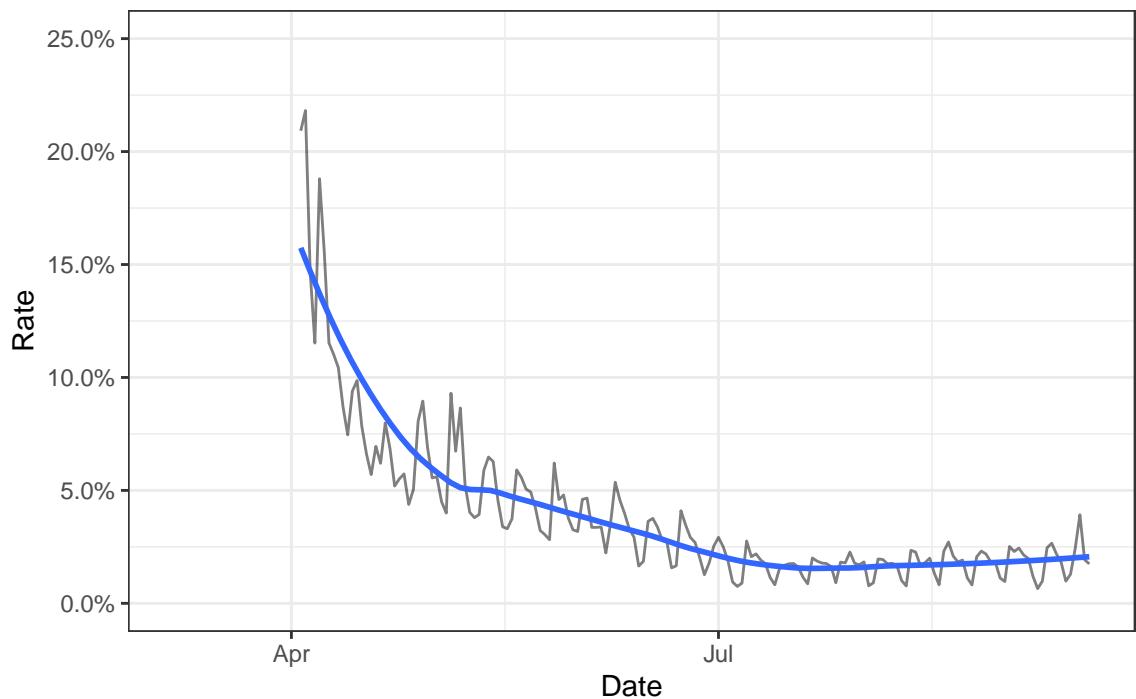

Date	Cases	Deaths	New Cases	New Deaths
2020-09-18	6,688,827	190,566	47,486	901
2020-09-17	6,641,341	189,665	43,558	863
2020-09-16	6,597,783	188,802	40,021	1,200
2020-09-15	6,557,762	187,602	35,445	1,031
2020-09-14	6,522,317	186,571	33,864	404
2020-09-13	6,488,453	186,167	34,453	389
2020-09-12	6,454,000	185,778	42,087	810
2020-09-11	6,411,913	184,968	44,927	1,018
2020-09-10	6,366,986	183,950	37,581	1,170
2020-09-09	6,329,405	182,780	30,983	1,083
2020-09-08	6,298,422	181,697	22,223	358
2020-09-07	6,276,199	181,339	28,682	225
2020-09-06	6,247,517	181,114	33,117	449
2020-09-05	6,214,400	180,665	44,905	918

Deaths

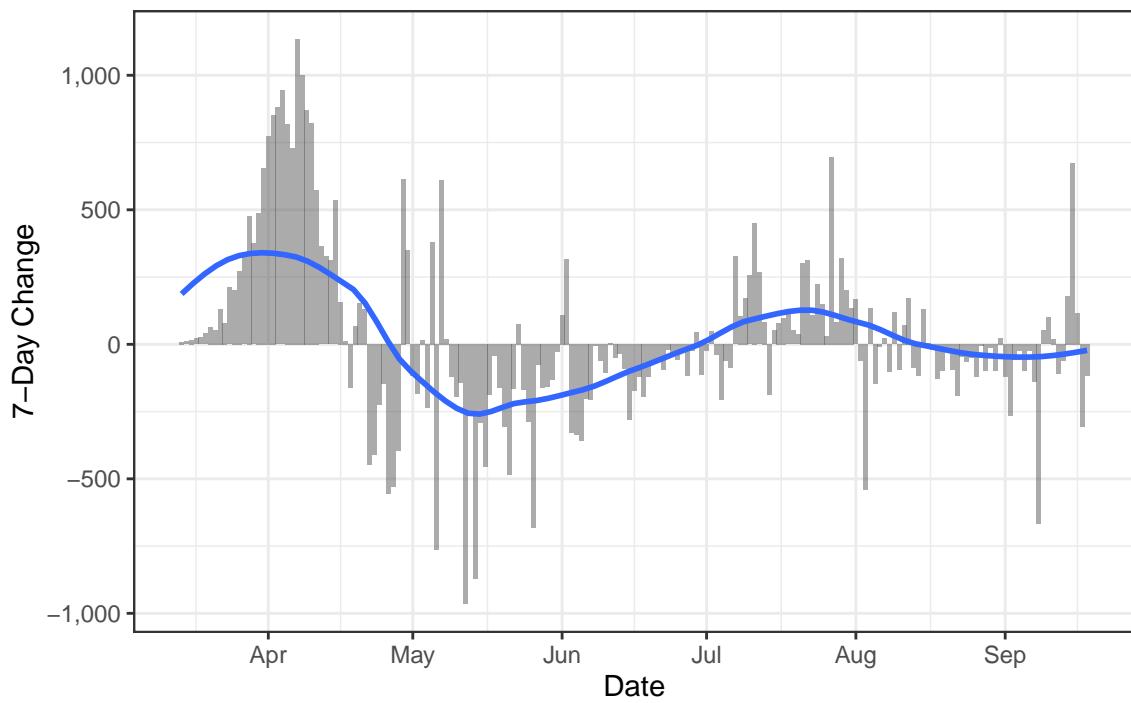

Because the effects of the virus can take several weeks to manifest in patients, deaths are a lagging indicator of contagion, but they may be a more reliable than case counts, which are a function of both the prevalence of the disease and the rate of testing. The case mortality rate is a very crude indicator of lethality because a large numbers of non-lethal cases are likely never detected. A declining case mortality rate is indicative of more widespread testing.

