

Erik's Covid-19 Chart Pack

Data updated 2020-08-24 17:31:23. World data are from Worldometers. National and state-level mortality, case, and testing data are from Johns-Hopkins University. County and city-level mortality and case data are from the New York Times. Most data presented in this report were accessed through APIs provided by The COVID Tracking Project and NovelCOVID API.

World Data

There have been 23,589,244 confirmed Covid-19 cases and 812,209 deaths worldwide.

Deaths

Cases

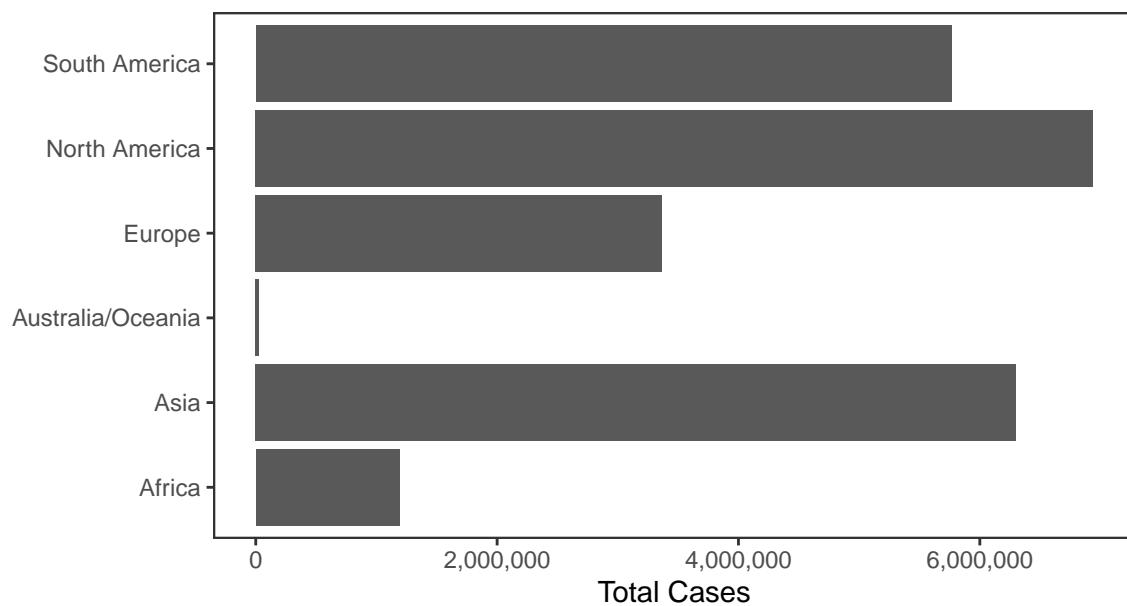

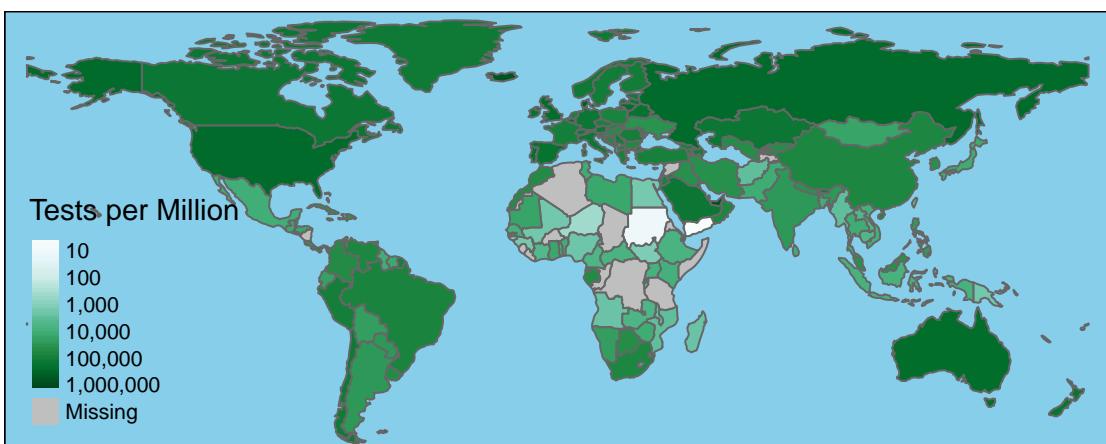

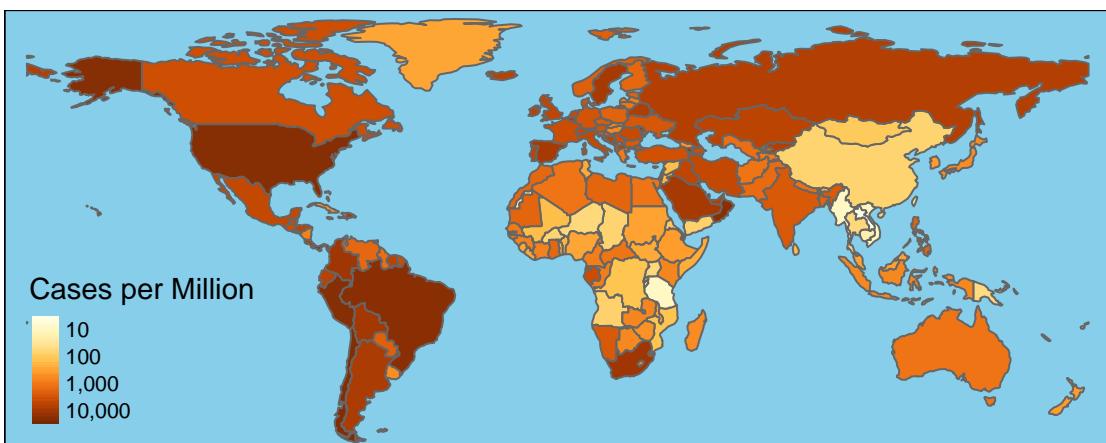

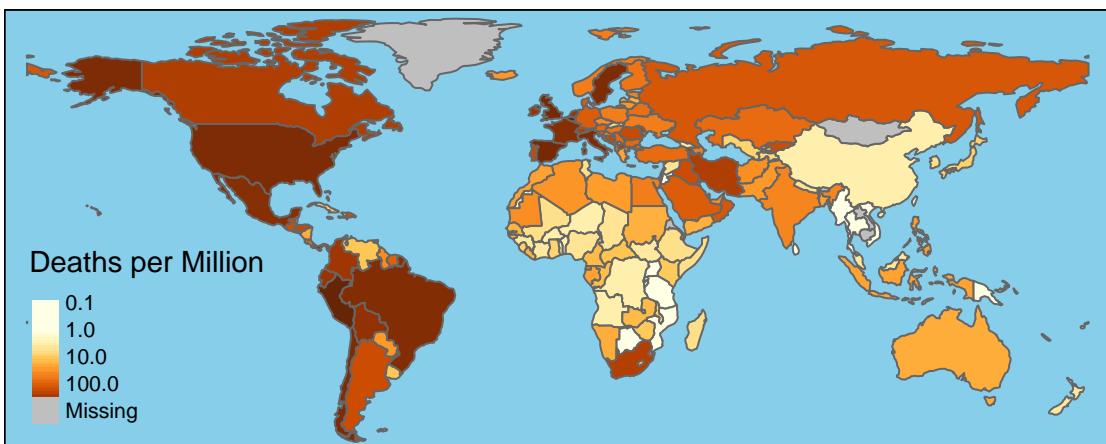

Table 1: Top Countries by Total Cases

Country	Cases	Deaths	New Cases	New Deaths
USA	5,874,146	180,604	32,718	430
Brazil	3,605,783	114,772	23,085	495
India	3,105,185	57,692	61,749	846
Russia	956,749	16,383	4,852	73
South Africa	609,773	13,059	2,728	72
Peru	594,326	27,663	9,090	210
Mexico	556,216	60,254	6,482	644
Colombia	541,147	17,316	8,044	348
Spain	418,729	28,860	3,950	11
Chile	397,665	10,852	1,957	60
Iran	358,905	20,643	2,113	141
Argentina	342,154	6,985	5,352	137
UK	325,761	41,429	1,160	6
Saudi Arabia	307,479	3,649	1,109	30
Bangladesh	294,598	3,941	1,973	34
Pakistan	292,765	6,235	591	4
Italy	259,345	35,437	1,209	7
Turkey	258,249	6,121	1,217	19
France	242,899	30,513	4,897	1
Germany	234,489	9,332	632	1

