

Erik's Covid-19 Chart Pack

Data updated 2020-08-18 19:28:39. World data are from Worldometers. National and state-level mortality, case, and testing data are from Johns-Hopkins University. County and city-level mortality and case data are from the New York Times. Most data presented in this report were accessed through APIs provided by The COVID Tracking Project and NovelCOVID API.

World Data

There have been 22,043,508 confirmed Covid-19 cases and 777,203 deaths worldwide.

Deaths

Cases

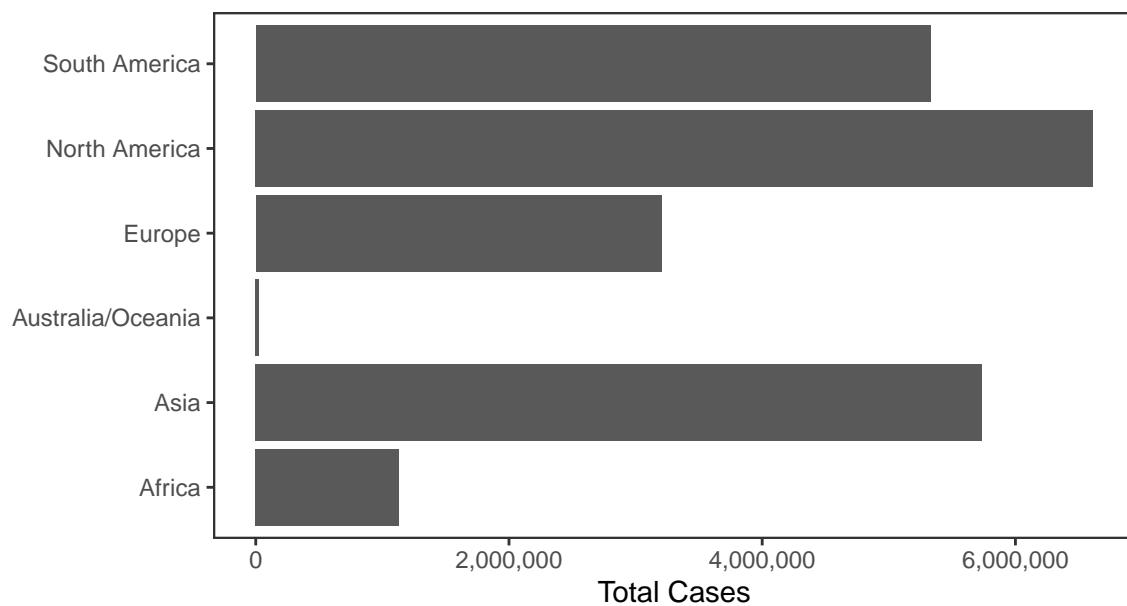

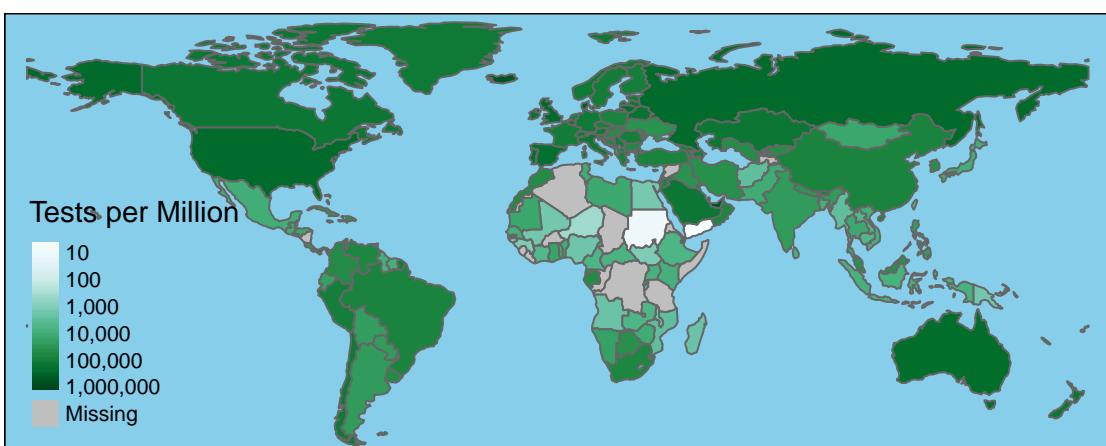

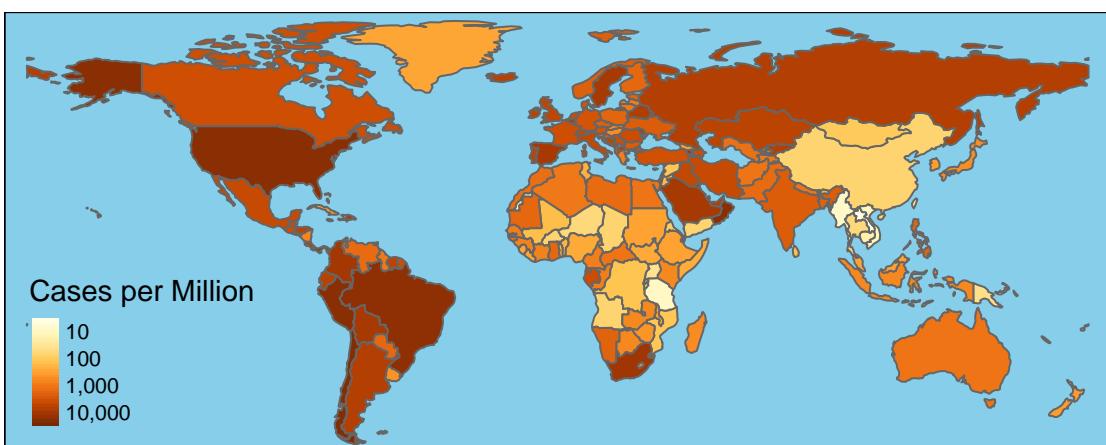

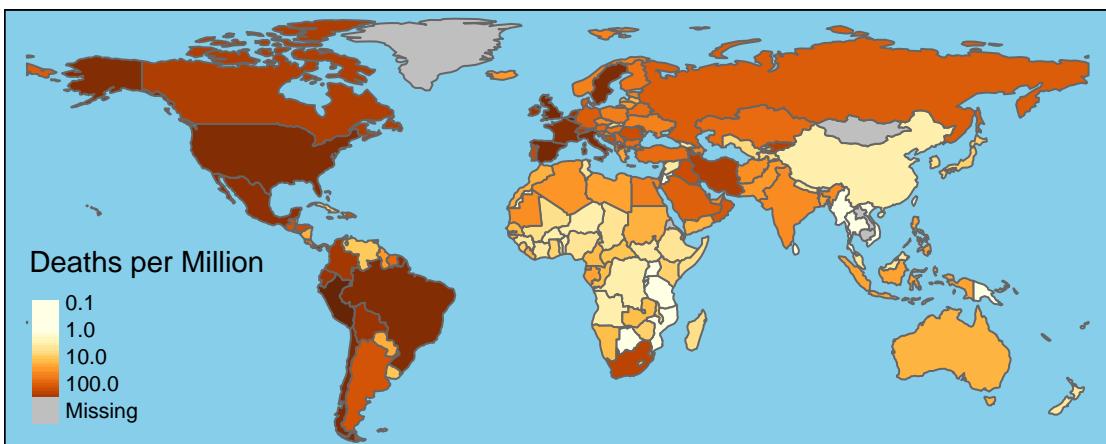

Table 1: Top Countries by Total Cases

Country	Cases	Deaths	New Cases	New Deaths
USA	5,611,975	173,716	40,560	589
Brazil	3,363,235	108,654	23,038	775
India	2,701,604	51,925	54,288	880
Russia	927,745	15,740	4,892	55
South Africa	589,886	11,982	2,541	143
Peru	541,493	26,481	5,547	200
Mexico	522,162	56,757	4,448	214
Colombia	476,660	15,372	8,328	275
Chile	387,502	10,513	1,556	61
Spain	382,142	28,646	1,833	2
Iran	345,450	19,804	2,247	165
UK	319,197	41,369	713	3
Saudi Arabia	299,914	3,436	1,372	28
Argentina	299,126	5,814	4,557	111
Pakistan	289,215	6,175	498	7
Bangladesh	279,144	3,694	2,595	37
Italy	254,235	35,400	320	4
Turkey	250,542	5,996	1,233	22
Germany	226,686	9,296	1,689	6
France	219,029	30,434	493	24