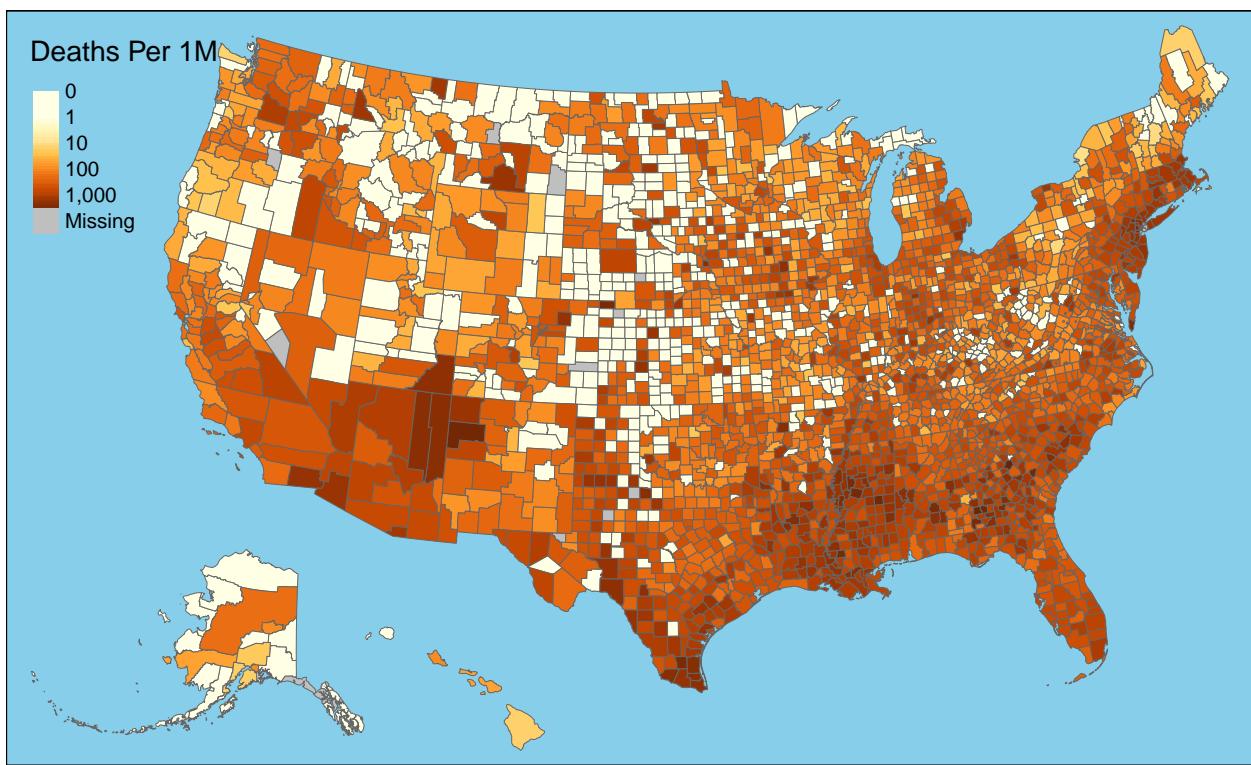

Daily Case Mortality Rate

One-Week Change in Daily Deaths

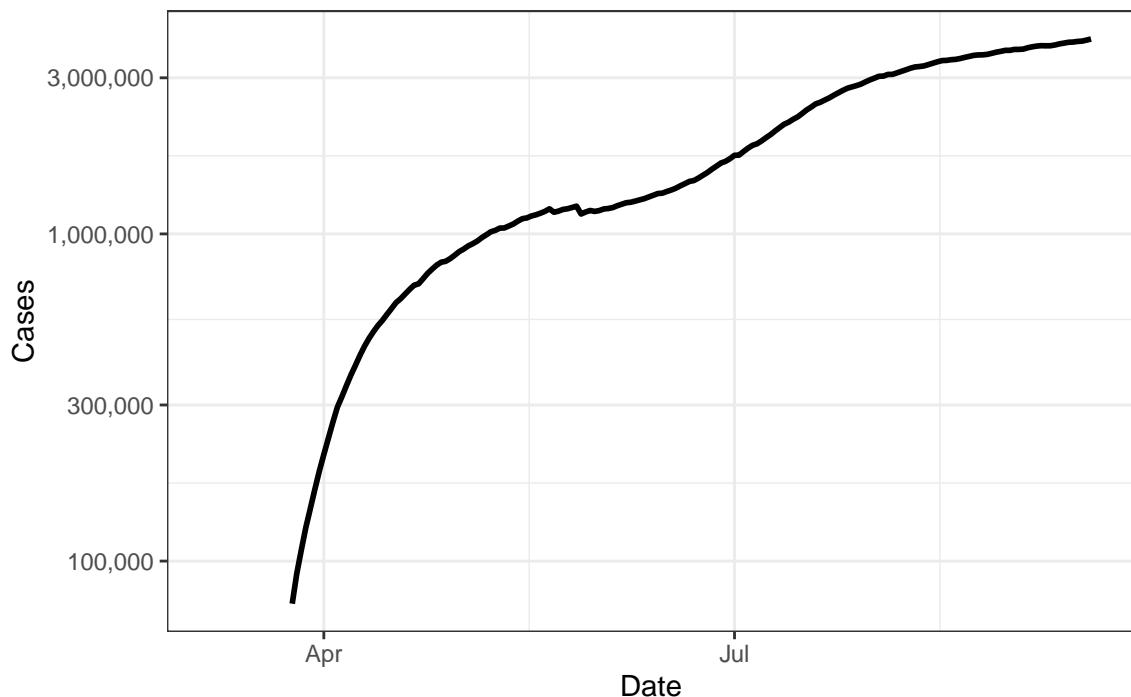

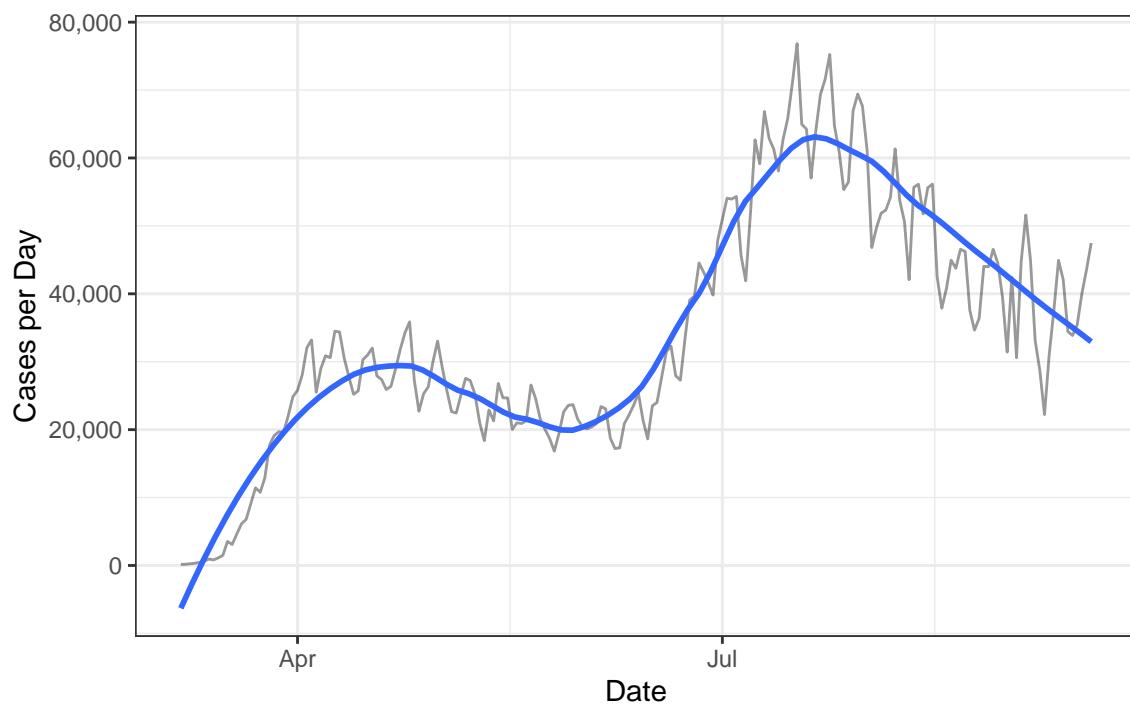

Cases

Reported cases are a function of both the spread of the disease and the prevalence of testing.