National Data

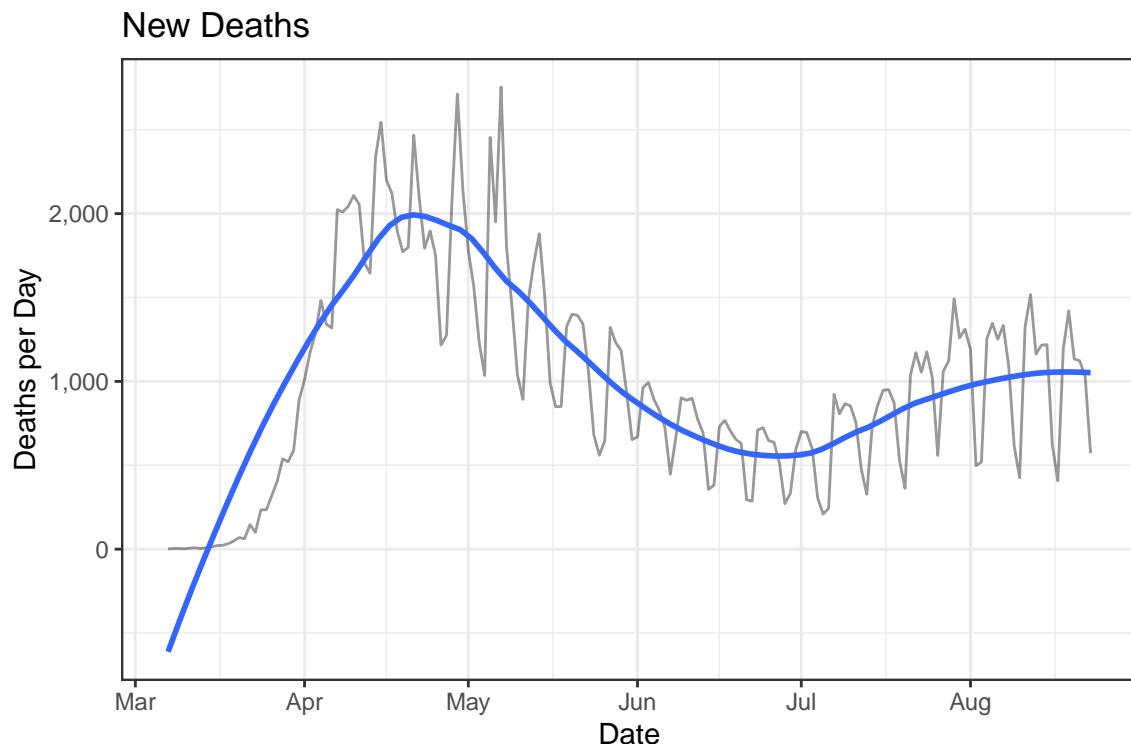

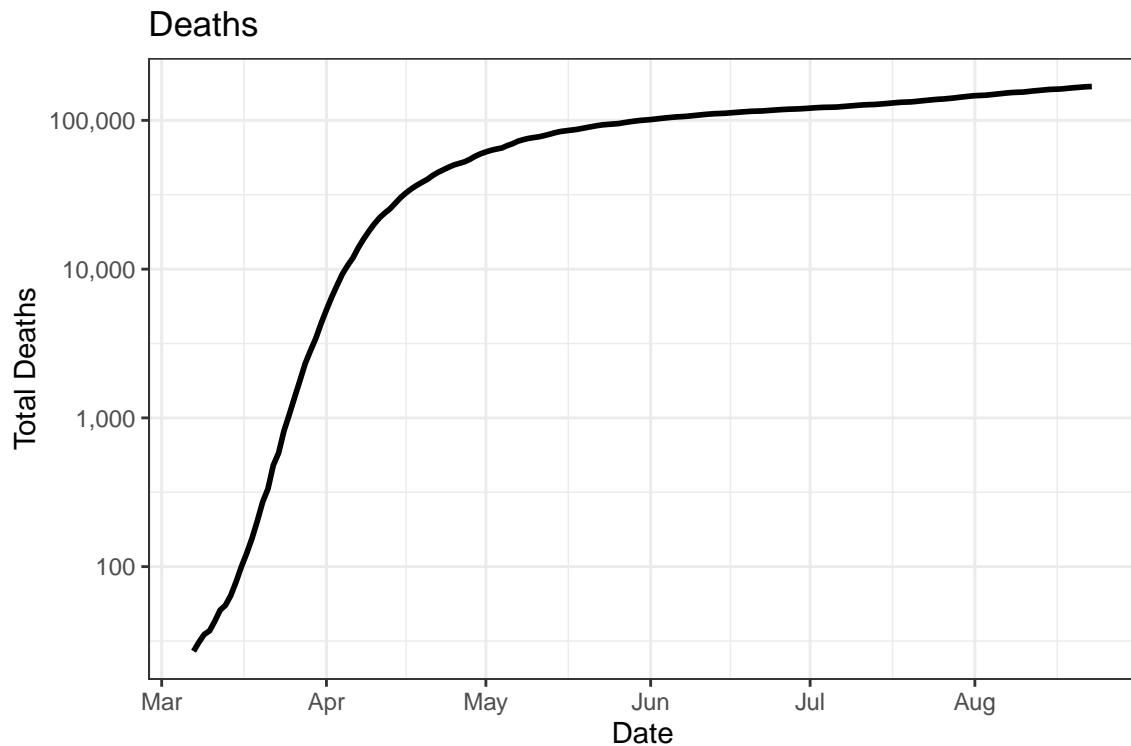

There have been 5,678,088 confirmed Covid-19 cases and 168,863 deaths in the United States.

Table 2: U.S. Deaths and Cases over the Last Two Weeks

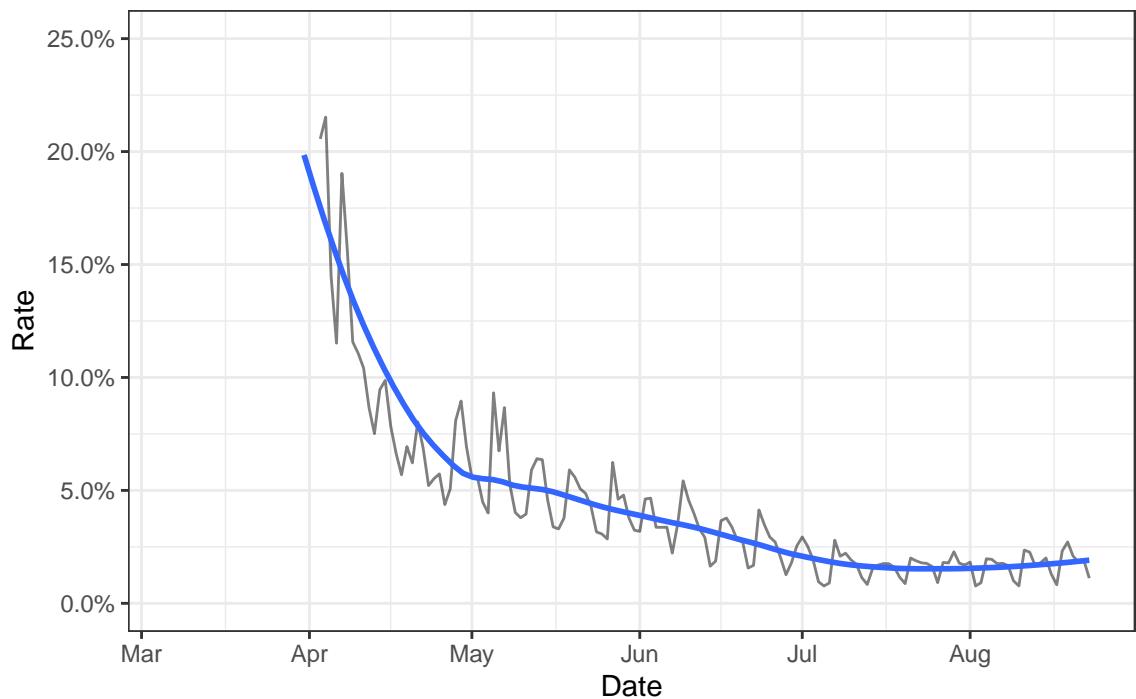

Date	Cases	Deaths	New Cases	New Deaths
2020-08-23	5,678,088	168,863	38,322	572
2020-08-22	5,639,766	168,291	46,448	1,029
2020-08-21	5,593,318	167,262	46,821	1,123
2020-08-20	5,546,497	166,139	43,740	1,134
2020-08-19	5,502,757	165,005	44,933	1,420
2020-08-18	5,457,824	163,585	40,458	1,195
2020-08-17	5,417,366	162,390	37,817	407
2020-08-16	5,379,549	161,983	43,083	619
2020-08-15	5,336,466	161,364	56,603	1,219
2020-08-14	5,279,863	160,145	55,649	1,216
2020-08-13	5,224,214	158,929	51,705	1,163
2020-08-12	5,172,509	157,766	56,035	1,517
2020-08-11	5,116,474	156,249	55,594	1,326
2020-08-10	5,060,880	154,923	41,835	426

Deaths

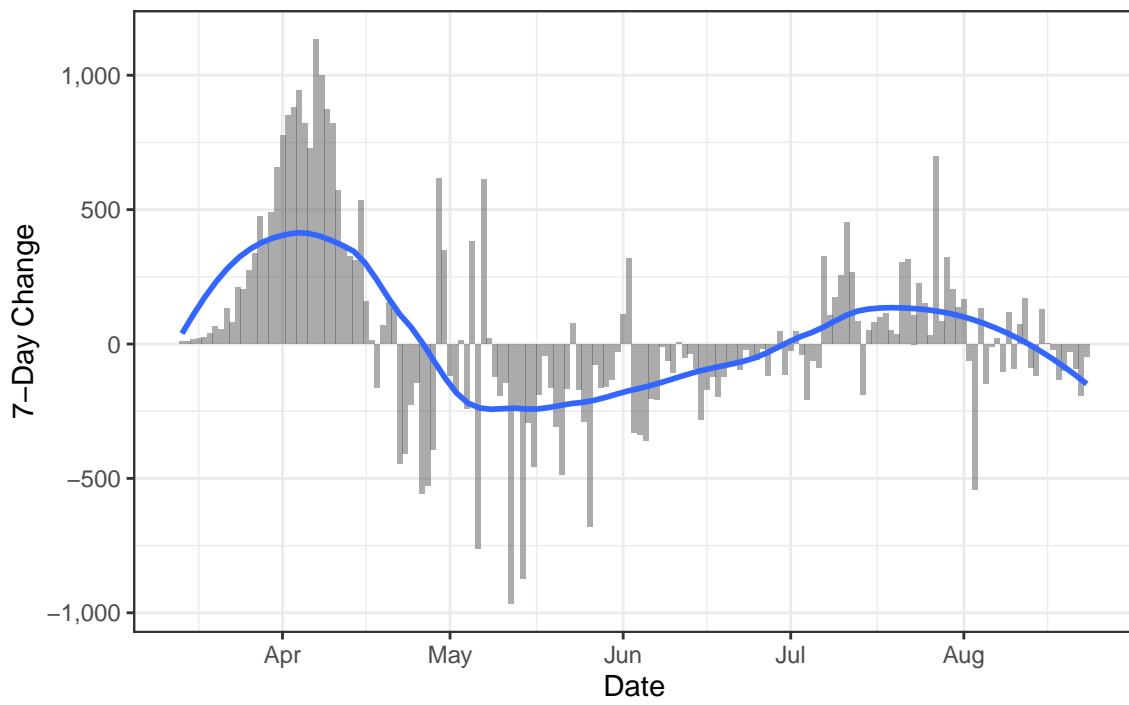

Because the effects of the virus can take several weeks to manifest in patients, deaths are a lagging indicator of contagion, but they may be a more reliable than case counts, which are a function of both the prevalence of the disease and the rate of testing. The case mortality rate is a very crude indicator of lethality because a large numbers of non-lethal cases are likely never detected. A declining case mortality rate is indicative of more widespread testing.