National Data

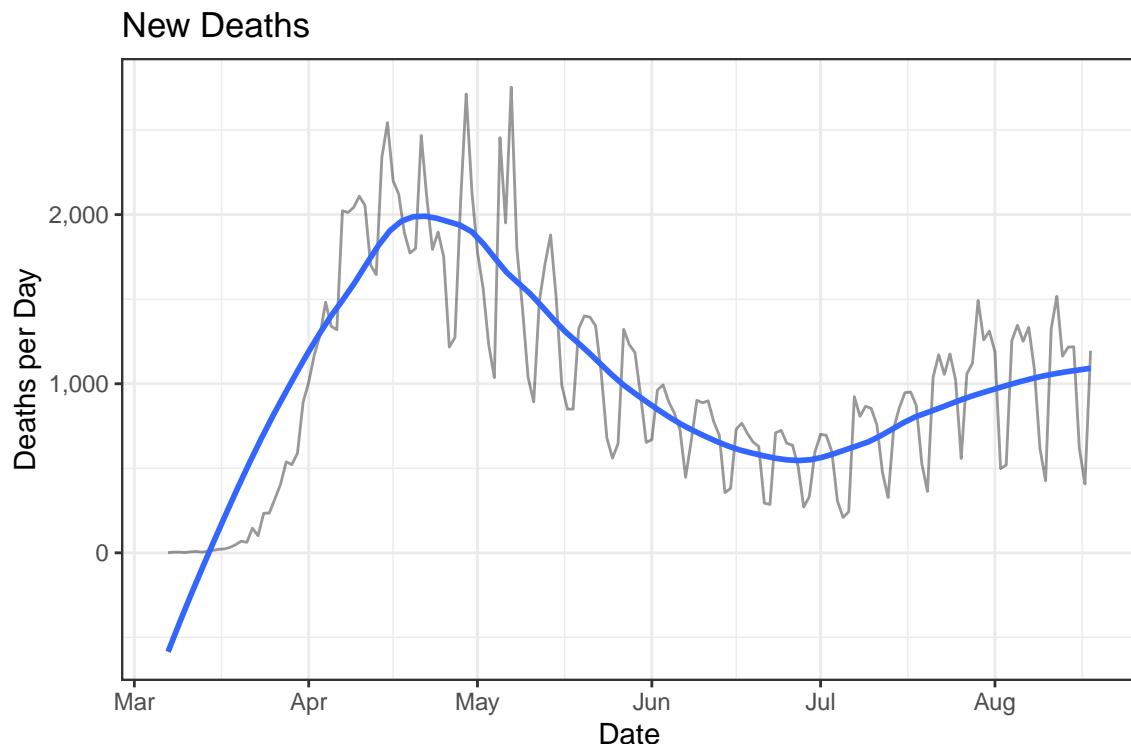

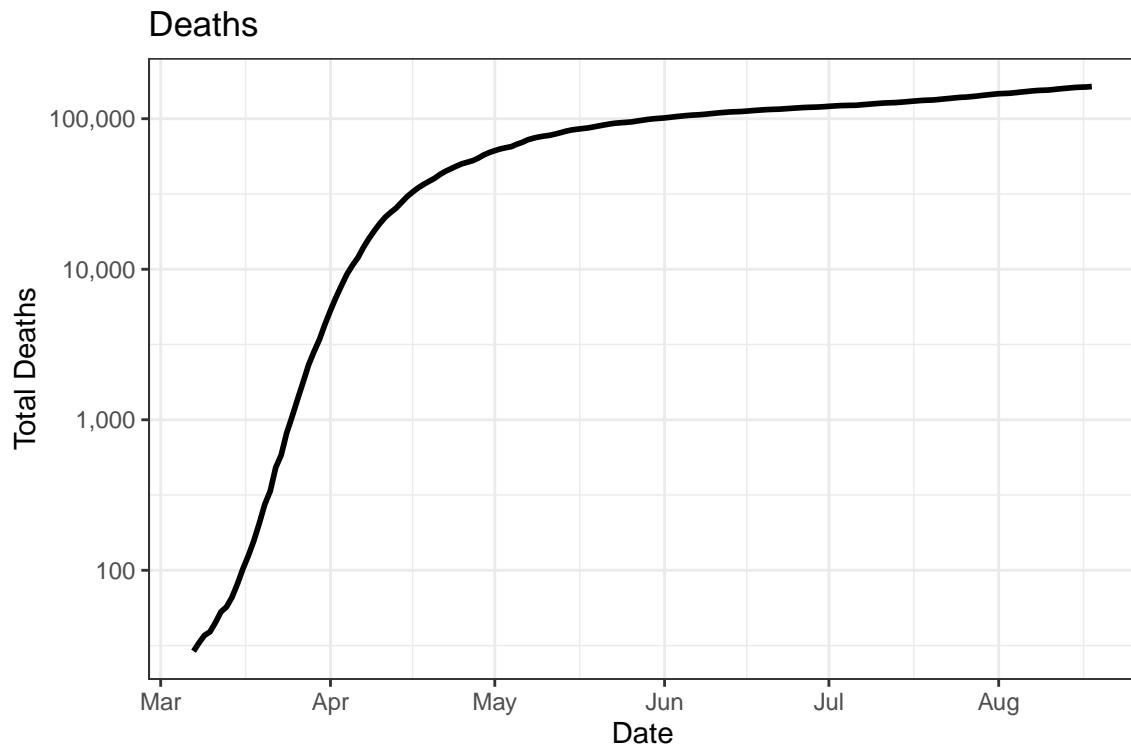

There have been 5,457,824 confirmed Covid-19 cases and 163,595 deaths in the United States.

Table 2: U.S. Deaths and Cases over the Last Two Weeks

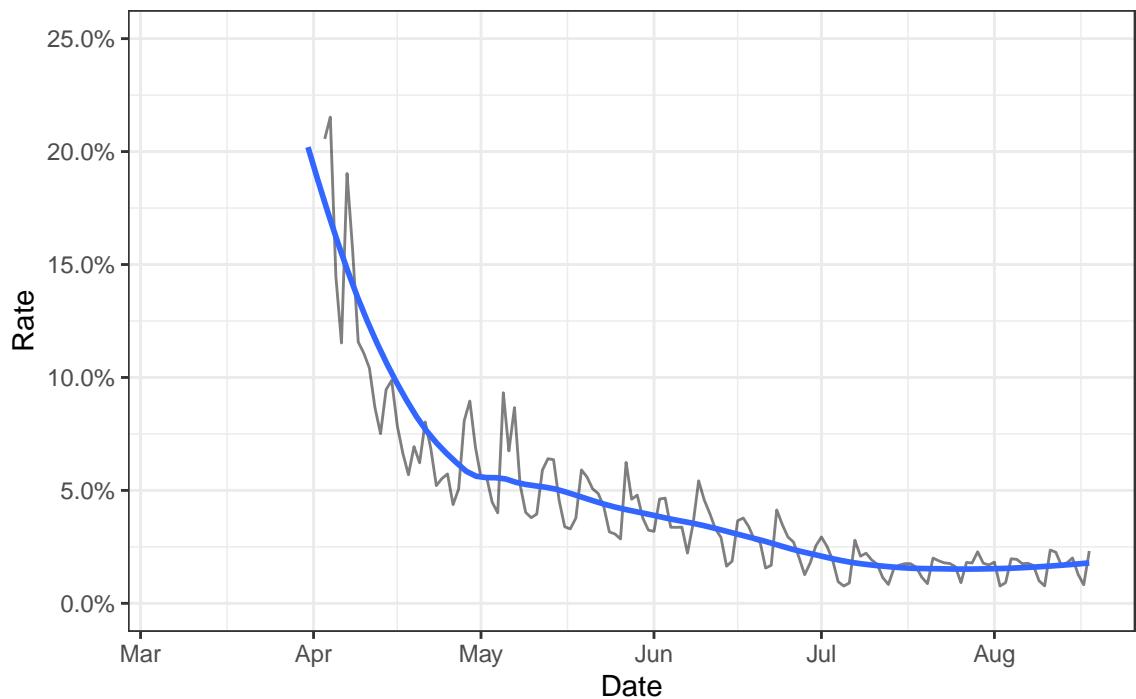

Date	Cases	Deaths	New Cases	New Deaths
2020-08-18	5,457,824	163,595	40,458	1,195
2020-08-17	5,417,366	162,400	37,817	407
2020-08-16	5,379,549	161,993	43,083	619
2020-08-15	5,336,466	161,374	56,603	1,219
2020-08-14	5,279,863	160,155	55,649	1,216
2020-08-13	5,224,214	158,939	51,705	1,163
2020-08-12	5,172,509	157,776	56,035	1,517
2020-08-11	5,116,474	156,259	55,594	1,326
2020-08-10	5,060,880	154,933	41,807	426
2020-08-09	5,019,073	154,507	51,319	616
2020-08-08	4,967,754	153,891	54,091	1,089
2020-08-07	4,913,663	152,802	61,520	1,333
2020-08-06	4,852,143	151,469	54,184	1,251
2020-08-05	4,797,959	150,218	52,265	1,346

Deaths

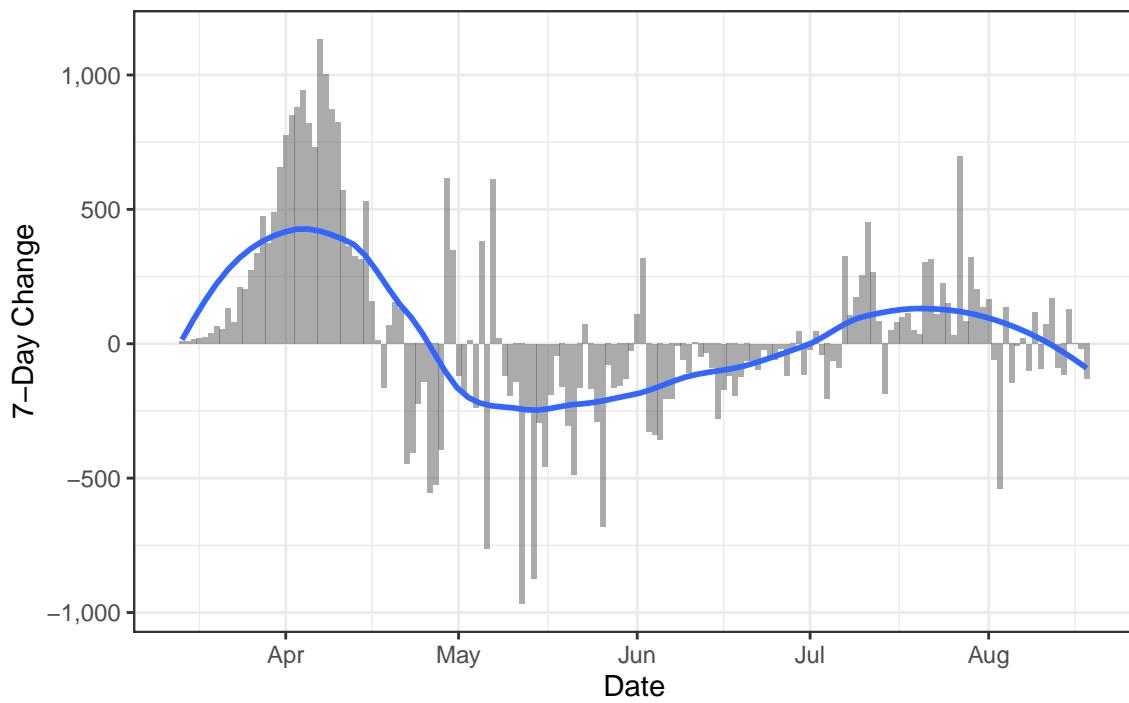

Because the effects of the virus can take several weeks to manifest in patients, deaths are a lagging indicator of contagion, but they may be a more reliable than case counts, which are a function of both the prevalence of the disease and the rate of testing. The case mortality rate is a very crude indicator of lethality because a large numbers of non-lethal cases are likely never detected. A declining case mortality rate is indicative of more widespread testing.