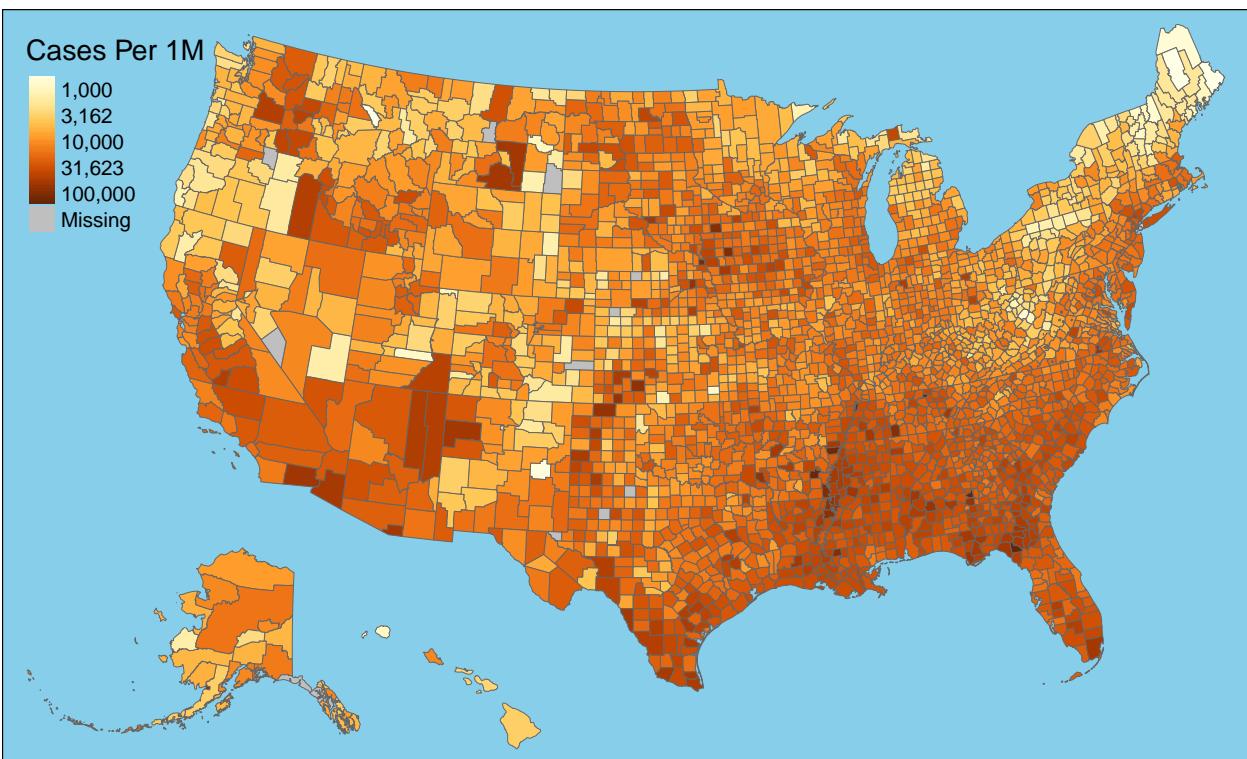

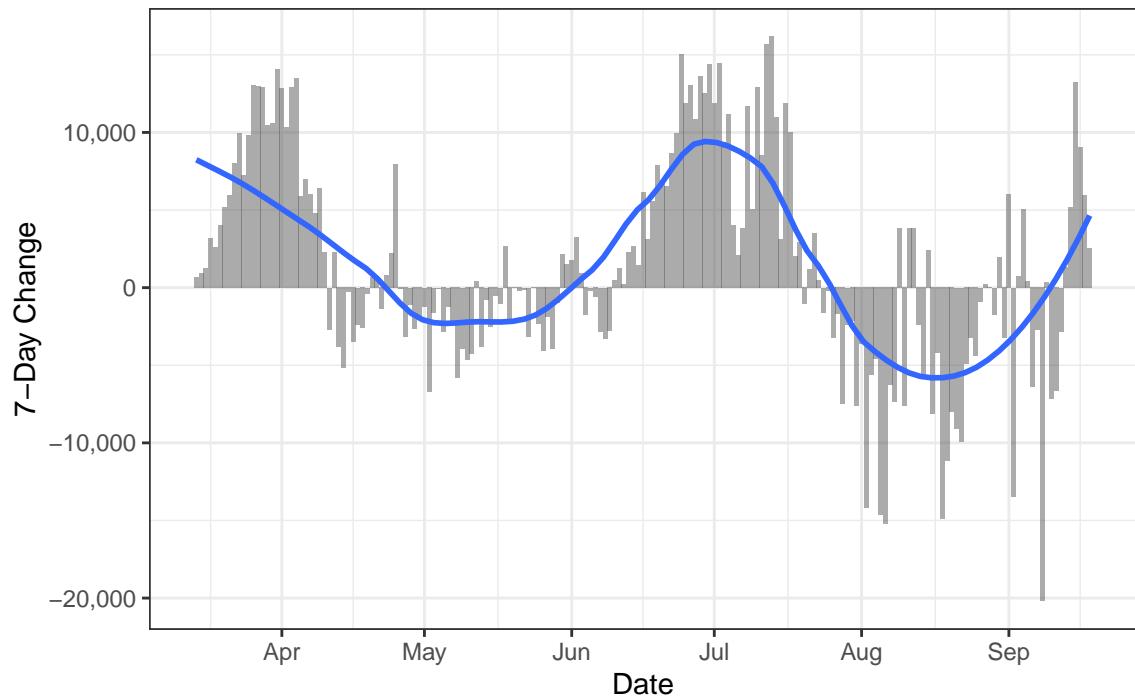

Active Cases

New Cases

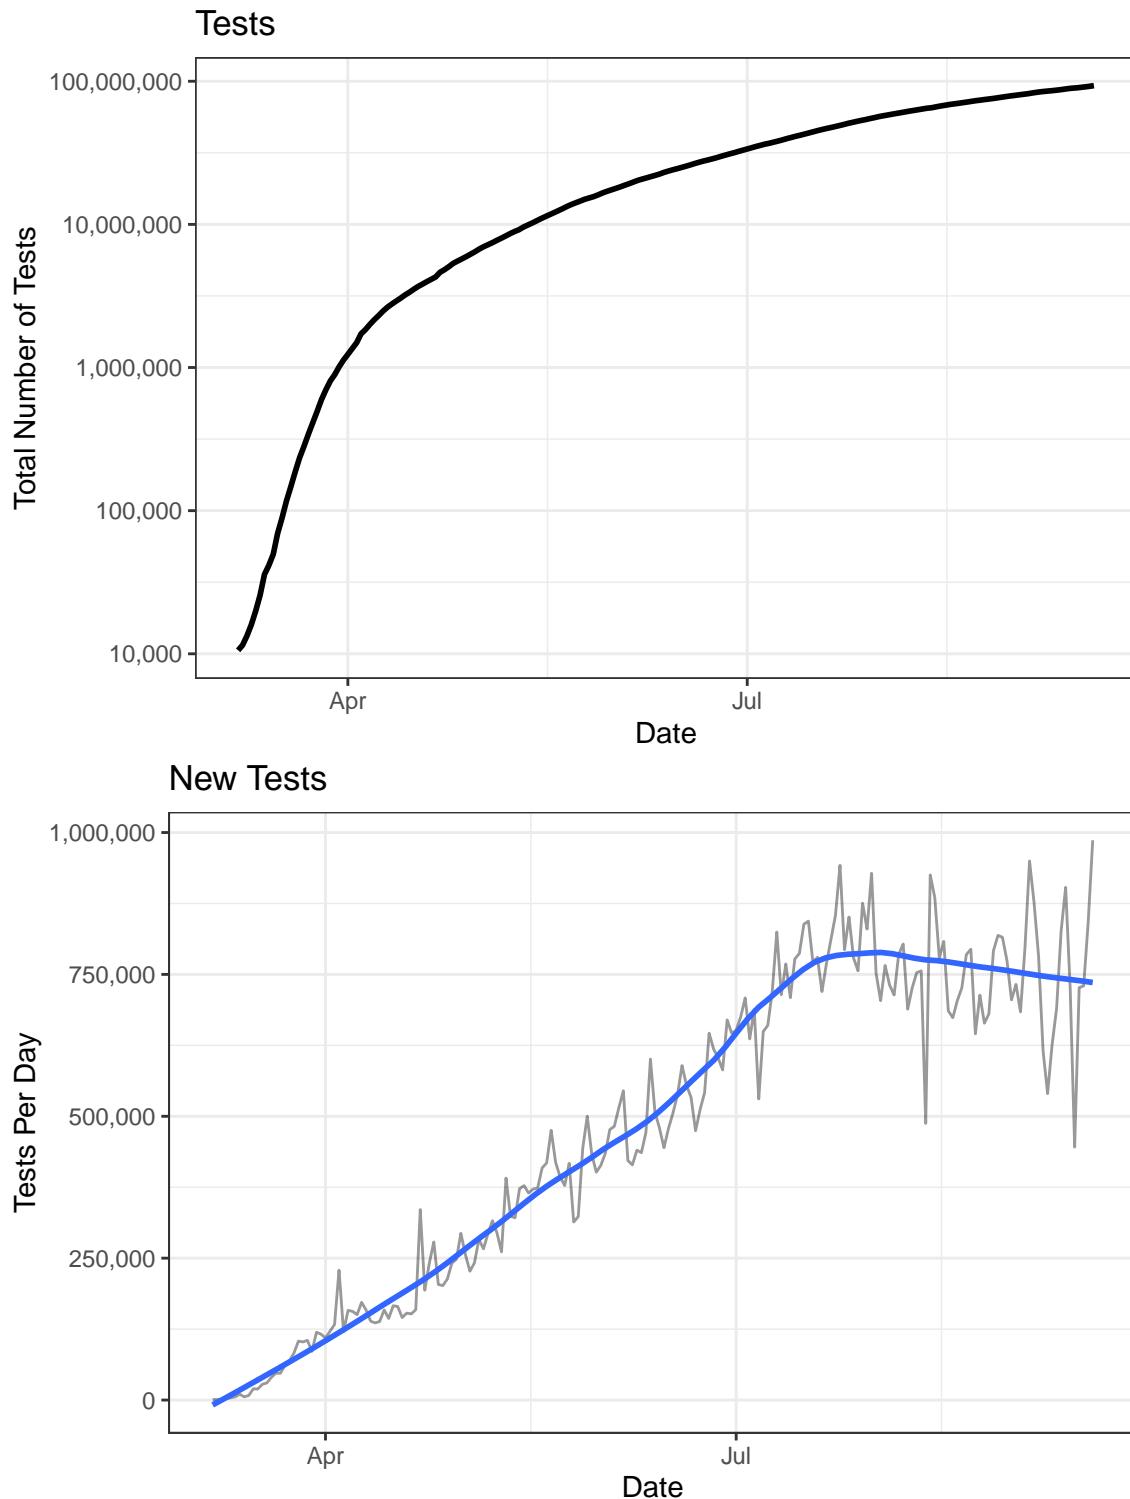

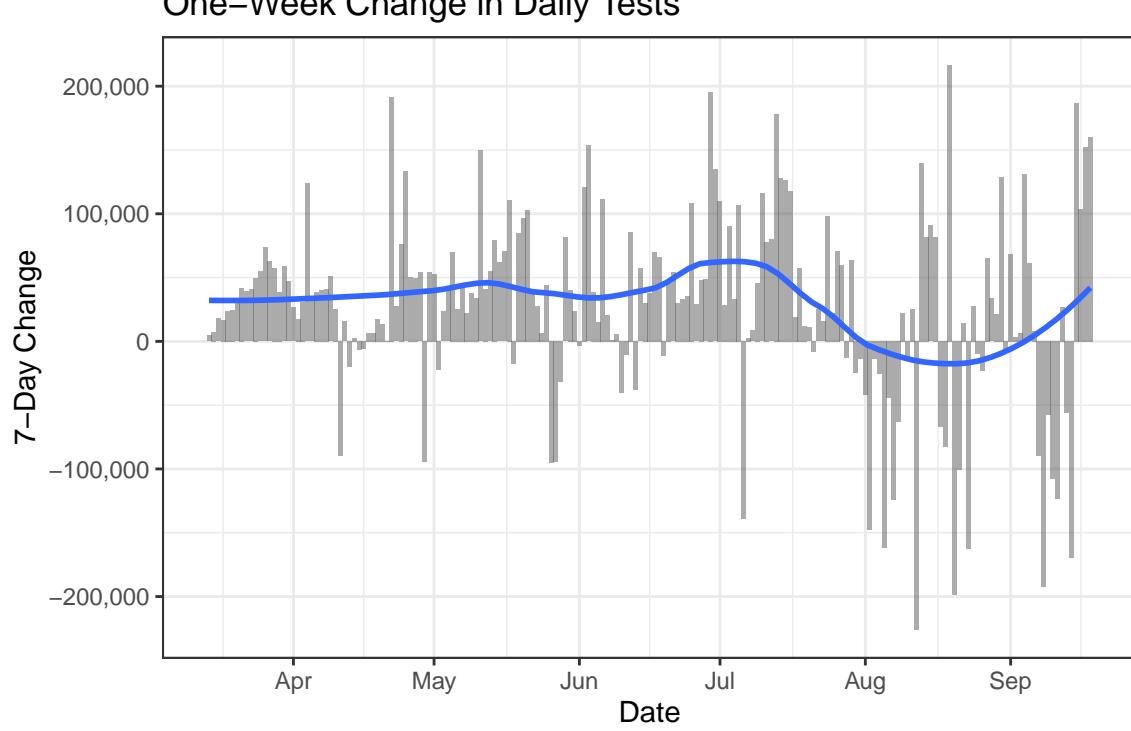

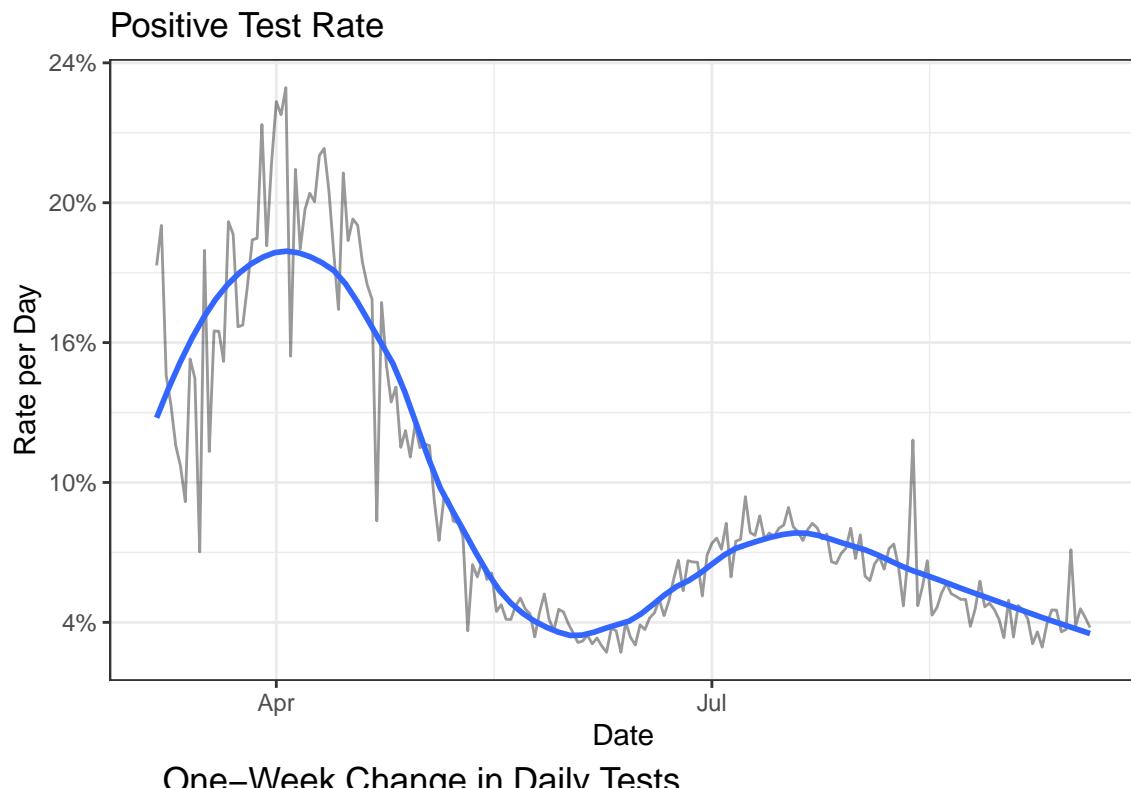

One-Week Change in Daily Cases

Testing

Widespread testing is necessary for managing the spread of the disease. The following charts show how testing in the United States has changed over time. When the supply of available tests is limited, they are typically only used for patients whose symptoms suggest they are likely to have contracted the virus. A high positive test rate indicates that testing capacity is constrained.