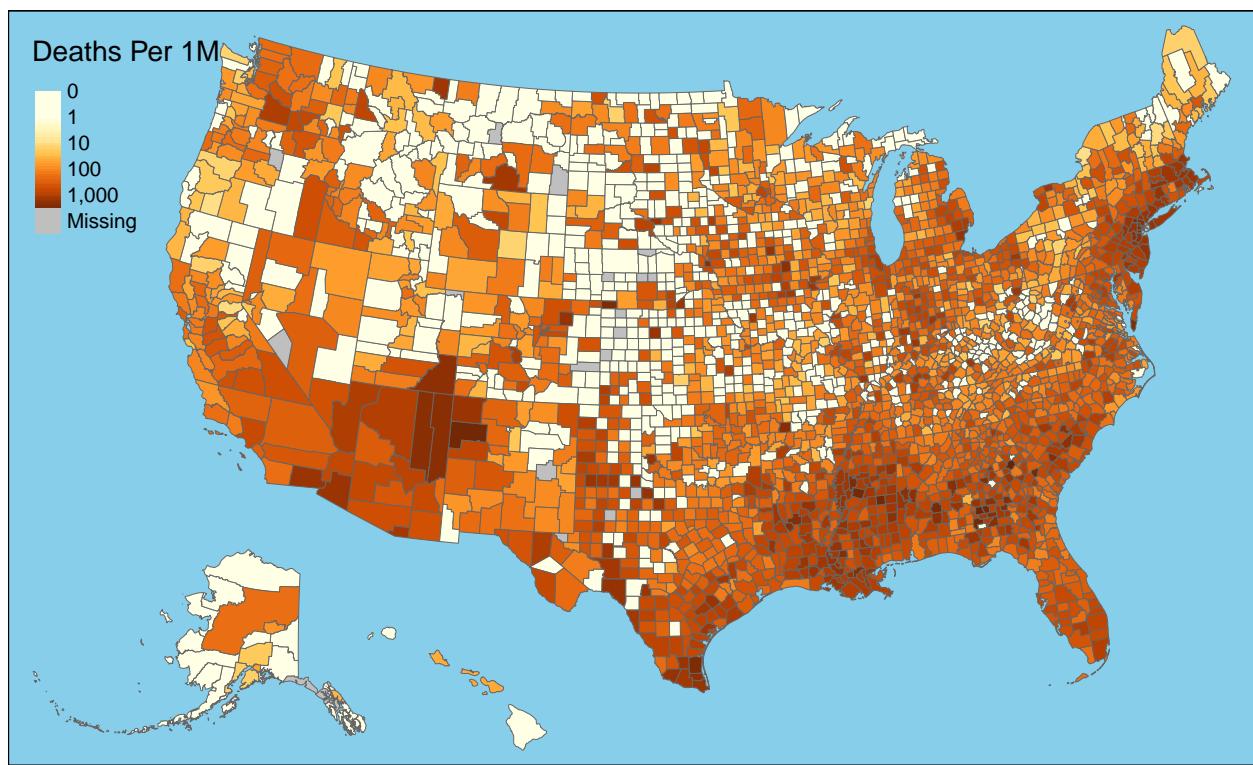

Daily Case Mortality Rate

One-Week Change in Daily Deaths

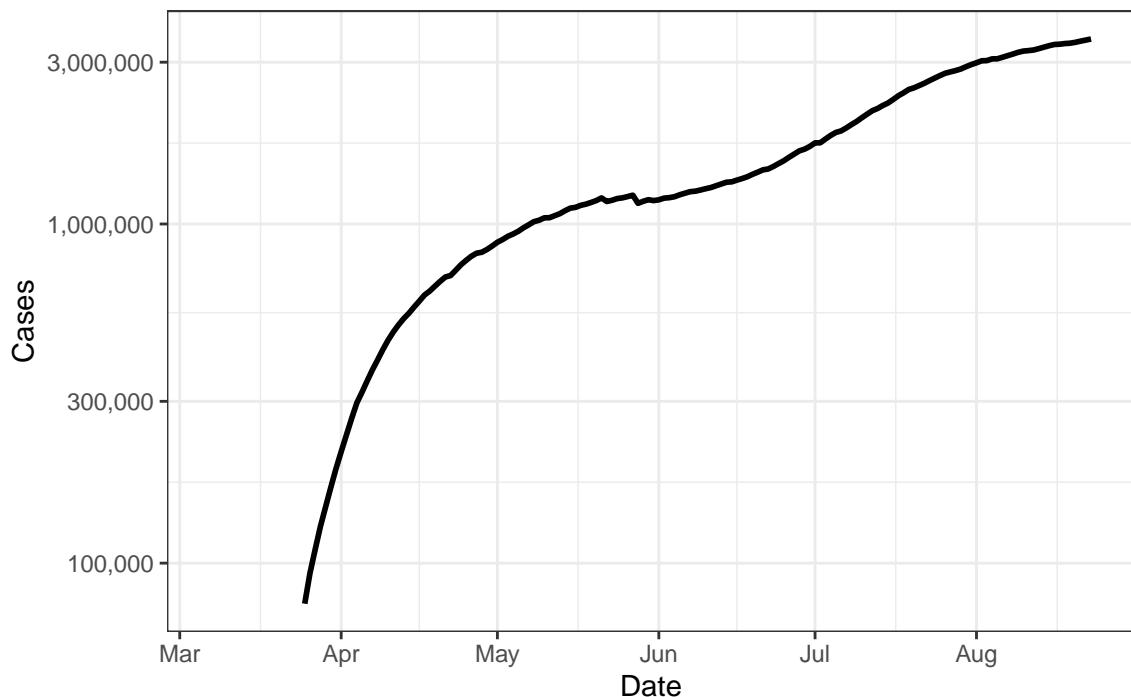

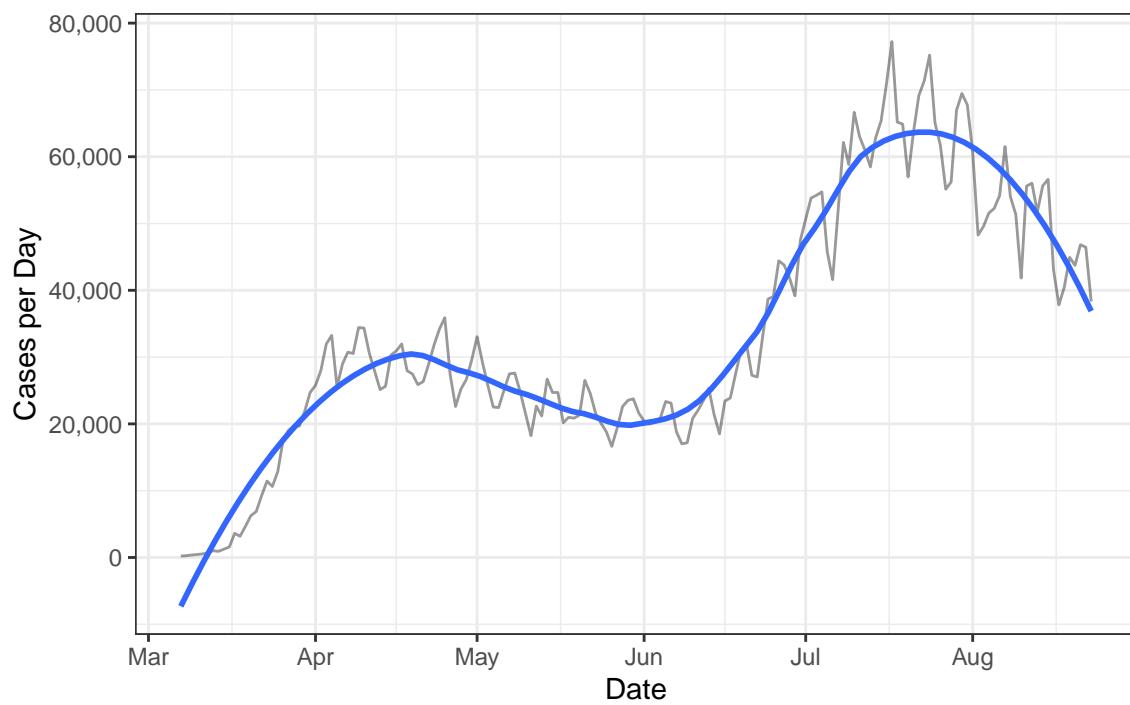

Cases

Reported cases are a function of both the spread of the disease and the prevalence of testing.