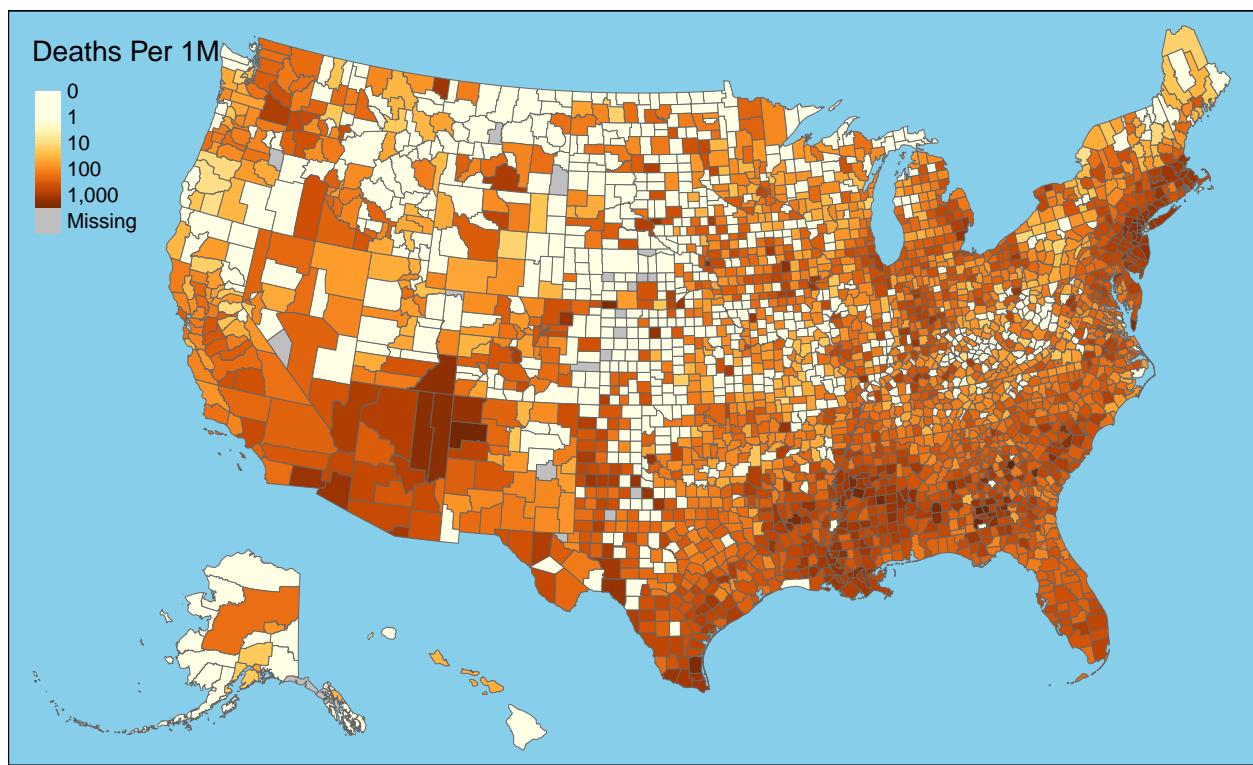

Daily Case Mortality Rate

One-Week Change in Daily Deaths

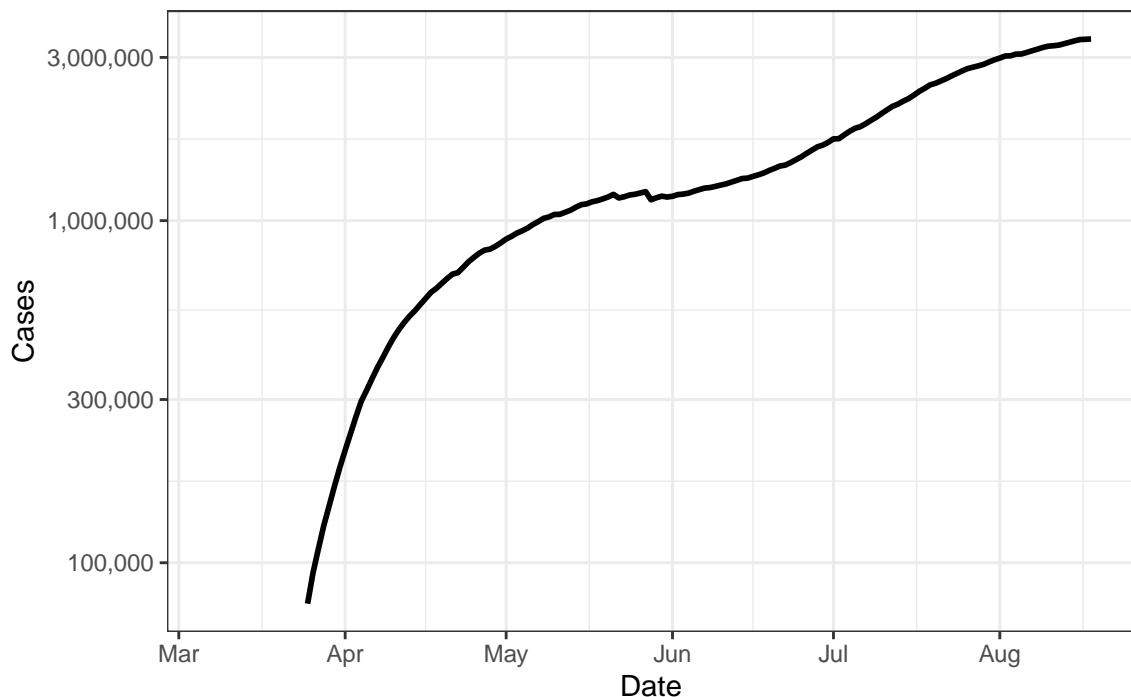

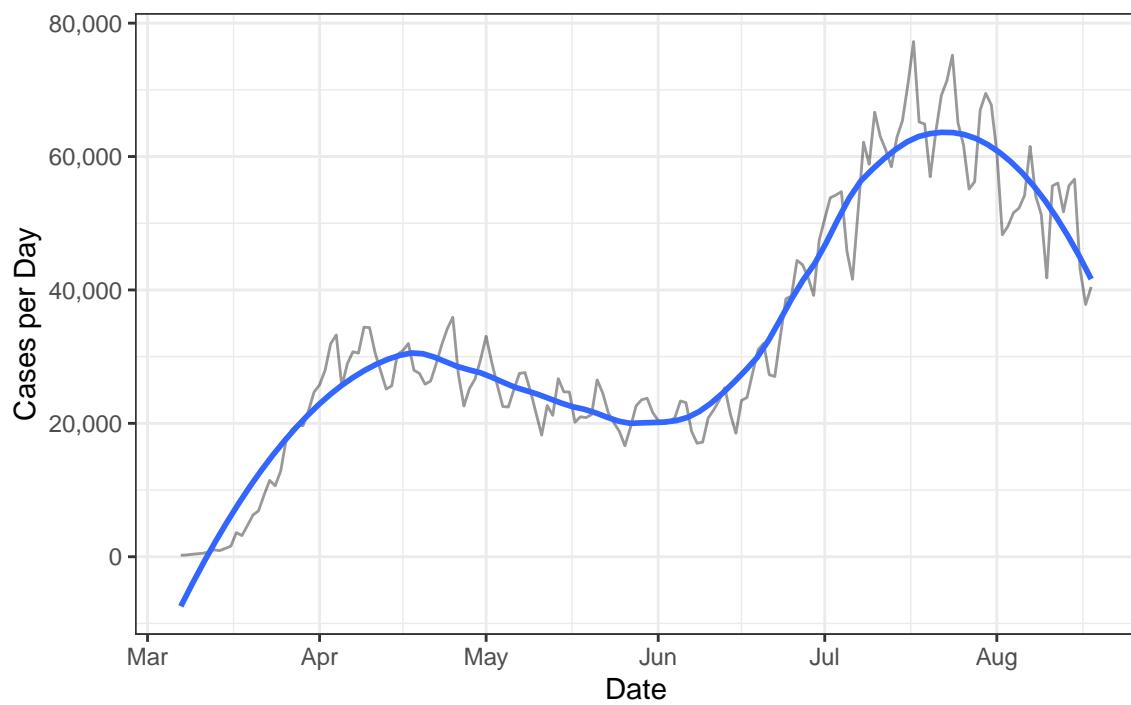

Cases

Reported cases are a function of both the spread of the disease and the prevalence of testing.