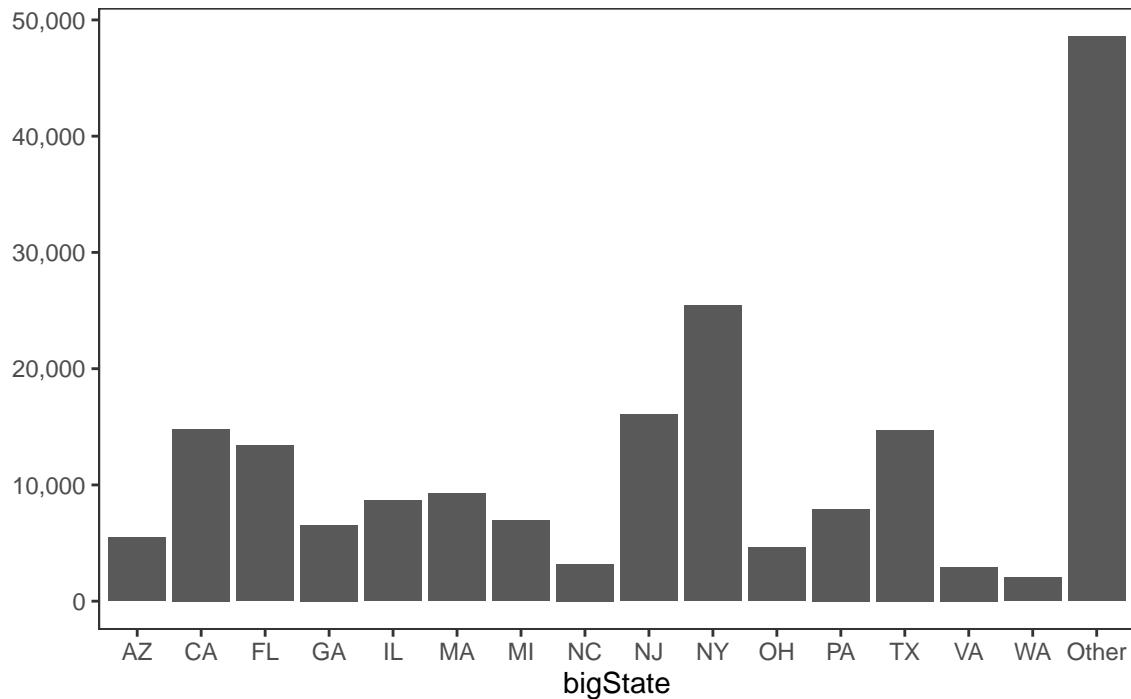

State Data

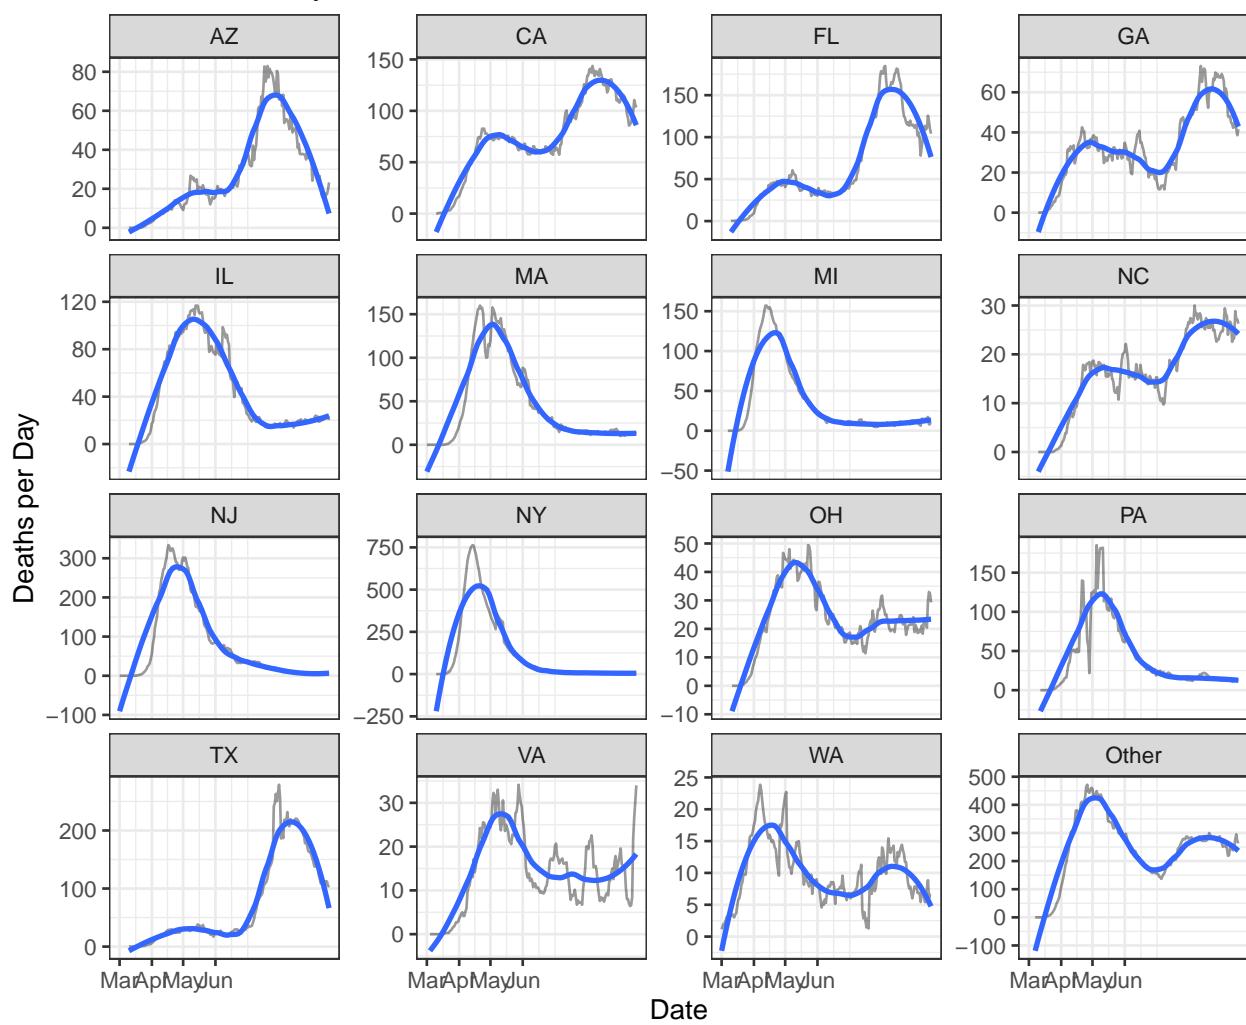

This section summarizes state-level data. Most data are reported for the largest 15 states by population, which account for NaN percent of the total U.S. population.