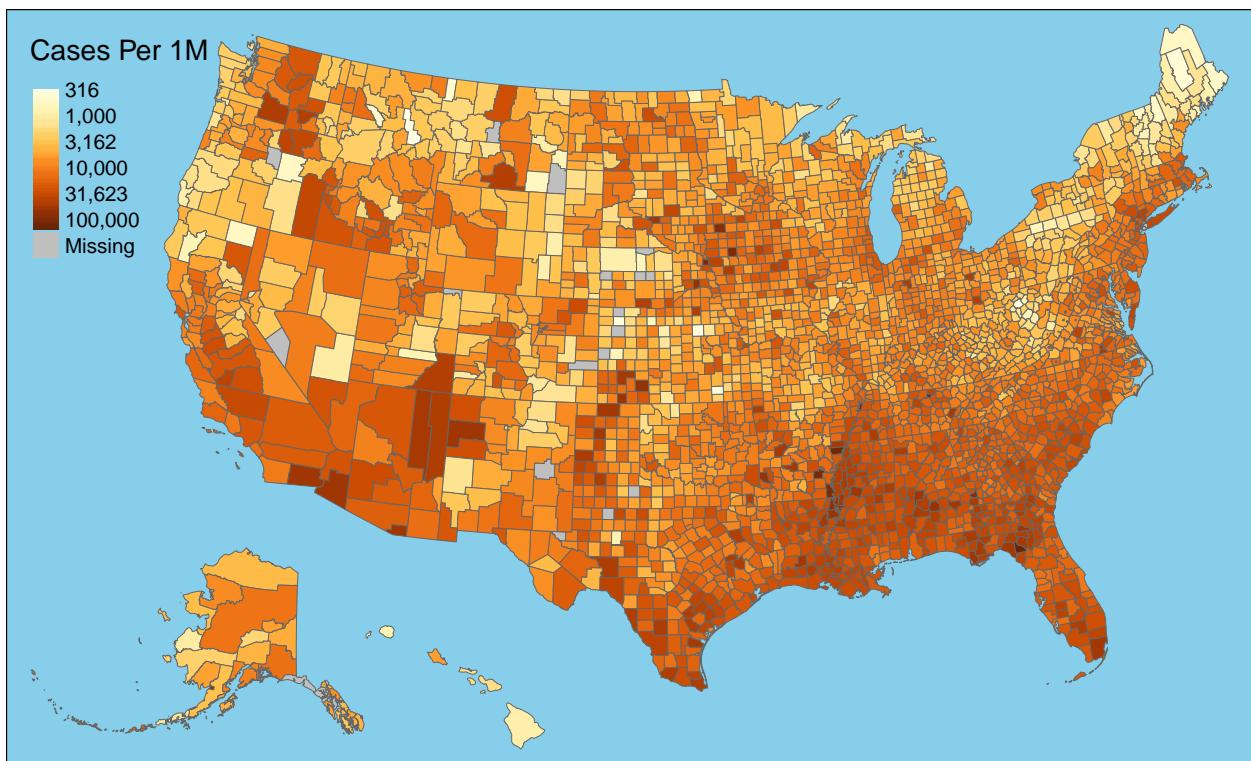

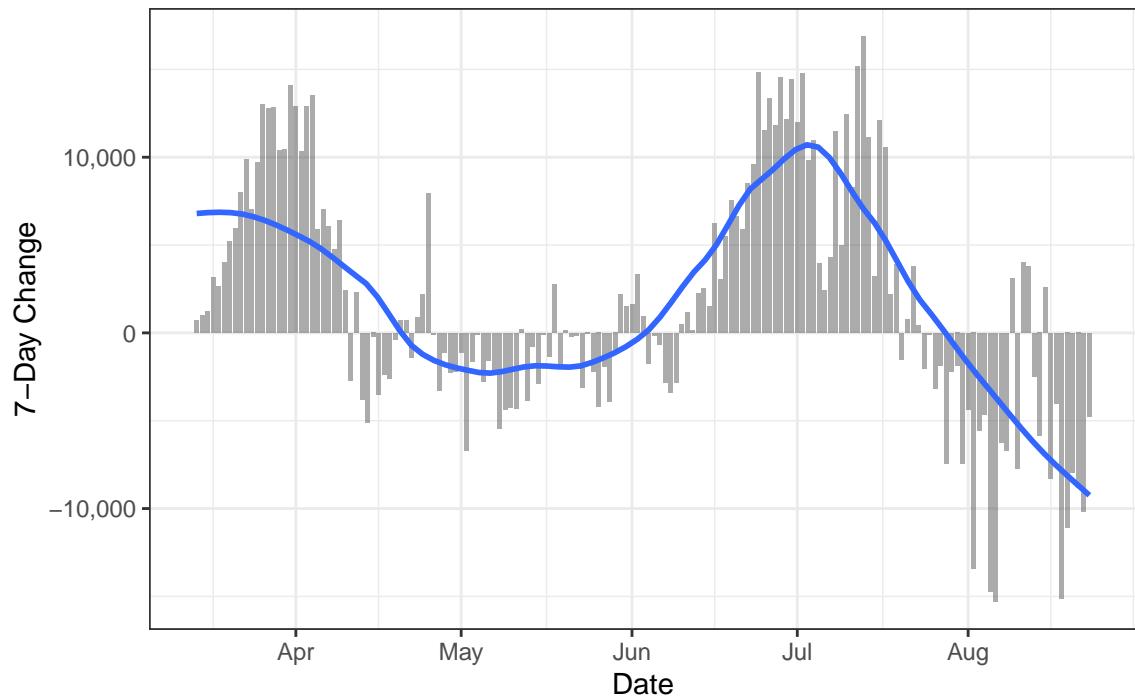

Active Cases

New Cases

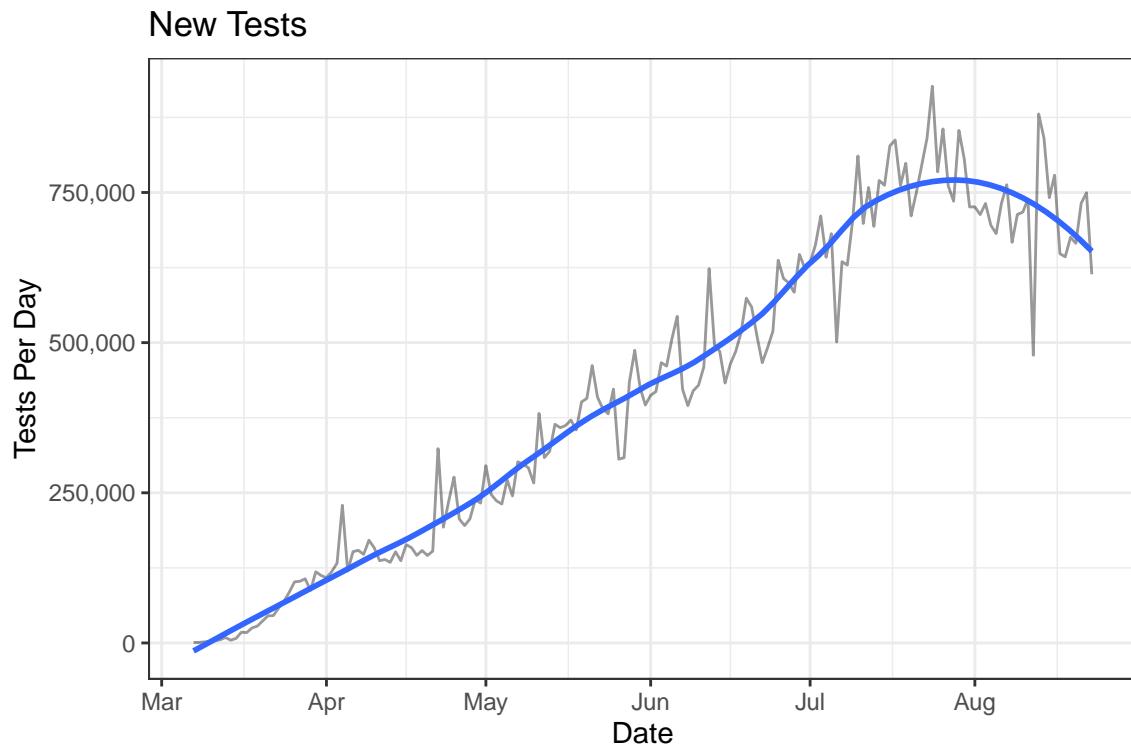

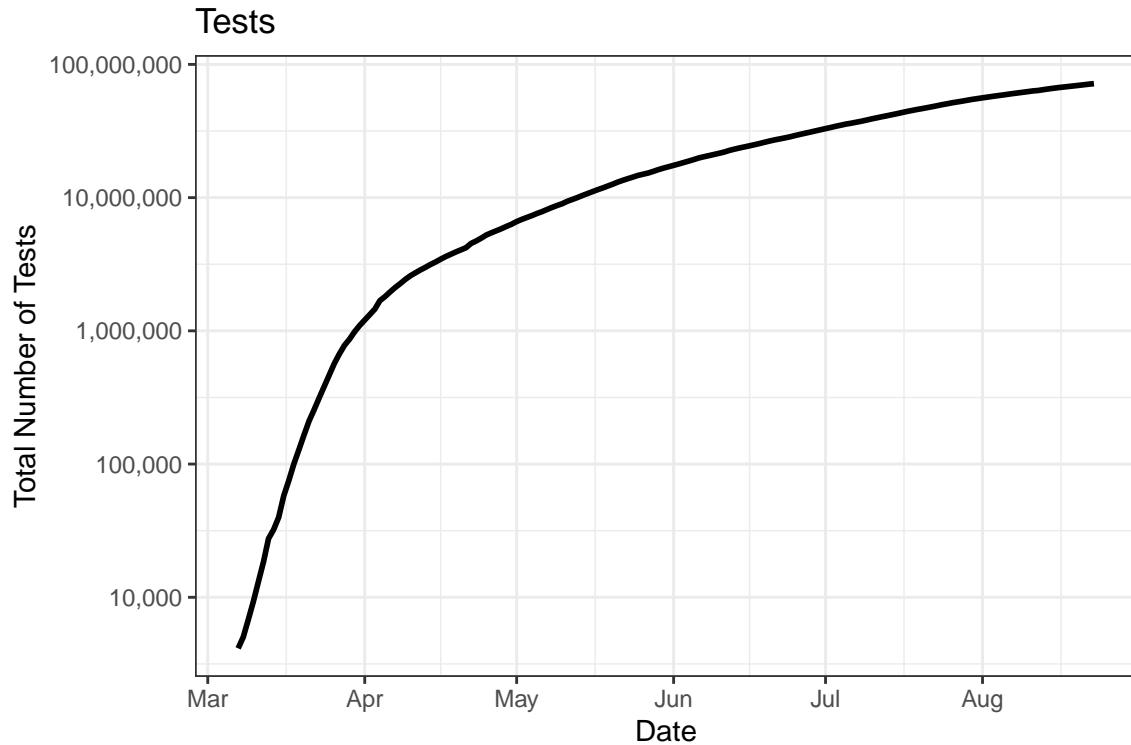

One-Week Change in Daily Cases

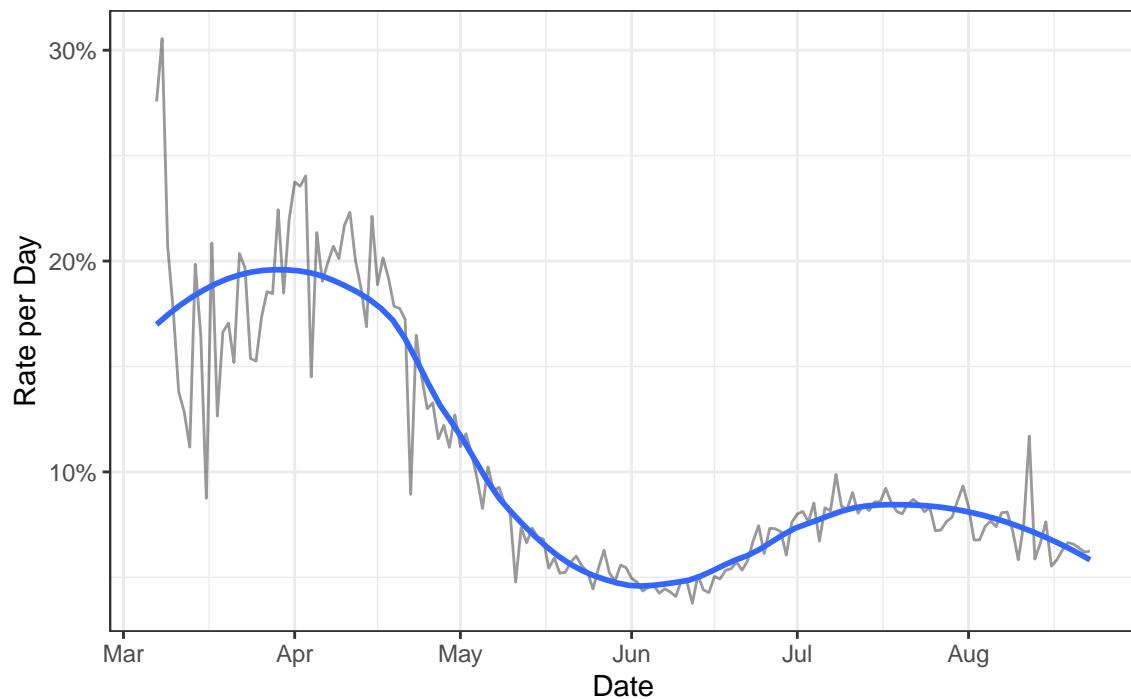

Testing

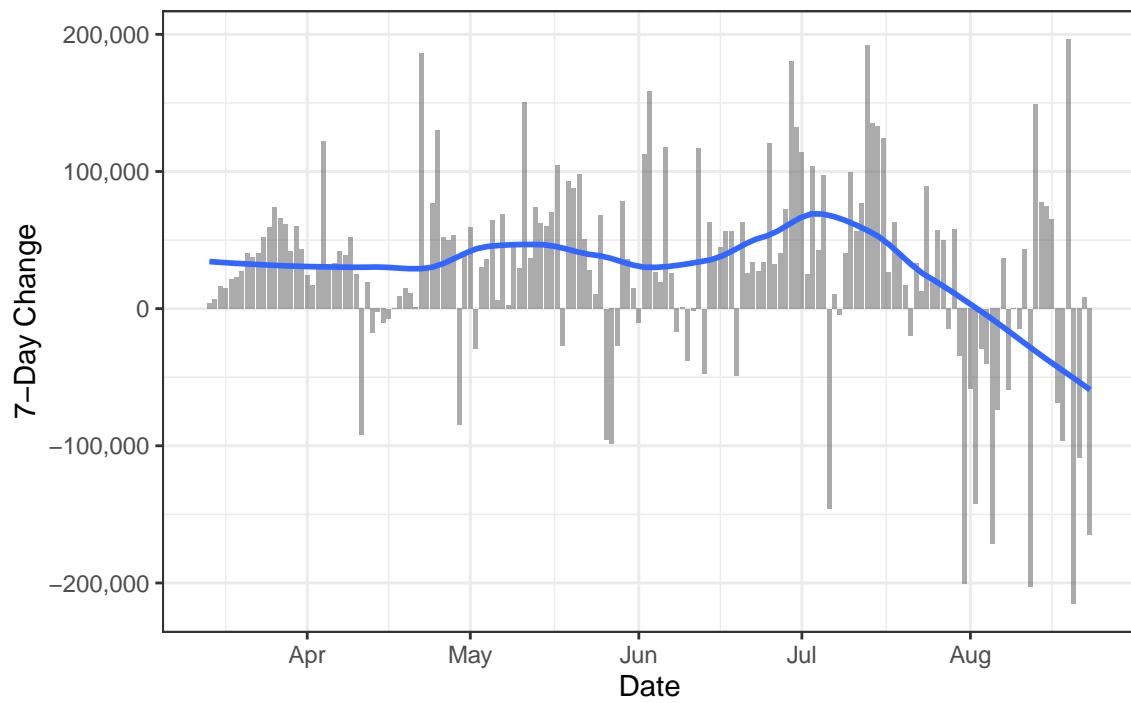

Widespread testing is necessary for managing the spread of the disease. The following charts show how testing in the United States has changed over time. When the supply of available tests is limited, they are typically only used for patients whose symptoms suggest they are likely to have contracted the virus. A high positive test rate indicates that testing capacity is constrained.