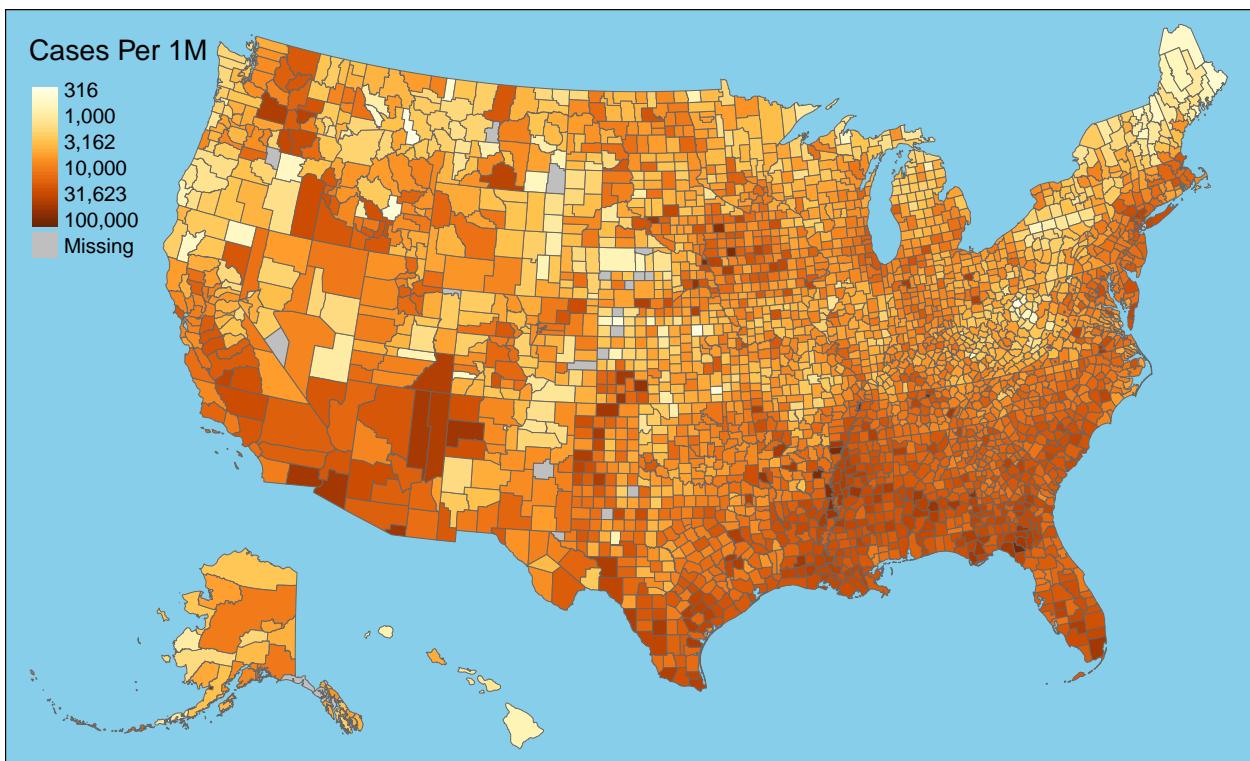

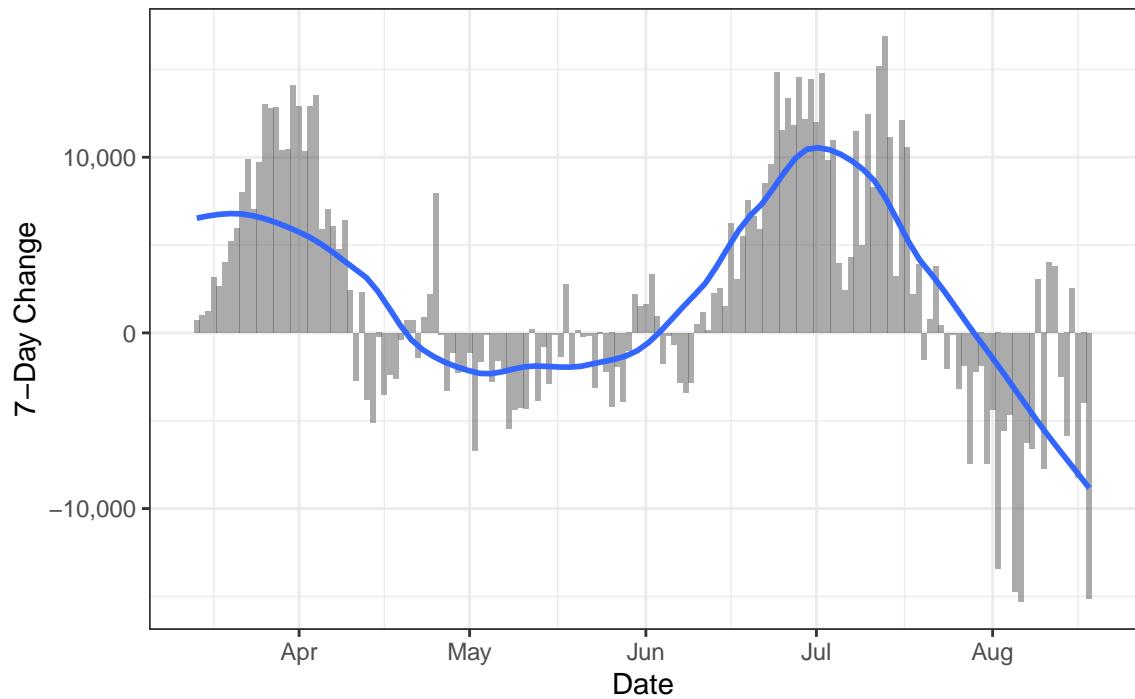

Active Cases

New Cases

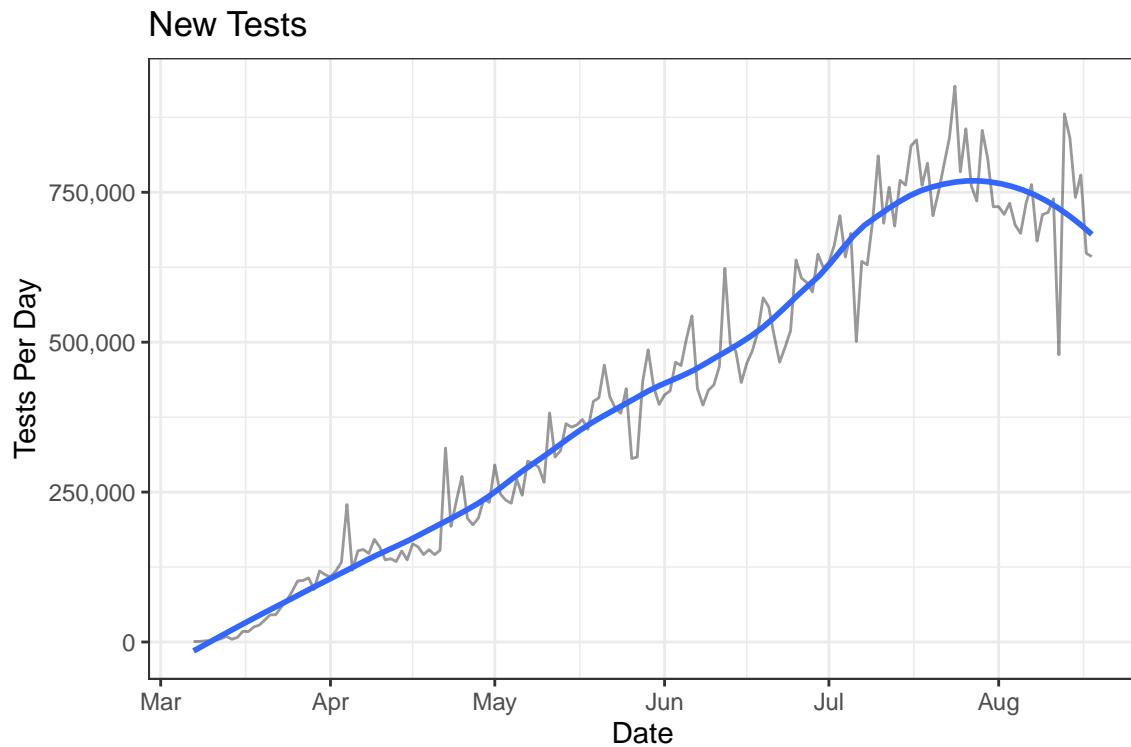

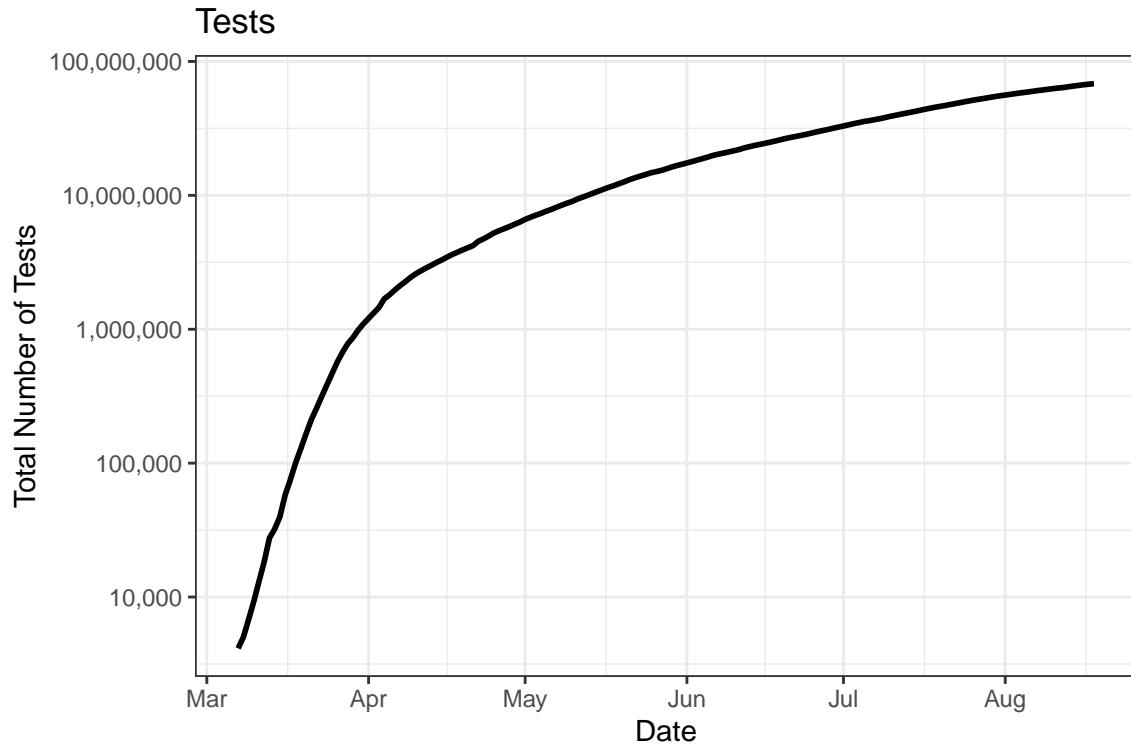

One-Week Change in Daily Cases

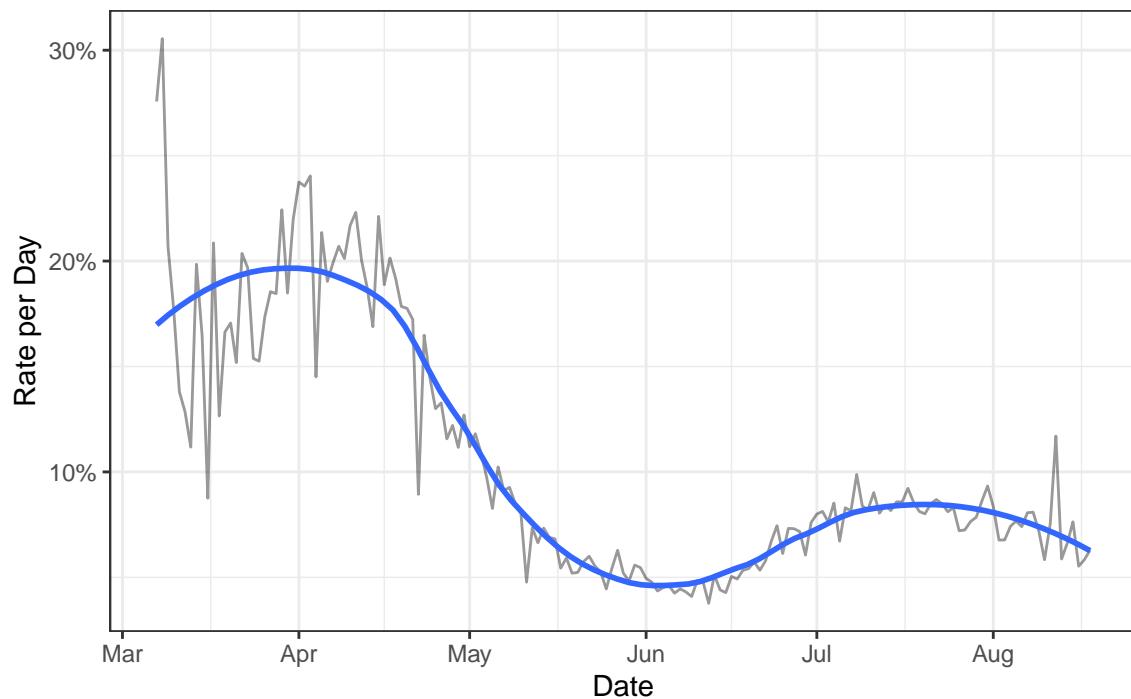

Testing

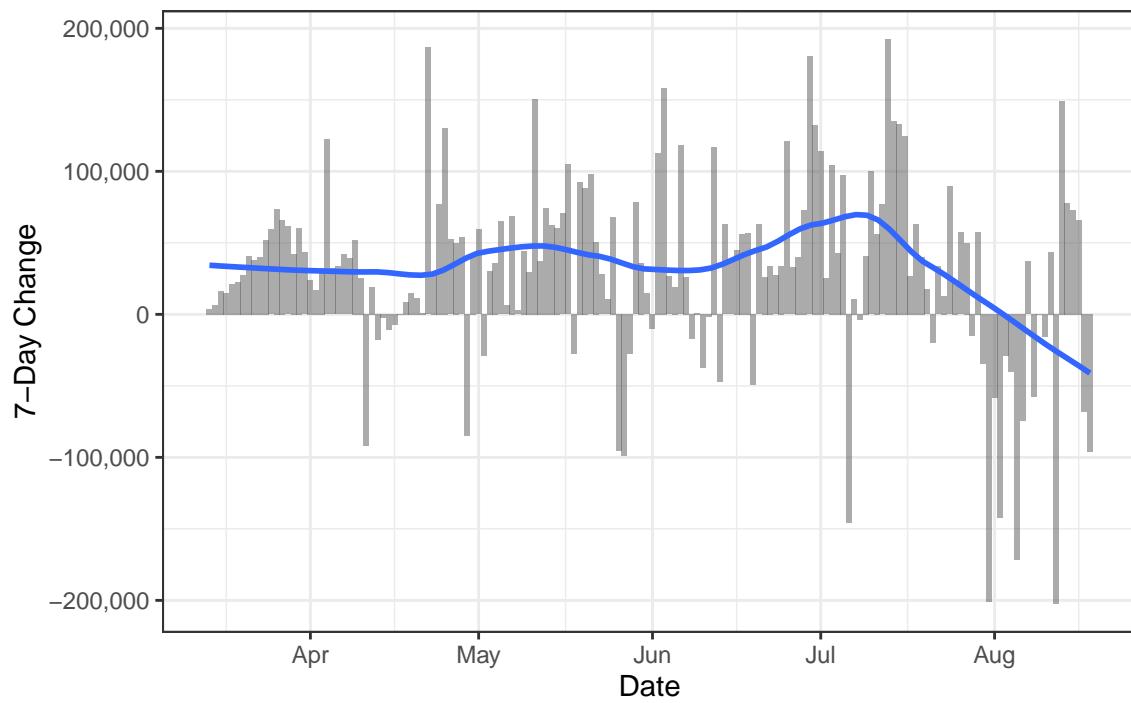

Widespread testing is necessary for managing the spread of the disease. The following charts show how testing in the United States has changed over time. When the supply of available tests is limited, they are typically only used for patients whose symptoms suggest they are likely to have contracted the virus. A high positive test rate indicates that testing capacity is constrained.