7-Day Change in Daily Cases

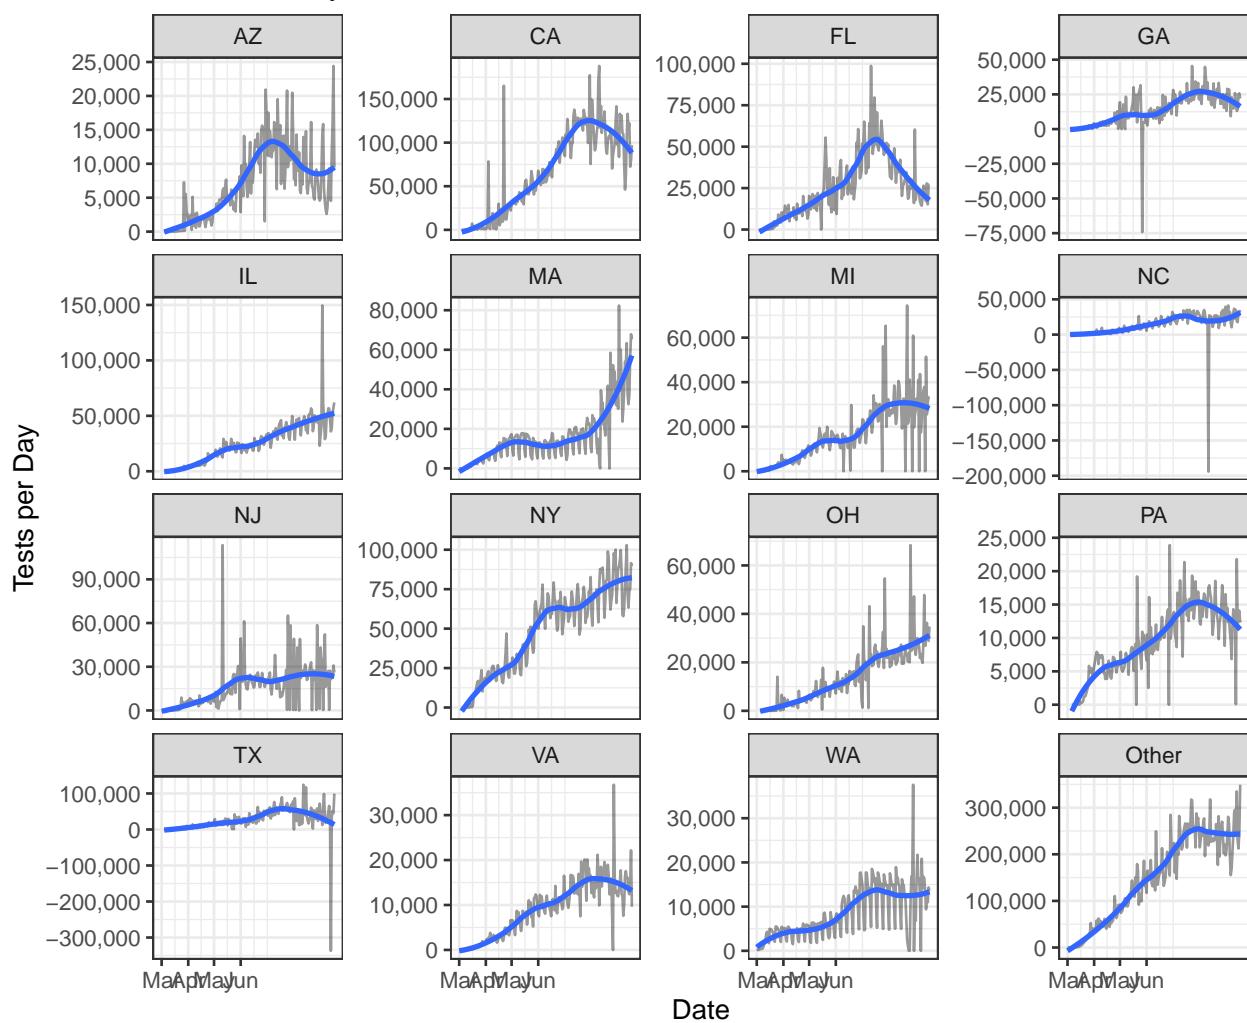

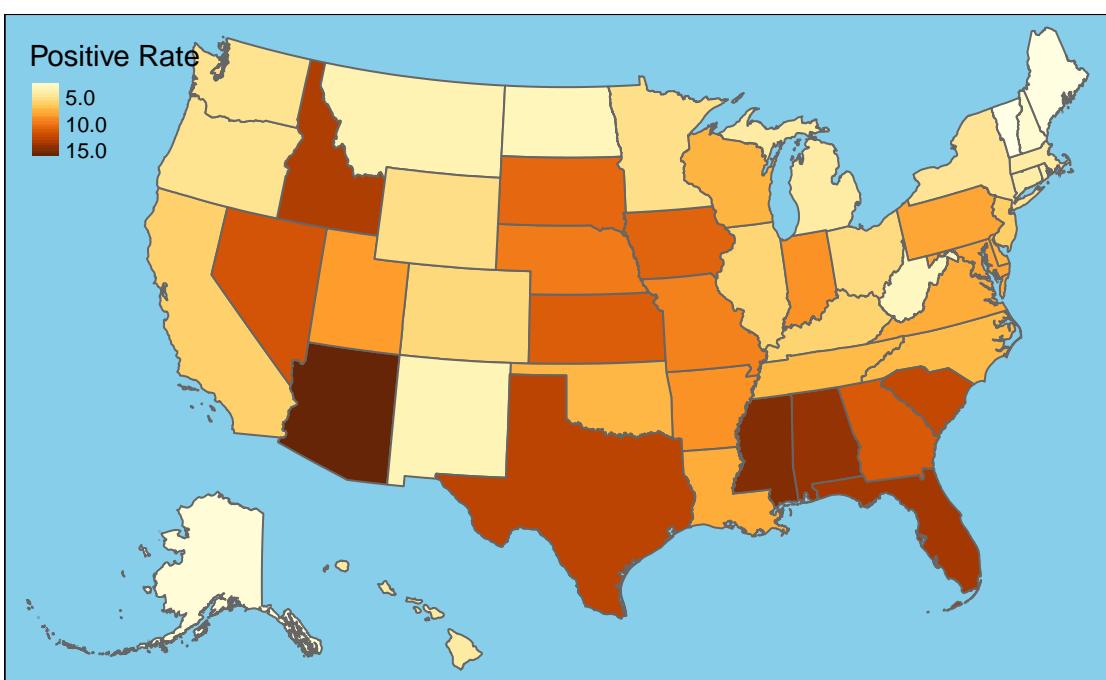

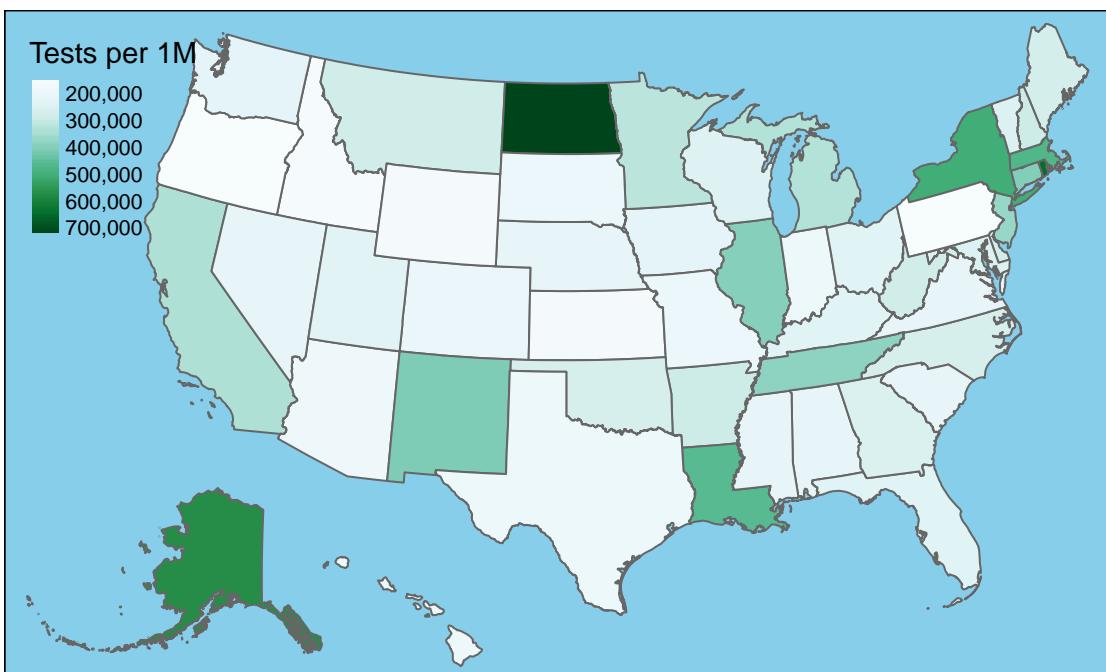

Testing

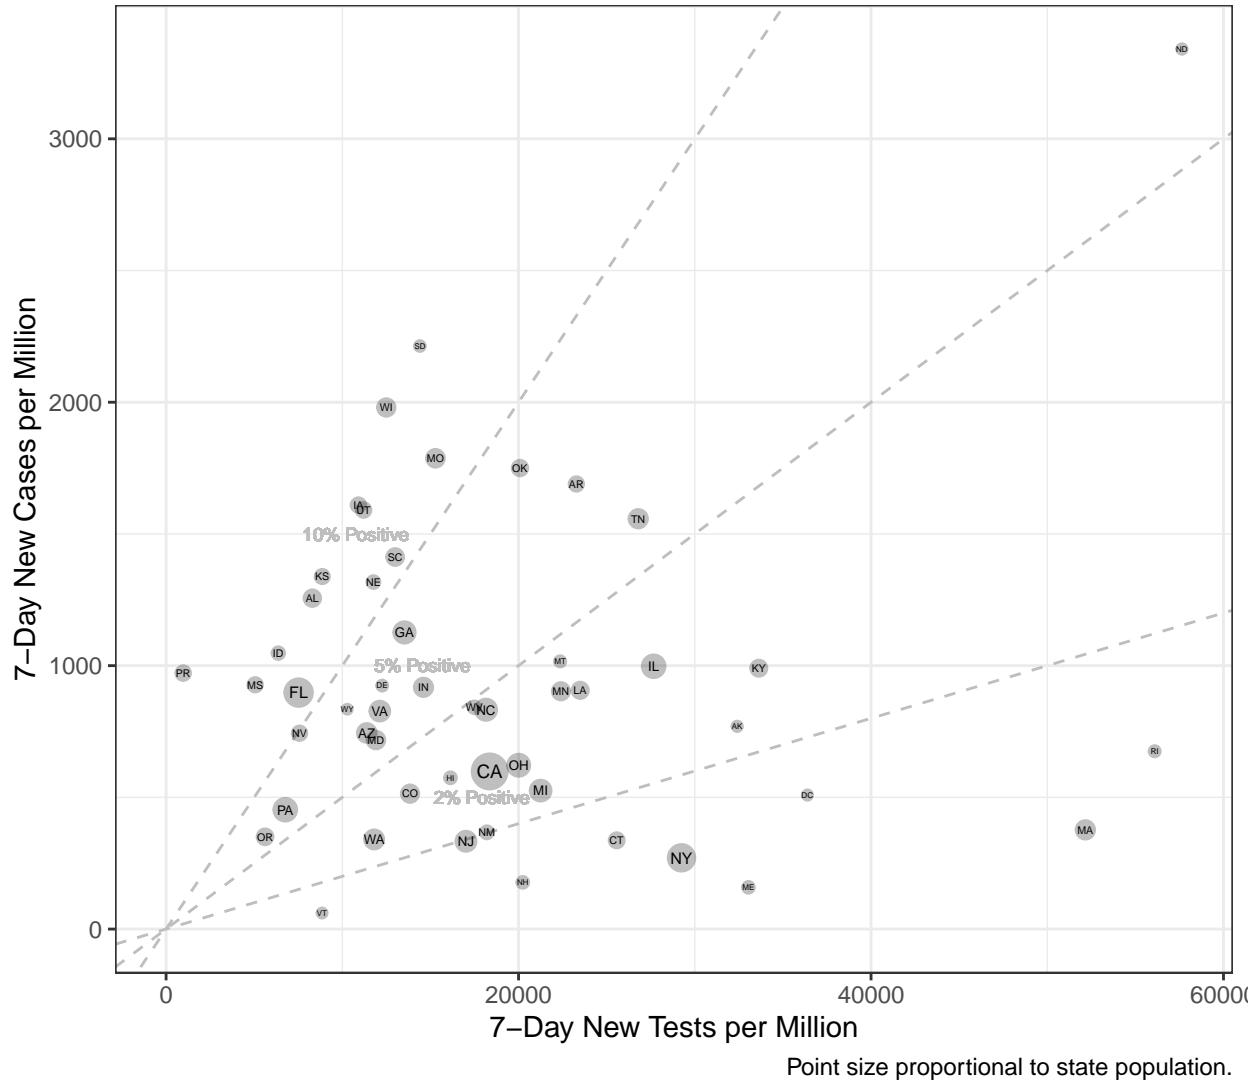

New Tests by State

Interpretation of differences in case rates across states is complicated by the fact that those states that do more thorough testing will invariably uncover more cases. A lower positive test rate is an indication that a state is doing more comprehensive testing since, when testing is rationed, only those individuals who are more likely to test positive are typically tested. The following chart compares the one-week increase in detected cases to the number of tests administered by each state relative to population. The states of greatest current concern are those with both a large increase in detected cases and a relatively small increase in tests. These states lie in the upper-left of the chart.