Positive Test Rate

One-Week Change in Daily Tests

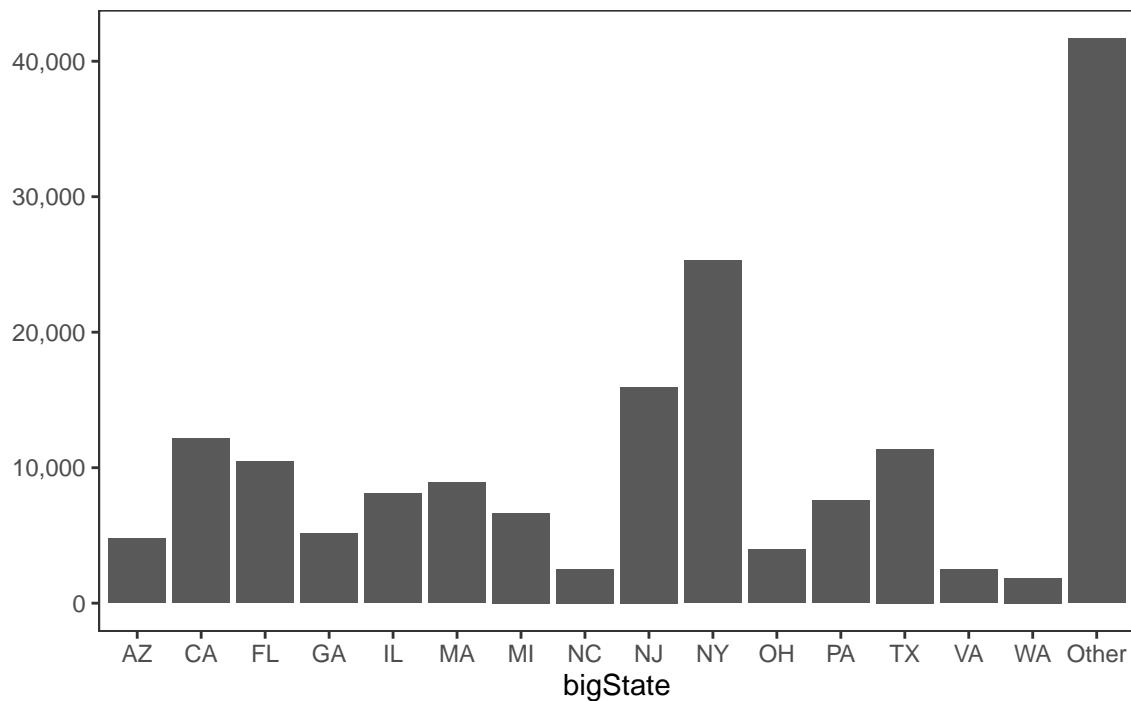

State Data

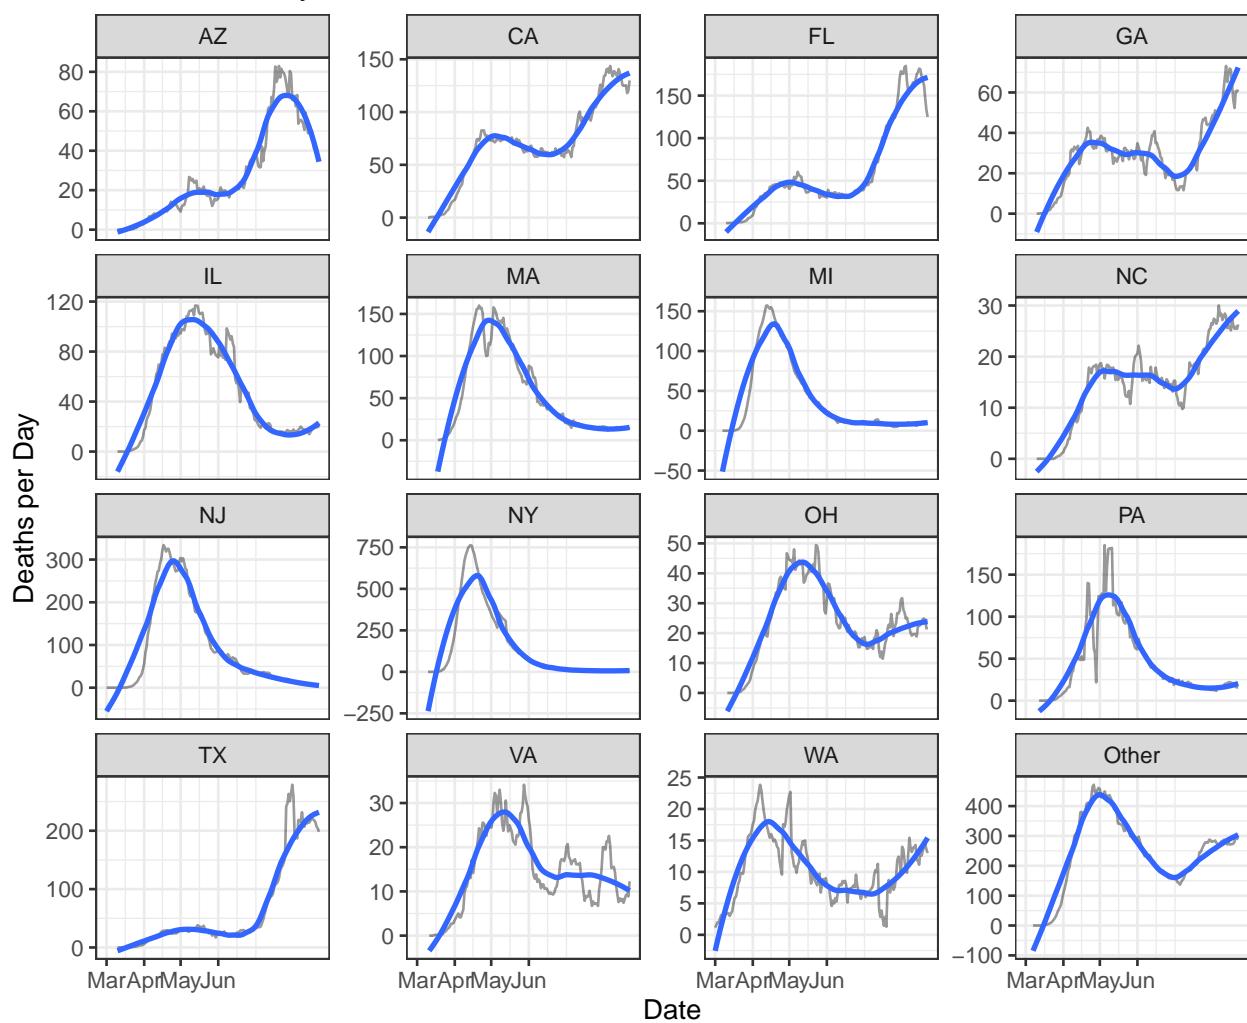

This section summarizes state-level data. Most data are reported for the largest 15 states by population, which account for NaN percent of the total U.S. population.