Positive Test Rate

One-Week Change in Daily Tests

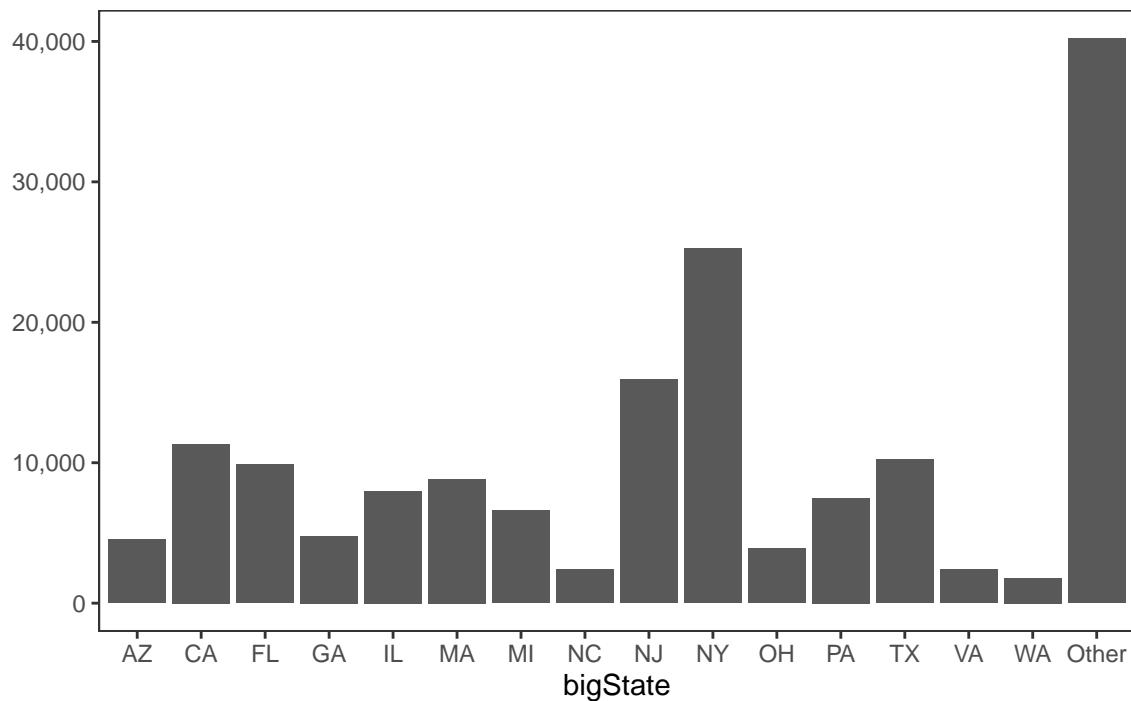

State Data

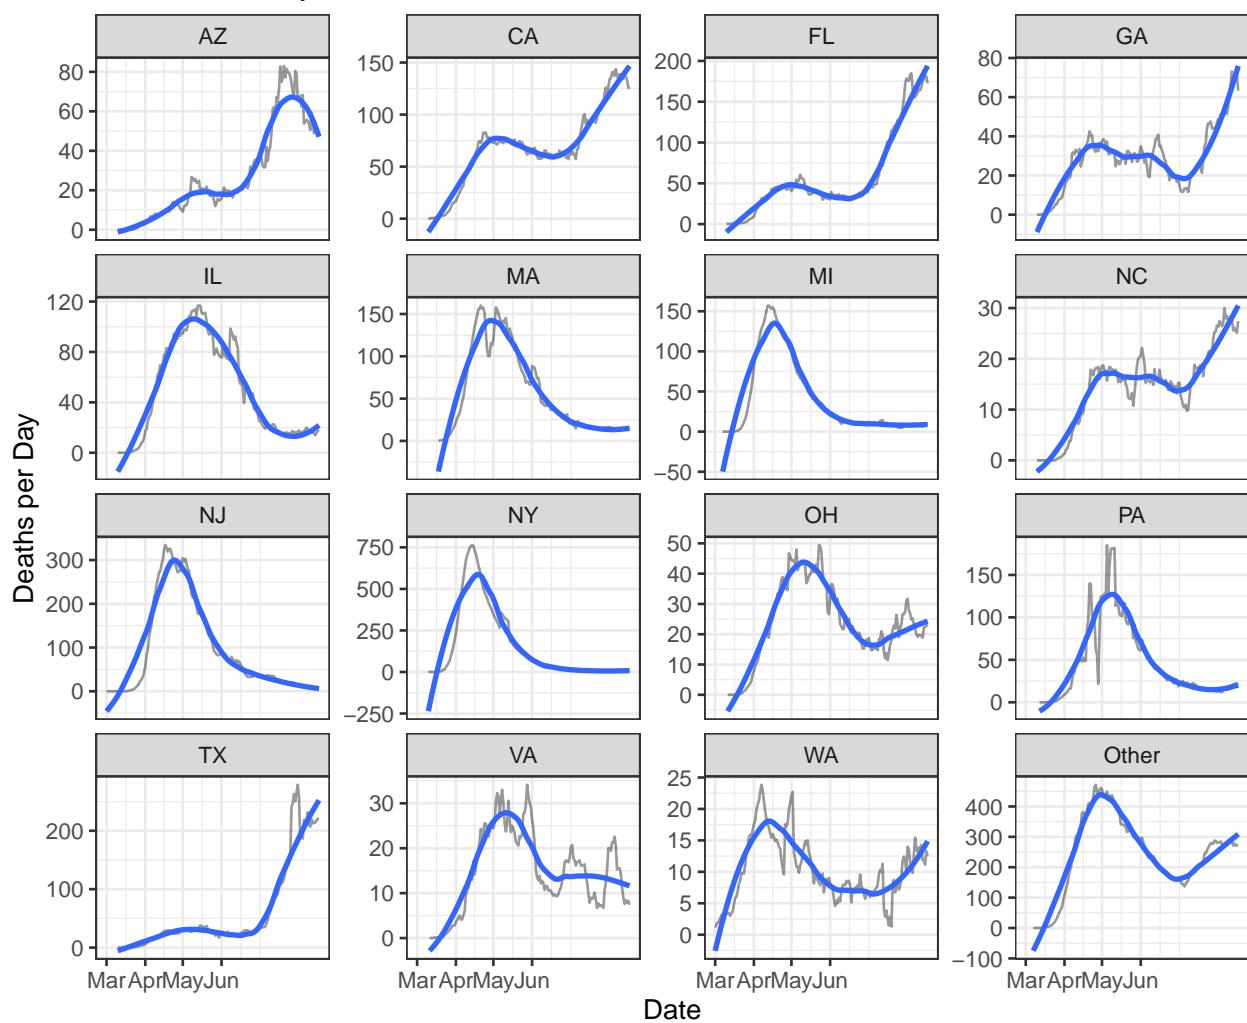

This section summarizes state-level data. Most data are reported for the largest 15 states by population, which account for NaN percent of the total U.S. population.