Tests vs. Cases by State

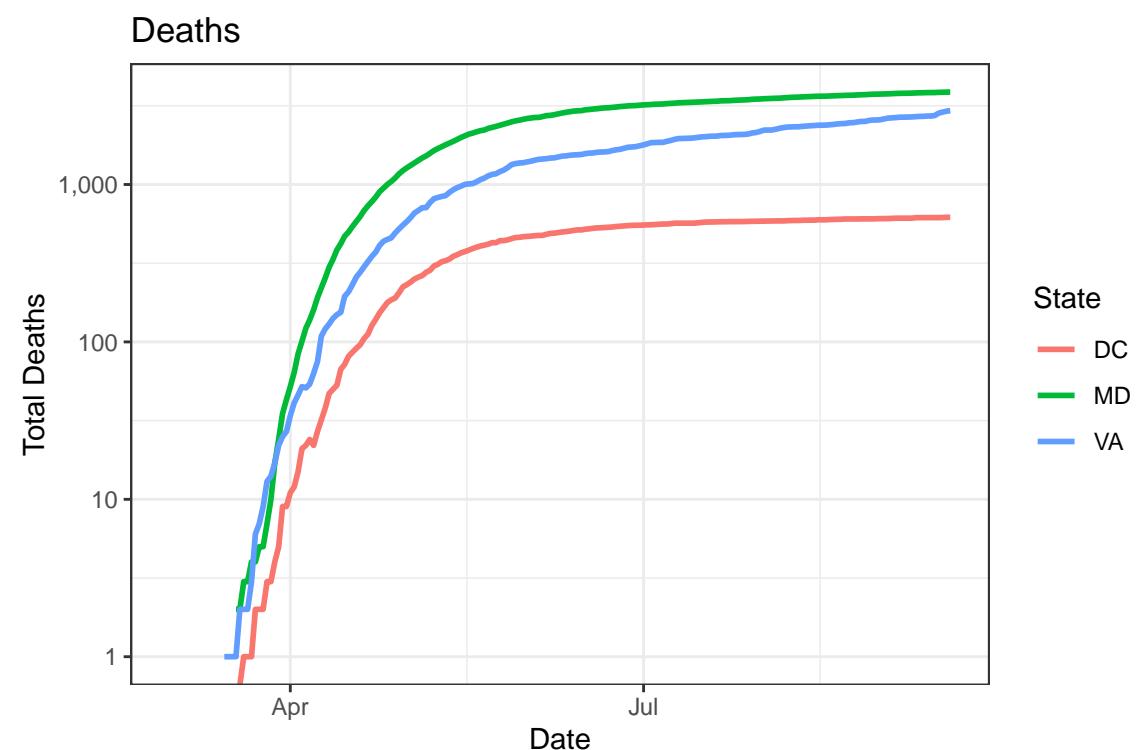

Local Data

The following charts and tables present mortality, case, and testing data for the Washington DC metropolitan area and adjacent states.

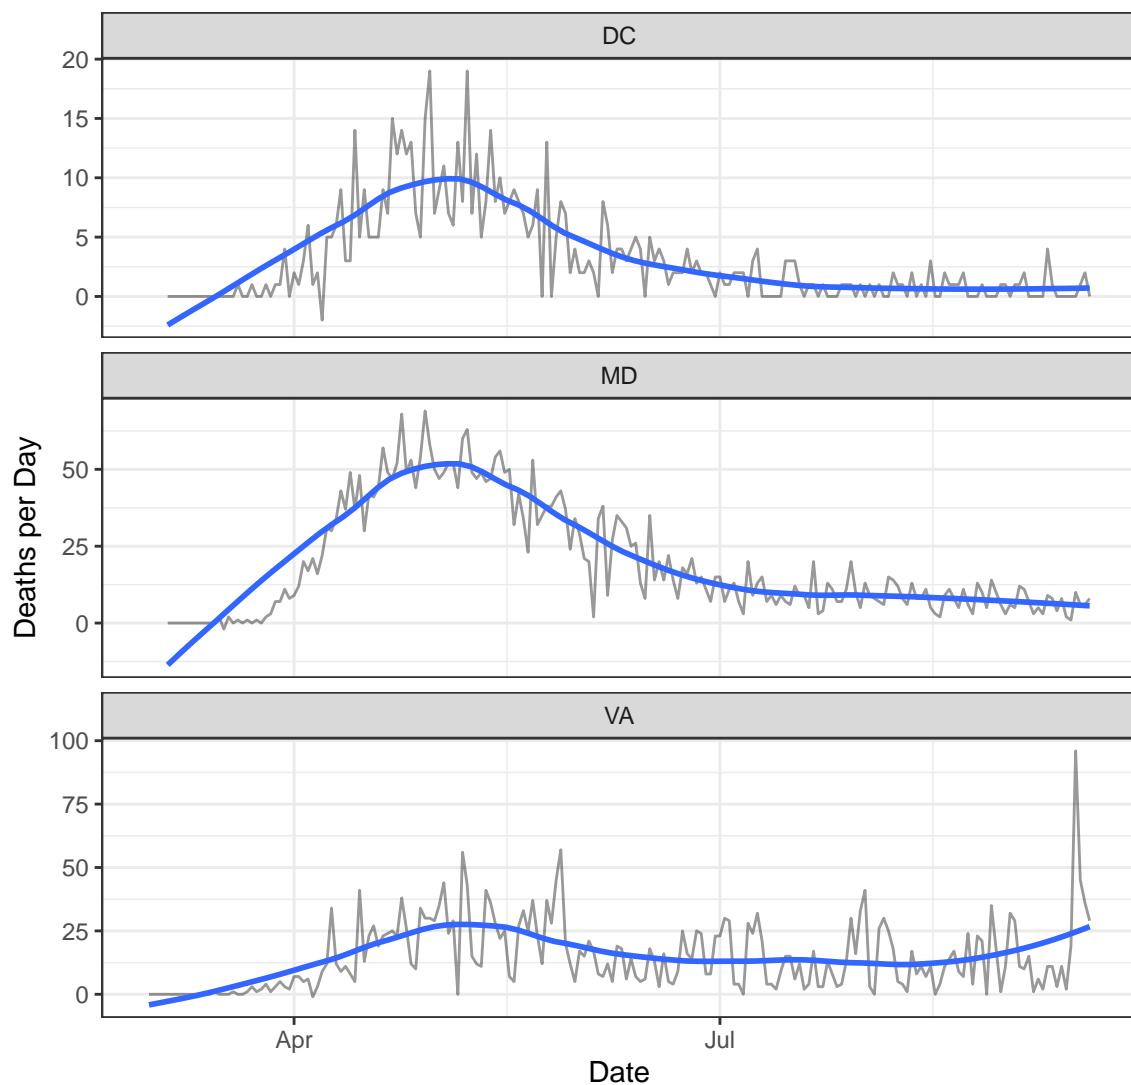

Table 3: Latest Local Data

State	Cases	Deaths	New Cases	New Deaths
DC	14,852	619	62	0
MD	119,062	3,869	543	8
VA	138,702	2,949	1,242	29