Deaths

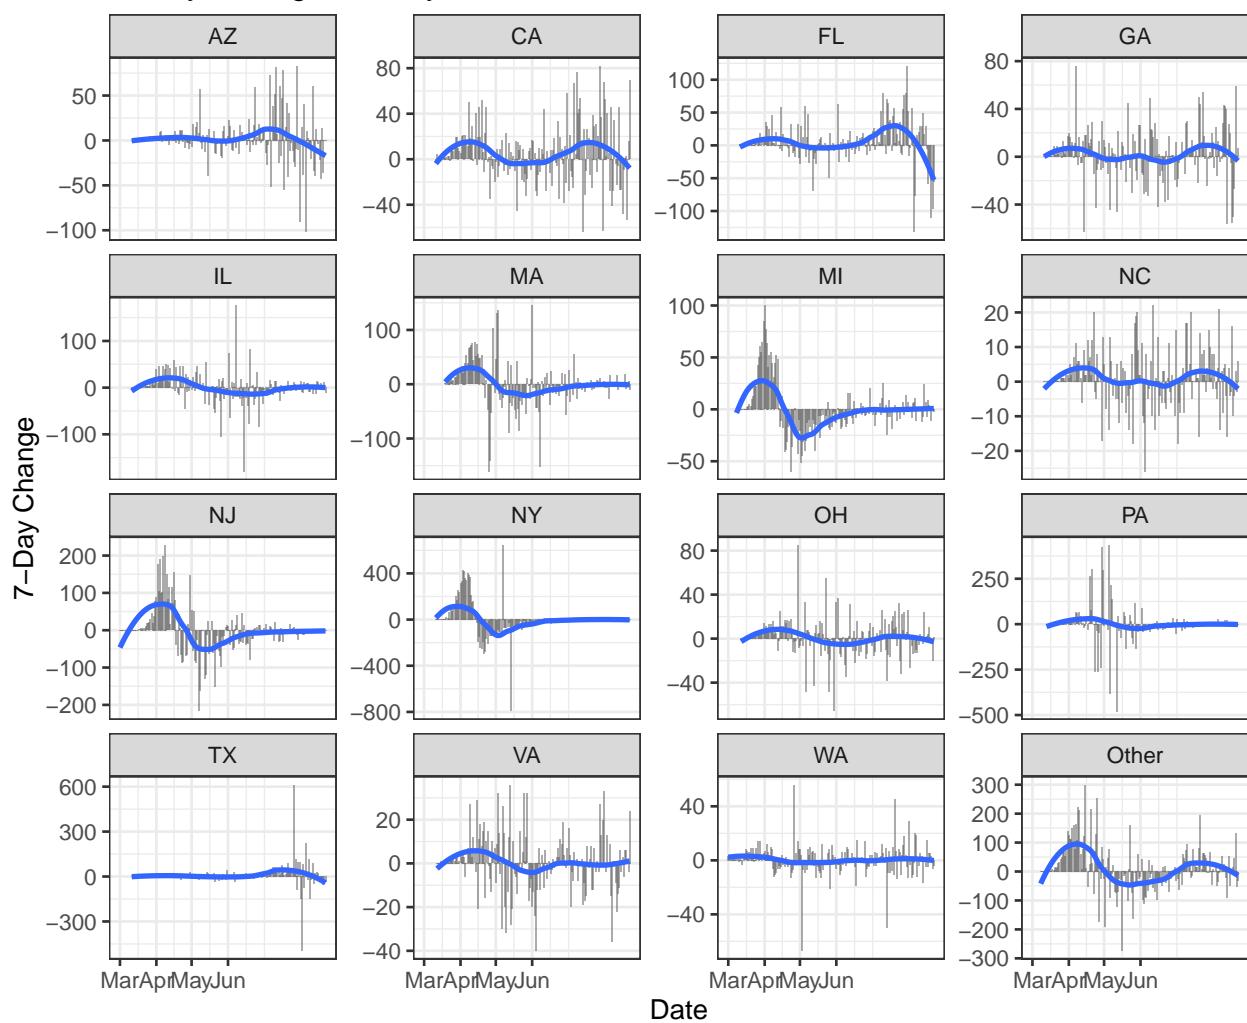

Deaths by State

Cases

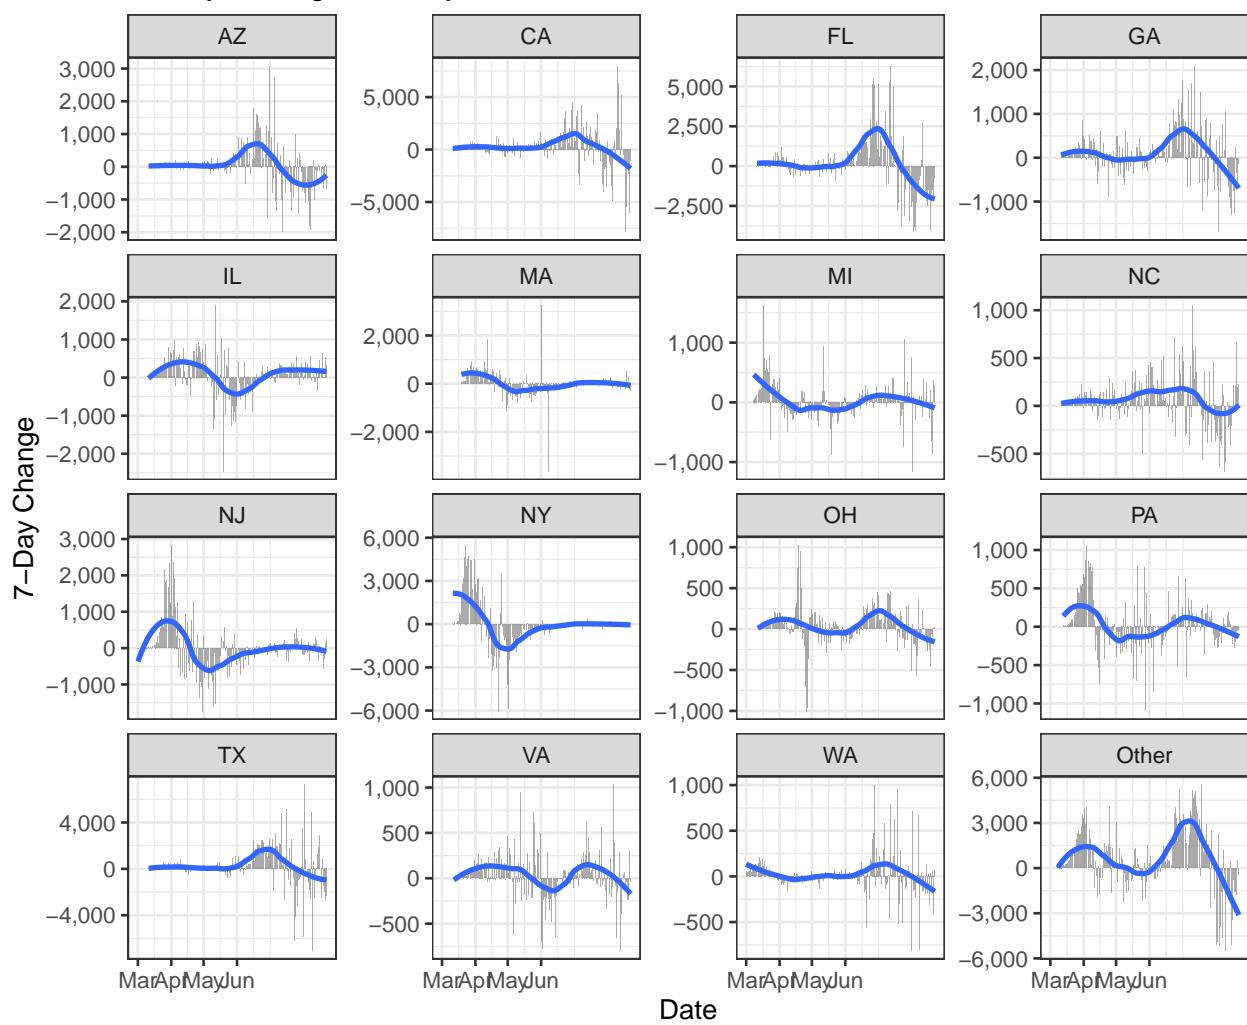

Cases by State

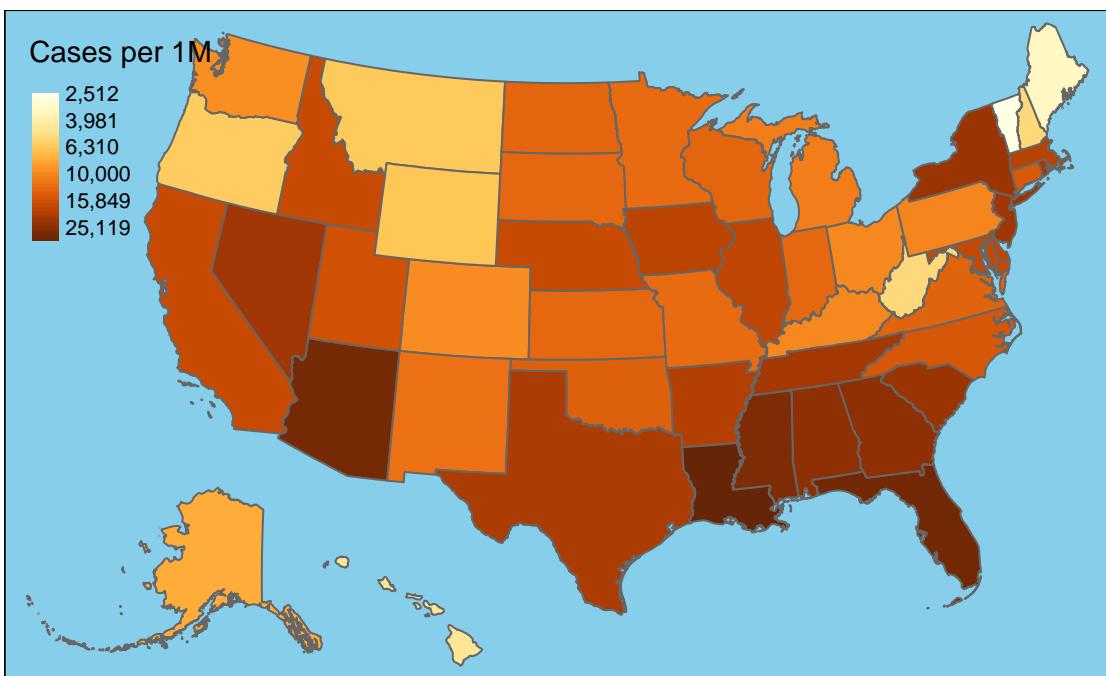

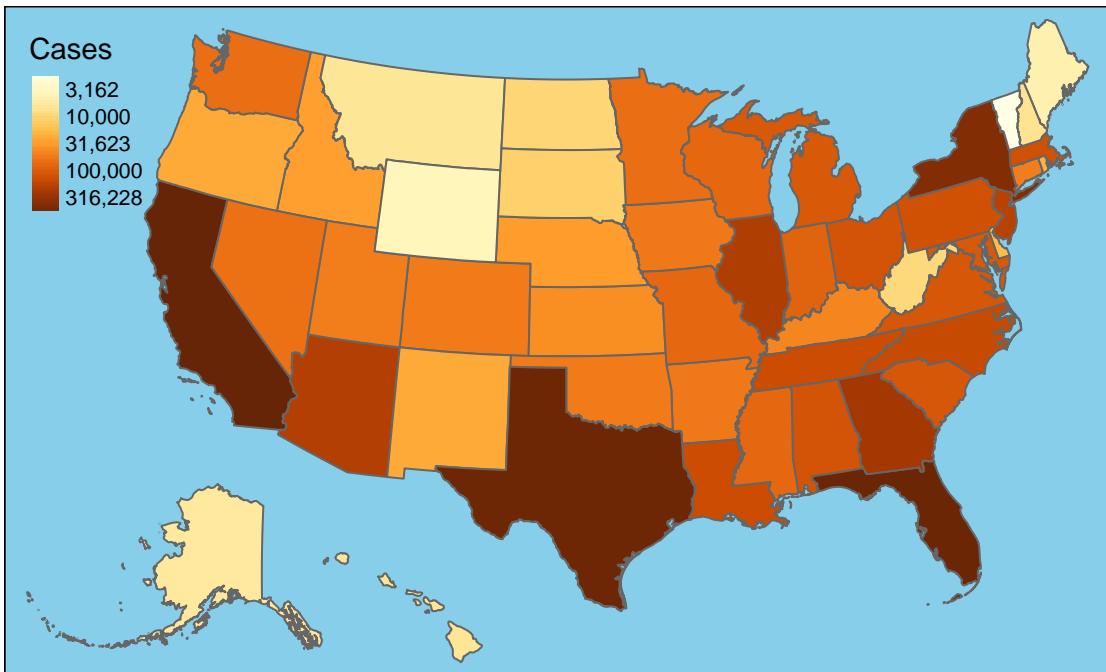

New Cases by State

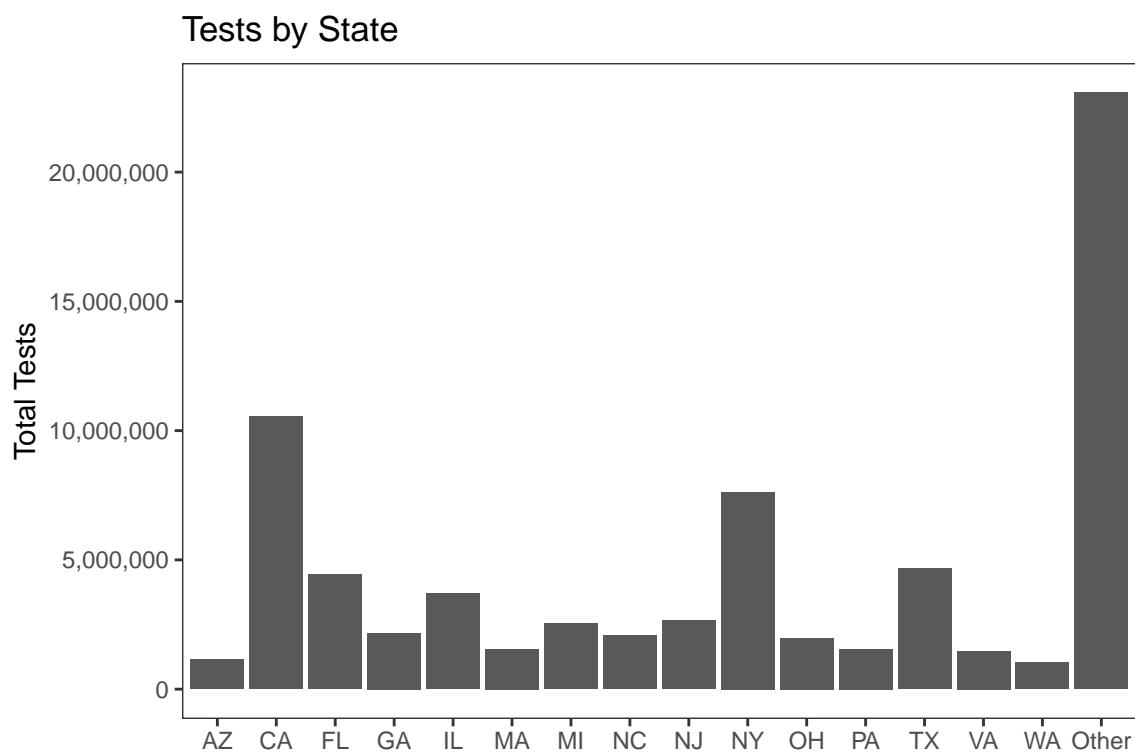

7-Day Change in Daily Cases

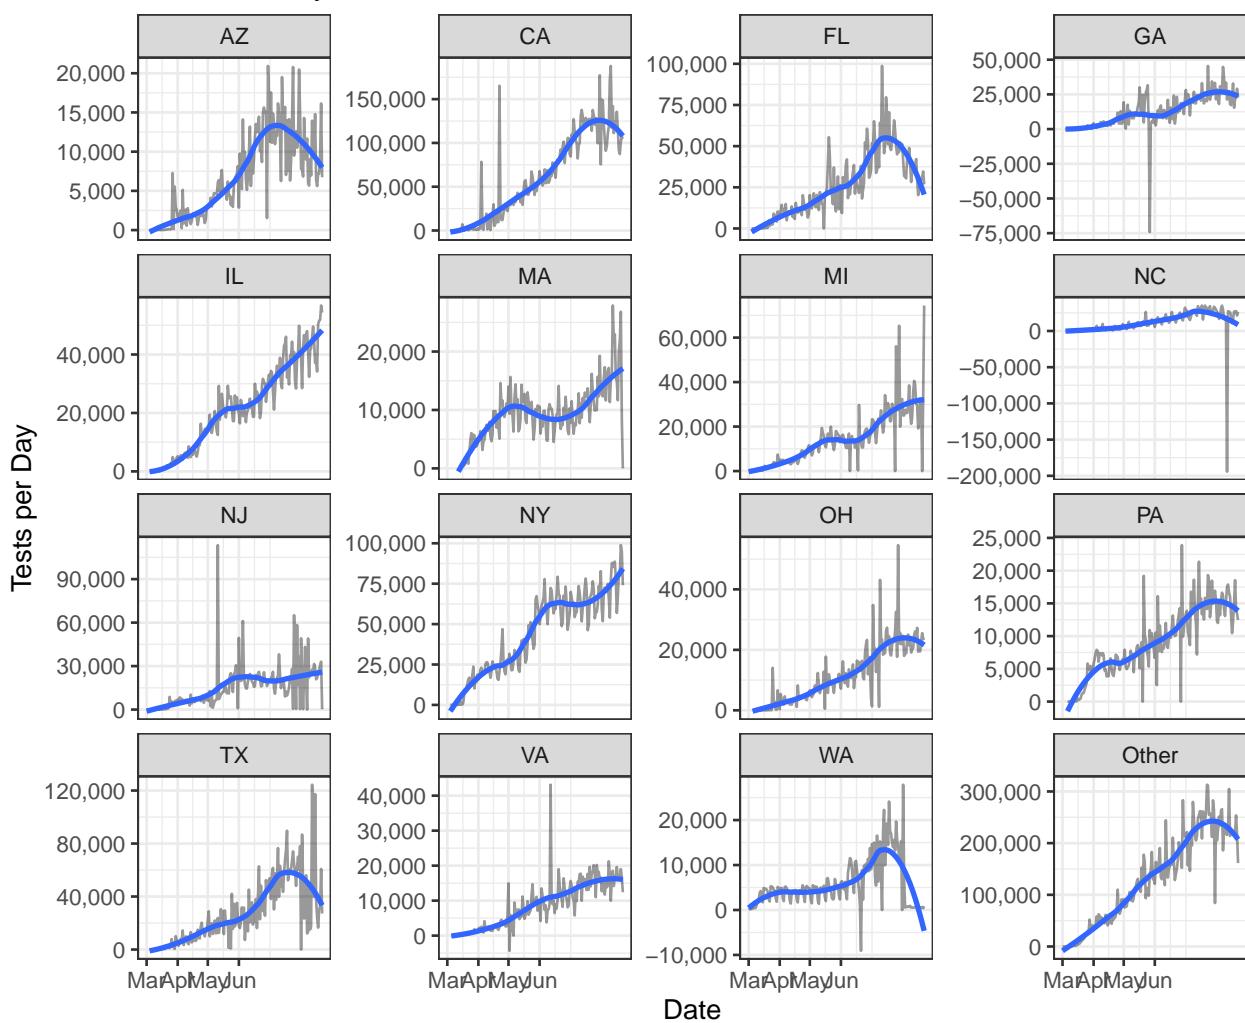

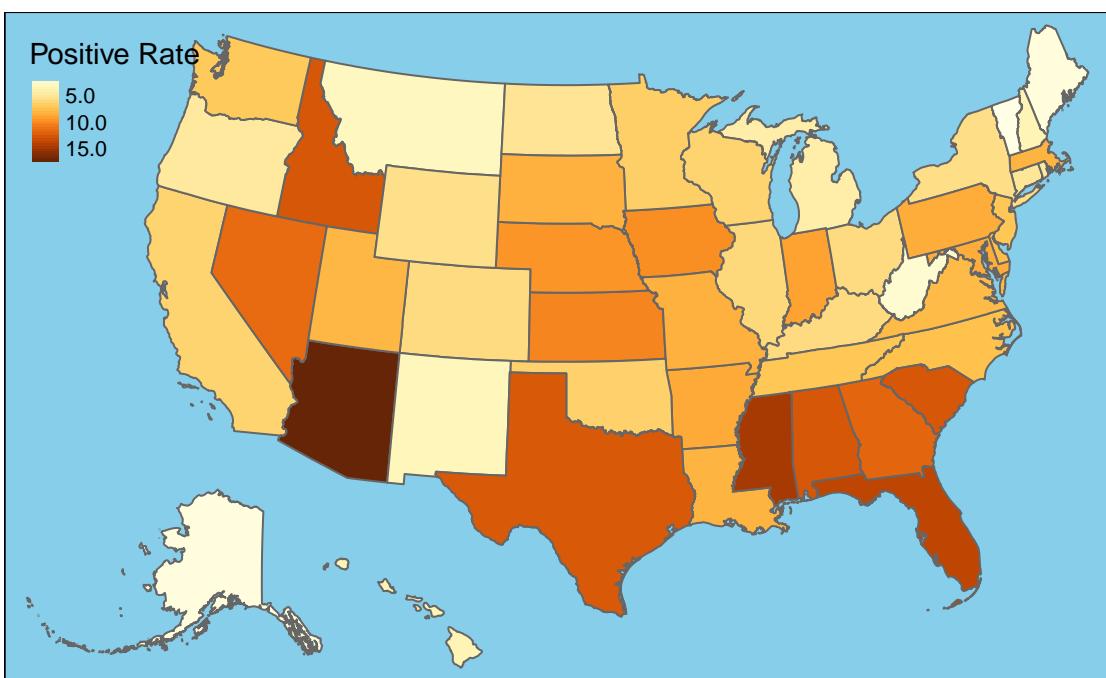

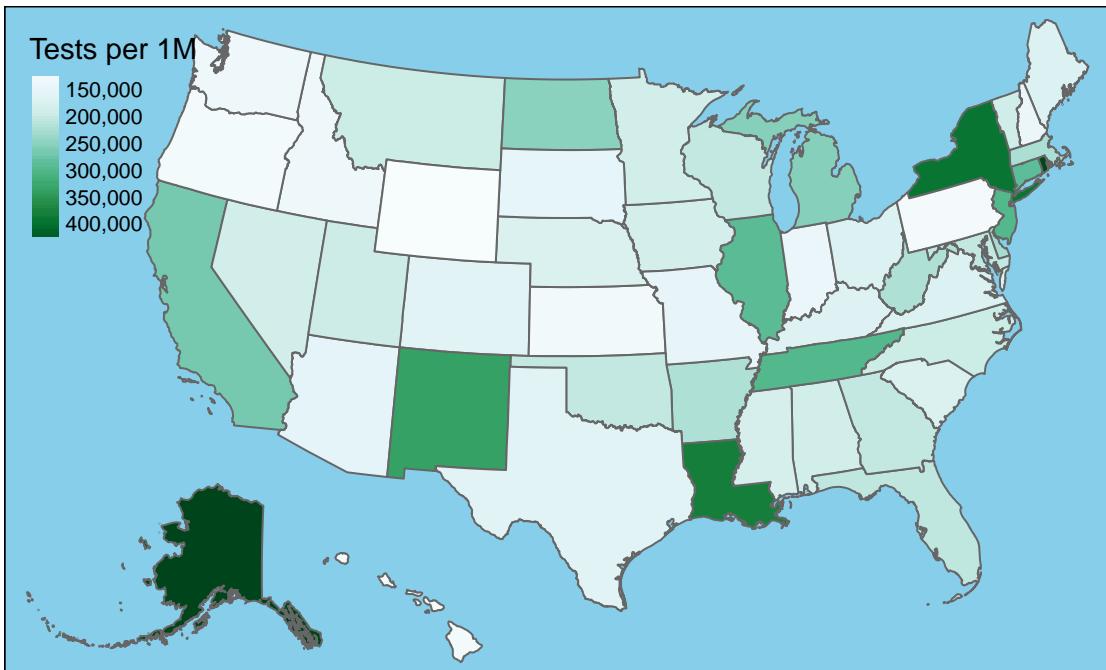

Testing

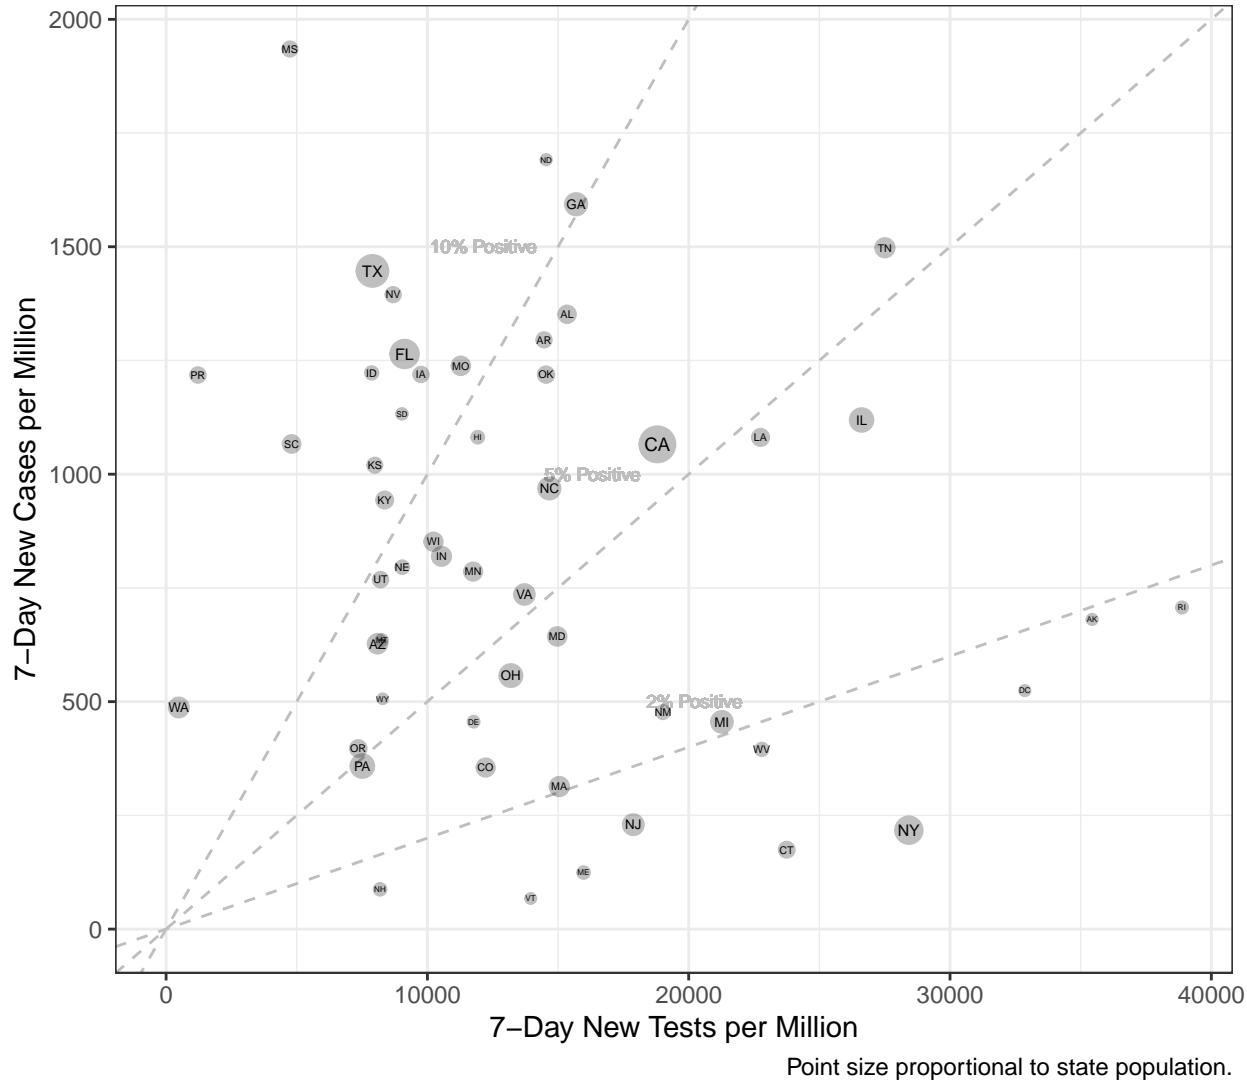

New Tests by State