Deaths

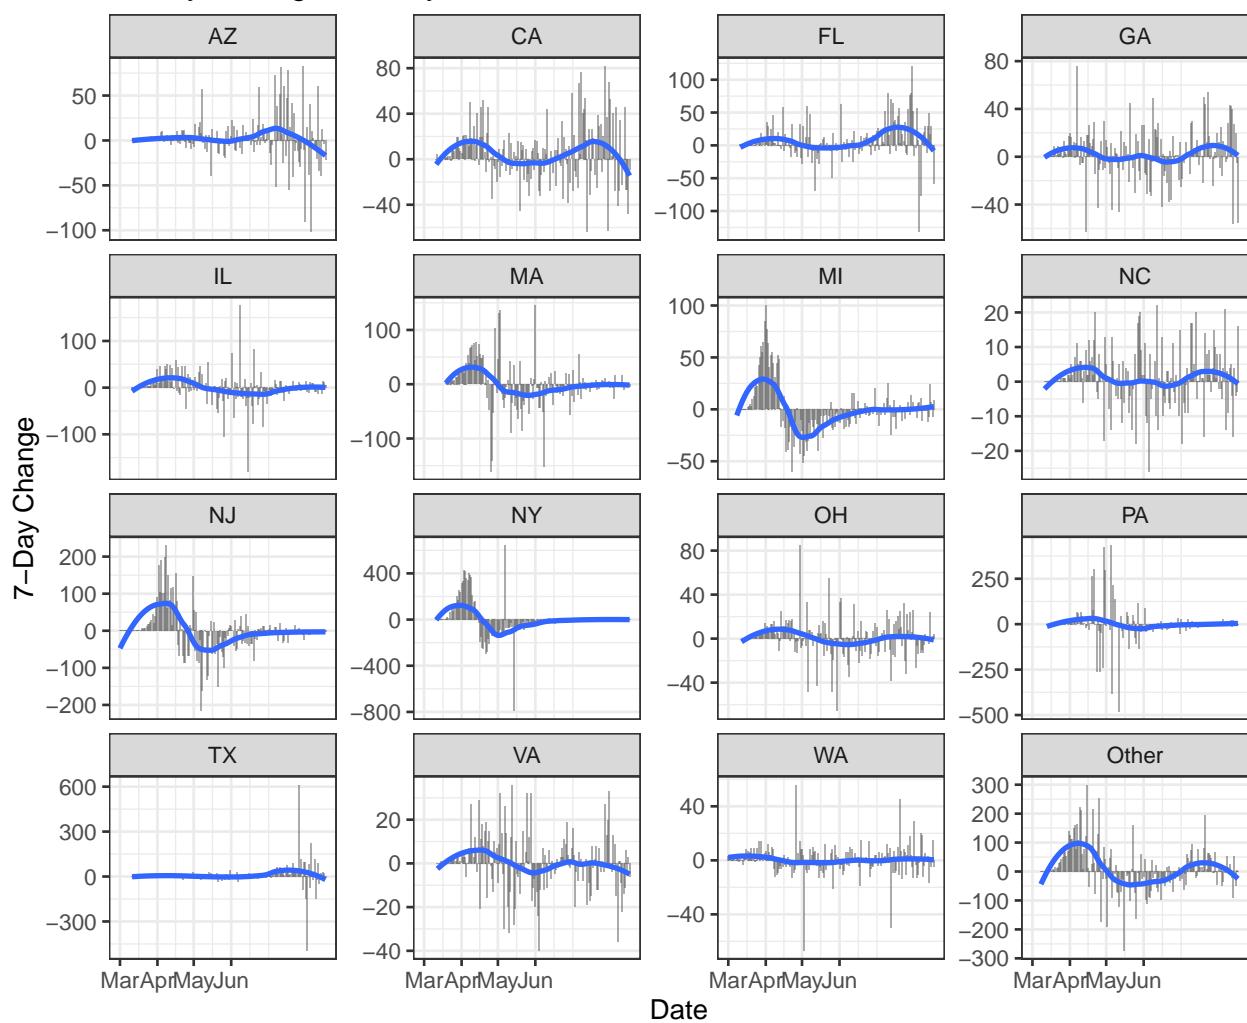

Deaths by State

New Cases by State

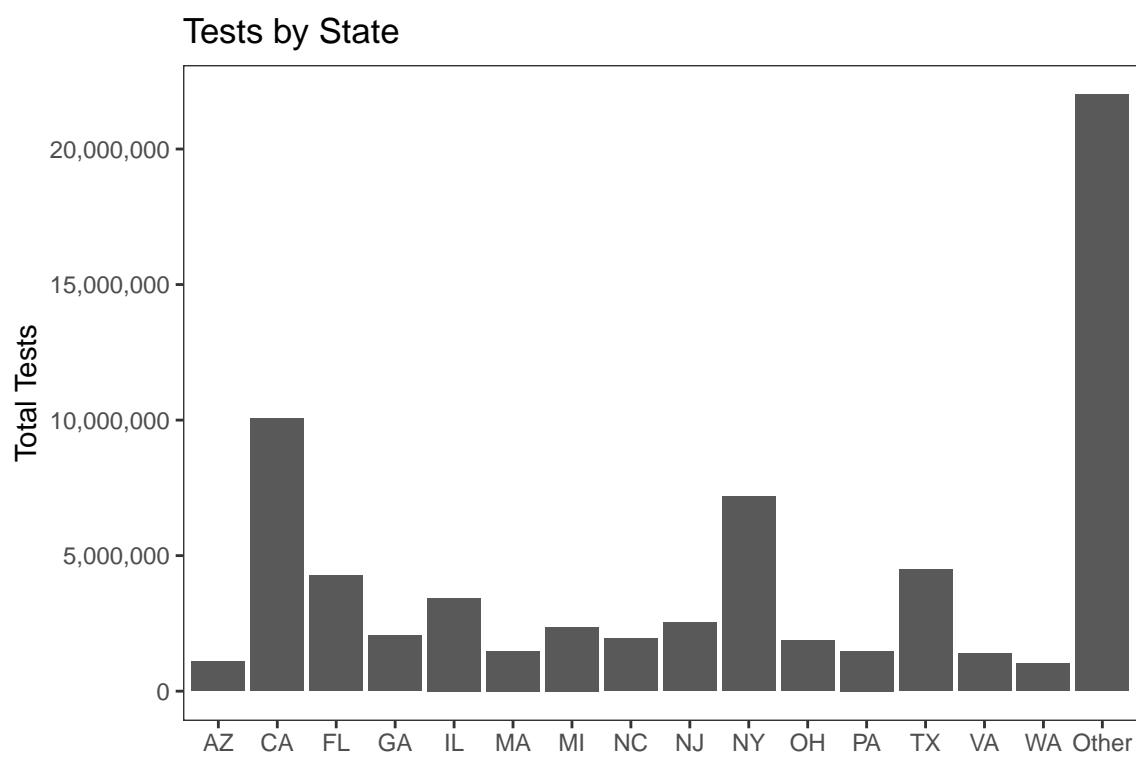

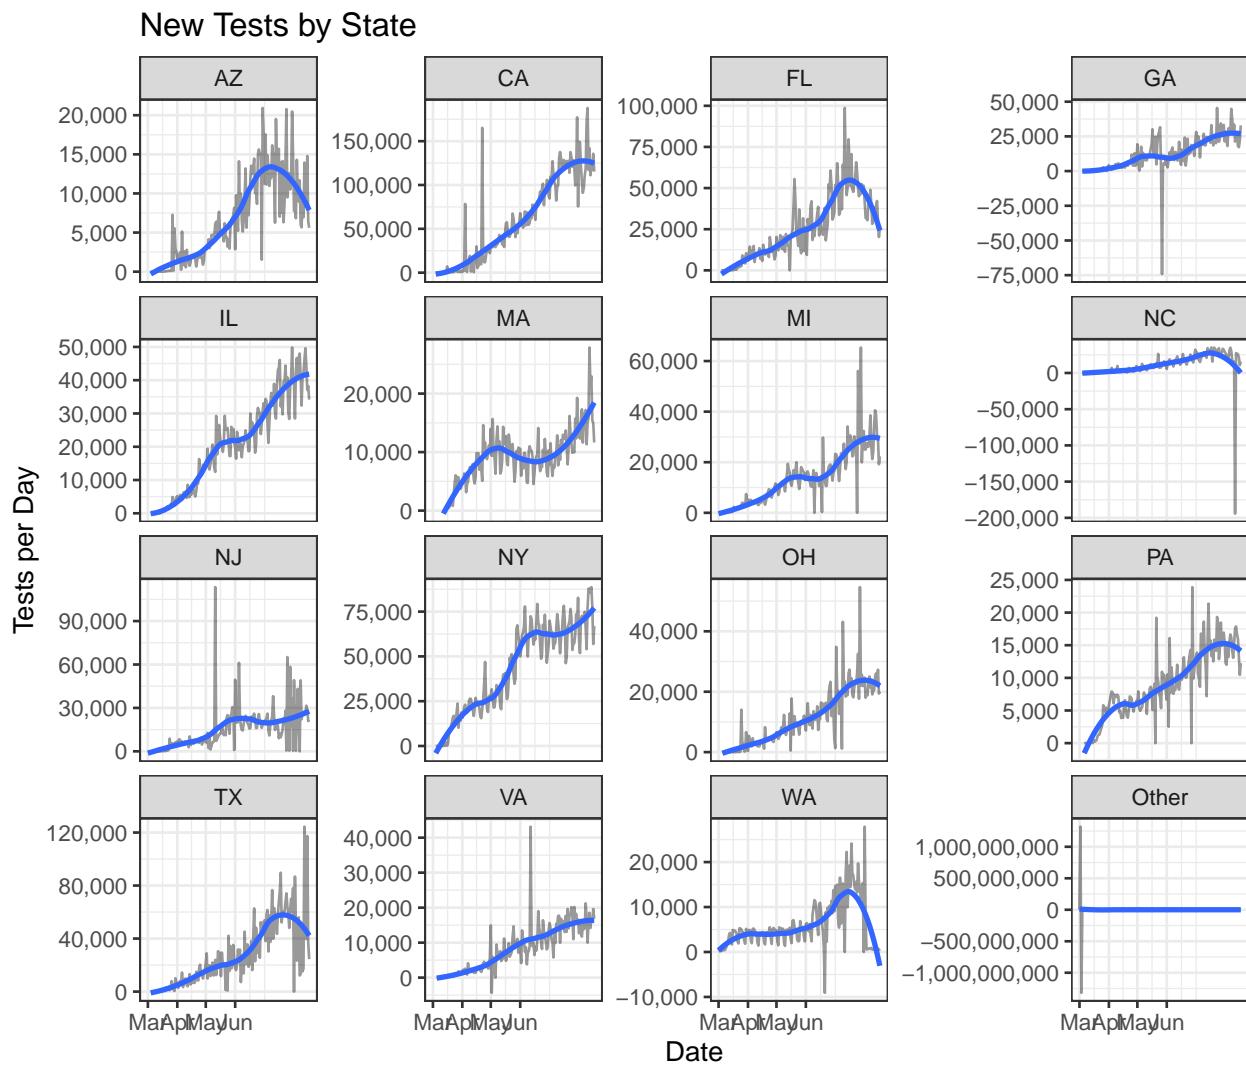

7-Day Change in Daily Cases

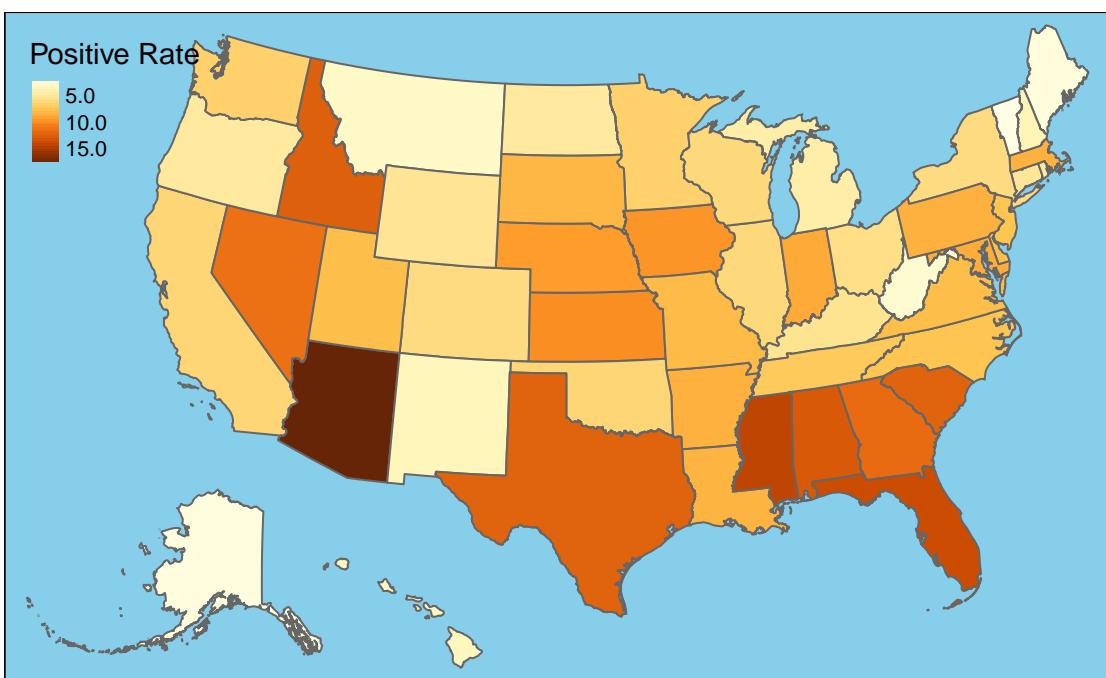

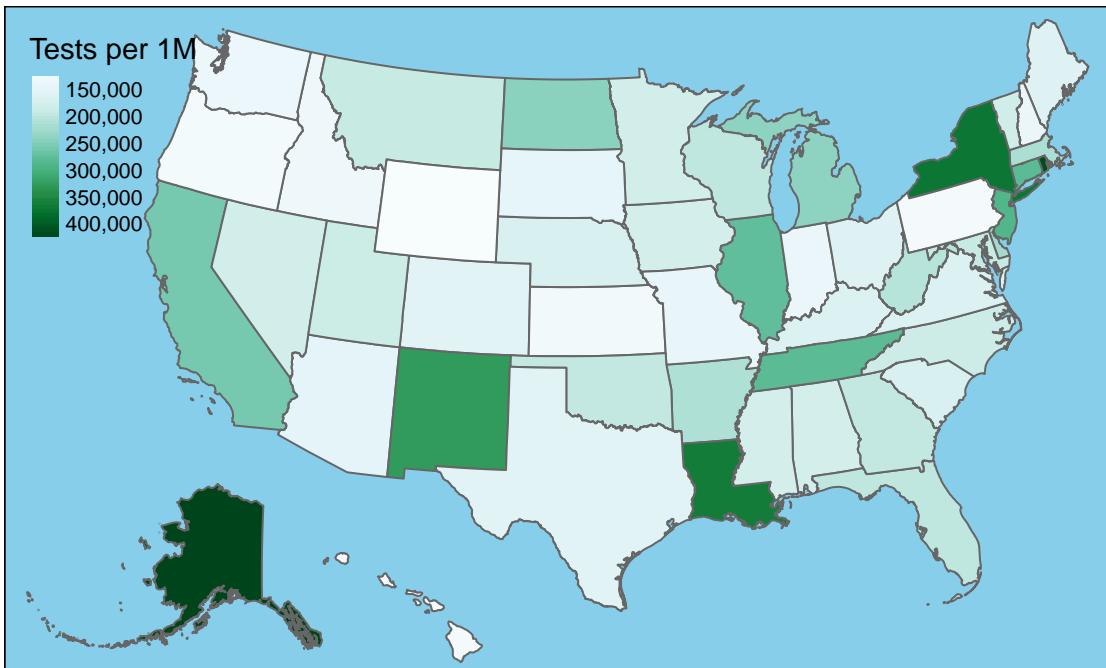

Testing

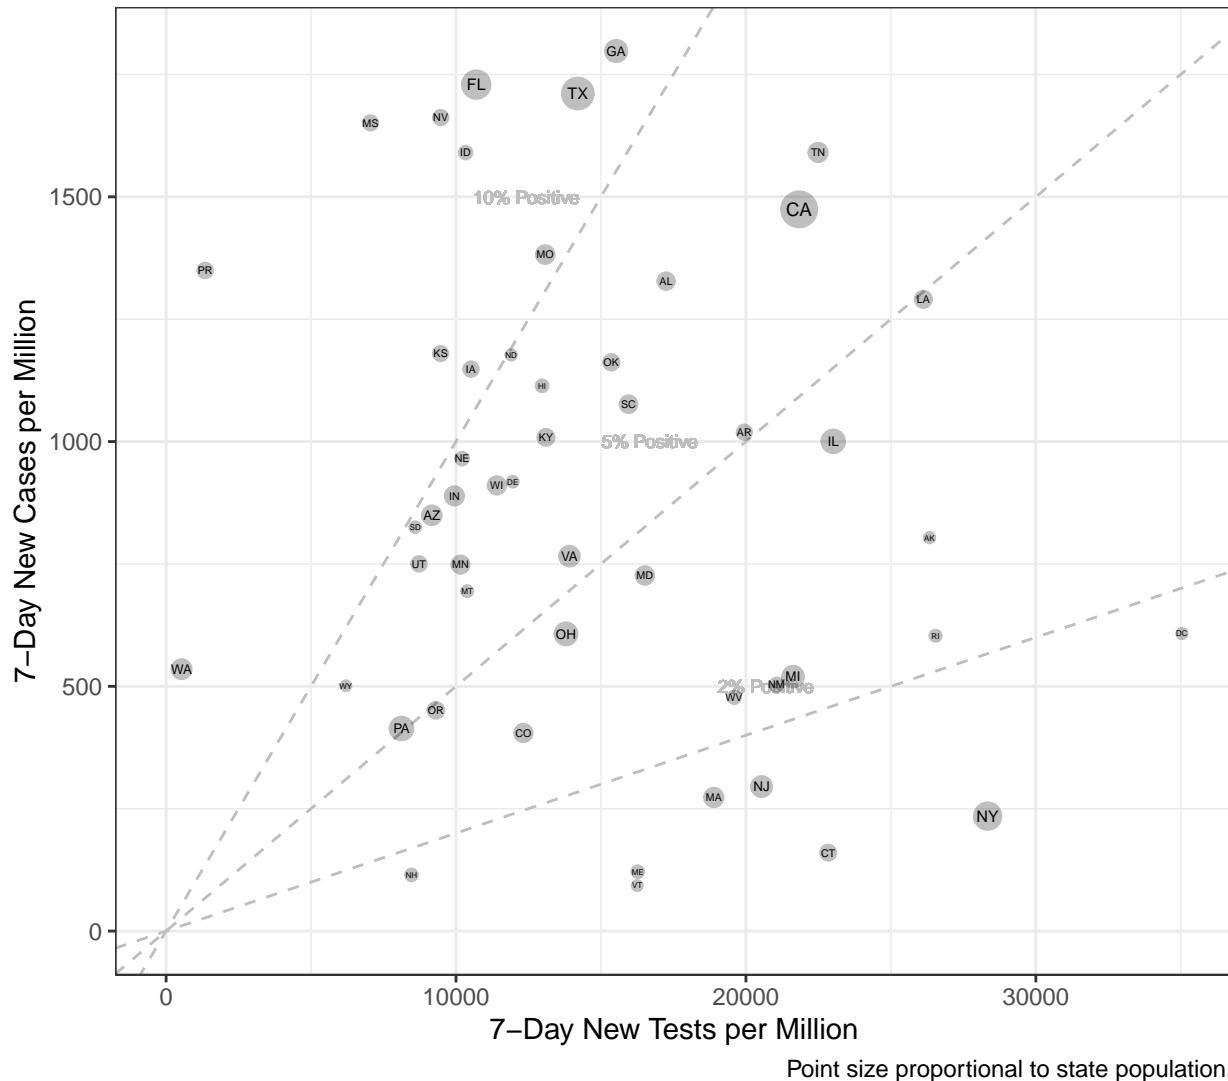

Interpretation of differences in case rates across states is complicated by the fact that those states that do more thorough testing will invariably uncover more cases. A lower positive test rate is an indication that a state is doing more comprehensive testing since, when testing is rationed, only those individuals who are more likely to test positive are typically tested. The following chart compares the one-week increase in detected cases to the number of tests administered by each state relative to population. The states of greatest current concern are those with both a large increase in detected cases and a relatively small increase in tests. These states lie in the upper-left of the chart.

Tests vs. Cases by State

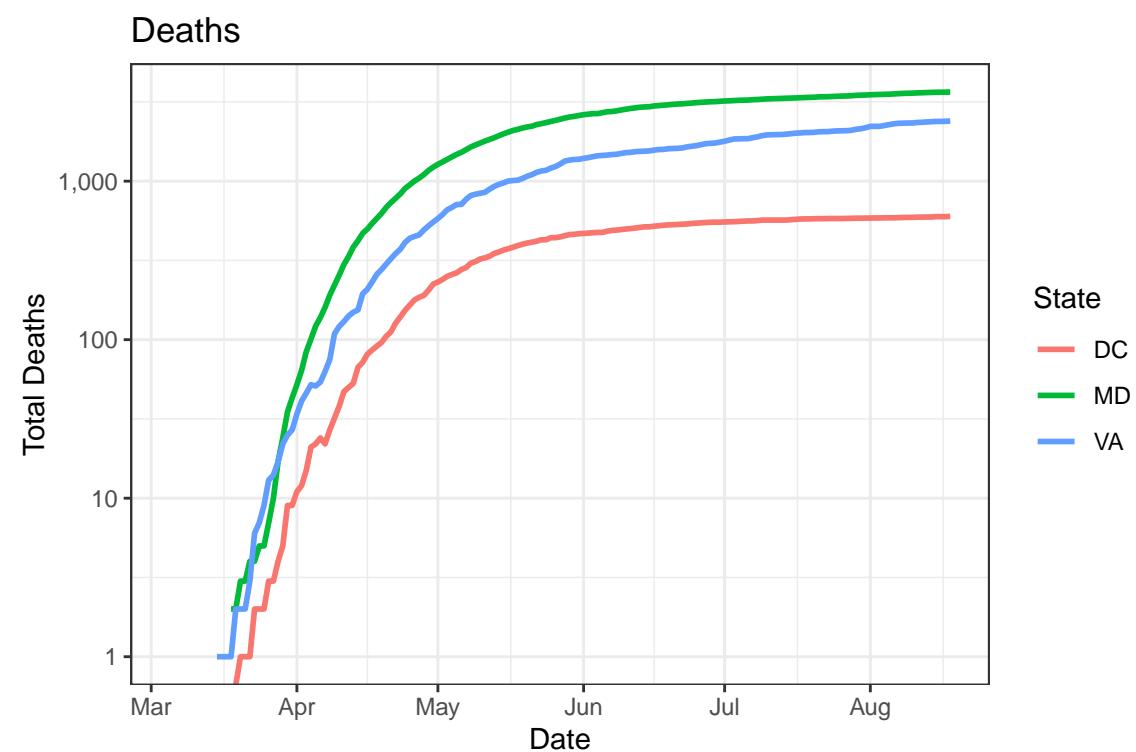

Local Data

The following charts and tables present mortality, case, and testing data for the Washington DC metropolitan area and adjacent states.

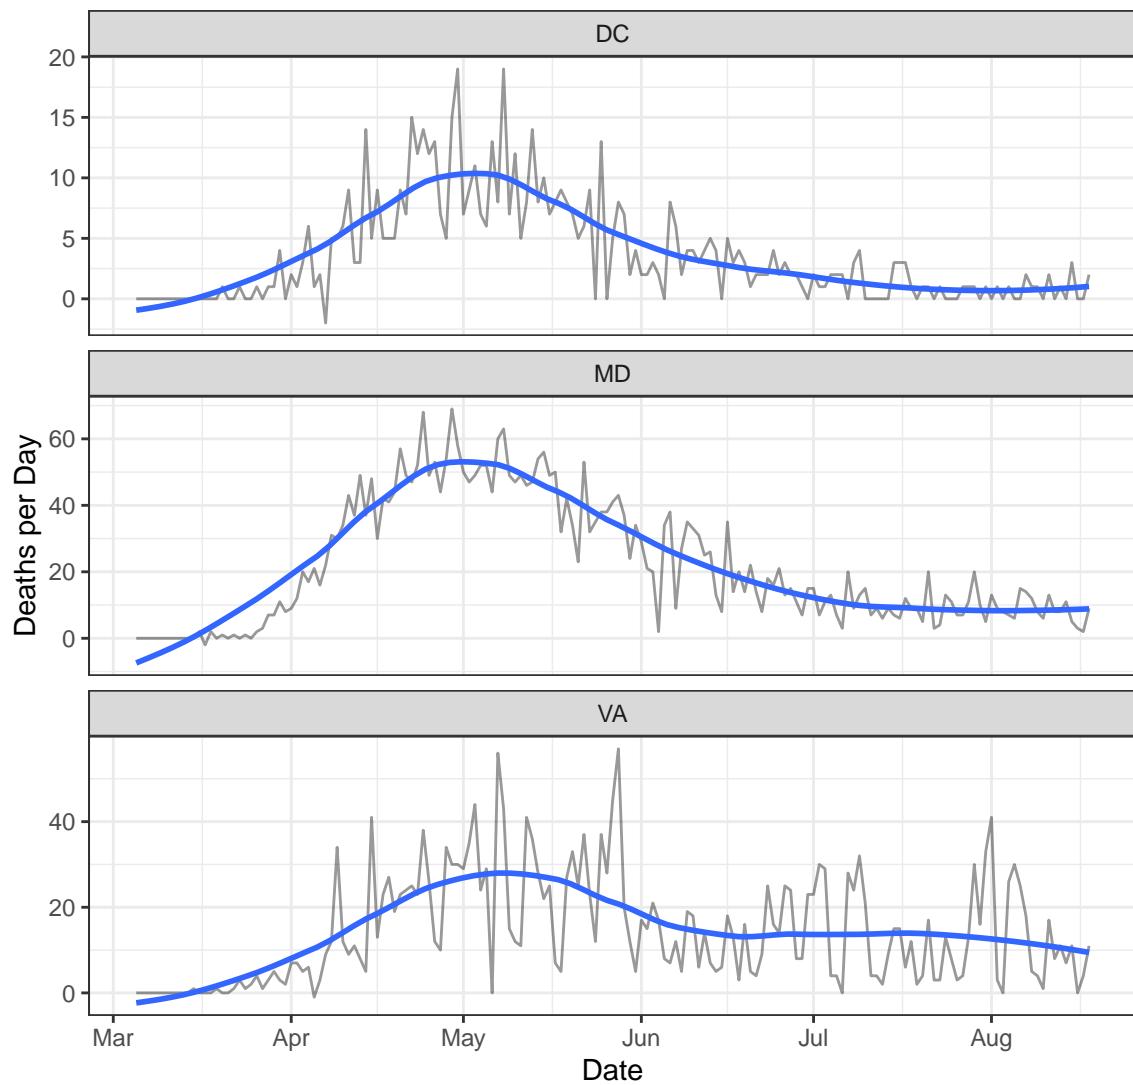

Table 3: Latest Local Data

State	Cases	Deaths	New Cases	New Deaths
DC	13,325	599	52	2
MD	101,235	3,650	520	9
VA	108,282	2,396	861	11