Interpretation of differences in case rates across states is complicated by the fact that those states that do more thorough testing will invariably uncover more cases. A lower positive test rate is an indication that a state is doing more comprehensive testing since, when testing is rationed, only those individuals who are more likely to test positive are typically tested. The following chart compares the one-week increase in detected cases to the number of tests administered by each state relative to population. The states of greatest current concern are those with both a large increase in detected cases and a relatively small increase in tests. These states lie in the upper-left of the chart.

Tests vs. Cases by State

Point size proportional to state population.

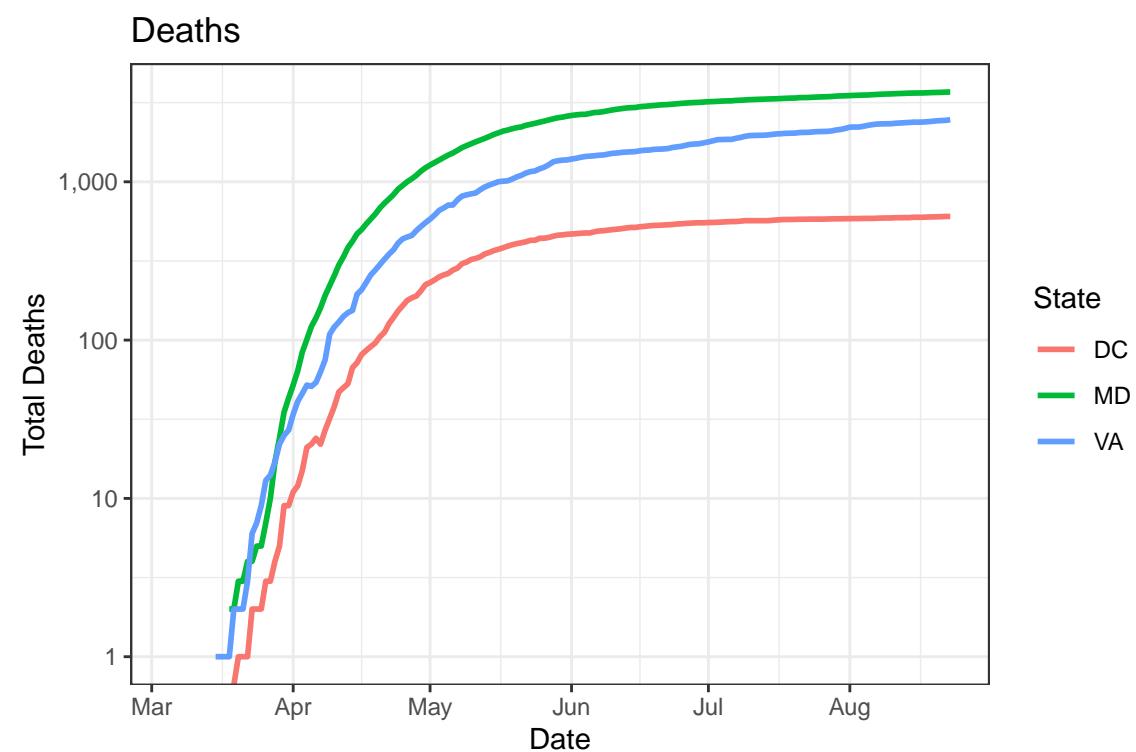

Local Data

The following charts and tables present mortality, case, and testing data for the Washington DC metropolitan area and adjacent states.

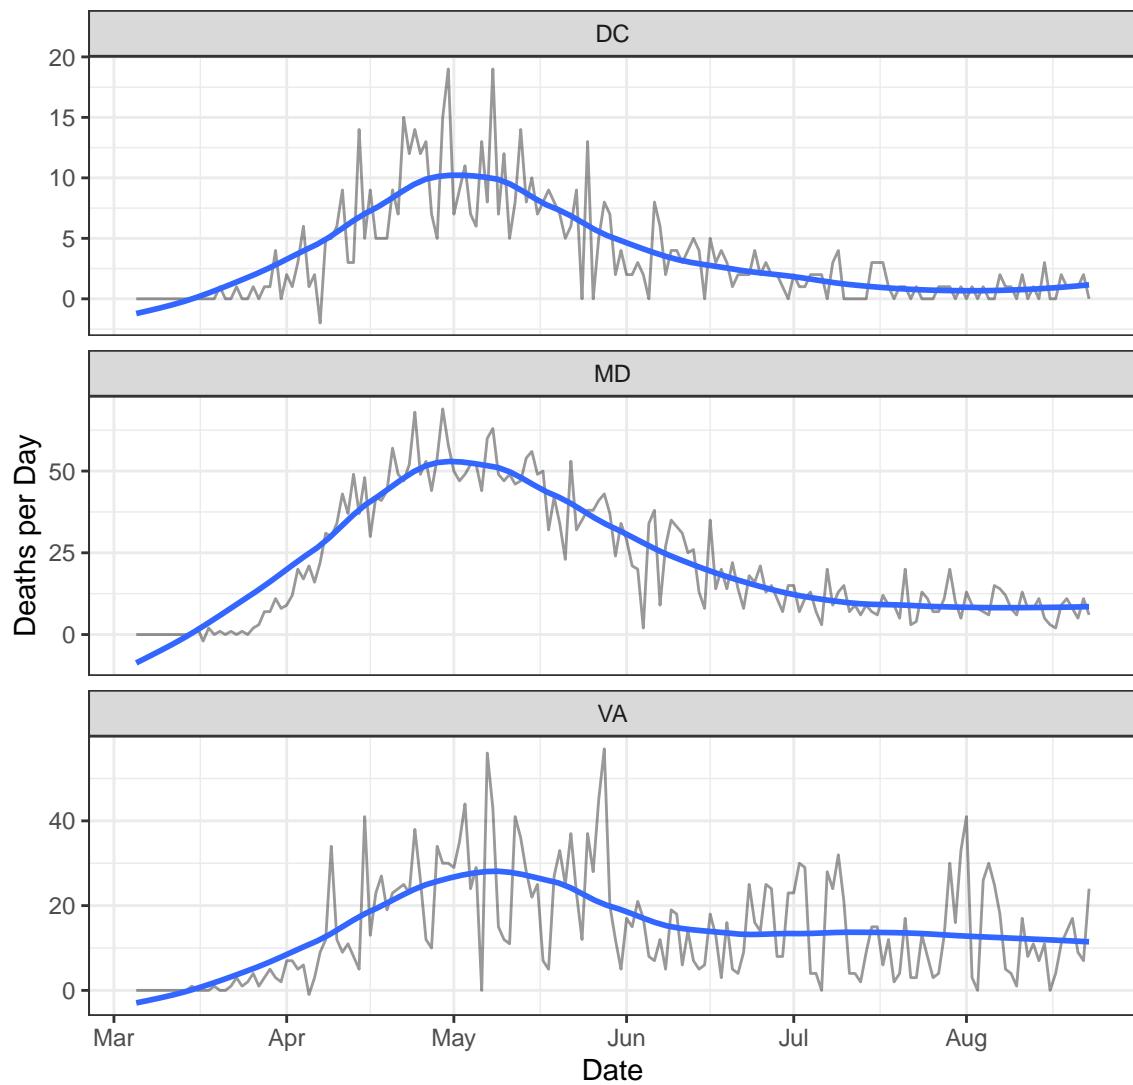

Table 3: Latest Local Data

State	Cases	Deaths	New Cases	New Deaths
DC	13,590	604	56	0
MD	104,102	3,691	579	6
VA	112,966	2,467	894	24
